The United States, under the auspices of the Customs Cooperation Council, has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule ("HTS"), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s).

Imports covered by this review are shipments of Indian industrial fasteners. Through 1988, such merchandise was classified under item numbers 646.4920, 646.4940, 646.5800, 646.6020, 646.6040, 646.6320, and 646.6340 of the Tariff Schedules of the United States Annotated. This merchandise is currently classifiable under HTS item numbers 7318.11.00, 7318.12.00, 7318.14.10, 7318.14.50, 7318.15.20, 7318.15.40, 7318.15.60, and 7318.15.80. The written descriptioin remains dispositive.

Determination to Revoke

The Department may revoke an order if the Secretary of Commerce concludes that an order is no longer of interest to interested parties. We received no objections to our intent to revoke the countervailing duty order on certain fasteners from India and have not received a request to conduct an administrative review of the order for the past five consecutive annual anniversary months.

Based on the absence of both objections to the revocation of this order and requests for administrative reviews by interested parties, the Department has concluded that the order is no longer of interest to interested parties. Therefore, we are revoking the countervailing duty order on certain fasteners from India in accordance with § 355.25(d)(4) of the Department's regulations. The effective date of this revocation is January 1, 1989.

Further, as required by § 355.25(d)(5) of the Department's regulations, the Department is terminating the suspension of liquidation and will instruct the Customs Service to liquidate, without regard to countervailing duties, all unliquidated entries of this merchandise exported from India on or after January 1, 1989.

This notice is in accordance with § 355.25(d)(3)(vii) and 355.25(d)(5) of the Department's regulations.

Dated: August 28, 1989.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

Final Negative Countervailing Duty Determination; Certain Steel Wire Nails From Malaysia

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We determine that no benefits which constitute bounties or grants within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Malaysia of certain steel wire nails ("the subject merchandise"), as described in the Scope of Investigation section of this notice.

EFFECTIVE DATE: September 5, 1989.

FOR FURTHER INFORMATION CONTACT: Vincent Kane or Carole Showers, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377-2815 or 377-3217.

SUPPLEMENTARY INFORMATION:

Final Determination

Based on our investigation, we determine that no benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in Malaysia of the subject merchandise.

Case History

Since publication of the Preliminary Negative Countervailing Duty Determination: Certain Steel Wire Nails from Malaysia (54 FR 26229, June 22, 1989), the following events have occurred. From July 17 to July 21, 1989, we conducted verification in Malaysia of the questionnaire responses of the Government of Malaysia and South Engineers Sdn. Bhd. (South Engineers). On August 11, 1989, we received a case brief filed on behalf of respondents.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted to the Harmonized Tariff Schedule (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS sub-headings. The HTS sub-headings are provided for convenience and Customs purposes. The written description remains dispositive.

The products covered by this investigation are certain steel wire nails from Malaysia. These nails are: steel wire nails of one-piece construction as currently provided for in HTS items 7317.00.5505, 7317.00.5510, 7317.00.5520, 7317.00.5530, 7317.00.5540, 7317.00.5550, 7317.00.5560, 7317.00.5570, 7317.00.5580, 7317.00.5590, and 7317.00.6560; steel wire nails of two-piece construction, as currently provided for in HTS item 7317.00.7500; and steel wire nails with lead heads, as currently provided for in HTS item 7317.00.7500.

Analysis of Programs

For purposes of this final determination, the period for which we are measuring bounties or grants ("the review period") is calendar year 1988, which corresponds to the fiscal year of the respondent company. Based upon our analysis of the petition, the responses to our questionnaires, verification, and respondents' case brief, we determine the following:

I. Programs Determined Not To Be Used

We determine that manufacturers, producers, or exporters in Malaysia of the subject merchandise did not receive benefits during the review period for exports of the subject merchandise to the United States under the programs listed below. With the exception of the Double Deduction of Insurance Premiums for Importers, these programs were described in the preliminary determination in this investigation:

A. Export Tax Incentives

1. Abatement of Taxable Income Based on the Ratio of Export Sales to Total Sales and an Abatement of Five Percent of the Value of Indigenous Materials Used in Exports
2. Allowance of a Percentage of Net Taxable Income Based on the F.O.B. Value of Export Sales
3. Allowance of Taxable Income of Five Percent of the F.O.B. Value of Export Sales for Trading Companies Exporting Malaysian-Made Products
4. Double Deduction for Export Credit Insurance Payments
5. Double Deduction for Export Promotion Expenses
6. Industrial Building Allowance

B. Other Export Incentives

1. Export Credit Refinancing
2. Export Insurance Program

C. Other Tax Incentives

1. Pioneer Status Under the Investment Incentives Act of 1968
2. Pioneer Status Under the Promotion of Investments Act of 1986
3. Investment Tax Allowance
4. Double Deduction for Operational Expenses
5. Abatement of Five Percent of Adjusted Income

D. Medium- and Long-Term Government Financing

Medium- and long-term financing provided by the following institutions:

- the Industrial Bank of Malaysia (formerly the Industrial Development Bank of Malaysia)
- the Development Bank of Malaysia
- the Borneo Development Corporation
- the Sabah Development Bank

E. Double Deduction of Insurance Premiums for Importers

Although not alleged by petitioner and not included in our notice of initiation or preliminary determination, we found during verification that South Engineers claimed a double deduction for insurance premiums on imports on its 1988 income tax return. The double deduction is authorized under the provisions of Income Tax (Deduction of Insurance Premiums for Importers) Rule 1962. The rule provides that the double deduction may be taken by importers only if insurance is purchased from a company incorporated in Malaysia.

In the case of South Engineers, we verified that the insurance premiums for which a double deduction was claimed were for imports of merchandise entirely unrelated to the manufacture or exportation of the subject merchandise. Therefore, we determine that, with respect to the subject merchandise, the double deduction of insurance premiums for importers was not used.

Verification

We verified the information used in making our final determination in accordance with section 776(b) of the Act. During verification we followed standard verification procedures including meeting with government and company officials, examining relevant documents and accounting records, tracing information in the responses to source documents, accounting ledgers and financial statements, and collecting additional information that we deemed necessary for making our final determination. Our verification results are outlined in detail in the public versions of the verification reports, which are on file in the Central Records Unit (Room B-099) of the Main Commerce Building.

This determination is published pursuant to section 705(d) of the Act (19 U.S.C. 1671d(d)).

Dated: August 23, 1989.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

Certain Textile Mill Products From Mexico; Final Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of final results of countervailing duty administrative review.

SUMMARY: On September 26, 1988, the Department of Commerce published the preliminary results of its administrative review of the countervailing duty order on certain textile mill products from Mexico. We have now completed that review and determine the total bounty or grant to be zero or *de minimis* for 25 compaines, 11.50 percent *ad valorem* for Fibras Sinteticas, 9.83 for Hilasal Mexicana, and 3.01 percent *ad valorem* for all other companies during the period January 1, 1986 through December 31, 1986.

EFFECTIVE DATE: September 5, 1989.

FOR FURTHER INFORMATION CONTACT: Jean Carroll Kemp or Ilene Hersher, Officer of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On September 26, 1988, the Department of Commerce ("the Department") published in the Federal Register (53 FR 37327) the preliminary results of its administrative review of the countervailing duty order on certain textile mill proudcts from Mexico. The Department has now completed that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of Review

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS number(s).

Imports covered by the review are the Tariff Schedules of the United States Annotated items listed in appendix A. Such merchandise is currently classifiable under the HTS items listed in appendix B. The review covers the period January 1, 1986 through December 31, 1986 and the following programs: (1) FOMEX; (2) FOGAIN; (3) FONEI; (4) CEPROFI; (5) State tax incentives; (6) National Industrial Development Fund ("FOMIN"); (7) NDP preferential discounts; (8) Trust Fund for the Study and Development of Industrial Parks ("FIDEIN"); (9) Bancomext loans; (10) Delay of payments on loans; (11) Delay of payments to PEMEX of fuel charges; (12) PROFIDE loans; (13) Export credit insurance; (14) Tax Rebate Certificate ("CEDI"); (15) Accelerated depreciation; (16) Article 15 loans; (17) Preferential state investment incentives; and (18) Import duty reductions and exemptions.

Analysis of Comments Received

We gave interested parties an opportunity to comment on the preliminary results. On November 14, 1988, we received comments from the following respondents: Fibras Sinteticas, Hilasal Mexicana, the Mexican Textile Industry Chamber, and Tapetes Luxor. At the request of respondents, we held a public hearing on November 22, 1988. On December 2, 1988, we received post-hearing comments from the Mexican Textile Industry Chamber.

Comment 1: As a result of the "Understanding Between the United States and Mexico Regarding Subsidies and Countervailing Duties" (the "Understanding"), signed on April 23, 1985, Mexico became a "country under the Agreement." Therefore, respondents argue that U.S. law (19 U.S.C. 1671(a)) requires an affirmative injury determination as a prerequisite to the imposition of countervailing duties on any Mexican merchandise imported on or after April 23, 1985, whether the countervailing duty order was published before or after that date.

While Article VI of the General Agreement on Tariffs and Trade ("GATT") requires an affirmative injury determination before the imposition of countervailing duties, the United States was allowed to "grandfather" provisions in its laws which allowed countervailing duties to be placed on dutiable products without an injury test. Duty-free products were not subject to countervailing duties at the time the United States acceded to the GATT. In 1974, Congress amended section 303 of the Tariff Act of 1930 to authorize the United States to impose countervailing duties on duty-free products. However, for countries towards which the United States has an "international obligation," Congress authorized the imposition of countervailing duties on imports of duty-free goods only after an affirmative injury determination. Thus, the "grandfather clause," which allowed countervailing duties on dutiable products absent an injury test, did not apply to duty-free products from countries towards which the United States had an international obligation.

The Trade Agreements Act of 1979 ("TAA") established an injury test requirement before any countervailing duties could be imposed on products from "countries under the Agreement," and amended section 303 of the Tariff Act to apply only to countries which were not under the Agreement. Under the TAA, respondents claim that no countervailing duties can be imposed on Mexican imports after the date Mexico became a country under the Agreement, absent an affirmative injury determination.

The imposition of duties in this review would occur after Mexico became a country under the Agreement whether the controlling date is the time of entry or the time of final assessment and liquidation.

Respondents cite three decisions of the Court of International Trade ("CIT") to support the conclusion that under any interpretation of what the controlling date is, an injury test is required for entries of Mexican textiles in 1986: *Cementos Anahuac del Golfo, S.A.* v. *United States*, 687 F. Supp. 1558 (CIT 1988) ("Anahuac I"), *Cementos Guadalajara* v. *United States*, 686 F. Supp. 335 (CIT 1988) ("Guadalajara"), and *Cementos Anahuac del Golfo, S.A.* v. *United States*, 689 F. Supp. 1191 (CIT 1988) ("Anahuac II").

In Anahuac I, the court found that Mexico was entitled to an injury test for goods entering the United States prior to the time Mexico became a country under the Agreement, as long as the imposition of duties occurred after the date Mexico qualified for an injury test. In the Anahuac II decision, the CIT held that since the liability for duties, as well as all legal obligations attached to that liability (including an injury test), occur at the time of entry, no injury test was required for any goods entered prior to the date of the Understanding. Respondents contend that the CIT implied in Anahuac II that before countervailing duties could be assessed, an affirmative injury determination would be required on goods entering after April 23, 1985. The Guadalajara decision also emphasized that the date on which the goods enter the United States is determinative of whether an injury test is required. Anahuac I and Anahuac II both held that country under the Agreement status means that the TAA applies to Mexican imports made on or after April 23, 1985. Therefore, absent an affirmative injury finding on all entries after April 23, 1985, the effective date of the Understanding, the countervailing duty order on textile mill products from Mexico should be revoked.

Department's Position: We do not agree that the injury determination mandated by section 701 of the TAA applies to Mexican products imported on or after the effective date of the Understanding if those products were subject to a countervailing duty order prior to that date. Article 5 of the Understanding makes clear that country under the Agreement status was not given to Mexico retroactively for the purpose of obtaining injury tests on merchandise subject to countervailing duty orders that were in effect before April 23, 1985. Before Mexico's accession to the GATT on August 24, 1986, the United States had no international obligation towards Mexico to provide an injury test on any merchandise covered by this order, whether dutiable or duty-free. We agree, however, that we must grant an injury test on duty-free merchandise from a country towards which the United States has an international obligation. Mexico's accession to the GATT created such an obligation for an injury test on entries of duty-free merchandise made on or after August 24, 1986 before countervailing duties can be imposed on such merchandise.

We appealed the CIT's decision in Anahuac I. On July 13, 1989, the United States Court of Appeals for the Federal Circuit reversed the CIT's decision in Anahuac I and upheld the CIT decision in Anahuac II, where the court supported our position that the Understanding does not require an injury test for Mexican countervailing duty orders issued before April 23, 1985, but only for countervailing duty investigations in progress on that date or orders issued after that date. In fact, contrary to respondent's interpretation, the CIT in Anahuac II explicitly upheld the Department's position that "the Understanding excluded CVD orders existing prior to April 23, 1985, the effective date of the Understanding * * *" 689 F. Supp. 1191 at 1213. We confirmed with the principal U.S. negotiators that the intent of Article 5 of the Understanding was to exclude from the application of the Understanding, and hence the application of country under the Agreement status, orders existing before April 23, 1985. The U.S. Court of Appeals also upheld the Guadalajara decision, in which the CIT indicated that an injury test is required only on duty-free goods from Mexico entering the United States after Mexico acceded to the GATT.

As we have explained in numerous final results notices, we believe that we lack the authority to revoke any countervailing duty order on Mexican products on the basis of the Understanding. *See, e.g.* Portland Hydraulic Cement and Cement Clinker from Mexico; Final Results of Countervailing Duty Administrative Review, (51 FR 44501, December 10, 1986); Certain Iron Metal Construction Castings from Mexico; Final Results of Countervailing Duty Administrative Review, (51 FR 9698, March 20, 1986); Portland Hydraulic Cement and Cement Clinker; Final Results of Administrative Review, (52 FR 18325, May 23, 1988); and Bricks from Mexico; Final Results of Countervailing Duty Administrative Review, (53 FR 38314, September 30, 1988).

Comment 2: Respondents argue that the relevant U.S. statute (19 U.S.C. 1671) does not permit a country's entitlement to an injury test to depend in any way on the interpretation of the term "investigation" as used in the Understanding. When it officially designated Mexico as a country under the Agreement, the Office of the United States Trade Representative did not put any qualifications on that status, as doing so would have been in violation of 1671(a). The statute does not permit the Department to impose duties on entries from a country under the Agreement unless (1) subsidies are being provided, and (2) the International Trade Commission ("ITC") makes an affirmative injury determination.

The CIT's decision in Anahuac I clearly defines the term "investigation" as used in the Understanding to mean both the process through which the Department initially issues a countervailing duty order and any subsequent administrative reviews. The CIT's discussion in Anahuac II of the term "investigations in progress" only reflected the court's concern that Mexico not be afforded an injury test for the entries that occurred prior to the Understanding. That discussion should not be construed to negate the basic implication of the CIT's Guadalajara and Anahuac II decisions that an injury test is required for all merchandise from Mexico entered on or after April 23, 1985.

Department's Position: As discussed in our response to Comment 1, the U.S. Court of Appeals reversed the Anahuac I decision, and upheld the decisions in Anahuac II and Guadalajara, thus supporting our position that the Understanding does not require an injury test for products subject to pre-Understanding countervailing duty orders.

Comment 3: The Mexican Textile Industry Chamber argues that in Article 8 of the Understanding, Mexico was granted "most favored nation" ("MFN") status. The MFN principle requires that Mexico be given the same treatment as other countries under the Agreement. When the TAA was enacted, countries under the Agreement had three years after the effective date of the TAA to request an injury test for products covered by countervailing duty orders in effect before that date. Mexico deserves this same treatment as of the date it became a country under the Agreement and, thus, should have been accorded an injury test within three years of the

signing of the Understanding. Since more than three years have passed since the signing of the Understanding, and Mexico has not been granted an injury test for Mexican products entered under per-Understanding orders, this countervailing duty order should be revoked.

Department's Position: The international obligation created in Article 8 of the Understanding does not extend to entries covered by this review because the Understanding itself makes clear that the only international obligation of the United States is to provide an injury test to investigations in progress or investigations begun after April 1985. The investigation in this case was completed in March 1985. Therefore, the United States is not required by the MFN language in Article 8 to grant an injury test in this case on entries of merchandise covered by this review. *See,* Portland Hydraulic Cement and Cement Clinker From Mexico; Final Results of Administrative Review, (53 FR 18325, May 23, 1988).

The three-year grace period provided for in section 104(b) of the TAA applies only to the three-year period after the effective date of the TAA, *i.e.,* January 1, 1980. 19 U.S.C. 1671 note. Congress made no special provision for an injury test for any products from countries that did not become countries under the Agreement before the end of the three-year grace period.

Comment 4: The Mexican Textile Industry Chamber argues that Mexico's accession to the GATT entitles Mexico to an injury test on the duty-free products entered on or after August 24, 1986, as required by the international obligations of the United States. Absent such a test, the countervailing duty order on Mexican textile mill products must be revoked with regard to the duty-free items subject to the order. The Department has previously partially revoked a countervailing duty order because the ITC believed it had no mechanism to perform an injury test (*see,* Certain fasteners from India, 47 FR 19562). There are 14 TSUSA items covered by this order that enter duty-free under the Generalized System of Preferences ("GSP"): 319.030, 319.0700, 339.1000, 355.8100, 356.2510, 358.0690, 358.1400, 360.7900, 360.8400, 364.0500, 364.1800, 364.2500, 365.8400, and 366.8400.

Department's Position: We are currently pursuing means by which an injury determination can be made concerning imports of duty-free Mexican textile mill products entered on or after August 24, 1986, the date Mexico acceded to the GATT. Twelve of the items cited by the respondent, 319.0300, 319.0700, 339.1000, 355.8100, 356.2510, 358.0690, 358.1400, 360.7900, 360.8400, 364.0500, 364.1800, and 364.2500, were duty-free on and after August 24, 1986. We will instruct the Customs Service not to liquidate shipments of the duty-free products listed above which were entered, or withdrawn from warehouse, for consumption on or after August 24, 1986, until we resolve this issue. The two other items listed by the respondent, 365.8400 and 366.8400, became ineligible for GSP status on August 1, 1986 and were dutiable after that date. Therefore, we will instruct Customs to assess duties on entries under those two TSUSA categories made on or after August 24, 1986.

Comment 5: Respondents argue that the appropriate benchmark for both determining if FOMEX financing is a countervailable subsidy and measuring the benefit from such financing is the cost to the Government of Mexico of obtaining similar funds. Item (k) of the Illustrative List of Export Subsidies appended to the Subsidies Code, and incorporated by reference in section 771(5)(i) of the TAA as part of the statutory definition of an export subsidy, provides that the benchmark for considering export credits to subsidies is whether funds have been provided to the borrower at less than the cost of funds to the government. The Department has recognized the Illustrative List as a source of applicable benchmarks for export-related government programs. The Understanding also uses this cost-to-government standard. The Department has erroneously and illegally used a commercial benchmark to measure the benefit from FOMEX loans.

Department's Position: The cost-to-government standard in the Understanding applies only to whether Mexico is in compliance with the Understanding and does not limit the United States in applying its own national countervailing duty law with regard to subsidized imports from Mexico. We addressed this issue and our use of a commercial benchmark for short-term financing at length in the final results of the last review of this order. *See,* Certain textile Mill Products from Mexico; Final Results of Countervailing Duty Administrative Review, (52 FR 45010, November 24, 1987). The use of a commercial benchmark is consistent with our standard of measuring subsidies from countervailable financing in terms of the benefit to the recipient rather than the cost to the government. *See, e.g.,* Certain Steel Products from Belgium; Final Affirmative Countervailing Duty Determination, Appendices 2 and 4 (47 FR 39304, September 7, 1982); and Final Affirmative Countervailing Duty Determination and Countervailing Duty Order; Ceramic Tile from Mexico, (47 FR 200014, May 10, 1982).

When the United States signed the Subsidies Code, it was not required by the Code to include the Illustrative List in its countervailing duty statute. Part I of the Code deals with the implementation by the signatories of their own national countervailing duty laws, or the "Track I" of the Code. Part Two of the Code relates only to the obligations of the signatories concerning their use of subsidies, the "Track II" of the Code. The Illustrative List does not relate to and is not mentioned in the Track I part of the Code. Article 9 of Part Two prohibits the use of export subsidies and refers to the Illustrative List to describe such export subsidies.

The TAA in relevant part states: "the term 'subsidy' has the same meaning as the term 'bounty or grant' as that term is used in section 303, and includes, but is not limited to, the following: i) any export subsidy described in Annex A to the Agreement (relating to the Illustrative List of Export Subsidies) * * *" (emphasis added). While Congress incorporated the Illustrative List in the statute, it did not limit the definition of export subsidy to the practices outlined in the List. The legislative history of the TAA explains, "The reference to specific subsidies in the definition is not all inclusive, but rather is illustrative of practices which are subsidies within the meaning of the word as used in the bill. The administering authority may expand upon the list of specified subsidies consistent with the basic definition." S. Rep. 96–249, 96th Cong., 1st Sess. 85 (1979). *See, also,* Trade Agreements Act of 1979: Statements of Administrative Action, H.R. Doc. No. 96–153, Pt. II, 96th Cong., 1st Sess. 432 (1979).

The Illustrative List is not, therefore, the sole statutory standard for identifying and measuring export subsidies, but must be considered with the definition of the term "bounty or grant" that practice and the courts have ascribed to it. When we have cited the Illustrative List as a source for benchmarks to identify and measure export subsidies, those benchmarks have been consistent with our long-standing practice of using commercial benchmarks to measure the benefit to the recipient of a subsidy program. The cost-to-government standard in item (k) of the Illustrative List does not fully capture the benefits provided to recipients of FOMEX financing. Therefore, we msut use a commercial

BEST COPY AVAILABLE

benchmark to calculate the benefit from a subsidy, consistent with the full definition of "subsidy" in the statute.

Comment 6: Tapetes Luxor argues that it should not be required to post cash deposits of estimated countervailing duties. The Department has sufficient information and has had ample time to verify that Tapetes did nto receive any benefits under its current owners (the company changed ownership in April 1987) and did not benefit from the FOMEX financing that the previous owners' U.S. importer received in 1985. Tapetes has since renounced FOMEX benefits for itself and its U.S. importers. Tapetes argues that the Department places unnecessary and unjustified hardships on the company by requiring it to continue to post estimated countervailing duty deposits when it is not receiving benefits. The Department has previously made adjustments to cash deposits based on subsequent events. *See, e.g.,* Certain Softwood Products from Canada; Final Countervailing Duty Determination, (48 FR 24159, May 31, 1983).

Department's Position: As we explained in detail in the final results of our last review in this case, because Tapetes did not export during the period of review, we do not have a record on which to base a determination that it did not receive benefits in the review period. *See,* Certain Textile Mill Products from Mexico; Final Results of Countervailing Duty Administrative Review, (52 FR 45010, November 24, 1987). If Tapetes exported in 1987, we will revisit its claims in the 1987 review, which is already underway.

Comment 7: The Mexican Textile Industry Chamber argues that the Department should retract its improper expansion of the scope of the countervailing duty order on Mexican textile mill products with regard to cotton yarns. The Department's interpretation of the cotton yarn TSUSA numbers as series of ranges adds 133 new TSUSA items to the scope of the order. The Department's interpretation that these items were intended to be included in the scope is not supported by the record. Petitioners clarified that the ranges applied to fabrics, but they never did so for yarns. Additionally, petitioners never responded to the Department's request for comments on this issue.

Department's Position: We have already considered this issue in our scope determination memorandum signed on September 22, 1988. In that memorandum, we decided that the record supports our interpretation that each of the cotton yarn numbers published in the original countervailing duty order and subsequent notices represented a range of TSUSA items. If respondents did not agree with our scope determination, the proper remedy was to appeal the scope determination to the CIT within 30 days of that determination.

Comment 8: The Mexican Textile Industry Chamber contends that the Department should accept zero-rate certifications from companies that certified zero-rate status in the last review but not in this review. These companies simply did not know that they had to re-certify to maintain their zero-rate status. Since the petitioners have not sought a hearing in this review, acceptance of such certificates would not prejudice the interests of any party.

Department's Position: The new Commerce Regulations (53 FR 52354, December 27, 1988, to be codified at 19 CFR 355.22) allow a producer or exporter to request an individual administrative review if that producer or exporter and the government submit certifications that the producer or exporter did not apply for or receive any net subsidy on the merchandise from any program that the Department previously found countervailable in the proceeding and will not do so in the future. This provision became effective on March 1, 1989. For any reviews initiated prior to the effective date of this provision, including this review, it was our policy to accept zero-rate certifications from companies if we received these certifications before the publication of the preliminary results or, in cases where we verify, before the verification. This practice allowed all interested parties to comment on zero-rate findings after reviewing the preliminary results of the administrative review. Since we did not receive certifications before our preliminary results, we cannot accept them.

Comment 9: Fibras Sinteticas ("FISISA") argues that the Department should correct its preliminary results to reflect the benefit from subsidies FISISA received only on its U.S. exports. FISISA reported all its FOMEX loans to the Mexican government, including a loan for a shipment to Shanghai, China that transited the United States. The Government of Mexico did not exclude FISISA's FOMEX loan on this shipment from its questionnaire response. This FOMEX pre-export loan was not for exports to the United States and therefore should be excluded from the Department's calculation of FISISA's company-specific benefit. Eliminating this loan brings FISISA's rate well within the rate for "all other" companies. FISISA argues that its supplemental data on the China shipment is not a submission of new information but a clarification of information the Department received in the questionnaire response. Other interested parties had ample time to comment on the clarification and did not do so. The Department should accept this clarification and adjust its calculations.

Department's Position: After reveiwing FISISA's questionnaire response, commercial invoices for the China shipment transiting the United States, bank debit notices, FOMEX documents, and other documents regarding the shipment, we agree that the FOMEX loan for that shipment was not for products exported to the United States. We have revised our calculations for FISISA accordingly by omitting the FOMEX loan for that shipment. However, § 355.22(d) of our new regulations define a significant differential as a difference of the greater of at least five percentage points, or 25 percent, from the weighted average net subsidy calculated on a country-wide basis. Evren with the China shipment financing removed from the calculation of the company's benefits, FISISA's company-specific benefit is more than five points higher than the weighted-average country-wide rate. We also found another company, Hilasal Mexicana, to have benefits that are significantly different. In addition, we inadvertently omitted another company's CEPROFI benefits from the "all other" rate.

Adjusting for these corrections, we determine the benefit during the review period from FOMEX to be zero or *de minimis* for 25 companies, 11.50 percent *ad valorem* for Fibras Sinteticas, 9.83 percent *ad valorem* for Hilasal Mexicana and 2.69 percent *ad valorem* for all other companies; from FOGAIN to be zero or *de minimis* for 27 companies and 0.03 percent *ad valorem* for all other companies; from CEPROFI to be zero or *de minimis* for 27 companies and 0.01 percent *ad valorem* for all other companies; and from FONEI to be zero or *de minimis* for 27 companies and 0.01 percent *ad valorem* for all other companies. The resulting total benefit is zero or *de minimis* for 25 companies, 11.50 percent *ad valorem* for FISISA, 9.83 percent *ad valorem* for Hilasal Mexicana and 3.01 percent *ad valorem* for all other companies during the period January 1, 1986 through December 31, 1986.

We have also reconsidered the calculation of the FOMEX benefit for purposes of cash deposits of estimated countervailing duties. Since the end of the 1986 review period, the Costo Porcentual Promedio (CPP) has been alternately volatile and stable for various periods of time. Because the interest rate on FOMEX per-export loans is based in significant part on the CPP, as is our benchmark, we cannot accurately estimate the change, if any, in the benefit received from FOMEX pre-export loans. Therefore, we determine that the "all other" cash deposit rate for FOMEX is the same as the review period assessment rate, 2.96 percent *ad valorem.* We determine that for the purposes of cash deposits of estimated countervailing duties, the rate is zero or *de minimis* for 25 companies, 11.50 percent *ad valorem* for FISISA, 9.83 percent *ad valorem* for Hilasal Mexicana and 3.01 percent *ad valorem* for all other companies.

In the preliminary results, Crisol Textil, S.A. de C.V. was listed as receiving *de minimis* benefits for purposes of cash deposits of estimated countervailing duties. For the purposes of cash deposits, we now determine the benefit for Crisol Textil to be in the "all other" category.

Firms Not Receiving Benefits

We determine that the following firms received zero or *de minimis* benefits during the period January 1, 1986 through December 31, 1986:

(1) Abetex, S.A. de C.V.;
(2) Acytex, S.R.L. de C.V.;
(3) Celanese Mexicana, S.A.;
(4) Celulosa y Derivados, S.A. de C.V. (Derivados Acrilicos, S.A.);
(5) Corporacion Charles, S.A.;
(6) Extrafil, S.A.;
(7) Fabrica de Hilados y Tejidos SINDEC, S.A.;
(8) Fabrica La Estrella, S.A.;
(9) Fariel, S.A. de C.V.;
(10) Fisher Price, S.A. de C.V.;
(11) Glassmex, S.A.;
(12) Jeramex, S.A.;
(13) Hilados y Tejidos de Tepeji del Rio, S.A.;
(14) Milyon, S.A. de C.V.;
(15) Noblis Lees, S.A. de C.V.;
(16) Ryltex, S.A. de C.V.;
(17) Sociedad Cooperativa de Produccion Maquiladora El Progresso, S.C.L.;
(18) Stanmex, S.A. de C.V.;
(19) Telas Ajijic, S.A.;
(20) Terpel, S.A. de C.V.;
(21) Textiles Mabratex, S.A.;
(22) Textiles Panzacola, S.A.;
(23) Texturizados y Tejidos Windsor, S.A.;
(24) Torenco, S.A. de C.V.; and
(25) Turbofil, S.A.

Final Results of Review

After reviewing all of the comments received, we determine the total bounty or grant to be zero or *de minimis* for 25 companies, 11.50 percent *ad valorem* for FISISA, 9.83 percent *ad valorem* for Hilasal Mexicana and 3.01 percent *ad valorem* for all other companies during the period January 1, 1986 through December 31, 1986.

Merchandise entering under the following TSUSA items covered by this review is afforded duty-free status under the Generalized System of Preferences: 319.0300, 319.0700, 339.1000, 355.8100, 356.2510, 358.0690, 358.1400, 360.7900, 360.8400, 364.0500, 364.1800, and 364.2500. Section 303 of the Tariff Act prohibits the imposition of countervailing duties on duty-free products absent an injury test when the United States has an international obligation to provide such a test. Mexico's accession to the GATT on August 24, 1986 imposes such an international obligation on the United States with respect to duty-free merchandise entered into the United States on or after the date of Mexico's accession.

For the duty-free merchandise, the Department will instruct the Customs Service to liquidate, without regard to countervailing duties, shipments from the 25 firms listed above exported on or after January 1, 1986 and on or before December 31, 1986. The Department will also instruct the Customs Service to assess countervailing duties of 11.50 percent of the f.o.b. invoice price on shipments from FISISA, 9.83 percent of the f.o.b. invoice on shipments from Hilasal Mexicana, and 3.01 percent of the f.o.b. invoice price on shipments from all other firms exported on or after January 1, 1986 and entered, or withdrawn from warehouse, for consumption before August 24, 1986. The Department will instruct the Customs Service to continue to suspend liquidation on all unliquidated shipments of the duty-free Mexican textile mill products entered, or withdrawn from warehouse, for consumption on or after August 24, 1986, while we pursue means by which an injury determination can be made concerning this merchandise.

For all dutiable merchandise listed in appendix A, the Department will instruct the Customs Service to liquidate, without regard to countervailing duties, shipments from the 25 firms listed above and to assess countervailing duties of 11.50 percent of the f.o.b. invoice price on shipments from FISISA, 9.83 percent of the f.o.b. invoice on shipments from Hilasal Mexicana, and 3.01 percent of the f.o.b. invoice price on shipments from all other firms exported on or after January 1, 1986 and on or before December 31, 1986.

The Department will also instruct the Customs Service to waive cash deposits of estimated countervailing duties, as provided by section 751(a)(1) of the Tariff Act, on any shipments of merchandise from the 25 firms listed above, and to collect a cash deposit of estimated countervailing duties of 11.50 percent of the f.o.b. invoice price on shipments from FISISA, 9.83 percent of the f.o.b. invoice price on shipments from Hilasal Mexicana, and 3.01 percent of the f.o.b. invoice price on shipments from all other firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. This deposit requirement and waiver shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.22 of the Commerce Regulations published in the **Federal Register** on December 27, 1988 (53 FR 52354) (to be codified at 19 CFR 355.22).

Dated: August 28, 1989.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Export Trade Certificate of Review

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Issuance of an amended export trade certificate of review, application no. 87–2A001.

SUMMARY: The Department of Commerce has issued an amendment to the Export Trade Certificate of Review granted to American Film Marketing Association on April 10, 1987. Notice of issuance of the Certificate was published in the **Federal Register** on April 17, 1987 (52 FR 12578).

FOR FURTHER INFORMATION CONTACT: Douglas J. Aller, Director, Office of Export Trading Company Affairs, International Trade Administration, 202–377–5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. 4001–21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. The regulations implementing title III are found at 15 CFR part 325 (50 FR 1804, January 11, 1985).

The Office of Export Trading Company Affairs is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Department of Commerce to publish a summary of a Certificate in the **Federal Register**. Under section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

Description of Amended Certificate

Export Trade Certificate of Review No. 87–00001 was issued to American Film Marketing Association ("AFMA") on April 10, 1987. Notice of issuance of the Certificate was published in the **Federal Register** on April 17, 1987 (52 FR 12578).

AFMA has amended its Certificate to:

1. Add each of the following companies (but not their controlling entities) as a "Member" within the meaning of § 325.2(1) of the Regulations (15 CFR 325.2 (1)): Angelika Films, Inc., New York, NY; Bandcompany, Los Angeles, CA: Cinetrust Entertainment Corp., Los Angeles, CA; Esquire Films, Inc., Burbank, CA; Film & Television Company, Beverly Hills, CA; Filmstar, Inc., Los. Angeles, CA; Golden Harvest/Golden Communications, Beverly Hills, CA (controlling entity: Golden Communications); International Film Exchange, New York, NY; Morgan Creek International, Los Angeles, CA (controlling entity: Morgan Creek Film Productions, Inc.); Odyssey/Cinecom Int'l., Los Angeles, CA (controlling entity: Odyssey Entertainment Ltd.); Premiere Film Marketing, Beverly Hills, CA; Silver Star Film Corp., Los Angeles, CA; Sugar Entertainment Inc., Encino, CA; Tom Parker Motion Pictures, Tarzana, CA; and Vidmark Entertainment, Santa Monica, CA;

2. Delete each of the following companies as a "Member" of the Certificate: Globe Export Company; and Vista Organization Partnership.

3. Change the listing of the company name of the following two current "Members" as follows: change Cannon International, Inc. to Pathe Films, N.V.; and F/M Entertainment Int'l. Inc./The Norkat Company to The Norkat Co. Ltd.

Effective date: May 31, 1989.

A copy of the amended Certificate will be kept in the International Trade Administration's Freedom of Information Records Inspection Facility, Room 4102, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

Dated: August 29, 1989.

Douglas J. Aller,

Director, Office of Export Trading Company Affairs.

BILLING CODE 3510-DR-M

Minority Business Development Agency

Business Development Center Applications; Minneapolis/St. Paul, MN

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting competitive applications under its Minority Business Development Center (MBDC) Program to operate an MBDC for approximately a 3 year period, subject to the availability of funds. The cost performance for the first 12 months is estimated at $165,000 in Federal funds and a minimum of $29,118 in non-federal contributions for the budget period February 1, 1990 to January 31, 1991. Cost-sharing contributions may be in the form of cash contributions, client fees for services, in-kind contributions, or combinations thereof. The MBDC will operate in the Minneapolis/St. Paul geographic service area. The award number of this MBDC will be 05–10–90001–01.

The funding instrument for the MBDC will be a cooperative agreement. Competition is open to individuals, non-profit and for-profit organizations, state and local governments, American Indian tribes and educational institutions.

The MBDC program is designed to provide business development services to the minority business community for the establishment and operation of viable minority businesses. To this end, MBDC funds organizations that can coordinate and broker public and private resources on behalf of minority individuals and firms; offer a full range of management and technical assistance; and serve as a conduit of information and assistance regarding minority business.

Applications will be evaluated on the following criteria: the experience and capabilities of the firm and its staff in addressing the needs of the business community in general and, specifically, the special needs of minority businesses, individuals and organizations (50 points); the resources available to the firm in providing business development services (10 points); the firm's approach (techniques and methodology) to performing the work requirements included in the application (20 points); and the firm's estimated cost for providing such assistance (20 points). An application must receive at least 70% of the points assigned to any one evaluation criteria category to be considered programmatically acceptable and responsive.

MBDCs shall be required to contribute at least 15% of the total project costs through non-federal contributions. Client fees for billable management and technical assistance (M&TA) rendered must be charged by MBDCs. Based on a standard rate of $50 per hour, MBDCs will charge client fees at 20% of the total cost for firms with gross sales of $500,000 or less and 35% of the total cost for firms with gross sales of over $500,000.

The MBDC may continue to operate, after the initial competitive year, for up to 2 additional budget periods. Periodic reviews culminating in year-to-date quantitative and qualitative evaluations will be conducted to determine if funding for the project should continue. Continued funding will be at the discretion of MBDA based on such factors as an MBDC's satisfactory performance, the availability of funds and Agency priorities.

CLOSING DATE: The closing date for applications is October 10, 1989. Applications must be postmarked on or before October 10, 1989.

ADDRESS: Chicago Regional Office, Minority Business Development Agency, 55 East Monroe Street, Suite 1440, Chicago, Illinois 60603, 312/353–0182.

FOR FURTHER INFORMATION CONTACT: David Vega, Regional Director, Chicago Regional Office.

SUPPLEMENTARY INFORMATION: Anticipated processing time of this award is 120 days. Executive Order 12372 "Intergovernmental Review of Federal Programs" is not applicable to this program. Questions concerning the preceding information, copies of application kits and applicable regulations can be outlined at the above address.

Catalog of Federal Domestic Assistance; 11.800 Minority Business Development

BILLING CODE 3510-21-M

National Oceanic and Atmospheric Administration

Caribbean Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Caribbean Fishery Management Council and the Council's Administrative Committee will meet September 26–28, 1989, at the Hotel Villa Parguera, Lajas, Puerto Rico.

The Council will hold its 67th regular public meeting to discuss, among other topics, the results of the first round of public hearings on the draft Queen Conch Fishery Management Plan (FMP), the request for emergency action on the red hind closure, and the Option Paper for Amendment #1 to the Shallowwater Reef Fish FMP. The approximate schedule for the Council's meeting is September 27, 1989, from 9 a.m. to 5 p.m., and September 28 from 9 a.m. to noon.

The Caribbbean Council's Administrative Committee will meet September 26 from approximately 2 p.m. to 5 p.m., to discuss the Council's regular administrative matters.

For more information contact Miguel A. Rolon, Executive Director, Caribbean Fishery Management Council, Banco de Ponce Building, Suite 1108, Hato Rey, Puerto Rico 00918–2577; telephone: (809) 766–5926.

Dated: August 25, 1989.

BILLING CODE 3510-22-M

Gulf of Mexico Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Gulf of Mexico Fishery Management Council and its Committees will meet September 11–14, 1989, at the Crowne Plaza Holiday Inn, 333 Poydras, New Orleans, LA. Except as noted below, the meetings are open to the public.

The Council will meet September 13 at 8:30 a.m. From 8:45 a.m. to 9:15 a.m., it will hear public comments on the Red Drum Fishery Management Plan (FMP), and review committee recommendations. From 9:45 a.m. to 10:15 a.m., it will hear public comments on Mackerel Amendment #3, take action on the amendment, review Draft Amendment #5 and schedule public hearing locations. It will also review Draft Amendment #1 to the Swordfish FMP, schedule public hearing locations, and receive a summary report of the swordfish session of the International Commission for the Conservation of Atlantic Tuna. There also will be reports from the Intercouncil Billfish, Ad Hoc Limited Entry, and Advisory Panel (AP) Selection Committees. (The AP Selection Committee session will be closed to the public to discuss personnel matters.) The meeting will recess at 5 p.m.

On September 14 the Council will reconvene at 8:30 a.m., to review the Law Enforcement Committee report. From 8:45 to 9:15 a.m., it will hear public testimony on Shrimp Amendment #4 and review committee recommendations; it will also discuss proposed 1990 Council meeting dates, receive enforcement reports, review the status of the Shark FMP and Gulf amendment, receive a tuna hearing summary and Director's reports, review the notice of control date for reef fish, and elect a Chair and Vice-Chair. The Council meeting will adjourn at 11:30 a.m.

On September 11 the Mackerel Management Committee will meet from 1 p.m. to 5:30 p.m. On September 12 the Red Drum Management Committee will meet at 8:30 a.m., followed by meetings of the Limited Entry and the AP Selection Committees. (The AP Selection Committee session will be closed to the public to discuss personnel matters.) Adjournment will be at noon. At 1 p.m., the Shrimp Management Committee will meet, followed by a meeting of the Swordfish Management Committee which will adjourn at 5:30 p.m. In another public session, the Law Enforcement Committee will meet at 2:30 p.m., and will adjourn at 4:30 p.m.

BILLING CODE 3510-22-M

National Fish and Seafood Promotional Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

TIME AND DATE: The meeting will convene at 8:00 a.m. on Tuesday, September 19, 1989 and adjourn approximately 4:00 p.m. on Wednesday, September 20, 1989.

PLACE: Periwinkle Gardens Hotel, 575 Sterling Highway , Homer, AK 99603.

STATUS: NOAA announces a meeting of the National Fish and Seafood Promotional Council (NFSPC). The NFSPC, consisting of 15 industry members and the Secretary of Commerce as a non-voting member, was established by the Fish and Seafood Promotion Act of 1986 to carry out programs to promote the consumption of fish and seafood and to improve the competitiveness of the U.S. fishing industry.

The NFSPC is required to submit an annual marketing plan and budget to the Secretary of Commerce for his approval that describes the marketing and promotion activities the NFSPC intends to carry out. Funding for NFSPC activities is provided for through Congressional appropriations.

MATTERS TO BE CONSIDERED

September 19, 1989

8:00 a.m.–3:00 p.m.—Chairman's opening remarks; approval of minutes from last meeting; Operations Committee budget recommendations and discussion; regional implementation meetings review; advertising and public relations updates; media review/preview; discussion of FY 1990 marketing plan.

September 20, 1989

8:30 a.m.–4:00 p.m.—Executive Director's update; Committee reports; Discussion on International Seafood Conference, trade shows, advertising achievement award program, omnibus consumption study, Astoria, Oregon project, species-specific councils update, 1990 American Seafood Challenge, and future Council options.

PORTION CLOSED TO THE PUBLIC: None.

FOR FURTHER INFORMATION CONTACT: Jeanne M. Grasso, Program Manager, National Fish and Seafood Promotional Council, 1825 Connecticut Ave., NW., Suite 618, Washington, DC 20235. Telephone: 202-673-5237.

Dated: August 24, 1989.

James E. Douglas, Jr.,

Deputy Assistant Administrator For Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMISSION FOR THE IMPROVEMENT OF THE FEDERAL CROP INSURANCE PROGRAM

Under the Federal Crop Insurance Commission Act of 1988 (7 U.S.C. 1508 note), notice is hereby given of the following meeting of the Commission for the Improvement of the Federal Crop Insurance Program:

Date: September 12–13, 1989.

Time: 1:00 p.m.—5:30 p.m., September 12, 1989. 8:00 a.m.—5:30 p.m., September 13, 1989.

Place: Embassy Suites Hotel, 1250 22nd Street NW., Washington, DC 20037; Telephone: (202) 857-3388.

Type of Meeting: Open to the public.

Comments: The public may file written comments before or after the meeting with the contact person listed below.

Purpose: To review the extent to which the Commission's recommendations for improvements in the Federal crop insurance program have been implemented; to draft the Commission's September monthly report; to consider other possible recommendations to improve the program; and to consider any other item of business necessary for the effective functioning of the Commission.

At this meeting, the Commission will be reviewing the extent to which its recommendations for improvements in the Federal crop insurance program are being implemented.

In April 1989, the Commission submitted an interim report to the congressional agriculture committees and the Secretary of Agriculture. The report sets forth the Commission's findings and recommendations for immediate administrative improvements in the Federal crop insurance program that it believes would foster increased participation by farmers. The Commission's findings and recommendations fall into four general categories: (1) Increased responsiveness to producer needs; (2) broadening participation; (3) program simplification; and (4) improvement of delivery system performance.

The Commission recently submitted its principal report to the congressional agriculture committees and the Secretary. In addition to recommendations for administrative improvements in the Federal crop insurance program, the report—which is dated July 1989—includes recommendations for legislation and a status report on the improvement of program administration by the Secretary based on the recommendations made by the Commission in the April report. The recommendations and findings of the Commission contained in the July report fall into four general categories: (1) Increased responsiveness to producer needs; (2) broadening participation; (3) program simplification; and (4) improved program administration.

Under the Federal Crop Insurance Commission Act of 1988, the Commission is charged with the responsibility of continuing to monitor the Federal crop insurance program and reporting on a monthly basis, through December 31, 1990, to the congressional agriculture committees and the Secretary on (1) the extent to which the recommendations of the Commission have been implemented, and (2) the level of participation in the program by producers.

The Commission considers the continued monitoring and monthly reporting a very serious responsibility. In addition to meeting the statutory requirements, the Commission intends to use the monthly reporting process as a means of furnishing the congressional agriculture committees and the Secretary with any additional recommendations it may develop on ways to improve the program.

The Commission also intends to study and analyze the recommendations contained in the April report and the July report and furnish the congressional agriculture committees and the Secretary, through the monthly reporting process, with any views or comments it may develop with respect to such recommendations.

Accordingly, at this meeting, the Commission will be reviewing the extent to which its recommendations are being implemented; drafting the Commission's September report; and considering other possible recommendations to improve the Federal crop insurance program. The Commission will also consider any other item of business necessary for the effective functioning of the Commission.

Contact Person: Kellye A. Eversole, Executive Director, Commission for the Improvement of the Federal Crop Insurance Program, 1255 23rd Street, NW., Suite 880, Washington, DC, 20037. Telephone: (202) 887-6700.

Done at Washington, DC, this 25th day of August 1989.

Benjamin I. Baker,

Acting Executive Director.

BILLING CODE 4310-[illegible]

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits, Sublimits and Charges for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Mexico

August 30, 1989.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits, sublimits and charges.

EFFECTIVE DATE: September 6, 1989.

FOR FURTHER INFORMATION CONTACT: Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits and sublimits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 535-9461. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION:

Authority. Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits and sublimits for certain categories are being increased for carryover and recrediting of carryforward not used.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 53 FR 52461, published on December 28, 1988.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

August 30, 1989.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 22, 1988, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man-made fiber textiles and textile products, produced or manufactured in Mexico and exported during the twelve-month period which began on January 1, 1989 and extends through December 31, 1989.

Effective on September 6, 1989, the directive of December 22, 1988 is amended further to increase the limits and sublimits for the following categories, as provided under the provisions of the current bilateral textile agreement between the Governments of the United States and the United Mexican States:

Category limits not in a group	Adjusted 12-month limit [1]
201-C/669-C [2]	1,334,242 kilograms.
334	82,382 dozen.
336/636	211,070 dozen.
340/640	423,576 dozen.
341/641	789,032 dozen of which not more than 285,600 dozen shall be in Categories 342-Y/641-Y. [3]
347/348/647/648	4,412,250 dozen.
349/649	2,941 dozen.
351/651	340,647 dozen.
352/652	2,864,451 dozen.
604-A [4]	680,715 kilograms.
604-O/607-O [5]	1,937,991 kilograms.
669-B [6]	625,050 kilograms.
Non-Special Regime Category Sublimits [1]	
340/640	105,894 dozen.
347/348/647/648	529,764 dozen.
349/649	588,300 dozen.
351/651	51,097 dozen.
352/652	1,289,003 dozen.

[1] The limits and sublimits have not been adjusted to account for any imports exported after December 31, 1988.

[2] In Categories 201-C/669-C, only HTS numbers 5607.41.3000, 5607.49.1500, 5607.49.2500, 5607.50.2000 and 5607.90.2000 in Category 201-C; and 5607.49.3000 and 5607.50.4000 in Category 699-C.

[3] In Categories 341-Y/641-Y, only HTS numbers 6204.22.3060, 6206.30.3010 and 6206.30.3030 in Category 341-Y; and 6204.23.0050, 6204.29.2030, 6206.40.3010 and 6206.40.3025 in Category 641-Y.

[4] In Category 604-A, only HTS number 5509.32.0000.

[5] In Category 604-O, all HTS numbers except 5509.32.0000; and in Category 607-O all HTS numbers except 5509.53.0030 and 5509.53.0060.

[6] In Category 669-B, only HTS numbers 6305.31.0020 and 6305.39.0000.

Also effective on September 6, 1989, you are directed to deduct 3,266 kilograms, for goods exported in 1988, from the current charges made to Category 459. Import charges of 6,286 kilograms, for goods exported in 1988, shall be charged to the 1988 limit established in the March 7, 1988 directive for Category 459.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements

[FR Doc. 89-20723 Filed 9-1-89; 8:45 am]

BILLING CODE 3510-DR-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Wage Committee; Closed Meetings

Pursuant to the provisions of section 10 of Pub. L. 92-463, the Federal Advisory Committee Act, notice is hereby given that a meeting of the Department of Defense Wage Committee will be held on Tuesday, October 3, 1989; Tuesday, October 10, 1989; Tuesday, October 17, 1989; Tuesday, October 24, 1989; and Tuesday, October 31, 1989 at 10:00 a.m. in Room 1E801, The Pentagon, Washington, DC.

The Committee's primary responsibility is to consider and submit recommendations to the Assistant Secretary of Defense (Force Management and Personnel) concerning all matters involved in the development and authorization of wage schedules for federal prevailing rate employees pursuant to Public Law 92-392. At this meeting, the Committee will consider wage survey specifications, wage survey data, local wage survey committee reports and recommendations, and wage schedules derived therefrom.

Under the provisions of section 10(d) of Pub. L. 92-463, meetings may be closed to the public when they are "concerned with matters listed in 5 U.S.C. 552b." Two of the matters so listed are those "related solely to the internal personnel rules and practices of an agency," (5 U.S.C. 552b.(c)(2)), and those involving "trade secrets and commercial or financial information obtained from a person and priviledged or confidential" (5 U.S.C. 552b.(c)(4)).

Accordingly, the Deputy Assistant Secretary of Defense (Civilian Personnel Policy) hereby determines that all portions of the meeting will be closed to the public because the matters considered are related to the internal rules and practices of the Department of Defense (5 U.S.C. 552b.(c)(2)), and the detailed wage data considered from officials of private establishments with a guarantee that the data will be held in confidence (5 U.S.C. 552b(c)(4)).

However, members of the public who may wish to do so are invited to submit material in writing to the chairman concerning matters believed to be deserving of the Committee's attention.

Additional information concerning this meeting may be obtained by writing the Chairman, Department of Defense Wage Committee, Room 3D284, The Pentagon, Washington, DC 20301.

Dated: August 29, 1989.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Department of the Air Force

Air Force Academy Board of Visitors; Meeting

Pursuant to section 9355, Title 10, United States Code, the Air Force Academy Board of Visitors will meet at the Air Force Academy, Colorado Springs, Colorado, October 12–14, 1989. The purpose of the meeting is to consider morale and discipline, the curriculum, instruction, physical equipment, fiscal affairs, academic methods, and other matters relating to the Academy.

This meeting will be closed to the public to discuss matters analogous to those listed in subsections (2), (4), and (6) of section 552b(c), Title 5, United States Code. These closed sessions will include: attendance at cadet classes and panel discussions with groups of cadets and military staff and faculty officers involving personal information and opinions, the disclosure of which would result in a clearly unwarranted invasion of personal privacy. Closed sessions will also include executive sessions involving discussions of personal information, including financial information, and information relating solely to internal personnel rules and practices of the Board of Visitors and the Academy. Meeting sessions will be held in various facilities throughout the cadet area.

For further information, contact Major Tim Taylor, Headquarters, US Air Force (DPPA), Washington, DC 20330–5060, at (202) 697–2919.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

BILLING CODE 3910-01-M

DEPARTMENT OF ENERGY

Advisory Committee on Nuclear Facility Safety; Open Meeting; Agenda Change

On Tuesday, August 22, 1989, at page 34810 of **Federal Register** Vol. 54, No. 161; the Advisory Committee on Nuclear Facility Safety announced an open meeting being held on Wednesday, September 6, 1989 from 8:30 am to 10:00 pm, and Thursday, September 7, 1989 from 8:30 am to 3:00 pm at the U.S. Department of Energy, Savannah River Site, Aiken, South Carolina. In order to provide for the fullest participation of committee members in the scheduled meeting, the agenda item regarding the Waste Isolation Pilot Plan (WIPP) has been moved from September 7 to September 6. The overall agenda for both days, including the revision, is as set forth below.

Tentative Agenda

September 6, 1989

8:30 am—Chairman John F. Ahearne Opens Meeting. Review of Reactor Restart Plan
Noon—Lunch
1:00 pm—Review of Reactor Restart Issues. Status Report on Waste Isolation Pilot Plant
5:30 pm—Meeting Adjourned
8:00 pm–10:00 pm—Public Comment Session

September 7, 1989

8:30 am—Review of Reactor Restart Issues (Continued). Subcommittee Reports
12:00 noon—Lunch
1:00 pm—Review of Selected Technical Issues
3:00 pm—Meeting Ends.

Contact: Wallace R. Kornack, Executive Director, ACNFS, S–2, 1000 Independence Ave., SW., Washington, DC 20585, 202–586–1770.

Issued at Washington, DC on August 30, 1989.

J. Robert Franklin,

Deputy Advisory Committee Management Officer.

BILLING CODE 6450-01-M

Energy Information Administration

Agency Information Collections Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of requests submitted to the Office of Management and Budget for review.

SUMMARY: The Energy Information Administration (EIA) has submitted the energy information collection(s) listed at the end of this notice to the Office of Management and Budget (OMB) for review under provisions of the Paperwork Reduction Act (Pub. L. 96–511, 44 U.S.C. 3501 *et seq.*).

The listing does not include information collection requirements contained in new or revised regulations which are to be submitted under section 3504(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by the Department of Energy (DOE).

Each entry contains the following information: (1) The sponsor of the collection (the DOE component or Federal Energy Regulatory Commission (FERC)); (2) Collection number(s); (3) Current OMB docket number (if applicable); (4) Collection title; (5) Type of request, e.g., new, revision, or extension; (6) Frequency of collection; (7) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (8) Affected public; (9) An estimate of the number of respondents per report period; (10) An estimate of the number of responses annually; (11) An estimate of the average hours per response; (12) The estimated total annual respondent burden; and (13) A brief abstract describing the proposed collection and the respondents.

DATES: Comments must be filed on or before October 5, 1989. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the OMB DOE Desk Officer listed below of your intention to do so as soon as possible. The Desk Officer may be telephoned at (202) 395–3084. (Also, please notify the EIA contact listed below.)

ADDRESS: Address comments to the Department of Energy Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place NW., Washington, DC 20503. (Comments should also be addressed to the Office of Statistical Standards at the address below.)

FOR FURTHER INFORMATION AND COPIES OF RELEVANT MATERIALS CONTACT: Jay Casselberry, Office of Statistical Standards (EI–70), Energy Information Administration, M.S. 1H–023, 1000 Independence Avenue SW., Washington, DC 20585. Mr. Casselberry may be telephoned at (202) 586–2171.

SUPPLEMENTARY INFORMATION:

The first energy information collection submitted to OMB for review was:

1. Federal Energy Regulatory Commission
2. FERC–16A
3. 1902–0105
4. Monitoring (Omnibus) Report (stand-by authority)
5. Extension
6. On occasion
7. Mandatory
8. Businesses or other for profit
9. 1 respondent
10. 1 response annually
11. The estimated average hours per response for each of the respondents is 1 burden hour.
12. The estimated total reporting burden is 1 hour.
13. Stand-by authority to collect information needed to ensure that the FERC has timely information available with respect to the natural gas supply outlook for the upcoming winter period and to identify potential areas where shortages may exist or develop.

The second energy information collection submitted to OMB for review was:

1. Federal Energy Regulatory Commission
2. FERC–574
3. 1902–0116
4. Gas Pipeline Certificates—Hinshaw Exemption
5. Extension
6. One-time filing
7. Required to obtain or retain a benefit
8. Businesses or other for profit
9. 1 respondent
10. 1 response annually
11. The estimated average hours per response for each of the respondents is 245 burden hour.
12. The estimated total reporting hours are 245.
13. The FERC–574 data are used by the Commission in assessing applications for exemption from certain provisions of the NGA by companies engaging in the transportation or sale for resale of natural gas in interstate commerce.

Authority: Sec. 5(a), 5(b), 13(b), and 52, Public Law No. 93–275, Federal Energy Administration Act of 1974, as amended, 15 U.S.C. 764(a), 764(b), 772(b), and 790(a).

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

BILLING CODE 6450-01-M

Form EIA–6, Coal Distribution Report

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of proposed revision of the Form EIA–6, Coal Distribution Report and solicitation of comments.

SUMMARY: The Energy Information Administration (EIA), as part of its continuing effort to reduce paperwork and respondent burden (required by the Paperwork Reduction Act of 1980, Public Law 96–511, 44 U.S.C. 3501 *et seq.*), conducts a presurvey consultation program to provide the general public and other Federal agencies with an opportunity to comment on proposed and/or continuing reporting forms. This program helps to ensure that requested data can be provided in the desired format, reporting burden is minimized, reporting forms are clearly understood, and the impact of collection requirements on respondents can be properly addressed. Currently EIA is soliciting comments concerning the proposed revision to the Form EIA–6, Coal Distribution Report.

DATE: Written comments must be submitted within 30 days of the publication of this notice. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below of your intention to do so as soon as possible.

ADDRESS: Send comments to Mr. Bruce F. Quade, EI–521, Mail Stop 2G090, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–6868.

FOR FURTHER INFORMATION OR TO OBTAIN COPIES OF THE PROPOSED FORM AND INSTRUCTIONS: Requests for additional information or copies of the form and instructions should be directed to Mr. Bruce F. Quade at the address listed above.

SUPPLEMENTARY INFORMATION:

I. Background
II. Current Actions
III. Requests for Comments

I. Background

In order to fulfill its responsibilities under the Department of Energy Organization Act (Public Law 95–91), the Energy Information Administration is obliged to carry out a central, comprehensive, and unified energy data and information program which will collect, evaluate, assemble, analyze, and disseminate data and information related to energy resources, reserves, production, demand, and technology, and related economic and statistical information. The program will also include data and information relevant to the adequacy of energy resources to meet demands in the near and longer term future for the Nation's economic and social needs.

Form EIA–6 collects coal production, stock and shipment data from U.S. coal producers and distributors. The data collected on Form EIA–6 are used by the Federal government to support economic analysis of the coal and transportation industries, for analyses of the impacts of regulatory and legislative initiatives, for publication of timely coal statistics for use by the Congress and Federal agencies, and in the private sector to conduct market assessments and other economic analysis.

II. Current Actions

The proposed change to the EIA–6 is a revision of the existing survey with no change in the expiration date. Starting with 1990 data submissions beginning in April 1990, EIA–6 respondents will report by coal-producing State of origin instead of by the coal-producing District and State of origin.

III. Request for Comments

Prospective respondents and other interested parties should comment on the proposed revision. The following general guidelines are provided to assist in the preparation of responses.

As a potential respondent:

A. Are the instructions and definitions clear and sufficent? If not, which instructions require clarification?

B. Can the data be submitted using the definitions included in the instructions?

C. Can data be submitted in accordance with the response time specified in the instructions?

D. Public reporting burden for this collection is estimated to average 2.5 hours per response. How much time, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information, do you estimate it will require you to complete and submit the required form?

E. What is the estimated cost of completing this form, including the direct and indirect costs associated with the data collection? Direct costs should include all costs, such as administrative costs, directly attributable to providing this information.

F. How can the form be improved?

G. Do you know of any other Federal, State, or local agency that collects similar data? If you do, specify the agency, the data element(s), and the means of collection.

As a potential user:

A. Can you use data at the levels of detail indicated on the form?

B. For what purpose would you use the data? Be specific.

C. How could the form be improved to better meet your specific needs?

D. Are there alternate sources of data and do you use them? What are their deficiencies and/or strengths?

EIA is also interested in receiving comments from persons regarding their views on the need for the information contained on Form EIA–6.

Comments submitted in response to this notice will be summarized and/or included in the requests for OMB approval of the form; they also will become a matter of public record.

Authority: Sec. 5(a), 5(b), 13(b), and 52 of Public Law 93–275, Federal Energy Administration Act of 1974, 15 U.S.C. 764(a), 764(b), 772(b) and 790a.

Issued in Washington, DC, August 29, 1989.

Yvonne Bishop,

Director, Statistical Standards Energy Information Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. CP88–178–000 and CP88–178–001]

Indiana Ohio Pipeline Co.; Intent To Prepare an Environmental Assessment for the Indiana Ohio Project and Request for Comments on Environmental Issues

August 29, 1989.

Summary

Notice is hereby given that the staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) on the facilities proposed in the above-referenced dockets for the Indiana Ohio Project.

Indiana Ohio Pipeline Company (Indiana Ohio) is seeking a certificate of public convenience and necessity under section 7(c) of the Natural Gas Act and 18 CFR part 157, subpart E to construct and operate 110.72 miles of 30-inch-diameter natural gas pipeline and appurtenant facilities. The proposed facilities would be used to transport natural gas from Panhandle Eastern Pipe Line Company's (Panhandle) mainline system in Grant County, Indiana to Texas Eastern Transmission Corporation's (Texas Eastern) mainline system in Warren County, Ohio. The purpose of the Indiana Ohio Project is to provide an interconnecting pipeline link between the midcontinent gas supplies and the downstream facilities serving Northeast and Middle Atlantic markets.

By this notice the FERC staff is requesting comments on the scope of the analysis that should be conducted for the EA. All comments will be reviewed prior to publication of the EA and significant issues will be addressed. Comments should focus on potential environmental effects, alternatives to the proposal (including alternative routes), and measures to mitigate environmental impact. Written comments must be submitted by October 2, 1989, in accordance with the instructions provided at the end of this notice.

Proposed Action

On January 15, 1988, Indiana Ohio filed an application with the FERC in Docket No. CP88–178–000 to construct 110 miles of new 20-inch-diameter pipeline, a new 6,000-horsepower compressor station, and metering and related facilities with a design capacity of 200,000 Mcf (thousand cubic feet) of gas per day. However, on August 15, 1989, Indiana Ohio filed an amendment (Docket No. CP88–178–001) that changed the diameter of the proposed pipeline from 20 to 30 inches, deleted the 6,000-horsepower compressor station, and modified the pipeline route. All of these facilities would be owned and operated by Indiana Ohio, a wholly owned and operated subsidiary of Panhandle Eastern Corporation.

Proposed Facilities

The general location of the proposed pipeline is shown in figure 1.[1] The 30-inch-diameter, 110.72-mile-long pipeline would originate from Panhandle's Zionsville 7-gate valve, located about 4.7 miles south-southeast of Gas City, Indiana, and cross Grant, Delaware, and Randolph Counties, Indiana, and Darke, Preble, Montgomery, and Warren Counties, Ohio. The route would parallel existing pipeline, railroad, powerline and road rights-of-way for about 60 percent of its length and terminate at Texas Eastern's Lebanon Compressor Station, located about 2 miles north of Lebanon, Ohio.

Indiana Ohio proposes to use a 66-foot-wide construction right-of-way at most locations along the route. Larger work areas would be required at some road, railroad, stream, and wetland crossings. Indiana Ohio seeks to maintain a 66-foot-wide permanent right-of-way for the life of the project.

Indiana Ohio's metering facilities would be located at milepost 110.72 within Texas Eastern's existing Lebanon Compressor Station. No additional land would be required.

Construction Timing and Techniques

The proposed facilities would be constructed and operated in accordance with all applicable regulations. These include: 49 CFR part 192—Transportation of Natural and Other Gas by Pipeline: Minimum Federal Safety Standards; 18 CFR 2.69—Guidelines to be Followed by Natural Gas Pipeline Companies in the Planning, Clearing, and Maintenance of Rights-of-Way; and other applicable Federal, state, and local regulations and permit requirements.

If authorized, construction of the proposed project may occur in the warm weather months of 1990 and take about 4 months to complete.

Pipeline construction would begin with surveying. Then clearing and grading of a 66-foot-wide construction right-of-way would occur, in most locations, to prepare a relatively level strip to accommodate construction equipment. Rotary-wheel ditching machines, backhoes, clamshells, draglines, or other similar equipment would be used to excavate a trench deep enough to provide a minimum of 3.5 feet of cover, except for stream, river, road, and railroad crossings which would have about 5 feet of cover. Blasting would be required when areas of unrippable consolidated rock are encountered. As proposed, topsoil would be removed and conserved on all cultivated and improved lands if requested by the landowner.

After trenching, pipe segments would be strung along the right-of-way, bent to conform to the contours of the trench, welded together, coated, and lowered into the trench. Backfilling of the trench would use suitable previously excavated materials (no rock over 8 inches in diameter) or imported materials where necessary. Conserved topsoil would be replaced at approximately its original position. The right-of-way would be restored to its original contours as much as practicable, and reseeded, limed, fertilized and mulched in accordance with an erosion and sediment control plan that will be reviewed by the FERC staff.

Special construction methods would be employed across wetlands, rivers, and streams to provide stable work areas and to restore vegetation and prevent changes in drainage patterns. Small streams would be trenched using a backhoe, dragline or clam dredge. For major river crossings, a barge-mounted backhoe, hydraulic suction dredge or directional drilling may be employed. Staging areas for stream and wetland crossings would be located back from the waterline. Construction methods for crossing small wetlands would be similar to those used on dry land. Construction in large wetland areas would employ the "push-pull" technique where flotation devices are attached to the welded pipeline, the pipeline is pushed or pulled into place over the excavated trench, the floats are removed and the pipe settles to the bottom of the trench, and the trench is backfilled and the original wetland contours are restored.

Environmental Issues

Based on preliminary analysis of the application, pipeline route, and the environmental information provided by the applicant, the FERC staff has identified the following issues which will be addressed in the EA:

Soils and Geology.	Erosion control and revegetation.
	Effect on crop production and farmland.
	Effects of blasting and geologic hazards.
	Impact on exploitable mineral resources.
Water Resources..	Effects on potable water supplies.
	Impact on streams.
Vegetation.............	Impact on wetlands.
	Short- and long-term effects on vegetation.
Wildlife..................	Impact on fisheries.
	Impact on threatened and endangered species.
Cultural Resources.	Effect of the project on properties listed on or eligible for the National Register of Historic Places.
Land Use/ Aesthetics.	Impact on homes, future development, and public recreation areas.
	Impact on nature preserves, parks, and public lands.
	Effect of the right-of-way on scenic areas.
Pipeline Safety......	Possibility of pipeline rupture.
	Blasting in populated areas.

Alternatives, route modifications, and specific mitigating measures will also be considered in the staff's analysis. Comments are solicited on any additional topics of environmental concern to residents and others in the project area. After comments from this notice are received and analyzed and the various issues investigated, the staff will publish an EA for the Indiana Ohio Project.

Comment Procedure

A copy of this notice and request for comments on environmental issues has been sent to Federal, state, and local environmental agencies, parties in this proceeding, public interest groups, libraries, newspapers, and other interested individuals. All counties in the project area, and all townships which are traversed by the proposed pipeline have been provided copies of detailed maps which identify the location of the proposed project in their respective areas.

Comments on the scope of the EA should be filed as soon as possible but no later than October 2, 1989. All written comments must reference Docket No. CP88–178–001 and be addressed to the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. A copy of the comments should also be sent to Mr. Kenneth Frye, Project Manager, Federal Energy Regulatory Commission, Room 7312M, 825 North Capitol Street, NE., Washington, DC 20426. Comments recommending that the FERC staff address specific environmental issues should be supported with a detailed explanation of the need to consider such issues.

The EA will be based on the FERC staff's independent analysis of the proposal and, together with the comments received, will be a part of the record to be considered by the Commission in this proceeding. The EA will be sent to all parties in this proceeding, to those providing comments in response to this notice, to Federal and state agencies, and to interested members of the public. The EA may be offered as evidentiary material if an evidentiary hearing is held in this proceeding. In the event that an evidentiary hearing is held, anyone not previously a party to this proceeding and wishing to present evidence on environmental or other matters must first file with the Commission a motion to intervene, pursuant to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214).

Additional information about the proposal, including detailed route maps for specific locations, is available from Mr. Kenneth Frye, Project Manager, telephone (202) 357–8898.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP89–460–000, CP89–1851–000]

Pacific Gas Transmission Co., Altamont Gas Transportation Project; Notification of Schedule For Public Scoping Meetings on Environmental Issues To Be Addressed in the Joint Draft Environmental Impact Report Statement

August 29, 1989

The staff of the Federal Energy Regulatory Commission (FERC) hereby announces the schedule of public scoping meetings to be held jointly with the California Public Utility Commission (CPUC). The meetings will be conducted to identify the scope and significance of environmental impact associated with two proposals to transport natural gas between Canada and southern California for use by various local distribution companies and utilities. The attachment lists the locations, dates, and times of the meetings.

On August 8, 1989, the FERC staff issued a notice of intent to prepare a draft environmental impact report/statement and request for comments on its scope for the projects proposed in the dockets listed above (54 FR 33272). This notice stated that the CPUC is working with the FERC staff to produce a joint environmental impact document and contained brief descriptions of the actions proposed, general location maps, and information on comment procedures. Proposed locations for public scoping meetings were noted, and the public was afforded an opportunity to comment and/or nominate additional locations. The attachment to this notice finalizes the times, dates, and locations of the scoping meetings for these proposals.

As referenced in the August 8, 1989 notice, the public scoping meetings are intended as an opportunity for state and local governments and the general public to provide information and assistance directly to the FERC and CPUC staffs in defining the range of environmental issues and concerns that need to be addressed in the impact analysis. As previously stated, Federal agencies with an interest in these proposals have formal channels for input into the analysis and are expected to coordinate their comments through the lead Federal agency outside the public meeting mechanism.

---

[1] Figure 1 is not being printed in the Federal Register, but copies are available from the Commission's Public Reference Branch at (202) 357–8118.

Further information concerning the public scoping meetings or about these proposals in general is available from the following individuals:

Ms. Lauren H. O'Donnell, Room 7312, Office of Pipeline and Producer Regulation, Environmental Compliance and Project Analysis Branch, Federal Energy Regulatory Commission, Washington, DC 20426, Telephone (202) 357–8874.

or

Mr. Clyde Murley, California Public Utilities Commission, 505 Van Ness Avenue, San Francisco, CA 94102, Telephone (415) 557–4027.

Persons who would like to make oral presentations at the meetings should contact the FERC project manager identified above to have their names placed on the speakers' list. Persons on the speakers' list prior to the date of the meeting will be allowed to speak first. A second speakers' list will be available at the public meeting. Priority will be given to those persons representing groups.

Lois D. Cashell,

Secretary.

Schedule of Joint FERC/CPUC Public Scoping Meetings

Date	Time	Location
Altamont Gas Transportation Project		
Monday, September 18, 1989.	7:00 p.m.	Holiday Inn, North Federal at Sunset, Riverton, Wyoming.
Tuesday, September 19, 1989.	7:00 p.m.	Sheraton Hotel, 27 North 27th Street, Billings, Montana.
PGT/PG&E Expansion Project		
Monday, September 18, 1989.	7:00 p.m.	Antioch City Hall, City Council Chamber, 3rd and H Street, Antioch, California.
Tuesday, September 19, 1989.	7:00 p.m.	Riverhouse Motor Inn, Little Deschutes Room, 3075 North Highway 97, Bend, Oregon.
Wednesday, September 20, 1989.	7:00 p.m.	Ridpath Hotel, Legend Room A, 515 W. Sprague Avenue, Spokane, Washington.

BILLING CODE 6717–01–M

FEDERAL ENERGY REGULATORY COMMISSION

[Docket No. G–8493–003, et al.]

ARCO Oil and Gas Co., Division of Atlantic Richfield Co., et al.;

Applications For Certificates and Abandonment of Service[1]

August 28, 1989

Take notice that each of the Applicants listed herein has filed an application pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before September 14, 1989, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Lois D. Cashell,

Secretary.

Docket No. and date filed	Applicant	Purchaser and location	Description
G–8493–003, B, 8–1–89	ARCO Oil and Gas Company, Division of Atlantic Richfield Company, P.O. Box 2819, Dallas, TX 75221.	Texas Eastern Transmission Corporation, Various Fields, Hardin, *et al.* Counties, Texas.	Certain leases released. Certain other leases assigned 10–1–86 to Murphy Oil U.S.A., Inc. and 11–8–72 to Norman A. Bock and Douglas E. Bacon.
CI89–482–000, E, 7–19–89	Mitchell Energy Corporation, P.O. Box 4000, The Woodlands, TX 77387–4000.	Natural Gas Pipeline Company of America, Wise and Jack Counties, Texas.	Acreage acquired 3–1–88 from Gerald Rauch, Sabio Oil & Gas, Inc. and S.P. Mandell.
CI89–496–000 (CI61–151), F, 7–31–89.	Samson Resources Company, Samson Plaza, Two West Second Street, Tulsa, OK 74103.	Arkla Energy Resources, a division of Arkla, Inc., Manziel Field, Wood County, Texas.	Acreage acquired 11–1–87 from Shell Western E&P Inc.
CI89–497–000, E, 8–7–89	Samson Resources Company	Arkla Energy Resources, a division of Arkla, Inc., Cameron Field, LeFlore County, Oklahoma.	Acreage acquired 12–1–85 from Harold Hamm and Carroll L. Brewer.
CI89–498–000 E, 8–7–89	Samson Resources Company	Arkla Energy Resources, a division of Arkla, Inc., Arkoma Area, Latimer County, Oklahoma.	Acreage acquired 5–5–86 from Amelia R. Josey.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[FRL–3640–4]

Financial Assistance Program for Review Under 40 CFR Part 29

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability and review.

SUMMARY: The Environmental Protection Agency (EPA) is announcing the availability of a new financial assistance program (66.032 "State Indoor Radon Grants") to provide financial support to States (including the District of Columbia and the U.S. Trust Territories) for the purpose of assisting States in the development and implementation of programs for the assessment and mitigation of radon. The program is authorized by the Toxic Substances Control Act, (15 U.S.C. 2601 et seq.), under Title III, the Indoor Radon Abatement Act (15 U.S.C. 2661 *et seq.*).

DATES: States choosing to include this program in their intergovernmental review process must notify EPA on or before October 5, 1989. On or before September 22, 1989, States should notify EPA of their intent to apply for assistance under this program. Letters of intent should include proposals for innovative projects, if applicable. Completed applications must be received by EPA no later than December 15, 1989, to be considered for award.

ADDRESSES: Letters of intent, applications, and intergovernmental review comments on applications should be sent to the appropriate EPA Regional Grants Management Office:

Program Planning & Integration Branch, EPA—Region I, John F. Kennedy Federal Bldg, Room 2203, Boston, MA 02203
Grants Administration Branch 2MGT, EPA—Region II, 26 Federal Plaza, New York, NY 10278
Grants & Audit Resolution Branch, EPA—Region III, 841 Chestnut Street, Philadelphia, PA 19107
Grants and Contracts Section, EPA—Region IV, 345 Courtland Street, NE., Atlanta, GA 30365
Grants & Financial Management Branch 5MF, EPA—Region V, 230 South Dearborn Street, Chicago, IL 60604
Program Planning & Intergration Branch 6MG, EPA—Region VI, 1445 Ross Avenue, 12th Floor, Suite 1200, Dallas, TX 75270
Program Integration Branch, EPA—Region VII, 726 Minnesota Avenue, Kansas City, KS 66101
Grants Management Branch 8PM–GM, EPA—Region VIII, 999 18th Street, Suite 500, Denver, Co 80202–2405
Policy and Grants Branch M5, EPA—Region IX, 215 Fremont Street, San Francisco, CA 94105
Comptroller Branch, EPA—Region X, 1200 Sixth Avenue, Seattle, WA 98101.

Letters indicating State intent to participate in intergovernmental review should be sent to EPA on or before October 5, 1989 at the following address: Grants Policy and Procedures Branch, Grants Administration Division (PM–216F), 401 M Street SW., Washington DC, 20460, Attention: Corinne Allison.

FOR FURTHER INFORMATION CONTACT EPA REGIONAL RADIATION PROGRAM MANAGERS:

EPA—Region I, Thomas D'Avanzo, (617–565–4502)
EPA—Region II, Larainne Koehler, (212–264–0546)
EPA—Region III, Hank Sokolowski, (215–597–9075)
EPA—Region IV, Paul Wagner, (404–347–3907)
EPA—Region V, Patricia A.J. York, (312–886–6035)
EPA—Region VI, Terrie DeLorimier, (214–655–7208)
EPA—Region VII, Carl Walter (913–236–2893)
EPA—Region VIII, Milton Lammering, (303–293–1709)
EPA—Region IX, Mike Bandrowski, (415–974–8378)
EPA—Region X, Jerry Leitch, (206–442–7660).

SUPPLEMENTARY INFORMATION:

Under the authority of section 306 of the Indoor Radon Abatement Act (IRAA, 15 U.S.C. 2666) (EPA may award grants to State agencies for the State Indoor Radon Grant (SIRG) program. This program is eligible for intergovernmental review under Executive Order 12372 (E.O. 12372). States must notitify the Grants Policy and Procedures Branch, listed under **ADDRESSES** above, whether or not applications for the SIRG program will be subject to their State's official E.O. 12372 review process.

Applicants must contact their State's Single Point of Contact (SPOC) for intergovernmental review as early as possible to find out if their applications for this program are subject to their State's official E.O. 12372 review process. If subject to their State's E.O. 12372 review process, then the applicant must submit their application or any other material required by their State to their SPOC for review. SPOCs should send their official intergovernmental review comments on an application to the appropriate EPA Regional Grants Management Office listed under **ADDRESSES** above, no later than 60 days after the receipt of the application/other required for review.

State Indoor Radon Grants

Purpose

The State Indoor Radon Grant Program (SIRG), authorized by section 306 of IRAA (15 U.S.C. 2666) through Fiscal Year 1991, allows the governor of a State to apply to EPA for assistance in the development and implementation of programs for the assessment and mitigation of radon. The governor of a State must designate a lead agency to represent the State, as specified by section 306(b) of IRAA (15 U.S.C. 2666(b)). Eligible State applicants, as defined by section 3 of the Toxic Substances Control Act (15 U.S.C. 2602(13)), include: any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Canal Zone, American Samoa, the Northern Mariana Islands, or any other territory or possession of the United States. Therefore, the term "State" as used in this notice shall include the States, the District of Columbia, and the U.S. Trust territories, as defined above. States may, at their discretion, use grant funds to assist local governments for certain eligible activities pursuant to section 306(g) of IRA (15 U.S.C. 2666(g)).

Section 306(f) of IRAA (15 U.S.C. 2666(f)) states that the Federal cost share of radon program activities implemented under the SIRG program shall not exceed 75% and 60% in the first and second grant year, respectively. Thus, States must provide a non-Federal cost share of at least 25% in the first grant year of participation in the SIRG program, and at least 40% in the State's second grant year. Section 306(h) of IRA (15 U.S.C. 2666(h)) states that EPA may request information, data, and reports as necessary to determine the continuing eligibility of a State recipient. This section also specifies that State recipients shall provide EPA with all radon-related information generated by the recipient's activities, and that State recipients shall maintain and make available to the public a list of firms and individuals within the State that have received a passing rating under the EPA proficiency rating program. Section 306(i) of IRAA (15 U.S.C. 2666(i)) includes the following limitations on the State's use of grant funds:

(1) Before a State can receive funding for a second grant year, EPA must determine that such State has satisfactorily implemented the activities funded by the grant in the previous grant year.

(2) The costs of purchasing radon measurement devices and of implementing demonstration projects (eligible activities (4) and (9) listed below) shall not in the aggregate exceed 50% of the amount of the grant award in a fiscal year. A State should make every effort, consistent with the goals and successful operation of the State radon program, to give a preference to low-income persons.

(3) The costs of general overhead and program adminsitration (eligible activity (7) listed below) shall not exceed 25% of the amount of the grant award in a fiscal year.

(4) A State may use grant funds for financial assistance to persons only to the extent such assistance is related to demonstration projects or the purchase and analysis of radon measurement devices.

Eligible Activities

Under SIRG, the following activities are eligible for funding, as specified by section 306(c) or IRAA (15 U.S.C. 2666(c)):

(1) Survey of radon levels, including special surveys of geographic areas or classes of buildings (such as, among others, public buildings, schools, high risk residential construction types).

(2) Development of public information and educational materials concerning radon assessment, mitigation, and control programs.

(3) Implementation of programs to control radon in existing and new structures.

(4) Purchase by the State of radon measurement equipment or devices.

(5) Purchase and maintennce of analytic equipment connected to radon measurement and analysis, including costs of calibration of such equipment.

(6) Payment of costs of Environmental Protection Agency-approved training programs related to radon for permanent State or local employees.

(7) Payment of general overhead and program administration costs.

(8) Development of a data storage and management system for informationn concerning radon occurrence, levels, and programs.

(9) Payment of costs of demonstration of radon mitigation methods and technologies as approved by EPA, including State participation in the EPA Home Evaluation Program.

(10) A toll-free radon hotline to provide information and technical assistance.

Program Development Framework

The Agency will fund eligible activities that augment (but do not supplant) existing State efforts. EPA has identified four functional areas that together form the framework for the eligible activities specified by IRAA (and described above) to develop an effective, comprehensive State Indoor Radon Program. These functional areas are derived from the document entitled *Key Elements of a State Radon Program* (EPA 520/1–88–006). These four functional areas constitute a model radon program framework:

(1) Program Management: Organization and management activities designed to establish an effective program infrastructure. Examples include strategy development, designation of responsibilities, and implementation of data management systems.

(2) Public Information: Activities which provide basic, up-to-date information to citizens within the State concerning the sources of radon contamination, paths of exposure, health risks, assessment techniques, mitigation methods, and prevention measures.

(3) Problem Assessment: Process of identifying and evaluating areas of potentially significant radon exposure and health risk. Activities in this area may range from conducting isolated measurements in houses and schools to surveying "hot spot" areas and undertaking large, State-wide surveys.

(4) Problem Response: Actions designed to reduce radon exposure and risk to acceptable levels. Problem response encompasses both mitigation of risks in existing homes, schools, and other buildings and preventing radon problems in new structures.

EPA believes that every State should possess, at a minimum, the capacity to identify and respond to its most serious radon problem areas. States are strongly encouraged to complete their basic framework in each of these functional areas prior to (or concurrently with) undertaking more advanced activities. States with more mature programs are encouraged to propose activities that build upon existing efforts in the four functional areas. In some cases, a State may wish to undertake innovative projects which may be of use to other States. Innovative projects would complement the State's basic Indoor Radon Program, and can serve as a model for other States.

Innovative Projects

States may propose projects that have the potential for development of innovative approaches to reducing public health risk from radon. Projects funded from this pool should be useful as models either on a national or regional scale and have the potential to be adopted by other States. Project proposals may be submitted under any of the functional program areas identified in the model program framework (described above) for any of the activities described under Eligible Activities. States interested in implementing innovative projects should call the EPA Regional Radiation Program contacts listed under **FOR FURTHER INFORMATION** above for assistance in developing brief proposals. Interested States should then submit these proposals with their letter of intent no later than September 22, 1989 to the appropriate EPA Regional Grants Management Office listed under **ADDRESSES** above.

Funding

As specified in section 306(j) of IRAA (15 U.S.C. 2666(j)), up to $10,000,000 is authorized for SIRG for Fiscal Year 1990, and no more than 10% of the total amount available may be awarded to a single State. If State applications exceed the total funds available, EPA will give priority to activities or projects based on each of the following criteria specified

by section 306(e) of IRAA (15 U.S.C. 2666(e)):

(1) The seriousness and extent of the radon contamination problem to be addressed.

(2) The potential for the activity or project to bring about reduction in radon levels.

(3) The potential for development of innovative radon assessment techniques, mitigation measures as approved by EPA, or program management approaches which may be of use to other States.

(4) Any other uniform criteria that EPA deems necessary to promote the goals of the grant program and that EPA provides to States before the application process.

EPA has established an additional criteria, as authorized by section 306(e)(4):

The potential for the activity to establish a core Indoor Radon Program in all States who wish to participate.

Application Requirements

States who wish to apply for grant assistance under the SIRG program should submit a letter of intent (and brief innovative project proposals, if applicable) to the appropriate EPA Regional Office listed under **ADDRESSES** above by September 22, 1989. States must submit their completed applications to the appropriate EPA Regional Office no later than December 15, 1989.

Each application submitted to EPA for Fiscal Year 1990 grant awards must include the following information (See section 306(b) of IRAA, 15 U.S.C. 2666(b)):

1. Application SF–424: Application for Federal Assistance.
2. EPA Form 5700–49: Certification Regarding Debarment, Suspension, and Other Responsibility Matters.
3. A description of the seriousness and extent of the radon exposure in the State.
4. An identification of the State Agency which has the primary responsibility for radon programs and which will receive the grant, a description of the roles and responsibilities of the lead State agency and any other State agencies involved in the radon programs, and description of the roles and responsibilities of any municipal, district, or areawide organization involved in radon programs.
5. A description of the activities and programs related to radon which the State proposes in such year.
6. A budget specifying Federal and State funding of each element of activity of the grant application.
7. For the initial grant year, a 3-year plan which outlines long range program goals and objectives, tasks necessary to achieve them, and resource requirements for the entire 3-year period, including anticipated State funding levels and desired Federal funding levels.

Dated August 29, 1989.

Margo T. Oge,

Acting Director, Office of Radiation Programs.

BILLING CODE 6560-50-M

[FRL-3636-2]

Proposed Settlement Under the Comprehensive Environmental Response, Compensation and Liability Act; Adler Seeds, Inc., et al.

AGENCY: U.S. Environmental Protection Agency.

ACTION: Request for public comment.

SUMMARY: The U.S. Environmental Protection Agency is proposing to enter into a de minimis settlement under Section 122(g) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (CERCLA), 42 U.S.C. Section 9622(g). This proposed settlement is intended to resolve the liabilities under CERCLA of 139 de minimis parties for response costs incurred and to be incurred at the I. Jones Recycling, Clinton Street facility in Fort Wayne, Indiana.

DATE: Comments must be provided on or before (30 days from publication).

ADDRESS: Comments should be addressed to the Docket Clerk, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604, and should refer to: In Re I. Jones Recycling Site in Fort Wayne, Indiana, U.S. EPA Docket No. V–W–89C–009.

FOR FURTHER INFORMATION CONTACT: Thomas J. Krueger, U.S. Environmental Protection Agency, Office of Regional Counsel, 5CS–TUB–3, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886–0562.

Notice of De Minimis Settlement: In accordance with section 122(i)(1) of the Comprehensive Environmental Response, Compensation and Liability Act of 1984, as amended (CERCLA), notice is hereby given of a proposed administrative settlement concerning the I. Jones Recycling hazardous waste site at 3651 Clinton Street in Fort Wayne, Indiana. The agreement was proposed by EPA Region V on March 20, 1989. Subject to review by the public pursuant to this Notice, the agreement has been approved by the United States Department of Justice and the Department of the Interior. Below are listed the parties who have executed binding certifications of their consent to participate in the settlement:

Adler Seeds, Inc.; Aeroquip Corp./L–O–F Plastics, Inc./Sterling Engineered Products, Inc.; Group Dekko International, Inc. for Albion Wire/Indiana Insulated Wire; Allen County Motors, Inc.; Stoutco, Inc. for Ameri-Kan Division Corp.; American Tool & Die, Inc.; Appleton Papers Inc.; Aristech Chemical Corp. for USS Chemicals; Morton Thiokol, Inc., for Armstrong Products; ANR Freight System, Inc., for Associated Truck Lines, Inc.; Ball State University; Bard Manufacturing Co., Bauman Harnish Rubber and Plastics, Inc.; Dresser Industries for Bay State Abrasives; Allied-Signal Inc. for Bendix Corp.; Berne Tube Products, Division of Blissfield Manufacturing Co.; Uniroyal Goodrich Tire Co.; Biomet, Inc.; Boehringer Mannheim Diagnostics; Bowman Construction Co., Inc.; Bowmar Instrument Corp., Bowmar/Aerospace Division; Carretta Trucking, Inc.; Huntington County Community School Corp. for Central School; Central Soya Co., Inc.; Chase Brass & Copper Co.; Miami Carey, Inc. for Chemcraft, Inc.; Chemcentral Corp.; Pullman Co. for Imperial Clevite; CMS Roofing, Inc.; Commercial Intertech Corp. for Commercial Shearing, Inc.; Cooper Tire & Rubber Co., Industrial Products Division; Corning Glass Works; Craft Laboratories, Inc.; Crown International Inc.; CTS Corp. for CTS of Berne, Inc.; Baxter Healthcare Corp. for Dayton Flexible Products; Decatur Salvage, Inc.; Swift-Eckrich, Inc. for Peter Eckrich & Sons; Emerson Electric Co. for Doerr Electric; EPCO Products, Inc.; Erie Stone Inc.; Federal Insulation of Indiana, Inc.; Masco Corp. for Flint & Walling, Inc.; FMC Corp.—Fire Apparatus Division; Ford Meter Box Co., Inc.; City of Fort Wayne, Board of Public Works and Safety; Harris-Kayot, Inc. for Fort Wayne Anodizing Division/Harris Manufacturing Corp.; Fort Wayne Community Schools; Fort Wayne Newspapers, Inc.; Fort Wayne Pools, Inc.; Steel & Aluminum Fabricating Co. for Fort Wayne Structural Steel; Frye Copisystems, Inc.; National Oil & Gas, Inc. for Gasway Oil Inc.; G.F. Furniture Systems; Gladieux Refinery Inc.; Grav-I-Flow Corp.; Detrex Corp. for Gold Shield; Gould Inc.; Gripco Fastener Division, Emhart Industries Inc.; Grumman Corp. for Grumman Olson; GTE North Inc.; Hamlin, Inc.; Hansen Manufacturing Co., Inc.; Harrison Engine Service, Inc.; Harter Corp.; Hausman Steel Corp.; Eagle Picher for Hillsdale Tool & Manufacturing Co.; Hoosier Co. Inc.; Johnson Controls, Inc. for Hoover Universal; Easco Aluminum for Indiana

Aluminum Extrusion; Indiana Michigan Power Co.; Interior Woodworking Corp.; ITT Aerospace/Optical Division, ITT Corp.; Ivy Tech; King-Seeley Thermos Co., Division of Household Manufacturing; Kunkle Industries Inc.; Larden Division, Bristol Corp.; Lucas Ledex Inc.; Lincoln Graphic Corp.; Lincoln National Corp.; Maco Corp.; Martin Enterprises, Inc.; Metal Forge Co.; Meyer Stamping and Manufacturing Co., Inc.; FL Aerospace Corp. for Midland Ross Corp.; Miles Inc.; Kim Miller; Milton Roy Co.; Aro Corp. for Modernair Corp.; Morrill Motors, Inc.; Moyer Spring Co.; Sequa Corp. for Muncie Reclamation & Supply; National Railroad Passenger Corp.; Nationwide Industries, Inc.; New York Blower Co.; Nibco Inc.; N.I. Industries, Inc. for Norris Industries; Philips Lighting Co. Division of North American Philips Corp.; North American Van Lines, Inc. and its Fleet Service Division; Universal-Rundle Corp. for Northway Products; University of Notre Dame; Nylon Craft, Inc.; OEC-Diasonics; Parkview Memorial Hospital; Pullman Co. for Peabody ABC Corp.; Phelps Dodge Magnet Wire; Philips Industries Inc./Ventline Division; Petrochem Services, Inc.; Potlatch Corp.; Precision Heat Treating Corp.; Protective Coatings, Inc.; Public Service Company, of Indiana, Inc.; Quality Springs Products Division, Kuhlman Corp.; Rand McNally & Co.; Ransburg Corp.; Minnesota Valley Engineering, Inc. for Richmond-Lox Equipment Co.; Ross Laboratories Division, Abbott Laboratories; Saginaw Medical Center; St. Joseph Medical Center; Salvation Army; Sheller-Globe Corp.; Special Machine & Engineering, Inc.; States Engineering Corp.; Stoutco Inc.; Federal-Mogul Corp. for Switches, Inc.; Du Pont Photomasks, Inc. for Tau Laboratories; TECO, Inc.; Tokheim Corp.; Tritech Manufacturing, Inc. Tube Processing Corp.; Tulox Plastics Corp. for T.L.B. Plastics; Tuthill Corp.; Universal Cooperatives, Inc. for Universal Livestock Equipment; Valspar Corp.; Van Waters & Rogers; Wabash County Hospital; Wayne/Scott Fetzer Co. for Wayne Home Equipment; Westvaco Corp. and Zimmer, Inc.

These 139 parties have prepaid $2,172,038.74 in settlement payments under the agreement, subject to the contingency that EPA may elect not to complete the settlement based on matters brought to its attention during the public comment period established by this Notice. Of this amount, $1,888,328.05 would reimburse EPA for a portion of its past response costs at the I. Jones Recycling site. The remainder of the settlement payments would represent settlement of the potential liability of certain settling parties for penalties related to EPA's July 27, 1988, unilateral order concerning the site.

EPA is entering into this agreement under the authority of section 122(g) and 107 of CERCLA. Section 122(g) authorizes early settlements with *de minimis* parties to allow them to resolve their liabilities at Superfund sites without incurring substantial transaction costs. Under this authority, the agreement proposes to settle with parties in the I. Jones case who are responsible for less than .45 percent of the volume of hazardous substances at the site. EPA issued a preliminary settlement proposal on February 8, 1989, and invited comments on that proposal by all interested parties. On March 20, 1989, EPA issued final revisions to the proposed settlement, which included several modifications made in response to comments. The EPA also provided its response to major comments which the Agency determined did not require changes to the settlement proposal. The proposed settlement reflects, and was agreed to based on, conditions as known to the parties as of March 20, 1989. Settling parties will be required to pay their volumetric share of the Government's past response costs and the estimated future response costs at the site. Settling parties will also be required to pay a settlement premium on the expected future response costs to compensate for the risks that are posed by settling before all costs are known. Settling parties had the option to choose to pay a premium of approximately 1.5 times the share of expected future response costs in exchange for a release from further civil or administrative liabilities for the site, including Federal natural resource damage liabilities, which would be reopened if total site response costs exceeded $10.5 million. Alternatively, settling parties may choose to pay a premium of approximately 2.5 times the share of expected future response costs in exchange for a complete release from further civil or administrative liabilities for the site, including Federal natural resource damage liabilities. In addition, those settling parties that did not fully comply with the EPA's July 27, 1988, unilateral cleanup order for the I. Jones Recycling Clinton Street site will be required to pay an additional amount, equal to their volumetric share of expected future response costs, in settlement of their potential liability for noncompliance penalties related to that order. The settlement, as it is now proposed, includes several minor adjustments to volumetric shares of settling parties, which adjustments made after the proposal, was sent to all eligible parties on March 20, 1989, in response to additional evidence provided by those parties. The affected parties are: Phelps Dodge Magnet Wire, Imperial Clevite, Gould Manufacturing, Peabody ABC, TECO, Conrail, GTE, Peter Eckrich & Sons, and Parkview Memorial Hospital.

The Environmental Protection Agency will receive written comments relating to this agreement for 30 days from the date of publication of this notice.

A copy of the proposed administrative settlement agreement may be obtained in person or by mail from the EPA's Region V Office of Regional Counsel, 230 South Dearborn Street, Chicago, Illinois, 60604. Additional background information relating to the settlement is available for review at the EPA's Region V Office of Regional Counsel.

Authority: The Comprehensive Environmental Response, Compensation, and Liability Act, as amended, 42 U.S.C. Sections 9601–9675.

Valdas V. Adamkus,

Regional Administrator.

BILLING CODE 6560-50-M

[OPTS–59274A; FRL–3640–8]

Certain Chemicals; Approval of Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of an application for test marketing exemption (TME) under section 5(h)(1) of the Toxic Substances Control Act (TSCA) and 40 CFR 720.38. EPA has designated this application as TME–89–20. The test marketing conditions are described below.

EFFECTIVE DATE: August 29, 1989.

FOR FURTHER INFORMATION CONTACT: William B. Lee, New Chemicals Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Room E–611, 401 M Street SW., Washington, DC 20460, (202) 382–3769.

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use, and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present any unreasonably risk of injury.

EPA hereby approves TME–89–20. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the TME application, and for the time period and restrictions specified below, will not present an unreasonable risk of injury to health or the environment. Production volume, use, and the number of customers must not exceed that specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

The following additional restrictions apply to TME–89–20. A bill of lading accompanying each shipment must state that the use of the substance is restricted to that approved in the TME. In addition, the applicant shall maintain the following records until 5 years after the date they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA:

1. Records of the quantity of the TME substance produced and the date of manufacture.
2. Records of dates of the shipments to each customer and the quantities supplied in each shipment.
3. Copies of the bill of lading that accompanies each shipment of the TME substance.

TME–89–20

Date of Receipt: July 19, 1989.

Notice of Receipt: August 18, 1989 (54 FR 34231).

Applicant: Cape Industries.

Chemical: (G) aromatic polyester polyol.

Use: (G) industrial and commercial.

Production Volume: 200,000 lbs.

Number of Customers: (Confidential).

Test Marketing Period: Six months, commencing on first day of manufacture.

Risk Assessment: EPA identified no significant health or environmental concerns for the test market substance. Therefore, the test market substance will not present an unreasonable risk of injury to health or the environment.

The Agency reserves the right to rescind approval or modify the conditions and restrictions or an exemption should any new information that comes to its attention which casts significant doubt on its finding that the test marketing activities will not present any unreasonable risk of injury to health or the environment.

Dated: August 29, 1989.

John Melone,

Director, Chemical Control Division, Office of Toxic Substances.

[FR Doc. 89–20764 Filed 9–1–89; 8:45 am]

BILLING CODE 6560-50-M

[OPTS–59274B; FRL–36407]

Certain Chemicals; Approval of Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of applications for test marketing exemptions (TMEs) under section 5(h)(1) of the Toxic Substances Control Act (TSCA) and 40 CFR 720.38. EPA has designated these applications as TME–89–21 and TME–89–22. The test marketing conditions are described below.

EFFECTIVE DATE: August 29, 1989.

FOR FURTHER INFORMATION CONTACT: Darlene Jones, New Chemicals Branch, Chemical Control Division (TS–794), Office Toxic Substances, Environmental Protection Agency, Room E–611, 401 M Street SW., Washington, D.C. 20460, (202) 382–2279.

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use, and disposal of the substances for test marketing purposes will not present an unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present any unreasonable risk of injury.

EPA hereby approves TME–89–21 and TME–89–22. EPA has determined that test marketing of these new chemical substances described below, under the conditions set out in the TME applications, and for the time period and restrictions specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, use, and the number of customers must not exceed that specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

The following additional restrictions apply to TME–89–21 and TME–89–22. A bill of lading accompanying each shipment must state that the use of the substances are restricted to that approved in the TME. In addition, the applicant shall maintain the following records until 5 years after the date they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA:

1. Records of the quantity of the TME substance produced and the date of manufacture.
2. Records of dates of the shipments to each customer and the quantities supplied in each shipment.
3. Copies of the bill of lading that accompanies each shipment of the TME substance.

TME–89–21 and TME–89–22

Date of Receipt: July 24, 1989.

Notice of Receipt: August 18, 1989 (54 FR 34231).

Applicant: Confidential.

Chemical: (G) Fatty acid amine-organic salts.

Use: (G) Corrosion Inhibitor.

Production Volume: (Confidential).

Number of Customers: (Confidential).

Test Marketing Period: 1 year, commencing on first day of manufacture.

Risk Assessment: Although EPA identified concerns for toxicity to aquatic organisms, the Agency does not expect significant environmental releases of these test market substances. EPA identified concerns for potential irreversible ocular damage due to workers who may be exposed to the substance, however, the Agency does not believe there will be significant human exposure to the TME substances because periods of potential exposure are anticipated to occur infrequently and in conjunction with the use of safety goggles. Therefore, the test market activities will not present an unreasonable risk of injury to health or the environment.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information that comes to its attention which casts significant doubt on its finding that the test marketing activities will not present any unreasonable risk of injury to health or the environment.

Dated: August 29, 1989.

John W. Melone,

Director, Chemical Control Division, Office of Toxic Substances.

[FR Doc. 89-20765 Filed 9-1-89; 8:45 am]

BILLING CODE 6560-50-M

[OPTS-59272B; FRL-3640-6]

Certain Chemicals; Approval of Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of an application for test marketing exemption (TME) under section 5(h)(1) of the Toxic Substances Control Act (TSCA) and 40 CFR 720.38. EPA has designated this application as TME-89-17. The test marketing conditions are described below.

EFFECTIVE DATE: August 29, 1989.

FOR FURTHER INFORMATION CONTACT: Karen K. Pollard, New Chemicals Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Room E-611, 401 M Street SW., Washington, DC 20460 (202) 475-8993.

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use and disposal of the substances for test marketing purposes will not present an unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present an unreasonable risk of injury.

EPA hereby approves TME-89-17. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the TME application, and for the time period and restrictions specified below, will not present an unreasonable risk of injury to health or the environment. Production volume, use, and the number of customers must not exceed that specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

The following additional restrictions apply to TME-89-17:

1. A bill of lading accompanying each shipment must state that the use of the substance is restricted to that approved in the TME.

2. During manufacturing, processing, and use of the substance at any site controlled by the Company, any person under the control of the Company, including employees and contractors, who may be exposed via inhalation to the substance shall use:

a. Organic vapor respirator with dust prefilter.

3. The applicant shall maintain the following records until 5 years after the date they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA:

a. Records of the quantity of the TME substance produced and the date of manufacture.

b. Records of dates of the shipments to each customer and the quantities supplied in each shipment.

c. Copies of the bill of lading that accompanies each shipment of the substance.

T-89-17

Date of Receipt: June 22, 1989.

Notice of Receipt: July 14, 1989 (54 FR 29779).

Applicant: Confidential.

Chemical: (G) Cross linked starch hydrolyzed acrylonitrile copolymer.

Use: (G) Oil fracturing fluid, thickening agent.

Production Volume: Confidential.

Number of Customers: Confidential.

Test Marketing Period: Two year period.

Risk Assessment: EPA identified concerns for delayed lung toxicity to workers exposed via inhalation, based on an analogous chemical substance. However, during manufacturing, processing, and use, this concern will be mitigated with the use of a respirator where there is exposure in the form of a dust or particulate. Therefore, the test market activities will not present an unreasonable risk of injury to health. EPA identified no significant environmental concerns for the test market substance. Therefore, the test market activities will not present an unreasonable risk of injury to the environment.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information come to its attention which casts significant doubt on its finding that the test marketing activities will not present an unreasonable risk of injury to health or the environment.

Dated: August 29, 1989.

John W. Melone,

Director, Chemical Control Division, Office of Toxic Substances.

BILLING CODE 6560-50-M

[FRL-3640-3]

Proposed Determination To Prohibit, Restrict, or Deny the Specification, or the Use for Specification, of an Area as a Disposal Site; South Platte River

AGENCY: Environmental Protection Agency (EPA).

SUMMARY: Section 404(c) of the Clean Water Act (CWA) 33 U.S.C. 1344(c), authorizes the Environmental Protection Agency (EPA) to prohibit or restrict the discharge of dredged or fill material at defined sites into waters of the United States whenever it determines, after notice and opportunity for hearing, that use of such sites for discharge would have an unacceptable adverse impact on various resources, including fisheries, recreation areas and wildlife. Pursuant to section 404(c), EPA Region VIII proposes to prohibit or restrict use of the South Platte River in Douglas and Jefferson Counties, Colorado, as a discharge site for fill material in connection with construction of Two Forks dam and reservoir. On behalf of itself and the Metropolitan Water Providers (Providers), the Denver Board of Water Commissioners (DWB) has applied for a 404 permit to construct and operate Two Forks dam and reservoir which would eliminate approximately 30 miles of coldwater stream fishery, approximately 300 acres of wetland, and 7,300 acres of related upland areas. Inundation of the streams, wetlands and upland areas of the site would have an unacceptable adverse effect on fisheries, recreation and wildlife habitat.

Purpose of Public Notice: EPA seeks comments on this proposed determination to prohibit or restrict the discharge of dredged or fill material into the South Platte River in connection with the construction and operation of Two Forks dam and reservoir. See Solicitation of Comments, at the end of this public notice, for further details.

Public Comment: Comments on or requests for additional copies of the proposed determination should be submitted to the EPA Region VIII's designated Record Clerk, Mary Alice Reedy, U.S. EPA, Region VIII, 8WM-SP, 999 18th Street, Suite 500, Denver, CO 80202-2405.

EPA seeks comments concerning the issues enumerated under the Solicitation of Comments at the end of this notice. Copies of all comments submitted in response to this notice, as well as the administrative record to date, will be made available for public inspection during normal working hours (8:00 a.m. to 4:00 p.m.) at the EPA Region VIII office.

In accordance with EPA regulations at 40 CFR 231.4, the Regional Administrator has decided that public hearings on this proposed 404(c) determination would be in the public interest. Mr. Lee A. DeHihns, III, has been appointed the Regional Decision Officer for purposes of any EPA action on Two Forks dam and reservoir pursuant to section 404(c); since Mr. DeHihns has been designated to exercise all such authority of the Regional Administrator for the Two Forks dam and reservoir project, Mr. DeHihns will hereafter be referred to as the Regional Administrator. A separate public notice will be published in advance of the hearings in the **Federal Register** and local newspapers to announce the date, time and location of these hearings and describe the hearing procedures. Written comments may be submitted prior to the hearings, and both oral and written comments may be presented at the hearings.

Because of the scale of the proposed project, the complexity of issues, and the large volume of information which exists about this project, the Regional Administrator hereby determines that good cause exists to establish a comment deadline of November 17, 1989. This will also provide an opportunity for people to visit the site and make their own observations if they wish to do so.

FOR FURTHER INFORMATION CONTACT: Dr. Gene Reetz, EPA, Region VIII, State Programs Branch, 8WM-SP, 999 18th Street, Suite 500, Denver, CO 80202-2405. (303) 293-1570.

VII. Solicitation of Comments

I. Section 404(c) Procedure

The Clean Water Act, 33 U.S.C. 1251 *et seq.*, prohibits the discharge of pollutants, including dredged or fill material, into waters of the United States except under a permit issued pursuant to section 404 33 U.S.C. 1344. Section 404 establishes a federal permit program to regulate the discharge of dredged or fill material subject to environmental regulations developed by EPA in conjunction with the Department of the Army Corps of Engineers (COE).

The COE may issue permits authorizing dredged and fill material discharges into waters and wetlands if the permits comply with, among other things, EPA's section 404(b)(1) Guidelines at 40 CFR Part 230 (herein after "Guidelines"), except as provided in section 404(c). Section 404(c) authorizes EPA, after providing notice and opportunity for hearing, to prohibit or restrict the discharge to waters of the United States where EPA determines that such use would have an unacceptable adverse effect on wildlife or other specified environmental values. EPA, in its discretion, can exercise section 404(c) authority to "veto" a permit the COE has decided to issue.

Regulations published at 40 CFR part 231 establish the procedures to be followed by EPA in exercising its section 404(c) authority. Whenever the Regional Administrator has reason to believe that use of a site may have unacceptable adverse effects on one or more of the pertinent resources, EPA is to notify the COE and the applicant that EPA intends to issue a proposed determination under section 404(c). Unless the applicant or the COE persuades the Regional Administrator within 15 days that no unacceptable adverse effects will occur, the Regional Administrator is to publish a notice in the **Federal Register** of his proposed determination, soliciting public comment and offering an opportunity for a public hearing. Today's notice represents this step in the process.

Following the close of the comment period, the Regional Administrator may withdraw the proposed determination or prepare a recommended determination. A decision to withdraw will be reviewed by the Assistant Administrator for Water at EPA Headquarters. If the Regional Administrator prepares a recommended determination, he forwards it and the complete administrative record to the Assistant Administrator for Water. The Assistant Administrator then makes the final decision affirming, modifying, or rescinding the recommended determination.

II. Project Description and Background

The proposed Two Forks dam would be located on the South Platte River about 1 mile downstream from the confluence of the North Fork of the South Platte with the South Platte River. The dam would straddle the Jefferson-Douglas County line approximately 24 miles southwest of Denver.

The dam would consist of a concrete arch structure approximately 615 feet high with a crest length of 1,700 feet. The normal maximum reservoir pool level would be at an altitude of 6,547 feet. The reservoir would have a surface area of approximately 7,300 acres and provide an active storage capacity of 1,100,000 acre-feet (AF).

Two Forks dam and reservoir would provide long term storage for flows from the South Platte basin upstream from the dam, as well as storage of transmountain water diversions from the west slope of Colorado. Two Forks dam and reservoir storage would allow the Denver Water Department (DWD) to further integrate the northern and southern sections of its water supply system and improve yields from the existing Williams Fork and Fraser River collection systems. The DWB consists of a five-member board appointed by the Mayor of Denver to formulate the water supply and water development policies

BEST COPY AVAILABLE

for the City and County of Denver. The DWD is the public utility which implements the DWB policy.

The operation of the proposed reservoir, in conjunction with the rest of the DWD water supply system would result in an estimated 98,000 acre-feet of safe yield per year (AFY) from Two Forks dam and reservoir. The Blue River would supply 42 percent of the safe yield; the South Platte, 33 percent; the Fraser River, 20 percent; and the Williams Fork, 5 percent.

In December 1981, the DWB requested the COE be the lead agency in preparation of the Systemwide Environmental Impact Statement (SEIS). The SEIS was required to meet a stipulation of the 1979 Foothills Consent Decree which resulted from litigation initiated in the late 1970s concerning the construction of DWD's Strontia Springs dam and the Foothills water treatment plant. The primary purpose of the SEIS was to document the environmental impacts of the proposed future development of the DWD water supply system. The SEIS was also to include analysis of alternatives, including a No Federal Action alternative, consistent with requirements of the National Environmental Policy Act (NEPA) (42 U.S.C. 1421 *et seq.*).

In February 1984, prior to completion of the SEIS, the DWB requested section 404 permits for construction of the Two Forks dam and reservoir project. The DWB permit request changed the nature of the SEIS from that of a systemwide planning document to a site-specific EIS designed to meet all federal and state permitting requirements for the Two Forks dam and reservoir project.

In January 1987, after three years of extensive studies, review and coordination, the COE provided public notice of availability of the draft environmental impact statement (DEIS) and section 404 permit applications for Two Forks dam and reservoir project. The DEIS clearly indicated that the Two Forks dam and reservoir project was the most environmentally damaging of the alternatives examined. In April 1987, the EPA submitted comments to the COE on the DEIS and rated the draft EU–3 (environmentally unsatisfactory-inadequate information). The primary bases for the EU–3 rating were that adverse environmental impacts of the project would be significant and an appropriate mitigation plan had not been developed. Additionally, EPA expressed concerns that the DEIS inadequately addressed potentially significant water quality standards violations and failed to fully address reasonably available alternatives which had the potential to reduce or obviate the significant adverse environmental impacts. In view of the substantial inadequacies of the document, EPA recommended that the COE prepare a supplement to the DEIS to address these outstanding issues.

In March 1988, the COE issued the final environmental impact statement (FEIS). While improvements, especially a more detailed impact analysis, had been made between the DEIS and FEIS, EPA concluded a number of major issues had not been adequately addressed. EPA's May 26, 1988 comments on the Two Forks dam and reservoir FEIS and public notice identified that major concerns remained, including the (1) lack of a definitive mitigation plan, (2) length of the proposed permit, (3) adequacy of the implementation program for "interim" water supplies and effective conservation, and (4) the lack of a re-opener of the permit process in the future to reassess need. Even with the mitigation measures developed between the DEIS and FEIS, EPA indicated the Two Forks dam and reservoir alternative remained the most environmentally damaging of the alternatives examined.

On June 9, 1988, EPA provided the COE with detailed NEPA comments on the Two Forks dam and reservoir FEIS. The detailed comments addressed (1) alternative water supply sources, (2) mitigation, (3) water quality, (4) aquatics, (5) wetlands and (6) water conservation. In addition, EPA announced that it was considering its options under section 404, including referral to a higher COE authority under section 404(q) and referral of the matter to the Council on Environmental Quality.

During an extensive, post FEIS coordination effort among EPA, the COE, the DWD and the Providers, numerous reviews and proposed modifications of the proposed Two Forks dam and reservoir 404 permit conditions were undertaken. Following these efforts, on March 15, 1989, the COE issued a "notice of intent" to issue the permit for the Two Forks dam and reservoir. In response, EPA informed the COE on March 24, 1989, that EPA would commence the 404(c) process by preparing a public notice in accordance with 40 CFR part 231. During the "15 day" period (which was extended to July 14, 1989 by mutual agreement between the applicant and EPA) available to project applicant's and the COE to convince EPA that unacceptable effects would not occur as a result of the proposed discharge, EPA met numerous times with the DWD, the Providers, and their consultants. In addition, meetings were held with the Governor of Colorado, Mayor of Denver, numerous other elected officials, and representatives of the environmental community. EPA also received, and reviewed, thousands of comments submitted by mail. The materials received during the meetings and the correspondence will be in the Agency administrative record. During this period, visits were made to the Two Forks dam and reservoir site, Cheesman Canyon, the DWD's system and portions of northeastern Colorado.

III. Characteristics of the Site

The South Platte basin upstream from the Two Forks dam and reservoir site is approximately 2,580 square miles and contains a mix of land uses and habitat types. South Park, a large, nearly treeless high mountain basin of approximately 1,000 square miles dominates the upper portion of the basin. The remainder of the basin is dominated by rugged rocky slopes which are heavily forested at the higher altitudes. The primary upland habitat types in the immediate project area are Douglas fir and ponderosa pine coniferous forests, with gambel oak, mountain grassland and mountain shrubland accounting for the majority of the remaining upland habitat.

A. Area Affected by Construction and Inundation

The reservoir would inundate approximately 7,300 acres of upland and aquatic habitat, including approximately 300 acres of vegetated wetlands and approximately 30 miles of riffle and pool complexes. Twenty five wetland community types were identified in the FEIS with the dominant types being cottonwood-willow, wet meadow, willow thicket and willow-sedge. The majority of the wetlands in the immediate project vicinity are small (79 percent are less than 1 acre) and associated with the streamside riparian areas. Wetland mammals common in the area include beaver and muskrat, and wetland birds include Wilson's warbler, belted Kingfisher, Lincoln's sparrow, dipper, and many others.

The fishery in the Two Forks dam and reservoir area is an extremely valuable and unique resource. The Colorado Division of Wildlife examined the historic records concerning the South Platte fisheries and concluded that the entire South Platte basin upsteam from Denver possessed a phenomenal native fishery prior to initial settlement. By the late 1880s this quality fishery was being actively promoted by the railroads in an effort to attract fare-paying fishermen.

This large area of quality fishery has been reduced to limited portions of the basin today, much of which is in the Two Forks dam and reservoir area.

In recognition of the value and uniqueness of the remaining resource, both the U.S. Fish and Wildlife Service (USFWS) and the Colorado Wildlife Commission have selected the South Platte River in the inundation area for special status. The USFWS has designated portions of the stream in the inundation area as a Resource Category 1 indicating the "habitat to be impacted is of high value for evaluation species and is unique and irreplaceable on a national basis or in the ecoregion section". The Colorado Wildlife Commission has designated much of the stream as a Gold Medal trout fishery, one of the highest quality habitats for trout which offers the greatest potential for trophy trout fishing and angling success. The primary game fish in the area are rainbow and brown trout.

It has been suggested that the high quality fishery below Chessman Dam is a result of the presence of the dam itself. While the dam provides a warmer winter thermal regime for the fish, Colorado Division of Wildlife studies have documented the negative effects of Cheesman Dam on the existing fishery. The general conclusion is that fishery management, in the presence of exceptional physical habitat, has resulted in the high quality fishery in the inundation area. This high quality fishery consists of both a high biomass (in 1985 the second highest in the State, second only to the Frying Pan River) and the density of large fish (in 1985 there were more trout greater than 14 inches per acre than any other river in Colorado).

Additional information provided by the DWD during the recent consultation period indicated that of 53 stream segments considered to be high quality fisheries in the western United States, the three South Platte stream segments to be inundated are three of the top ten fisheries on the list. Only two segments of the Frying Pan River in Colorado and single stream segments in Montana, Idaho, Wyoming, Utah, and New Mexico contained fisheries which the DWD considered to be higher quality than the three segments of the South Platte in the inundation area.

The primary recreational resources in the inundated areas are related to the free-flowing stream reaches. The high quality scenic vistas, Gold Medal trout fishing, white water rafting and tubing are further enhanced by the ease of access to the 1.9 million people in the Denver metropolitan area. There is also an extensive system of hiking and motorized vehicle trails in the area.

The adjacent upland habitat provides food and shelter to support game species such as mule deer and elk. Other upland species of concern include Merriam's turkey, bighorn sheep, golden eagle and the endangered bald eagle, and peregrine falcon. The Two Forks dam and reservoir project area comprises a major portion of the known habitat of the threatened pawnee montane skipper butterfly.

B. Area Affected by Hydrologic Operations

(1) West Slope

The primary resources on the west slope of Colorado to be affected by the Two Forks dam and reservoir project are related to basins from which water would be diverted for storage in Two Forks reservoir, or other DWD reservoirs. These basins include the Blue River from Dillon Reservoir downstream, the Williams Fork, the Fraser River and the Colorado River downstream from the confluence with the Fraser. The Blue River downstream from Dillon Reservoir, as well as a 20-mile reach of the Colorado River downstream from the Fraser River, are Gold Medal trout streams. The Blue River and the Colorado River are also used for whitewater recreation and Dillon Reservoir is used for extensive water-based recreation. The Colorado River near Grand Junction contains populations of the endangered Colorado squawfish, bonytail and humpback chubs. The razorback sucker, a species presently proposed for listing as endangered is also found in this area. Much of the stream banks on these west slope rivers are bordered by riparian wetlands.

(2) East Slope

The hydrologically affected areas of the eastern slope of the Continental Divide extend downstream through Nebraska. The fisheries and recreational resources of the North Fork of the South Platte as well as the South Platte downstream from Antero Reservoir would be affected as a result of the operation of Two Forks dam and reservoir. South Boulder Creek from the Moffat tunnel downstream to the Ralston diversion also contains fisheries and recreational resources. Most of these stream reaches are bordered with riparian wetlands. Downstream from Denver the stream channel resources include warmwater fisheries, wetland/riparian areas and wildlife. Riparian areas are critical to this reach.

(3) Nebraska

The Platte River and its surrounding habitat in Nebraska provides essential habitat for many species of migratory birds. Habitat losses have caused concern for the millions of migratory birds that use the Platte River and its associated habitats. There is also concern for the welfare of summer, winter and year-round resident species. Migratory species of major importance include the Federally endangered whooping crane, peregrine falcon, bald eagle, least tern and the threatened piping plover. In addition to these endangered and threatened species, the Platte River supports about one-half million sandhill cranes and 5 to 7 million ducks and geese, including white-fronted geese, Canada geese, mallards, pintails and other waterfowl species during the spring staging period.

The area of the Platte River from Chapman to Lexington, Nebraska, has been designated as Resource Category 1, by the USFWS, indicating the uniqueness of this area. Many species of migratory birds other then waterfowl, sandhill cranes and endangered and threatened species use the Platte River Valley (such as, hawks, owls, wading birds, shore birds, gulls, terns, crows, some game birds, and songbirds).

These birds use the area during spring migration, fall migration, and for reproduction. The migratory species are of international, national, state, regional and local importance. There is also a diverse group of local fish and wildlife which is composed of game species which provide recreational and consumptive use and nongame species whose importance is predominately nonconsumptive, recreational and ecological.

IV. Basis of the Proposed Determination

A. Section 404(c) Criteria

The CWA requires that exercise of the final Section 404(c) authority be based on a determination of "unacceptable adverse effect" to municipal water supplies, shellfish beds, fisheries, wildlife or recreational areas. EPA's reguations define "unacceptable adverse effect" at 40 CFR 231.2(e) as:

> Impact on aquatic or wetland ecosystem which is likely to result in significant degradation of municipal water supplies or significant loss of or damage to fisheries, shellfishing, or wildlife habitat or recreation areas. In evaluating the unacceptability of such impacts, consideration should be given to the relevant portions of the section 404(b)(1) Guidelines (40 CFR part 230).

The Guidelines prohibit the discharge of dredged or fill material into waters of the United States if there is a less environmentally damaging practicable alternative, if it would cause or contribute to a violation of a State water quality standard, or if it would cause or contribute to significant degradation of waters of the United States. Those portions of the Guidelines which are particularly important in evaluating the unacceptability of environmental impacts in this case are:

—Less environmentally damaging practicable alternatives and special aquatic sites (§ 230.10(a));
—Water quality and endangered species impacts (§ 230.10(b));
—Significant degradation of waters of the United States (§ 230.10(c));
—Minimization of adverse impacts to aquatic ecosystems (§ 230.10(d));
—Impacts on existing indigenous aquatic organisms or communities (§ 230.11(e));
—Cumulative effects (§ 230.11(g)); and
—Secondary effects (§ 230.11(h)) to the aquatic ecosystem.

A major consideration during the application of the Guidelines is the definition of the "applicant". Although formally the permit applicant for the Two Forks dam and reservoir is the DWB, the section 404(b)(1) practicability analysis must consider both the DWB and the Providers as the applicant. One of the primary reasons the DWB wishes to build a Two Forks dam and reservoir is to supply water to the Providers. Since the Providers have an 80 percent interest in the cost and yields from Two Forks dam and reservoir, it is logical to consider the Providers as a part of the "applicant". Without the Providers the DWB has no "Need" to build the project. The approach taken by the COE in narrowly defining the applicant to include only the DWB during the practicability analysis while broadly defining the applicant to include the DWB as well as the Providers to establish the need for the project is obviously inconsistent.

B. Adverse Impacts of the Proposed Project

(1) Area Affected by Construction and Inundation.

Construction and filling of the Two Forks dam and reservoir would inundate a diverse riverine/wetland/upland complex which has extremely high fish, wildlife and recreational value. The riffle and pool component includes 21.3 miles of the main stem of the South Platte River and 8.8 miles of the North Fork of the South Platte River. Inundation of these resources would result in the loss of 1,467,800 square feet (33.7 acres) of adult trout habitat with the corresponding loss of sustained trout standing crop estimated at 38,200 pounds. The inundated adjacent wetland/upland component comprises 7,300 acres of various vegetation types, including approximately 300 acres of wetlands.

As described in section III(A), approximately 20 miles of the main stem of the South Platte River in the inundation area has been designated as Gold Medal Trout Waters by the Colorado Wildlife Commission. This stretch of stream has also been designated as a Resource Category 1 by the USFWS. Furthermore, the three South Platte segments to be inundated are unique in terms of their proximity to a major metropolitan area. The outstanding acquatic resource and the readily available stream fishing on these high quality waters would be irretrievably lost as a result of the project.

The significant recreational uses described above would also be lost. The South Platte corridor is the only area within a convenient day-use driving distance from the Denver metropolitan area where a relatively natural setting along a major waterway is available for dispersed public recreation use. This area is also used for whitewater recreation as well as more leisurely tubing and other water-oriented recreation. No comparable substitute recreational opportunities exist in similar proximity to the Denver metropolitan area or any other city of its size.

Major wildlife impacts associated with the Two Forks dam and reservoir project in the inundation area are related to the construction and inundation impacts on 7,300 acres of terrestrial wildlife habitat. Construction and inundation will result in the loss of mule deer, elk, wild turkey and bighorn sheep habitat. The potential also exists that the bighorn sheep herd may be completely lost as a result of stress induced during construction. New roads and construction activities may also disturb potential peregrine falcon nesting.

Two Forks dam and reservoir project has the potential to affect the federally threatened and endangered bald eagle, peregrine falcon and pawnee montane skipper. The pawnee montane skipper was officially listed as a threatened species on September 25, 1986. The present montane skipper range covers about 38 square miles (24,328 acres) along the North and South Forks of the Platte River and their tributaries, Buffalo and Horse Creeks.

The 1,100,000 AF Two Forks dam and reservoir would result in a direct impact on approximately 5,376 acres (22 percent) of the "best" montane skipper habitat. This would result in the loss of 23 to 42 percent of the montane skipper population. Additional significant, but unquantified, impacts to the pawnee montane skipper would result from the construction of recreation facilities around Two Forks Reservoir, boat launching ramps, residential development, the isolation of small pieces of habitat, and the splitting of the habitat along the North Fork of the South Platte and the mainstem of the South Platte into two separate isolated habitats.

The official position of the USFWS is that with full implementation of the conservation measures contained in the biological opinion, the project is not likely to jeopardize the continued existence of the montane skipper. Nevertheless, concern has been expressed that, even with the proposed conservation measures, the project would cause the loss of more than 40 percent of the skipper populations and the species classification could be downgraded from threatened to endangered.

(2) Area Affected by Hydrologic Operations

Two Forks dam and reservoir operations would reduce the flow of west slope streams with the potential for adversely affecting water quality on the west slope. EPA is concerned about potentially significant negative effects in the Williams Fork and Fraser River basins related to the loss of dilution, as well as increased salinity concentrations downstream on the Colorado River. Channel stability effects also have the potential to degrade the physical, chemical and biological integrity of the affected streams; these effects may have been understated in the FEIS. Whitewater recreation on the west slope will be negatively affected through the loss of peak flows.

The FEIS did not contain a detailed analysis of impacts of Two Forks dam and reservoir on fish and wildlife resources on the South Platte River from the Henderson gauge (just north of Denver) to the Colorado-Nebraska state line. During the summer of 1989, the Colorado Division of Wildlife sighted an endangered least tern in this area. The COE has not consulted with the USFWS concerning impacts of Two Forks dam and reservoir on the endangered least tern in Colorado.

(3) Nebraska

Concerns in Nebraska center around the recreational and wildlife habitat

losses, including impacts to endangered species, as a result of reduced peak flows and sediment transport. However, there is wide disagreement among the USFWS, COE and the applicant and the State of Nebraska and national environmental organizations concerning impacts of Two Forks dam and reservoir in Nebraska.

The State of Nebraska has two general concerns with the Two Forks dam and reservoir project. First, the projected impacts are based on what Nebraska believes to be an invalid hydrologic model. The Nebraska Department of Water Resources has reviewed one part of the hydrologic models and believe it is seriously flawed. Nebraska's level of concern has led the State to initiate a lawsuit with Wyoming over the use of a similar model for the Deer Creek dam and reservoir project to the U.S. Supreme Court. Further, the issues of the hydrologic model and sufficiency of the conservation measures are subject of ongoing litigation in U.S. District Court in Nebraska.

Second, Nebraska argues that the mitigation scheme for the endangered species is unauthorized, untested and has no scientific basis. Both the Nebraska Game and Parks Commission and the Department of Water Resources have reviewed the "conservation measures", which replace a water based habitat need with a land based mitigation approach, and found them untested at best and lacking in scientific validity at worst. The National Audubon Society and the National Wildlife Federation are in agreement with Nebraska concerns.

C. Project Purpose, Need and Alternatives

(1) Project Purpose

EPA considers the basic project purpose for Two Forks dam and reservoir is to supply water to the Denver metropolitan area. The Guidelines at 40 CFR 230.10(a) provide that no discharge is to be allowed if there is a practicable alternative to the proposed discharge which would have less adverse impact on the aquatic ecosystem, unless the alternative has other significant adverse environmental consequences. Under 40 CFR 230.10(a)(2) and 230.3(q), an alternative is practicable if it is available and capable of being done considering cost, existing technology and logistics in light of overall project purposes. Obviously, how project purposes are defined will determine the scope of practicable alternatives.

To that end, the DWB developed a ten-point project purpose statement. This was supplemented with three Provider-specific project purposes. The DWB and the Providers argue that EPA is required to use these project purposes in determining the practicability of any alternative to the Two Forks reservoir. They also argue that the EPA cannot ignore an applicant's statement of project purpose or substitute a different project purpose for that of an applicant. In addition, they believe that the EPA should give conclusive deference to a project purpose defined by a public entity.

Under the authority in the CWA and the regulations, the federal government has the responsibility for defining project purpose. Further, project purpose should be defined at its most basic or fundamental level, i.e., without qualifiers or additional criteria often unrelated to the project's basic water supply goal. Consideration is to be afforded an applicant's stated purpose, but it would be inconsistent with the CWA and the Guidelines to simply adopt without question an applicant's definition of the project purpose. Otherwise, an applicant could craft its project purpose so that every possible alternative would be excluded from consideration. This would reduce the Guideline alternative analysis to little more than a procedural requirement to be perfunctorily carried out by the COE.

Furthermore, the COE agrees with this need to avoid unduly narrowing both the purpose of the Two Forks dam and reservoir project and the corresponding scope of alternatives. In its 404(b)(1) Evaluaiton (March 10, 1989) the COE concluded:

> The applicant's stated project purposes taken at face value would seem to preclude the practicability of any alternative to the 1.1 million acre-foot (MAF) Two Forks * * * it would be inappropriate to accept without question or review a statement of project purpose so narrowly defined.

(2) Project Need

EPA questions whether the applicant has demonstrated current need for the proposed project within the appropriate time period, that is, by 2035. There are four factors to consider in determining the need for the proposed Two Forks dam and reservoir: (a) The amount of water needed to meet the expected population increase, (b) the DWD water available in the near future to meet that need, (c) the uncertainty of planning estimates, and (d) the role of water conservation.

(a) Population Forecasting. The COE revised the Denver metropolitan area population estimates between the DEIS and FEIS. Using estimates from the Bureau of Economic Analysis, the population projections made by the Denver Regional Council of Governments (DRCOG) for the DEIS were reduced by 13 percent. Since publication of the FEIS, both the Census Bureau and DRCOG have further reduced population estimates for the Denver metropolitan area.

DRCOG population estimates showed the area gained 0.1 percent during 1988 with births exceeding net migration. More people left the region during 1988 than moved in with a net migration out of approximately 16,750 persons. According to DRCOG's August 1989 projections, even if the Denver metropolitan area is able to recover from its current economic slump and return to growth rates of 2.4 percent per year by 2000, the expected population would be about 8 percent lower in 2010 than that indicated in the FEIS. This projected lower 2010 population would reduce projected water demand by 46,000 AFY. This factor alone would delay the need for additional water supplies by approximately 15 years.

(b) DWD's Available Water Supply. The DWD indicated it will have 107,000 AFY of available water supplies without Two Forks dam and reservoir by 1995. These sources include 21,000 AFY available from current sources not now listed (firm safe yield less current use), 26,600 AFY in conservation reductions by DWD, and 60,000 AFY of sources to become available to DWD by 1995. DWD indicates these latter sources consist of system enhancements, water rights acquisitions, new alluvial wells, water transfers, and water exchanges that have been approved by the water courts. This 60,000 AFY had been listed in the FEIS as "interim supplies". However, DWD indicated these will be available water supplies by 1995.

The DWB indicates it may not be willing to share its available supplies. DWB indicated it cannot share its water supplies because the needs of the residents of Denver must be considered first under its charter obligations. However, the history of the DWB since expanding its service area to the adjoining suburban communities has been to share its available supplies. DWD planning documents indicated its intention to reserve sufficient water to buildout its land area including the proposed new airport. Buildout would entail residential and commercial expansion to current zoning densities. DWD also intends to reserve another 10 percent of its supply. DWD also stated a need to meet the upper limits of certain special contracts and adequate water to build out the land area of its suburban distributors. At the expected rates of growth, such buildout would not occur until long after the 2035 planning period, possibly after the end of the next century.

The FEIS indicated that about 9000 AFY of additional water will be needed for the City and County of Denver through 2035 although Denver's proposed new airport may result in an additional water need. By comparison, DWD has reserved 20 percent, or 19,600 AFY of the proposed Two Forks dam and reservoir project safe yield. If DWB chose to reserve water needed for its own growth until 2035 or the amount that Two Forks would have provided, rather than that needed for many centuries, the remainder of the supplies could be available for the metropolitan area. This remainder is a significant amount since the DWD appears to have or will shortly have, available supplies to meet it needs and those of its suburban distributors until 2035.

Despite the finding of the COE that no sharing would take place, the 1982 Metropolitan Water Development Agreement provides for a means of adding water supply projects to be shared with DWD and the suburban communities. DWB could add its available supplies to the Metropolitan Water Development Agreement thereby providing sources of water for suburban expansion.

(c) Planning Uncertainty. DWD asks that the following "safety factors" be considered in assessing project need: Drought beyond that planned, uncertainties in population estimates, delays in obtaining the first yield of the project, provisions for system failure (primarily a potential failure of the Roberts Tunnel), reduced ability to decrease demand through conservation efforts, and uncertainties in "interim supplies." According to DWD, including or excluding such safety factors can accelerate or delay the need for the additional water supplies by approximately 25 years. However, most of these uncertainties appear to have been accounted for in the water demand projections. These uncertainties indicate that the timing of the Two Forks project itself is uncertain, and therefore, need for the project has not been reasonably established.

DWD's expressed desire to hold the permit for an unusually long period, also indicates uncertainty. The applicant requested that the permit life be at least 25 years with renewal options. This indicates that the need is neither immediate nor compelling. Until many of the above planning uncertainties are resolved, it appears that available supplies and water conservation can provide for additional community growth during the planning time frame. Thus, the Two Forks dam and reservoir, and the concurrent loss of unique environmental resources, can be deferred.

(d) Role of Water Conservation. The COE has indicated that, as a condition of permit issuance, it would require approximately an 8 percent reduction (or 42,000 AFY) in the anticipated water demand by 2035 to be achieved through water conservation programs. DWD plans to achieve approximately 26,600 AFY of savings by 1995 by completing its ongoing meter installation plan and other conservation measures. DWD also has stated its willingness to make its conservation water available for future growth of Denver and possibly for use by the suburbs.

Experience in other communities in the western U.S. has shown that effective water conservation programs, such as rate increases and financial rebate programs for plumbing and irrigation improvements, can reduce water demand by 15 to 30 percent over 5 to 10 years. Reduction of water use by the proposed 8 percent over anticipated use is far less than can be achieved by a utility determined to cut customer use. Such savings could be achieved without changing lifestyles or landscaping practices. The water saved would also be available to supply community growth and thus avoid additional water supply projects.

DWD agreed, as part of the Foothills Consent Decree in 1979, to take steps to reduce per capita consumption by approximately 20 percent between 1979 and 1999. Yet, information developed by the COE during the NEPA process projects increased water use with higher personal incomes and household size reductions and, thus, makes this prior 20 percent reduction commitment more difficult to attain.

In fact, the COE used these factors to conclude that per capita water use would increase.

The COE has indicated that if the per capita consumption goals of the 1979 Foothills Consent Decree were attained, an additional 29,000 AFY would not be needed by 2000. Reasonable, cost-effective conservation measures are available to achieve the proposed permit reduction of 42,000 AFY and the additional 29,000 AFY necessary to achieve the Foothills goals. Further reductions of water conservation may be possible as demonstrated in other communities.

EPA is now conducting a detailed investigation of cost effective water conservation programs suitable for Denver as part of the EPA 1989 evaluation of the DWD compliance with the Foothills Consent Decree conservation goals. A draft report on this effort is expected by January 1990. This evaluation should define additional programs suitable for Denver to achieve further water savings.

(3) Alternatives

The following discussion concentrates on alternative supply solutions analyzed in the COE's regulatory permit process and is by no means complete. The water supply needs of the Denver metropolitan area have been extensively studied at the local, State and Federal levels for many years, and many alternatives have been proposed. However, today's notice includes the proposed determination of whether there is a practicable, less environmentally damaging alternative, or combination of alternatives, to supply the Denver metropolitan area with sufficient water supply to replace that which would be available should Two Forks dam and reservoir be constructed. The available information supports the conclusion that there are such alternatives.

(a) Structural. The FEIS examined in detail four practicable, structural alternatives to the 1,100,000 AF Two Forks dam and reservoir project: 660,000 AF New Cheesman dam and reservoir, 400,000 AF Two Forks dam and reservoir, 400,000 AF Estabrook dam and reservoir and 200,000 AF Estabrook dam and reservoir. These projects would supply a safe yield of 68,000, 62,000, 58,000, and 46,000 AFY to the Denver metropolitan area respectively. While these are not the only alternatives available to supply water to the Metropolitan area, they were considered reasonable alternatives for the NEPA analysis, and, determined to be practicable under the Guidelines. Each of these structural alternatives is less environmentally damaging than Two Forks dam and reservoir. Consequently, it is questionable whether Two Forks dam and reservoir complies with the Guidelines, specifically § 230.10(a).

(b) No Federal Action. The FEIS presented a practicable, No Federal Action alternative, comprised primarily of ground-water sources and conservation, which would result in a yield of approximately 79,000 AFY. The 1982 Metropolitan Water Development Agreement is the principal basis by which the No Federal Action alternative is considered practicable since this constitutes the existing institutional arrangement by which other water can be shared or developed. Failure to question the DWB's ability to enter into

other water sharing arrangements and by accepting the pre-existing agreements, allows the DWB to characterize the project so as to preclude the existence of practicable alternatives. This type of pre-permit application action which attempts to limit the range of available alternative is not binding. Otherwise an applicant could, through agreements or other means, foreclose all possible alternatives except its own.

(c) Ground Water. There are sufficient ground-water resources stored in aquifers beneath the Denver metropolitan area to warrant the careful use of those resources, in conjunction with surface waters, as part of an alternative supply to Two Forks Dam and Reservoir. The area's ground water can be categorized as having a "renewable" portion (basically the ground water in the alluvial aquifers and a small portion of the ground water in the bedrock aquifers) and a "non-renewable" portion (predominately the ground water found in the bedrock aquifers). The quality of water contained in the bedrock aquifers is generally suitable for drinking with little or no treatment.

Ground water contained in the bedrock aquifers beneath the metropolitan area is legally and physically available for use if a sound water management plan can be developed. Based on estimates by the Colorado State Engineer's Office, EPA has calculated that approximately 69 million acre-feet of legally and physically recoverable ground water are contained in the five major aquifers beneath the 1,440 square-mile Denver metropolitan area. Even if only a portion of this would be economically available, a sufficient total ground-water supply exists to expand ground water use into the next several centuries.

While EPA recognizes that a portion of the ground water can be considered as a "non-renewable" resource, this is not an excluding criterion for the purposes of the Guidelines analysis. In order for the ground water within the Denver metropolitan area to be used in conjunction with surface water, Denver and its suburbs need to consider locating wells throughout the area and integrating this source directly into their existing water supply systems. For example, the U.S. Geological Survey estimates that 3,000 AFY could be used by Denver to provide water for three city parks. As noted in the FEIS, opportunities exist for nontributary ground water to supply an additional supply of 30,000 AFY. This could mean depleting the ground water at a somewhat faster rate than its recharge. However, with the large volume of water economically available, such a rate of depletion could be sustained for well over 1000 years.

For the purposes of the alternatives to the Two Forks dam and reservoir, ground water should be considered as part of a practicable approach to meeting metropolitan water supply needs. Just because a resource is finite does not mean the resource is unavailable for use; rather, its use must be judicious and coordinated with other available supplies.

D. Other Issues

1. Metropolitan Cooperation

The DWD has stated in its permit application that one purpose of the proposed Two Forks dam and reservoir is to provide water to share as an inducement to extend non-water related cooperation among community governments. Community officials have expressed a variety of hopes for future cooperative efforts to share the costs of hospital, cultural, and transportation facilities. As part of these cooperative efforts, some officials hope to consolidate regional land use planning to reduce the costs and environmental burdens of independent decision making. The applicants have suggested that such sharing and cooperation depend upon a sufficiently large water supply.

Many intergovernmental relationships are now well established and such arrangements are likely to expand where mutually beneficial. The current efforts by the City and County of Denver to offer water to its neighboring communities so they can then better share regional costs and burdens is an exciting prospect for community leaders and is endorsed by EPA.

The success of these cooperative efforts appear to be dependant on the amount of water available for sharing and not on the construction of the Two Forks dam and reservoir or any other project. Since its inception, the DWB has had a history of sharing its well-managed water supply system. This practice will continue with or without the Two Forks project or as long as sufficient water is available to share. So long as sufficient water is available, conditions appear conducive to metropolitan cooperation.

As noted above, the DWB indicated that its available sources will amount to 107,000 AFY by 1995. Because the City and County of Denver may only require as much as 9,000 AFY for its own growth during the planning period or choose to reserve that amount it would have retained from the Two Forks dam and reservoir (19,600 AFY), sufficient water appears to be available to allow the sharing of DWD's water to promote metropolitan cooperation without the Two Forks dam and reservoir. Moreover, the 1982 Metropolitan Water Development agreement provides an existing contractual arrangement for this purpose. In addition, the DWB has had, and indicated in its April 1989 policy statement it will continue to have, a policy of sharing available water beyond that needed to meet its direct charter obligations to the residents of Denver.

(2) Agricultural Water Exchanges and Transfers

One of the applicant's stated project purposes is to maintain Colorado's irrigated agricultural economy. Some project proponents have asserted that without the Two Fords dam and reservoir, Providers will acquire irrigation water, resulting in the "dry-up" of irrigated lands. Those proponents also alleged that this would result in substantial reduction in wetlands and other wildlife habitat. While recognizing the importance of agriculture in Colorado's economy, EPA agrees with the COE's analysis of the applicant's project purpose relating to protecting the state's agricultural economy. Protection of the States' agricultural economy is indeed an important planning goal.

It should be noted that irrigated agriculture in Colorado accounts for approximately 85–90 percent of total water use, whereas municipal and industrial use accounts for only 10–15 percent. Colorado water law permits the transfer of water rights and such transfers occur in a basically "free market" forum within the current Colorado water court process. Given the substantial proportion of water used by agriculture, and the legal system's flexibility, it is not surprising that, even without a decision of Two Forks dam and reservoir, Provider communities (Aurora and Thornton for example) have acquired agricultural water rights with the intent of transferring those rights to municipal uses.

There is no clear evidence that agricultural "dry-up" will occur as a result of a Two Forks dam and reservoir permit denial. During the "15-day" consultation period, local experts could not agree on the potential effects on irrigated agriculture of either proceeding, or not proceeding, with Two Forks dam and reservoir. No documentation was provided which indicated that the historical trends in irrigated agriculture would change with, or without, Two Forks dam and reservoir. It would appear that local and regional land use decisions governing urban, commercial and industrial expansion, coupled with agriculture's "soft" economic situation, have driven the shifting patterns of irrigated agriculture in Colorado.

Acquisition of agricultural waters can be a component for meeting metropolitan water supply needs. Such transfers can also occur with adequate and appropriate environmental safeguards. There may be creative arrangements (such as, dry year leasing or acquisition of water "salvaged" through improved irrigation practices) which could benefit both the agricultural community and the metropolitan area and also protect environmental values. Some arrangements could be implemented now, whereas others (use of "salvaged" water) may require institutional changes.

The Governor of Colorado, in his 1988 "A Colorado Agenda for Water", made a number of observations and recommendations which have a bearing on these issues. "* * * I believe the General Assembly should investigate ways to encourage water savings in the State's agricultural sector. Agriculture uses the vast majority of our water, and thus the potential for savings are tremendous. Yet our current system discourages water conservation by Agricultural users." The Governor further observed, "We know that there are a number of ways to reduce water consumption without reducing agricultural production, and we know that these methods often are cheaper than building a dam. We should seriously consider legislation which encourages farmers to find those savings and allow them to profit from their initiative." The Governor's statement also noted the need to balance a diversity of competing interests (protection of basin of origin, municipal, agriculture, environmental and recreational uses) and the desirability of fostering greater metropolitan cooperation.

(3) Current and Potential Use of the Reservoir Area

During the initial "15-day" consultation period, several commenters expressed the opinion that the area to be directly inundated by Two Forks reservoir was not especially valuable because it was "trashed-out" and "poorly managed". The areas to be inundated range from pristine (such as Cheesman Canyon) to areas of virtually uncontrolled use (such as portions of the lower North Fork of the South Platte). No doubt the resources and recreational opportunities of the entire area could be better managed to capitalize on the outstanding natural amenities and recreational opportunities.

V. Proposed Determination

The Regional Administrator proposes to recommend that the discharge of dredged or fill material into the South Platte River at the Two Forks dam and reservoir site be restricted or prohibited for the purpose of constructing the proposed Two Forks dam and reservoir and ancillary facilities. Based on current information, the adverse effects of the Two Forks dam and reservoir would be unacceptable. Moreover, it appears these impacts are partly or entirely unnecessary and avoidable.

This proposed determination is based primarily on the adverse impacts to fisheries, wildlife and recreational resources. EPA has reason to believe the project would cause or contribute to significant degradation of waters of the United States and violate the Guidelines. It would directly destroy approximately 30 miles of riffle and pool complexes, approximately 300 acres of wetlands, an irreplaceable mix of recreational values readily available to the Denver metropolitan area population, and 22 percent of the known pawnee montane skipper habitat. In addition, operation of the Two Forks dam and reservoir has the potential to degrade both east and west slope recreational opportunities, and threatened and endangered fish and bird populations in Colorado and Nebraska, as well as other wildlife such as the big horn sheep. Furthermore, there are less environmentally damaging practicable alternatives for meeting regional water supply needs. Impacts which are avoidable are unacceptable.

VI. Mitigation

As discussed above, there are practicable, less damaging alternatives to the Two Forks dam and reservoir project, without considering mitigation of potential adverse effects. However, because of the great emphasis which has been placed on mitigation throughout the COE's NEPA and permitting process, the following summarizes the Agency's major concerns with the environmental mitigation contained in the proposed Section 404 permit conditions.

The proposed Section 404 permit conditions provide for mitigation efforts for 16 different resources. The COE recognized Two Forks dam and reservoir would result in significant visual impacts but chose to defer to the U.S. Forest Service for permit conditions for this resource (Permit Conditions page 16). During the 404(q) process, the permit conditions were altered in an attempt to address EPA's concerns with the wetland, aquatic life, water quality, conservation and available supplies. However, the mitigation plan remains insufficient to fully replace the values which would be lost as a result of Two Forks dam and reservoir construction and operation.

For example, replacement of 90 percent of the lost instream trout biomass is inappropriate. Mitigation should be used to replace all the values lost. Every effort should be made to replace the value lost with equal values. The mitigation proposal for Two Forks dam and reservoir would allow, for example, replacement of one mile of 400 pound per acre stream fishery with 2 miles of 200 pound per acre stream fishery. This approach to mitigation does not address the real value of the resource to be lost, that is, there are very few 400 pound per acre stream fisheries. This inappropriate, out-of-kind mitigation is equally unaccepatable in the replacement of the quality fishing recreational values.

Furthermore, the COE and the applicant believe all practicable steps to mitigate the impacts have been taken, the permit conditions require that additional mitigation be pursued if the proposed mitigation proves ineffective. This logic renders the recreation and aquatic permit conditions suspect. It is difficult to see how the applicant will be able to pursue mitigation to replace unsuccessful mitigation if the applicant has already determined there is presently no additional practicable mitigation available.

EPA is also concerned with the after-the-impact approach to aquatic mitigation. The net result of this approach is that the risk of loss is placed on the resource. Much of the resource will be lost before the mitigation methods can be proven to work. A similar approach is used for the threatened pawnee montane skipper.

These concerns with the mitigation plan underscore the conclusion that the resource is of great value, that the resource is difficult if not impossible to replace in-kind, and impacts to this resource should be avoided if less damaging, practicable alternatives are available. As note above, there are less damaging, practicable alternatives.

VII. Solicitation of Comments

EPA is today soliciting comments on all issues discussed in this notice. In particular, comments on the likely adverse impacts to fish, wildlife and recreational values of the rivers,

streams, and wetlands in all areas which would be affected by the construction and operation of Two Forks dam and reservoir are requested. All relevant data, studies, knowledge of studies, or informal observations are appropriate. Where comments or materials have been previously submitted to EPA, it is sufficient to reference them by title and date of submission rather than resubmitting them.

While the significant loss of aquatic and recreational values and the availability of less damaging practicable alternatives serve as EPA's main bases for this proposed 404(c) determination, EPA Region VIII has additional concerns with the proposed project, including water quality impacts, threatened and endangered species, alternatives and project need. Therefore, EPA also solicits comments on the following aspects of the project:

(1) The potential for the Two Forks dam and reservoir project to violate State water quality standards, especially as related to potential channel stability alterations;

(2) Whether, based on information collected since preparation of the biological opinions, the threatened and endangered species consultation should be reinitiated for any of the species potentially affected by the Two Forks dam and reservoir project;

(3) Information on the wildlife species which would be affected by changes in the aquatic ecosystem;

(4) Information on the recreational uses which would be affected;

(5) Information on the availability of less environmentally damaging practicable alternatives to satisfy the basic project purpose of municipal and industrial water supply, taking into account cost, technology, and logistics, and including other alternatives which do not require the discharge of dredged material into the waters of the United States;

(6) Whether the discharge should be prohibited forever, allowed as proposed by the COE, or restricted in time, size or other manner; and

(7) Information on recent population projections by DRCOG, information on what criteria Denver should utilize to supply water under its charter obligation, and the affect of planning uncertainties on water supply planning.

Dated: August 29, 1989.

Lee A. DeHihns, III,

Regional Decision Officer.

[FR Doc. 89-20768 Filed 9-1-89; 8:45 am]

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirement Submitted to Office of Management and Budget for Review

August 28, 1989.

The Federal Communications Commission has submitted the following information collection requirement to the Office of Management and Budget for review and clearance under the Paperwork Reduction Act, as amended (44 U.S.C. 3501–3520).

Copies of the submission may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037. Persons wishing to comment on this information collection should contact Eyvette Flynn, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, (202) 395–3785. A copy of the comments should also be sent to the Commission. For further information contact Jerry Cowden, Federal Communications Commission, (202) 632–7513.

Please note: The Commission has requested emergency processing of this item under the provisions of 5 CFR 1320.18 and has requested that the Office of Management and Budget take action by August 28, 1989.

OMB Number: None.

Title: Tariff Update Format.

Action: New collection.

Respondents: Businesses.

Frequency of Response: One-time response.

Estimated Annual Burden: 39 responses; 3,900 hours; 100 hours average burden per respondent.

Needs and Uses: The information is needed to provide a simplified, consistent format for a scheduled update of rates charged by local telephone companies. Use of the format allows waivers of other cost support rules and a more focused and efficient review by the FCC and the public. Repondents are local telephone companies, with the exception of most small telephone companies.

Text of Tariff Update Format

In accordance with the provision of 5 CFR 1320.15(b)(1) the text of the Tariff Update format follows in its entirety.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

BILLING CODE 6712-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-838-DR]

District of Columbia; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the District of Columbia (FEMA-838-DR), dated August 28, 1989, and related determinations.

DATED: August 28, 1989.

FOR FURTHER INFORMATION CONTACT: Neva K. Elliott, Disaster Assistance Programs, Federal Emegency Management Agency, Washington, DC 20472 (202) 646-3614.

Notice

Notice is hereby given that, in a letter dated August 28, 1989, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*, Pub. L. 93-288, as amended by Pub. L. 100-707), as follows:

> I have determined that the damage in certain areas of the District of Columbia, resulting from severe storms and high winds on June 14-15, 1989, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 93-288, as amended by Public Law 100-707. I, therefore, declare that such a major disaster exists in the District of Columbia.
>
> In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.
>
> You are authorized to provide Public Assistance in the designated areas. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under Public Law 93-288, as amended by Public Law 100-707, for Public Assistance will be limited to 75 percent of the total eligible costs.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint James F. Oesterling of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the District of Columbia to have been affected adversely by this declared major disaster:

The District of Columbia for Public Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Robert H. Morris,

Acting Director, Federal Emergency Management Agency.

BILLING CODE 6720-01-M

FEDERAL RESERVE SYSTEM

Norwest Corp.; Request for Exemption

Norwest Corporation, Minneapolis, Minnesota ("Norwest"), has requested, pursuant to section 106 of the Bank Holding Company Act Amendments of 1970 (12 U.S.C. 1971 *et seq.*) ("section 106"), that the Board grant an exception in order to permit the bundling of credit card products, which are offered through only one of its banking affiliates, with traditional banking products offered by its other affiliates at an aggregated lower cost to the customer. Although section 106 permits a bank to fix or to vary the consideration for extending credit or furnishing services on condition that a customer also obtain a traditional banking service (loan, discount, deposit or trust service) from that bank, it prohibits a bank from engaging in these same activities on condition that the customer obtain any additional credit or services from any other subsidiary of the bank's parent bank holding company. The Board may, however, grant an exception that is not contrary to the purposes of this provision.

Norwest proposes to bundle credit card products, currently offered through only one of its banking affiliates, with traditional banking products offered by its other banking affiliates in such a way that the total price to the consumer for the bundled products would be lower than the price to the consumer for the products if purchased separately. For example, credit card products could be made available at a reduced interest rate or with a waiver for the first year of a service fee if purchased in conjunction with other traditional banking products offered by other banking affiliates. All products offered by other banking affiliates would continue to be available separately to customers at separate prices.

In support of its request, Norwest maintains that section 106's legislative history reveals a Congressional intent to prohibit anti-competitive conduct. Norwest contends that its proposal is not anti-competitive in that the customer would not be required either directly or indirectly to accept one product in order to obtain another product. All products are available separately at separate prices and the prices of products are kept competitive through normal market forces. Norwest concludes that it does not have enough economic power in the national credit card market to cause a lessening of competition in the markets for the other traditional banking products with which credit cards may be bundled. Customers may freely choose to purchase bundled or separate services from Norwest affiliates or from competitors.

Norwest also maintains that its proposal is consistent with the legislative history of section 106 because it only involves the bundling of traditional banking products. Norwest notes that Congress had no intent to prohibit traditional banking practices under section 106 and argues that the only difference between its current proposal and activities expressly authorized under section 106 is the fact that Norwest proposes to bundle the products offered by more than one affiliate.

Notice of the request is published solely in order to seek the views of interested persons on the issues presented by the request and does not represent a determination by the Board that the request meets or is likely to meet the standards of section 106.

The request may be inspected at the offices of the Board of Governors.

Any comments or requests for hearing should be submitted in writing and received by William W. Wiles, Secretary of the Board of Governors of the Federal Reserve System, Washington, DC 20551, not later than October 2, 1989.

Board of Governors of the Federal Reserve System, August 29, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

[FR Doc. 89-20715 Filed 9-1-89; 8:45am]

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 89F-0343]

Minnesota Mining & Manufacturing Co.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Minnesota Mining & Manufacturing Co. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of a copolymer of vinylidene fluoride and hexafluoropropene as an adjuvant for ethylene-vinyl acetate polymers for food-contact use.

FOR FURTHER INFORMATION CONTACT: Marvin D. Mack, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5) (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 9B4154) has been filed by Minnesota Mining & Manufacturing Co., 3M Center, St. Paul, MN 55144-1000, proposing that § 177.1350 *Ethylene-vinyl acetate copolymers* (21 CFR 177.1350) be amended to provide for the safe use of a copolymer of vinylidene fluoride and hexafluoropropene as an adjuvant for ethylene-vinyl acetate polymers for food-contact use.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: August 24, 1989.

Fred R. Shank,

Acting Director, Center for Food Safety and Applied Nutrition.

[FR Doc. 89-20733 Filed 9-1-89; 8:45am]

BILLING CODE 4160-01-M

Health Care Financing Administration

Statement of Organization, Functions, and Delegations of Authority

Part F. of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services, Health Care Financing Administration (HCFA), (**Federal Register**, Vol. 48, No. 198, pg. 46440, dated Wednesday, October 12, 1983 and Vol. 51, No. 63, pg. 11348, dated Wednesday, April 2, 1986) is amended to reflect a realignment of functions within the Division of Contractor Financial Management and within the Division of Provider Audits, Office of Financial Operations, Bureau of Program

Operations, Associate Administrator for Operations.

The specific changes to Part F. are as follows:

- Section FP.20.A.4.a., Division of Contractor Financial Management (FPA71) is amended by deleting the functional statement in its entirety and replacing it with the following functional statement:

a. Division of Contractor Financial Management (FPA71)

Provides leadership in developing, implementing and evaluating policies and procedures for the Medicare contractor budget process. Formulates and approves the national budget for Medicare contractor administrative costs. Develops, implements and monitors cash management letter-of-credit procedures for contractors and servicing banks. Develops, implements, and monitors fund control for the Medicare contractor administrative costs. Sets requirements and procedures for contractors and regional offices to prepare and submit periodic budget estimates and reports. Analyzes and evaluates budget estimates submitted by contractors for ADP systems proposals. Participates in experimental contract Request for Proposal (RFP) preparation and proposal evaluation made by the Bureau of Program Operations (BPO). Participates in negotiations and approval of all related price adjustments. Reviews periodic contractor expenditure reports to evaluate budget execution and determinations of the allowability of costs. Designs, maintains and, as necessary, prepares specifications to revise the Medicare financial administration and benefit payment systems. Analyzes contractor administrative cost data and trends. Directs and prepares instructions to guide regional office performance to assure consistency in implementation of financial policy. Interprets cost reimbursement principles and policies for contractors related to operational accounting issues. Determines compliance with accepted accounting principles and procedures. Participates in the formulation of regulations and development of administrative cost and benefit outlays reporting policy for the Catastrophic/Drug Program. Establishes procedures for the reporting of Catastrophic/Drug Program expenditures.

- Section FP.20.A.4.d., Division of Provider Audits (FPA76) is amended by deleting the functional statement in its entirety and replacing it with the following functional statement:

d. Division of Provider Audits (FPA76)

Analyzes regulations, executive orders, policies and legislative proposals and assesses their financial impact on the audit budget. Develops the plan, necessary audit programs, guidelines and instructions for the implementation of current and future regulations, legislation and court orders. Establishes audit protocols, priorities and procedures for use in performing compliance reviews required by applicable legislation, i.e., drug processors under the Catastrophic Drug provision. Plans and develops audit strategies that can be employed to improve and enhance the management of the audit function. Develops rationale for the audit and reimbursement portion of the national contractor budget and legislative audit budget package applicable to catastrophic and drug legislation. Develops the return ratio requirements for provider audits to assure maximum return on investment (expenditures). Reviews and evaluates contractor audit and reimbursement reports to determine the effectiveness of contractor audit and reimbursement performance and compliance with established audit guidelines, priorities, funding limitations and workload objectives. Analyzes and researches issues and responds to reimbursement and financial audit reports and studies prepared by the Office of Inspector General and General Accounting Office and other components both within and outside HCFA. Coordinates Provider Statistical & Reimbursement Report (PS&R) related activities with contractors, Blue Cross and Blue Shield Association (BCBSA) and HCFA central and regional office components. Implements, maintains and develops future enhancements for a uniform system of audit and reimbursement data collection and retrieval (System Tracking for Audit and Reimbursement) which supports the PRISM system, and manages the timely development and implementation. Plans, monitors and reports on special audit projects (e.g., uniform cost reports, skilled nursing facility and home health agency prospective payment). Conducts national and regional training for contractors on audit and reimbursement issues.

Dated: August 23, 1989.

Robert A. Streimer,

Acting Associate Administrator for Management.

[FR Doc. 89-20740 Filed 9-1-89; 8:45 am]

BILLING CODE 4120-01-M

National Institutes of Health

National Heart, Lung, and Blood Institute; Opportunity for a Cooperative Research and Development Agreement and an Exclusive License To Pursue Research and Development of a Chinese Hamster Ovary Cell Line That Produces B19 Proteins

AGENCY: National Institutes of Health, Public Health Service, HHS.

ACTION: Notice.

SUMMARY: Offer of an opportunity for collaborative research and apply for an exclusive license for: scientific and commercial production of a genetically-engineered cell line that produces empty capsids of B19 (human) parvovirus; development of a B19 parvovirus diagnostic and of a vaccine against the virus; exploration of potential packaging of this cell line for use in gene therapy; and development of the nonstructural protein of parvovirus as a cytotoxic reagent, using the cell line and other techniques.

ADDRESS: Responses and requests for further information, including a copy of the patent application, may be addressed to Mr. Stephen A. Ficca, Executive Officer and Technology Development Coordinator, National Heart, Lung, and Blood Institute, National Institutes of Health, Building 31, Room 5A50, 9000 Rockville Pike, Bethesda, Maryland 20892, (301) 496-2411.

DATE: Interested parties should submit a written plan for development and marketing of the invention within 30 days from the date of this notice.

Late or incomplete responses will not be considered. If the Government determines that it is necessary, timely respondees may be allowed another opportunity to provide additional information, to present an oral statement, and to answer questions. A potential awardee's failure to submit a timely response will be considered in the Government's assessment of any objection raised by the company to the granting of an exclusive patent license to the awardee finally selected.

SUPPLEMENTARY INFORMATION: The Clinical Hematology Branch (CHB), National Heart, Lung, and Blood Institute (NHLBI) of the National Institutes of Health (NIH) seeks an exclusive licensee under U.S. Patent (pending) "Chinese Hamster Ovary Cell Line Producing B19 Proteins" who will also collaborate with NHLBI to pursue efficiently and effectively further research and development of a Chinese hamster ovary (CHO) cell line that produces B19 proteins to (1) develop an assay for antibodies to B19 parvovirus; (2) produce a vaccine to protect patients against infection with B19 parvovirus; (3) explore the potential of the cell line for transfer of genetic material into bone marrow cells for purposes of gene therapy; (4) and utilize this cell line and other techniques in developing the nonstructural protein of B19 parvovirus as a cytotoxic reagent. Scientists from the CHB, NHLBI, have used recombinant DNA technology to engineer a stable cell line that produces the major and minor structural proteins of B19 parvovirus. These proteins are produced in natural proportions and self-assemble into noninfectious virion capsids. These capsids are indistinguishable from infectious virus present in serum and infected bone marrow cells by electron microscopy and immunoblot. This cell line may be useful in developing practical assays for B19 parvovirus antibody and also serve as the basis for a vaccine for the virus. Parvoviruses have been proposed as vectors for gene therapy, and this cell line might be employed for packaging of other cells. Finally, the nonstructural protein of B19 parvovirus is toxic to proliferating cells and may have potential usefulness in the treatment of cancer.

The Government seeks a company which, in accordance with the requirements of the regulations governing the licensing of Government-owned inventions (37 CFR 404.8), presents the most meritorious plan for: (1) The commercial exploitation of a genetically-engineered cell line that produces empty capsids of B19 (human) parvovirus with the best terms for the Government; and (2) the further development of the invention through collaborative research with the NHLBI. Specifically, the company must be able to:

(1) Culture 3-11-5 CHO cells under conditions that maintain stable expression of the transfected genes and production of empty capsids. The company will provide the collaborating Government laboratory with sufficient quantities of empty capsids and metabolically radioactively-labelled empty capsids for investigative purposes. The company will assure minimal lot-to-lot variation by determination of B19 protein production and encapsidation using standard techniques.

(2) Develop an immunological assay for anti-B19 parvovirus IgM and IgG antibodies utilizing the products of the cell line. The company will be responsible for quality control of this product, its manufacture, and its marketing. Until commercial distribution occurs, the company will provide to selected state and other government laboratories designated by NHLBI sufficient CHO 3-11-5 lysate for the performance of such antibody tests. The company will be responsible for expeditiously achieving regulatory approval of this assay, and any other assays, by the Food and Drug Administration.

(3) Develop a vaccine based on the CHO 3-11-5 cell line for the purpose of protecting patients with underlying hemolysis who are at risk for transient aplastic crisis; immunosuppressed and susceptible patients who are at risk for chronic anemia due to persistent parvovirus infection; pregnant women who are susceptible to this virus from infection and possible fetal loss; and for broader vaccination of the general population if indicated. The company will be responsible for performing adequate preclinical and clinical trials of such a vaccine, including support of basic immunologic studies in the collaborating laboratory.

CRITERIA FOR REVIEW OF APPLICANT COMPANIES' PLANS: Companies' plans will be reviewed by a panel of senior Government scientists. The principal criteria used in the review will be those set forth by 37 CFR 404.7(a)(1)(ii)–(iv); and:

(1) Expertise and experience in mass mammalian cell line development, cell culture, and purification of proteins from cell culture, including quality control of the cell line and its expressed protein.

(2) Expertise and experience in protein chemistry and virology that would insure the ability to isolate and characterize empty capsid particles.

(3) Expertise and experience in developing diagnostic assays.

(4) Expertise and experience in developing vaccines.

(5) Expertise and experience in related methods for the support of this research, including prior experience in the construction of recombinant genes for production of vaccine molecules, production of monoclonal antibodies and hyperimmune sera, and standard molecular assays for protein, DNA, and RNA.

(6) Expertise and experience in the design, conduct, and evaluation of clinical studies for development of biological products, including recombinant proteins.

(7) Prior development and regulatory experience with recombinant proteins that have been evaluated in clinical studies under INDA.

(8) Willingness to share in the cost and the development of 3-11-5 cell line to its fullest potential by collaboration with and support of the collaborating Government laboratory. Specifically, the company will support basic laboratory work in B19 parvovirus directed towards utilizing the cell line for gene therapy and utilizing the nonstructural protein of B19 parvovirus. The company will provide financial support to be used for supplies, travel and equipment and provide at least 4 individuals to work in the Clinical Hematology Branch laboratory.

(9) Commitment to pay to the United States Government reasonable royalties once the diagnostic product or vaccine is marketed at rates to be negotiated, based on rates set forth in the company's plan.

(10) Agreement to comply with the Department of Health and Human Services' rules involving human/animal subjects.

(11) Appropriateness of the plans for efficiently and effectively pursuing this research and development, including milestones and deadlines for a vaccine and diagnostic products.

If it is necessary, in order to determine which applicant is best qualified to commercialize the invention in collaboration with the NHLBI, offerors may be allowed an opportunity to provide additional information, present an oral statement, and/or answer questions.

Upon selection of the best qualified applicant, an exclusive license will be negotiated in accordance with the procedures of 37 CFR part 404. A Cooperative Research and Development Agreement (CRADA) will be negotiated on the basis of the NIH Model CRADA, with the exclusive licensee selected under 37 CFR part 404.

Dated: August 28, 1989.

William F. Raub,

Acting Director, National Institutes of Health.

BILLING CODE 4140-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N-89-2041]

Submission of Proposed Information Collection to the Office of Management and Budget

AGENCY: Office of Administration, HUD.

ACTION: Notice.

BEST COPY AVAILABLE

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESS: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 755–6050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total numbers of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: August 29, 1989.

David S. Cristy,

Deputy Director, Information Policy and Management Division.

Proposal: Information Collection and Recordkeeping Requirements on Loan Servicing—section 223(f) and 221(d) Coinsurance Programs.

Office: Housing.

Description of the Need for the Information and Its Porposed Use: The information collected includes items which coinsuring lenders collect from mortgagors to monitor project performance and management as well as items which HUD collects from coinsuring lenders to monitor and to ensure effective servicing of section 223(f) and 221(d) coinsured loans.

Form Number: HUD–92329, 93479, 93480, 93841, 92410, 93486, 949, 9250, 92458, 92266, 92426, 2744A, 2744B, 2744C, 2744D, and 2744F.

Respondents: Businesses or Other For-Profit.

Frequency of Submission: Recordkeeping and Annually.

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora; Seventh Regular Meeting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: This notice sets forth summaries of the proposed U.S. positions for the seventh regular meeting of the Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora. Comments or other relevant information concerning these proposed negotiating positions are solicited. A public meeting to discuss these proposed negotiating positions as well as proposals to amend the Convention's appendices concerning species to be controlled also will be held.

ADDRESS: Information and comments should be communicated to the U.S. Fish and Wildlife Service, Office of Management Authority, P.O. Box 3507, Arlington, Virginia 22203–3507. Information and comments received pursuant to this notice are available for public inspection at the Office of Management Authority, 4401 N. Fairfax Drive, Room 432, Arlington, Virginia 22203, telephone (703) 358–2095, from 8:00 a.m. to 4:15 p.m., Monday through Friday (except holidays).

DATES: A public meeting will be held on September 8, 1989, from 1:00–4:30 p.m., in rooms 7000A and 7000B of the U.S. Department of Interior, 18th and C Streets, NW., Washington, DC.

The Service will consider information and comments received by close of business September 15, 1989.

FOR FURTHER INFORMATION CONTACT: Arthur Lazarowitz, Chief, Operations Branch, Office of Management Authority, P.O. Box 3507, Arlington, Virginia 22203–3507, telephone (703) 358–2095.

Background

The United States is a Party to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (hereinafter referred to as CITES or the Convention), an international agreement designed to control international trade in certain species of animals and plants. The purpose of such control is to ensure that no species becomes extinct or threatened with extinction due to trade. CITES provides for biennial meetings of the Conference of the Parties (COP) at which CITES implementation is reviewed.

This notice is the third in a series of notices intended to inform the public of preparations for the seventh regular meeting (COP7) to be held in Lausanne, Switzerland, October 9–20, 1989. The first notice, published on December 8, 1988 (53 FR 49611–49612), announced the time and place of COP7 and called for suggestions for agenda items for COP7. The second notice, publised on March 20, 1989 (54 FR 11449.11450), set forth the provisional agenda for COP7 (subsequently revised). The U.S. Fish and Wildlife Service (Service) invited the public to provide information and comments on that provisional agenda and also announced a public meeting that was subsequently held on March 29, 1989, to receive further public input toward development of the U.S. positions. A separate series of notices from the Service's Office of Scientific Authority has been and will be addressing proposals to amend CITES Appendices I and II which are lists of species controlled by CITES.

Proposed Negotiating Positions

In this notice, the Service summarizes proposed negotiating positions for COP7. Numerals next to each summary correspond to the numbers used in the provisional agenda as revised (Doc. 7.1(Rev.)). A summary of any information and comments on the agenda items received at the March 29, 1989, public meeting or submitted in writing to the Service, as well as a brief rationale, follow each proposed summary negotiating position. In some instances, no proposed negotiating position is stated, but an explanation for not developing one is given.

I. Official Opening Ceremony

Proposed negotiating position: No position necessary.

Information and comments: None received.

Rationale: Not an issue for negotiation.

II. Welcoming Address

Proposed negotiating position: As Chair of the Standing Committee, the United States will present a welcoming address which will emphasize the need for the Parties, the Secretariat and nongovernmental organizations to rededicate themselves and provide the leadership to make CITES one of the most important and effective conventions for the conservation of wild fauna and flora.

Information and comments: None received.

Rationale: It is believes that CITIES has not lived up to its potential and that in light of renewed public concern for the environment the time is ripe to reinvigorate the implementation process.

III. Adoption of the Rules of Procedure

Proposed negotiating position: As Chair of the Bureau for the meeting, the United States will suggest that consideration be given to the admission of the public to the proceedings of Committees I and II in such a manner as not to disturb the normal functioning of these committees.

Information and comments: None received.

Rationale: World attention will be focused on COP7 because of concern over the serious decline of African elephant populations. Public awareness of CITES will be enhanced by opening Committee I and Committee II meetings. However, limitations on public attendance may be necessary in order to ensure the normal functioning of these committees. Generally, the Plenary sessions shall be open to the public (Rule 21 of the provisional Rules of Procedure, Doc 7.3). Sessions of Committees I and II are open to delegates and observers, but no mention is made of public attendance (Rule 22). Decisions taken in Committees I and II are not open for discussion in the Plenary session unless one-third of the voting delegates support a motion to open debate (Rule 13 paragraph 6).

IV. Election of Chair and Vice-Chair of the Meeting and of Committees I and II

Proposed negotiating position: Support the election of Chair and Vice-Chair on the basis of capabilities and regional representation.

Information and comments: None received.

Rationale: CITES is a worldwide convention. CITES would benefit from the use of human resources from every region of the world.

V. Adoption of Agenda and Working Programme

Proposed negotiating position: Support adoption of the provisional agenda (Doc. 6.1 (Rev.)).

Information and comments: None received.

Rationale: Usually adoption is *pro forma.*

VI. Establishment of the Credentials Committee and Committees I and II

Proposed negotiating position: Support the establishment of the Credentials Committee and Committees I and II.

Information and comments: None received.

Rationale: Establishment of the Credentials Committee is a *pro forma* matter. The United States supports the establishment of Committees I and II provided most Parties participating in COP7 have been able to send at least two delegates, or that the rules governing debate of Committee I and Committee II recommendations in Plenary have been sufficiently relaxed to ensure that most delegations will have had an opportunity to debate such recommendations before a final decision is made.

VII. Report of the Credentials Committee

Proposed negotiating position: Support adoption of the report of the Credentials Committee if it does not recommend the exclusion of legitimate representatives of countries party to CITES. Representatives whose credentials are not in order should be afforded observer status as under Article XI.7(a). If Credentials have been delayed, representatives should be allowed to vote on a provisional basis. A liberal interpretation of the rules of procedure on credentials should be adhered to in order to permit clearly legitimate representatives to participate.

Information and comments: None received.

Rationale: Adoption of the report is usually *pro forma.* Exclusion of representatives whose credentials are in order could undermine cooperation among Parties which is essential to the effective implementation of CITES.

VIII. Adminission of Observers

Proposed negotiating position: The United States supports the admission as observers of all representatives of agencies or bodies which meet the requirements specified in CITES that they be technically qualified in protection, conservation or management of wild fauna of flora.

Information and comments: None received.

Rationale: Participation of qualified nongovernmental organizations at COP's is specifically provided by Article XI of CITES. The United States has typically supported the opportunities of all technically qualified observers to participate to the maximum extent. Such wide participation has, on the whole, proven beneficial.

IX. Matters Related to the Standing Committee

1. Report by the Chairman

Proposed negotiating position: As Chair, the United States should stress the leadership role of the Standing Committee as it relates to oversight of the development and execution of the Secretariat's budget and the provision of general policy and operational direction to the Secretariat concerning CITES implementation.

Information and comments: None received.

Rationale: The operations of the Secretariat would be more effective if guided by a set of long-term goals and objectives established by the Parties that could then be used to structure short-term work plans. The Secretariat's budget needs to be presented in a comprehensive, clear and concise fashion so that the Standing Committee and the Parties can better oversee the Secretariat's budget functions. The Secretariat staff must be given long-term contracts and full benefits as a matter of the highest priority.

2. Election of New Members

Proposed negotiating position: Support the election of regional members that are willing and able to actively participate in Standing Committee activities.

Information and comments: None received.

Rationale: The Standing Committee has the potential to become a stronger leader in the development of CITES. Its mandate was substantially strengthened by COP6 and its review of the economy and efficiency of the Secretariat was a good start at using this expanded mandate. Capable and energetic regional members are essential to the development of the Standing Committee's leadership role. In keeping with the principle of rotation of office the United States will not be standing for re-election as North American regional member of the Standing Committee and will probably be replaced by Canada. New Representatives from Europe and Oceania will also be chosen to replace the Federal Republic of Germany and Australia, respectively.

3. Election of Alternate Regional Members

Proposed negotiating position: Advocate the adoption of a U.S. proposal to amend the mandate of the Standing Committee to establish alternate regional members.

Information and comments: None received.

Rationale: Alternate regional members would attend Standing Committee meetings only in the absence of the member of the region to which the alternate belongs. Because of their representational function and authority to vote, attendance of regional members or their alternates is important to the effective functioning of the Standing Committee.

X. Report of the Secretariat

Proposed negotiating position: None Necessary.

Information and comments: One commenter recommended that the COP evaluate the effectiveness of the Secretariat and implement a mechanism for job performance evaluation, including hiring and firing criteria. The commenter indicated that "signatories to the Convention and animal protection/conservation NGO's worldwide are dissatisfied with the current performance of the Secretariat, and their grievances should have their hearing at the Conference of the Parties."

Rationale: This agenda item enables the Secretariat to make a report to the COP of its activities in the immediately prior year. It usually contains such information as an accounting of CITES membership, reservations, Party submission of annual and biennial reports and the like. Normally, the Parties accept the report with little comment. The Secretariat's report has not been received by the Service as of this date. Full consideration will be given to any comments concerning the performance of the Secretariat. As noted under item IX.1, Report by the Chairman (of the Standing Committee), there are certain deficiencies in the operation of the Secretariat that need to be remedied. Secretariat staff members are employees of the United Nations Environment Programme (UNEP), which has the ultimate authority for personnel decisions.

XI. Financing and Budgeting of the Secretariat and of Meetings of the Conference of the Parties

Proposed negotiating position: Oppose any substantial increase in the Secretariat's budget representing an increase in its work program; recommend that the Secretariat continue to work with the Standing Committee to impose economies. Make clear the U.S. Government's position that its contributions under the financial amendment are voluntary. Continue to press for complete accounting of external revenues and expenditures and for a more transparent budget presentation.

Information and comments: None received.

Rationale: A large part of the increase in the 1990–1991 budget flows from the Standing Committee's decision to transfer the ivory control unit's budget from external funding to the core budget in order to exercise closer oversight. UNEP's decision to reclassify most of the professional positions in the Secretariat also caused part of the increase. External funding still represents a large part of the increase. External funding still represents a large part of the Secretariat's budget, and the Parties still need a comprehensive accounting of those funds.

XII. Committee Reports and Recommendations

1. Animals Committee

Proposed negotiating position: None necessary.

Information and comments: None received.

Rationale: The Animals Committee's report may contain information and/or recommendations on continuation of the review of significant trade in Appendix II species, on the draft resolution on first breeding facility for bred-in-captivity criteria for the first breeding facility for a new species, a request for committee operating budget, and a summary of marking techniques. These issues are discussed separately elsewhere in this notice. The overall applicability of the Berne criteria may also be discussed but no conclusion/recommendation is expected to be presented.

2. Plants Committee

Proposed negotiating position: Continue to encourage development of the committee, and accomplishment of its tasks identified in the report, to improve the effectiveness of CITES for plants. Tasks include: (1) Strengthen interaction with other (including regional) plant organizations and institutions; (2) publish identification *Guide;* (3) publish checklists and develop computerized databases on listed higher taxa; (4) study significant trade in orchids (and selected succulents); (5) assess trade in bulbs, timber, and possibly medicinal plants; (6) other stated (often administrative) items to encourage or assist Parties in implementing CITES and to consistently interpret its provisions for plants; and (7) expand educational efforts.

Information and comments: None Received.

Rationale: The United States has chaired the prior Plant Working Group and the Committee since 1983. Improving CITES effectiveness for the many listed (and the many possibly qualifying) plants is a long-term undertaking. Consider request for operating budget.

3. Identification Manual Committee

Proposed negotiating position: Continued to foster development of the animal and plant identification manuals and the plant Guide for use by port and border enforcement officers and to seek information on their usefulness. Renew efforts to recruit a new chairman for the Committee, preferably one from the European region for the sake of continuity.

Information and comments: None received.

Rational: The identification manuals are a long term undertaking due to the large number of species controlled by CITES. The former chairman of the manual for animals, a Swiss Federal Government employee, resigned at COP6 and is acting as a caretaker until a successor can be found.

4. Nomenclature Committee

Proposed negotiating position: Encourage and support the development/adoption of checklists for all taxa. Support clarification of any taxa not adequately described by proponents at the time of listing in the Appendices.

Information and comments: One commenter raised several questions related to how the Parties should deal with listing status questions when an inadequate scientific description of a taxon was given at the time of the listing.

Rationale: Implementation of the Convention is strengthened by use of uniform names of listed species by all parties, and adopted checklists provide guidance. Furthermore, the Chairman of the Nomenclature Committee has requested that the CITES Secretariat "prepare proposed 'procedures for action' of the Nonmenclature Committee in cases requiring interpretation of the nonmenclatural status of a species in the absence of supporting documentation at the time the listing was adopted by the Parties." The Chairman of the Nomenclature Committee also requested the CITES Secretariat to "obtain an independent legal opinion of the limits of authority [that] permanent committees hold regard to interpreting the intent of the Conference of the Parties (in relation to the preparation of the procedures for action)".

XIII. Intepretation and Implementation of the Convention

1. Report on National Reports Under Article VIII, Paragraph 7, of the Convention

Proposed negotiating position: Support measures that would encourage or pressure Parties to submit their annual reports and that would upgrade their quality.

Information and comments: None received.

Rational: Approximately 70 percent of the Parties are submitting an annual report, up from 58 percent in 1981. Accurate and complete report data are necessary to adequatley measure the impact of international trade on the species and can be a useful enforcement tool.

2. Review of Alleged Infractions

Proposed negotiating position: Support necessary and appropriate recommendations designed to obtain wider compliance with the terms of CITES.

Information and comments: None received.

Rationale: Article XIII provides for COP review of alleged infractions. A COP may make whatever recommendations it deems appropriate. The Service has received a first draft of the Secretariat's Infractions Report which covers the period July 1987–May 1989, and notes that 15 Parties have not identified a Scientific Authority and so notified the Secretariat.

3. Trade in Ivory From African Elephants

Proposed negotiating position: If the African elephant is listed on Appendix I, with no populations excluded from such listing, oppose any move to allow countries to trade in stockpiles of African elephant ivory or other parts or derivatives for primarily commercial purposes.

Information and comments: One commenter urged that a joint session of Committees I and II be held to consider elephant issues in order to facilitate participation of delegations and observers with few members. The commenter also opposed the establishment of quotas for the ivory trade regardless of origin (e.g. confiscated, culled, etc.)

Rationale: Importation of Appendix I specimens for primarily commercial purposes is not allowed under the terms of CITES. It is very doubtful that legal trade of ivory stocks could be accomplished without providing cover for illegal trade. In response to a 1981 request to allow commercial trade in Appendix I flood-killed lizards, the Parties recommended they be saved in storage or destroyed (Conf.3.14).

4. Trade in Rhinoceros Products

Proposed negotiating position: Support reasonable proposals that would enhance interdiction of the illegal rhinoceros horn trade and rhinoceros protection in the wild.

Information and comments: One commenter urged the U.S. Government to take all possible steps to eliminate trade in rhinoceros products.

Rationale: Illegal taking and trade of rhinoceros horn have been further depleting the already endangered species of rhinoceros. Medicinal forms are difficult to interdict. Further measures need to be taken on the supply side and in the consumer countries.

5. Trade in Leopards Skins

Proposed negotiation position: Advocate stricter controls if necessary to prevent quota violations. Oppose any further increases in quotas without adequate supporting data that includes well documented studies based on sound scientific principles.

Information and comments: One commenter urged a strong position against trade in leopards, and measures that would ensure that leopards are being killed because of their unacceptable activities and not to fill the quota.

Rationale: Trade of leopard skins for noncommercial purposes is allowed under CITES resolution Conf.6.9, which recognizes killing in defense of life and property and to enhance the survival of the species. Controversy exists over the adequacy of a leopard study produced for the Secretariat. Thus far, no quota increases have been requested.

6. Trade in Plant Specimens

Proposed negotiating position: No draft resolutions or other documents are pending. The Plants Committee will hold its second meeting simultaneously with portions of COP7. Encourage and be generally supportive of recommendations and items presented at COP7 that would improve CITES effectiveness for plants. If an item on certification of orchid nurseries is presented, consider supporting it within the existing CITES framework for issuance of certificates and permits for artificially propagated specimens of species.

Information and comments: None received.

Rationale: As no specific items have been presented, no firmer positions can be adopted. The Conservation Committee of the International Orchid Commission, and the Orchid Specialist Group of the Species Survival Commission of the IUCN, are seeking ways to expedite trade in artificially propagated orchids, as discussed in the first meeting of the Plants Committee. Orchid specialists familiar with various countries may offer advice and assistance to Parties in reaching their decisions as to which nurseries propagate orchids artificially. So long as certification is based on species and certain knowledge of each facility (not just on general information and without first knowing the facility's full inventory), and so long as the Parties remain actively responsible in using the advice and assistance to issue certificates and permits, the effort should be encouraged.

7. Marking of Specimens

Proposed negotiating position: Support continuing efforts to find new practical and effective methods of marking of animal and plant specimens.

Information and comments: None received.

Rationale: Article VI provides that where appropriate and feasible a Management Authority may affix a mark upon any specimen to assist in identifying the specimen. The Animals Committee may present a paper at COP7 that describes and evaluates current marketing systems for live animals and parts and derivatives and that questions the systems of marking of ranched specimens recommended by resolution Conf. 5.16 (see also item XIII.18, Trade in ranched specimens between Parties, non-Parties and reserving Parties.)

Significant Trade in Appendix II Species

Proposed negotiating position: Support expeditious completion of studies of significantly traded Appendix II species. Support regular funding for the coordination of significant trade study projects.

Information and comments: One commenter recommended that a mechanism should be implemented that would restrict trade to reasonable and biologically sustainable levels.

Rationale: It has been 6 years since the Parties recognized that some Appendix II species may have been traded at levels detrimental to their survival and without sufficient information to know whether or not this was the case. Over 85 species were identified as fitting that description. Some studies have been started and a few completed, but not enough has been done. Without adequate biological data, the possibility that some of those species are being detrimentally affected by trade is rather high.

9. Sale of Confiscated Specimens of Species Included in Appendix II

Proposed negotiating position: Oppose any proposal that would give the Secretariat general authority to receive confiscated specimens for the purpose of auction and that would authorize the Secretariat to expend the proceeds of auction to establish a conservation program with the confiscating country to study the status of the species and/or assist the Management Authority of that country.

Information and comments: None received.

Rationale: The administration of such auctions and project development proposals would divert valuable resources of the Secretariat to activities best left to the individual Parties. While some governments may have problems assuring that the disposal of confiscated specimens and the disposition of the proceeds thereof is free from wrongdoing, the Secretariat should not be seen as a surrogate for such governments and, given the possibility of a large and continuing supply of such specimens, as a commercial establishment for the sale of Appendix II specimens.

10. Export/Re-Export Permit/Certificates

Proposed negotiating position: Support proposals that a security stamp must be authenticated on its face and its number printed on the face of the permit or certificate; that permits/certificates should be refused if modified without indication that modification was made by the appropriate authorities; that the date of issuance of the country of origin permit number be included on the re-export certificate (if available); that re-export certificates indicate country of last re-export with permit number and date of issuance in block 5 of the standardized permit; that validity of such documents be conditional on transport of live animals in accordance with IATA Live Animals Regulations; and that each Party send to the Secretariat three signature specimens of each official authorized to sign CITES export permits and re-export certificates.

Information and comments: None received.

Rationale: Printing the number of the security stamp on the face of the permit or certificate and cancelling the security stamp would mitigate against removal and reuse of security stamps. Modification of permits/certificates without official indication of the validity of such modification makes it difficult to distinguish between official and unofficial (sometimes fraudulent) modification. Inclusion of the date of issuance of the country of origin export permit in some instances would facilitate the search for the permit by the issuing authority. Inclusion of the last country of re-export's permit number and issuance date on the next re-export certificate would facilitate tracing back of a shipment of CITES specimens that has entered two or more countries. Current U.S. regulations under the Lacey Act requires shipping containers for live mammals and birds to meet, at a minimum, space and design guidelines of IATA's Live Animals Regulations (LAR). These regulations are a stricter domestic measure, permissible under Article XIV of CITES. The Service has been conditioning its export permits/re-export certificates on compliance with LAR.

11. Treatment of Genuine Re-Export Certificates for Illegal Specimens

Proposed negotiating position: Support the proposition that an importing country has the right to question the validity of a CITES document which on its face was appropriately issued, but which may not have been issued in accordance with all CITES requirements.

Information and comments: None received.

Rationale: While substantial weight must be given to the official documents of another country, they should not be binding on the importing country (and exporting country if prospective trade involves Appendix I species) if that country has good reason to believe that issuance was not in accordance with all CITES requirements. CITES does not expressly state that the importing country must accept all official documents of the exporting country. CITES does provide that each Party must take stricker domestic measures regarding the conditions for trade or the complete prohibition thereof (Article XIV, paragraph 1(a)).

12. Transport of Live Animals

Proposed negotiating position: Support modification of resolution Conf. 6.24 if that modification would not substantially weaken resolutions adopted at previous COP's.

Information and comments: One commenter was distressed that two earlier resolutions designed to reduce transport related mortalities have failed to be implemented, citing Conf.6.24 relating to a checklist of requirements for safe transport, among other things; and Conf.1.6 relating to a call for the phasing in of captive-bred animals to replace wild ones in the international trade of pets.

Rationale: This agenda item relates to the conditions of transport for live animals rather than whether wild or captive-bred animals should be used in the international trade of pet specimens. Oppose any attempt to eliminate the Conf.4.20, paragraph (d) recommendation that for so long as the CITES Secretariat and Committee (now the Standing Committee would fulfill this function) agree, IATA (International Air Transport Association) Regulations are generally deemed to meet CITES requirements with respect to air transport.

13. Guidelines for Evaluating Marine Turtle Ranching Proposals

Proposed negotiating position: Support the recommendations of a meeting convened by the International Union for the Conservation of Nature and Natural Resources (IUCN) relating to guidelines for evaluating marine turtle ranching proposals, provided they would promote protection of wild populations of marine turtles.

Information and comments: None received.

Rationale: While the Parties have considered several ranching proposals, none have been accepted. The meeting convened by IUCN in San Jose, Costa Rica in January of 1988 produced draft guidelines, but none have been finalized.

14. Review of Resolution Conf.5.21 on Special Criteria for the Transfer of Taxa From Appendix I to Appendix II

Proposed negotiating position: Support the extension of Conf.5.21, provided those Parties whose species are transferred pursuant thereto, are required to later justify the transfer on the basis of information that meets the "Berne Criteria" for downlisting to Appendix II (See Conf.1.2)

Information and comments: None received.

Rationale: Conf.5.21 allows an exemption from the strict criteria for downlisting species placed on Appendix I at COP1 or at the original negotiation meeting of CITES in 1973. Conf.5.21 coupled downlisting with export quotas to reduce the possibilities that trade would be detrimental to the survival of the species. Since data were insufficient for meeting the Berne Criteria for downlisting, export quotas based on such data are not likely to provide assurance of nondetrimental trade over an extended period of time. Management of the species for export under the quota system should enhance the capabilities of the Conf.5.21 countries of origin to obtain the data necessary to meet the downlisting Berne Criteria.

15. Consideration of Criteria and Applications for Inclusion of New Species in the "Register of Operations Which Breed Specimens of Species Included in Appendix I in Captivity for Commercial Purposes"

Proposed negotiating position: Support the adoption of reasonable criteria designed to assure that breeding operations are not established or maintained in a manner detrimental to the survival of the species.

Information and comments: None received.

Rationale: While resolution Conf.2.12 defines the term "bred in captivity," it needs more quantitative definition to enable breeding operations to feel more assured that they would meet or would continue to meet Conf.2.12 criteria. The United States and Canada have submitted like proposals for COP7 consideration that would provide such assurance.

16. Exemption for Blood and Tissue Samples for DNA Studies From CITES Permit Requirements

Proposed negotiating position: Oppose any exemption for blood and tissue samples that is not within the terms of CITES and existing CITES resolutions.

Information and comments: None received.

Rationale: Presumably, a real problem exists in expediting CITES formalities to accommodate specimens subject to spoilage or high trade volume. All reasonable solutions should be explored to resolve the problem short of negating the requirements of CITES.

17. Return of Live Animals of Appendix II or III Specimens

Proposed negotiating position: Oppose any recommendation that would favor return of live Appendix II or III specimens accompanied by faulty documents to the country of export without penalty to the importer or exporter.

Information and comments: None received.

Rationale: The application of sanctions for illegal trade is essential to fostering compliance with CITES rules.

18. Trade in Ranched Specimens Between Parties, Non-Parties and Reserving Parties

Proposed negotiating position: Oppose any substantial weakening of the marking and trade criteria of resolution Conf. 5.16.

Information and comments: None received.

Rationale: The marking and trade criteria of Conf. 5.21 were specifically tightly drawn to provide strong assurances that the wild Appendix I populations related to ranched Appendix II populations would not be impacted by trade in specimens from the ranching operations. Trade was limited to non-reserving Parties (non-Parties and reserving Parties could not participate in such trade), in part, to prevent the wild Appendix I specimens from being traded as Appendix II ranched specimens and probably as an inducement to reserving Parties and non-Parties to become Parties.

19. Amendments to Appendix III

Proposed negotiating position: Oppose any move to restrict Appendix III listings to coincide with meetings of COP.

Information and comments: None received.

Rationale: Article XVI allows any Party to unilaterally list a species in Appendix III at any time. Presumably, this proposal is for purposes of administrative convenience, since it would enable regulatory agencies to adjust to new species listings all at one time—once every 2 years after each COP. However, it would work to postpone Appendix III listings and the protection afforded thereby for up to two years. Perhaps a resolution could encourage Parties to consider deferring Appendix III listings to COP's if to do so would not produce biological harm to the species.

XIV. Consideration of Proposals for Amendment of Appendices I and II

Suggestions for appropriate changes to the CITES Appendices were solicited in the September 14, 1988, **Federal Register** (53 FR 35530). On March 21, 1989, the Service identified the species that the United States might submit as proposed amendments to the Appendices (54 FR 11551) and requested further information and comments. The Service reviewed all available information and submitted its proposed amendments to the CITES Secretariat by the May 12, 1989, deadline. The decision on the proposals considered and those submitted was announced in early September in the **Federal Register**. Proposed amendments submitted by other Parties have been received and reviewed by the Service. These proposals and a tentative negotiating position on each proposal have been announced in the August 23, 1989, **Federal Register** (54 FR 35013).

XV. Conclusion of the meeting

1. Determination of the Time and Venue of the Next Regular Meeting of the Conference of the Parties

Proposed negotiating position: Favor holding COP8 in the Pacific area, provided adequate funding is available and all Parties will be admitted to the host country without political difficulties. Support the holding of COP's on a biennial basis.

Information and comments: None received.

Rationale: As yet, the Pacific area has not hosted a COP. It is an important wildlife and plant area with significant trade problems. Holding the COP there would help focus attention in that area on CITES and stimulate interest in its goals and activities. COP meetings energize governmental and nongovernmental organizations concerned with CITES to reexamine its implementation. Studies have indicated that much needs to be done to bring implementation up to a satisfactory level. Stretching out meetings to 3-year intervals under these circumstances is not appropriate. It is likely that the apparent cost savings that would result from a 3-year intervals would be reduced by an increase in committee meetings in the interim.

Request for Information and Comments and Announcement of Public Meeting

Information and comments related to the above proposed negotiating positions are hereby solicited. They should be forwarded to: U.S. Fish and Wildlife Service, Office of Management Authority, P.O. Box 3507, Arlington, Virginia 22203–3507. For express mail and messenger deliveries the address is: 4401 N. Fairfax Drive, Room 432, Arlington, Virginia.

A public meeting will be held on Friday, September 8, 1989, from 1:00 to 4:30 p.m., in rooms 7000A and 7000B, U.S. Department of Interior (Main Building), 18th and C Streets, NW., Washingotn, DC for the purpose of receiving information and comments and discussion of the proposed negotiating positions summarized above, as well as proposals to amend CITES Appendices I and II. Written statements may by submitted at or before the meeting. Appointments to speak may be made with the Office of Management Authority at the street address mentioned above or by telephoning (704) 358–2095. Speakers without appointments will be given an opportunity to speak following speakers with appointments to the extent time allows. This meeting will be conducted

in a rather informal manner. Participants will be provided opportunities, to the extent that time allows. to comment on each point.

Observers

Article IX, Paragraph 7 of the Convention provides:

> "Any body or agency technically qualified in protection, conservation or mangement of wild fauna and flora, in the following categories, which has informed the Secretariat of its desire to be represented at meetings of the Conference by the observers, shall be admitted unless at least one-third of the Parties object:
>
> (a) International agencies or bodies, either government or nongovernmental, and national governmental agencies and bodies; and
>
> (b) National non-governmental agencies or bodies which have been approved for this purpose by the State in which they are located. Once admitted these observers shall have the right to participate, but not to vote."

Persons wishing to be observers representing United States national non-governmental organizations must receive prior approval of the Service. Requests for such approval should include evidence of technical qualification in protection, conservation or management of wild fauna or flora and should be sent to the Office of Management Authority (see "Address above). Copies of letters of approval should be used by these organizations to inform the Secretariat of their wish to send observers to the meeting. In the past, the Secretariat has required such information to be received at least 1 month prior to the meeting. The letters should be sent to the Secretariat at the following address: CITES Secretariat, 6 rue du Maupas, Case postale 78, CH–1000 LAUSANNE 9 Chauderon, Switzerland.

This notice was prepared by Arthur Lazarowitz of the Office of Management Authority.

Dated: August 31, 1989.

Richard N. Smith,

Acting Deputy Director.

[FR Doc. 89–20948 Filed 9–1–89; 8:45 am]

BILLING CODE 4310-55-M

Bureau of Land Management

[UT–060–4320–02]

Grazing Advisory Board; Meeting

August 28, 1989.

AGENCY: Bureau of Land Management, Moab District, Interior.

ACTION: Grazing Advisory Board meeting notice.

SUMMARY: Notice is hereby given in accordance with Public Law 92–463 that the Moab District Grazing Advisory Board will meet September 28, 1989. The meeting will begin at 10 a.m. in the conference room of the Bureau of Land Management Price Resource Area Office, 900 N. 700 E. Price, Utah 84501.

The agenda for the Grazing Advisory Board Meeting includes a discussion of fiscal 1989 range management projects, allotment management plans, and the prioritization of 1990 range improvement project packages and range improvement funds. The board will also hear an update on drought measures in the Moab District.

The Meeting is open to the public. Interested persons may make oral statements to the board between 2:00 and 3:00 p.m. on September 28, 1989 or file written statements for the Board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, P.O. Box 970, Moab, Utah 84532, by September 26, 1989.

Summary minutes of the Board meeting will be maintained in the District Office and will be available within thirty (30) days following the meeting.

Kenneth V. Rhea,

Associate District Manager.

[FR Doc. 89–20751 Filed 9–1–89; 8:45 am]

BILLING CODE 4310-DO-M

National Park Service

Badlands National Park, South Dakota

AGENCY: National Park Service and United States Forest Service.

ACTION: Boundary adjustment order.

Order adjusting the boundary of the North Unit of Badlands National Park and transferring jurisdiction of certain lands to the Department of Agriculture and transferring jurisdiction of certain other lands to the Department of the Interior.

SUMMARY: Pursuant to the authority contained in the Act of May 7, 1952, 66 Stat. 65, 16 U.S.C. 441f and the Act of August 8, 1968, 82 Stat. 663, 16 U.S.C. 441j, and as land exchanges are currently being consummated which enhance the land-ownership pattern for the North Unit of Badlands National Park as well as the Buffalo Gap National Grassland, the Department of the Interior and the Department of Agriculture have agreed to the boundary adjustments contained herein.

EFFECTIVE DATE: The effective date of this Order is September 5, 1989.

FOR FURTHER INFORMATION CONTACT: Chief, Land Resources Division, Rocky Mountain Region, P.O. Box 25287, Denver, Colorado 80225–0287, (303) 969-2610 or FTS 327–2610.

SUPPLEMENTARY INFORMATION: The above-cited authorities authorize the Secretary of the Interior to adjust and redefine the boundary of the North Unit of Badlands National Park provided the total acreage of the area does not exceed the acreage of the area as authorized by the Act of August 8, 1968, 82 Stat. 663, 16 U.S.C. sec. 441j. Further, the Act of May 7, 1952, 66 Stat. 65, 16 U.S.C. sec. 441f, provides that federally-owned lands under the administrative jurisdiction of any other Department or Agency of the Federal Government shall be included within the park area only with the approval of the head of such Department or Agency.

On December 4, 1987 Mr. F. Dale Robertson, Chief, U.S. Forest Service, Washington, DC, gave approval for the subject boundary adjustment as it affects U.S. Forest Service administered lands being included into the Badlands National Park. The total acreage of the Badlands National Park will be reduced by 519.34 acres upon completion of this boundary adjustment.

The lands are all located in the Black Hills Meridian.

I. The following described lands in paragraph I are hereby exclused from the Badlands National Park and the boundary is so revised. Subject to valid existing non-Federal rights, if any, the administrative jurisdiction of all federally-owned lands described hereafter in this paragraph are hereby transferred to the Department of Agriculture to be administered as part of the Buffalo Gap National Grassland, Nebraska National Forest, in accordance with existing and future applicable laws and regulations.

Jackson County, South Dakota

T. 4 S., R. 18 E., Sec. 2, S½NW¼ NW¼; (Federal land)
T. 3 S., R. 18 E., Sec. 13, NW¼ (non-Federal land);
  Sec. 14, N½ (Federal land);
  Sec. 15, N½ (non-Federal land);
  Sec. 16, NE¼. (Federal land),

containing 980 acres, more or less.

Pennington County, South Dakota

Part of Section 12 as shown on "Certificate of Survey in Badlands National Park" Dependent Resurvey and Subdivision Section 12, T. 3 S., R. 17 E. B.H.M., Pennington County, South Dakota. Said survey was recorded on December 21, 1988 with the County Register of Deeds in Book 22 of Plats on page 142, more particularly described as follows:

Beginning at the section corner common to Sections 1, 6, 7, and 12, Township 3 South, Ranges 17 and 18 East of the Black Hills Meridian; thence South 01 degrees 18 minutes West, 2629.5 feet along the section line common to Sections 7 and 12 to the ¼ corner common to Sections 7 and 12; thence South 01 degree 20 minutes West, 809.1 feet along the section line common to Sections 7 and 12 to a point on said section line; thence North 63 degrees 31 minutes West, 589.0 feet to Angle Point 10; thence North 32 degrees 17 minutes West, 3819.3 feet to the ¼ corner common to Sections 1 and 12; thence South 88 degrees 50 minutes East, 2645.8 feet along the section line common to Sections 1 and 12 to the point of beginning and containing 117.84 acres, more or less, of Federal land.

The above-described parcels of land in paragraph I contain 1097.84 acres, more or less.

II. Subject to valid existing non-Federal rights, the following described lands in paragraph II are hereby included into the Badlands National Park and the boundary is so revised.

Jackson County, South Dakota

T. 4 S., R. 18 E., Sec. 2, N½NE¼NW¼.

Parts of Sections 7 and 8 as shown on "Certificate of Survey in Buffalo Gap National Grasslands" Dependent Resurvey and Subdivision sections 7 and 8, T. 3 S., R. 18 E., B.H.M., Jackson County, South Dakota. Said survey was recorded on September 1, 1987, with the County Register of Deeds in Book C of Plats on page 192, more particularly described as follows:

Beginning at the southwest corner of said Section 7, thence N 01 degrees 20 minutes E along the west line of Section 7, a distance of 1,860.4 feet to P.I. No. 1;
thence S 63 degrees 31 minutes E 1231.4 feet to P.I. No. 2 which is on the north line fo the S½S½ of said Section 7;
thence S 88 degrees 47 minutes E 1,466.8 feet to the center south ¹⁄₁₆ corner of said Section 7 which is also P.I. No. 3;
thence S 88 degrees 44 minutes E 1,318.5 feet to P.I. No. 4 which is on the north line of the S½S½ of said Section 7;
thence N 16 degrees 24 minutes E 416.5 feet to P.I. No. 5;
thence N 49 degrees 39 minutes E 716.5 feet to P.I. No. 6;
thence N 57 degrees 55 minutes E 803.9 feet to the P.I. No. 7 which is also the ¼ corner common to said Sections 7 and 8;
thence N 52 degrees 32 minutes E 275.1 feet to P.I. No. 8;
thence S 56 degrees 57 minutes E 324.2 feet to P.I. No. 9 which is on the east-west center section line of said Section 8;
thence S 88 degrees 54 minutes E 1735.3 feet to P.I. No. 10 which is on the east-west center section line of said Section 8;
thence N 04 degrees 32 minutes E 232.0 feet to P.I. No. 11;
thence N 25 degrees 39 minutes E 388.6 feet to P.I. No. 12;
thence N 21 degrees 03 minutes W 403.0 feet to P.I. No. 13;
thence N 02 degrees 42 minutes W 211.8 feet to P.I. No. 14;
thence N 72 degrees 31 minutes E 445.3 feet to P.I. No. 15;
thence N 89 degrees 08 minutes E 345.9 feet to P.I. No. 16;
thence S 59 degrees 23 minutes E 796.6 feet to P.I. No. 17;
thence S 54 degrees 28 minutes E 743.0 feet to P.I. No. 18;
thence S 49 degrees 37 minutes E 738.4 feet to P.I. No. 19 which is on the east-west center section line of said Section 8;
thence S 51 degrees 57 minutes E 223.7 feet to P.I. No. 20;
thence S 39 degrees 27 minutes E 352.5 feet to P.I. No. 21 which is the east line of the SE¼ of said Section 8;
thence S 01 degree 29 minutes W along the east line of the SE¼ to the southeast corner of said Section 8;
thence N 88 degrees 57 minutes W along the south line of the SE¼ of Section 8 to the south ¼ corner of said Section 8;
thence N 89 degrees 02 minutes W along the south line of the SW¼ of said Section 8 to the southwest corner of Section 8 which is also the SE corner of said Section 7;
thence N 88 degrees 53 minutes W along the south line of the SE¼ of said Section 7 to the south ¼ corner of Section 7;
thence N 88 degrees 58 minutes W along the south line of the SW¼ of said Section 7 to the southwest corner of Section 7, said point being also the point of being. The above-described parcels of land contain 578.5 acres, more or less.

The transfer of administrative jurisdiction of the existing Federal lands and the hereafter acquired non-Federal lands described in paragraph II is hereby accepted by the Department of the Interior to be administered as part of the Badlands National Park in accordance with existing and future applicable laws and regulations.

Dated: August 28, 1989.

Manuel Lujan Jr.,

Secretary of the Interior.

BILLING CODE 4310-70-M

National Capital Region, Public Affairs; Public Meeting

The National Park Service is seeking public comments and suggestions on the planning of the 1989 Christmas Pageant of Peace, which opens December 14 on the Ellipse, south of the White House.

A public meeting will be held at the Park Service's National Capital Region Building in East Potomac Park at 1100 Ohio Drive, SW., Room 234, at 10 a.m., Wednesday, October 11, 1989.

Interested persons who would like to comment at the meeting may notify the National Park Service by calling the Office of Public Affairs between 9 a.m. and 4 p.m., weekdays at (202) 485–9666. Persons who cannot attend the meeting may send written comments to Regional Director, National Capital Region, 1100 Ohio Drive, SW., Washington, DC 20242. Written comments will be accepted until October 25, 1989.

Dated: August 28, 1989.

Ronald N. Wrye,

Acting Regional Director, National Capital Region.

DEPARTMENT OF JUSTICE

Lodging of Consent Decree; Bourdeauhui

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on August 23, 1989, a proposed Consent Decree in *United States* v. *Bourdeauhui,* No. H–88–354, was lodged with the United States District Court for the District of Connecticut. This suit was brought under section 107(a) of the Comprehensive Environmental Response, Compensation and Liability Act, 42 U.S.C. 9607(a), to recover costs incurred by EPA in connection with removal actions conducted at two mercury-contaminated sites in Willington, Connecticut. As a result of settlements with other potentially responsible parties and defendants, EPA already has recovered $229,000. The proposed Consent Decree would resolve the liability of the four remaining defendants—Eugene Bourdeaudhui, Edward Battle, Ott Dental Supply Co., and Smith-Holden, Inc.—for $200,000.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to Jay Printing, D.J. Ref. 90–11–2–356.

The proposed Consent Decree may be examined at the office of the United States Attorney, District of Connecticut, Federal Courthouse Building, 141 Church Street, Post Office Box 1824, New Haven, Connecticut 06508, and at the Region 1 Office of the Environmental Protection Agency, J.F.K. Federal Building, Boston, Massachusetts 02203. Copies of the Consent Decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1647, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please refer to the referenced case and enclose a check in the amount of $1.90 (10 cents per page reproduction cost) made payable to the Treasurer of the United States.

Donald A. Carr,

Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to the Resource Conservation and Recovery Act in United States v. City of Durant, Oklahoma and State of Oklahoma

In accordance with Department policy, 28 CFR 50.7, notice is hereby given that on June 30, 1989, a proposed Consent Decree in *United States* v. *City of Durant and State of Oklahoma,* Civil Action No. 89–314–C, was lodged with the United States District Court for the District of Oklahoma.

The Complaint in this enforcement action was filed on June 30, 1989, against City of Durant and State of Oklahoma pursuant to section 309, 33 U.S.C. 1319, of the Clean Water Act seeking civil penalties for the improper management of a Publicly Owned Treatment Works (POTW) and injunctive relief to abate the release of hazardous substances from the POTW. The proposed Consent Decree ("Decree") requires the City to pay a civil penalty of $33,000 and implement a schedule for construction and modification of the POTW.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, U.S. Department of Justice, Washington, DC 20530, and should refer to *United States* v. *City of Durant,* D.J. No. 90–5–1–1–2774.

The proposed Consent Decree may be examined at the office of the United States Attorney, 33 Federal Courthouse, Fifth and Muskogee, Muskogee, Oklahoma 74401 and at the United States Environmental Protection Agency, Region VI, 1445 Ross Avenue, Dallas, Texas 75202–2733. Copies of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, Room 1521, U.S. Department of Justice, 9th and Pennsylvania Avenue, NW., Washington, DC 20530. In requesting a copy please enclose a check in the amount of $1.50 payable to the Treasurer of the United States.

Richard B. Stewart,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Drug Enforcement Administration

[Docket No. 87–74]

Leonardo V. Lopez, M.D.; Denial of Application

On October 1, 1987, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to Leonardo V. Lopez, M.D., (Respondent) of 12791 Superior, Southgate, Michigan 48195, proposing to deny his application, executed on September 5, 1987, for registration as a practitioner under 21 U.S.C. 823(f). The Order to Show Cause alleged that Respondent's registration would be inconsistent with the public interest as that term is used in 21 U.S.C. 823(f).

Respondent requested a hearing on the issues raised by the Order to Show Cause and the matter was docketed before Administrative Law Judge Mary Ellen Bittner. Following prehearing procedures, a hearing was held on April 12, 1988, in Ann Arbor, Michigan. Respondent failed to appear at the hearing. Subsequently, by letter dated May 26, 1988, Respondent notified Government counsel that he had not appeared at the hearing because he had suffered a heart attack on April 4, 1988. Respondent further advised in the letter that he was still interested in obtaining DEA registration.

On August 4, 1988, Judge Bittner ordered that the record of the April 12, 1988, hearing be stricken and that a new hearing be conducted. Following prehearing procedures, a hearing was held on January 11, 1989, in Ann Arbor, Michigan. On June 9, 1989, the Administrative Law Judge issued her opinion and recommended ruling, findings of fact, conclusions of law and decision. No exceptions were filed and on August 1, 1989, the Administrative Law Judge transmitted the record of these proceedings to the Administrator. The Administrator has considered the record in its entirety and pursuant to 21 CFR 1316.67, hereby issues his final order in this matter based upon findings of fact and conclusions of law as hereinafter set forth.

The Administrative Law Judge found that in 1977, the Michigan State Police, Diversion Investigation Unit, obtained information from a confidential informant that Respondent was selling prescriptions for controlled substances for no legitimate medical purpose. As a result, an undercover investigation of Respondent was initiated. On four separate occasions between June 14, 1977 and August 9, 1977, a Michigan State Police detective went to Respondent's office in an undercover capacity. On three of these occasions, the detective was accompanied by a Michigan Department of Licensing and Regulation investigator. Respondent wrote prescriptions for Tuinal, Desoxyn, Quaalude and Valium, all controlled substances, for the undercover officers during each visit. Respondent never performed any sort of physical examination prior to issuing the prescriptions. Respondent wrote a total of fifteen prescriptions for the officers during the four visits. Of these prescriptions, nine of them were for fictitious individuals. Respondent never asked the officers for any information about the backgrounds of these individuals before issuing prescriptions in their names.

During these visits, neither Respondent nor the officers made any attempt to hide the fact that the prescriptions were written strictly as a business transaction and not for a valid medical need. During the second visit, Respondent wrote one of the officers a prescription for Quaalude, but stated that he would have to be more careful because the state or Federal authorities were "after him." Respondent then stated that he had to raise the price of the prescriptions because of the risk involved. On at least one occasion, one of the undercover officers told Respondent that he was selling the drugs that Respondent prescribed for him. In addition, the officers spoke with other individuals in Respondent's waiting room during the visits. These individuals made it clear to the officers that they had come to Respondent solely to "score" or buy prescriptions for drugs from the doctor.

Respondent was arrested on August 15, 1977, and charged with two felony counts of delivery of Desoxyn in violation of the laws of the State of Michigan. On September 22, 1977, Respondent entered a guilty plea in Recorder's Court for the City of Detroit to one count of delivery of Desoxyn, a felony offense.

On January 2, 1985, Respondent executed an application for registration with DEA. Subsequently, on March 24, 1986, the Deputy Assistant Administrator, Office of Diversion Control, DEA, issued to Respondent an Order to Show Cause why that application should not be denied. A hearing regarding that application was held before Administrative Law Judge Francis L. Young on April 19, 1986. On November 25, 1986, Judge Young issued his opinion and recommended ruling, findings of fact, conclusions of law and decision. Judge Young recommended that Respondent's application for registration be denied. In a final order effective February 12, 1987, the Administrator adopted Judge Young's recommendation in its entirety and thus denied Respondent's application. See, *Leonardo* V. *Lopez, M.D.,* Docket No. 86–39, 52 FR 4542 (February 12, 1987).

At the hearing regarding the application which is the subject of this final order, Respondent essentially argued that his need for a DEA registration to obtain employment and the passage of time since his conviction constitute compelling reasons to grant his application. With respect to Respondent's asserted need for a DEA registration, Judge Bittner stated that

that need does not outweigh the public interest in assuring that controlled substances are properly handled. The Drug Enforcement Administration registers medical practitioners so that they may prescribe, dispense, administer and otherwise handle controlled substances in order to effectively treat their patients. These substances are controlled because of their potential for abuse and they must be handled responsibly.

Judge Bittner further stated that the mere fact that the events for which Respondent was convicted occurred in 1977 does not establish that now he should have a DEA registration. The paramount issue is not how much time has elapsed since his unlawful conduct, but rather, whether during that time Respondent has learned from past mistakes and has demonstrated that he would handle controlled substances properly if entrusted with a DEA registration. Judge Bittner concluded that the record of these proceedings does not contain such a demonstration. In fact, at the hearing, when referring to the events which led to his 1977 conviction, Respondent stated that he had "forgotten all the details about it." This statement clearly indicates that Respondent does not appreciate the egregiousness of his past unlawful conduct. Further, the Administrative Law Judge was not convinced that Respondent recognizes and understands the responsibilities that accompany DEA registration.

In light of the reasons stated above, as well as Respondent's controlled substance-related felony conviction, the Administrative Law Judge concluded that Respondent's registration would be inconsistent with the public interest and thus, recommended the denial of Respondent's application for registration. The Administrator has considered the factors listed in 21 U.S.C. 823(f) and concurs with the Administrative Law Judge's conclusion that Respondent's registration would be inconsistent with the public interest. The Administrator adopts the opinion and recommended ruling, findings of fact, conclusions of law and decision of the Administrative Law Judge in its entirety.

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 28 CFR 0.100(b), hereby orders that the application of Leonardo V. Lopez, M.D., executed on September 5, 1987, for registration as a practitioner under the Controlled Substances Act, be, and it hereby is, denied.

This order is effective September 5, 1989.

John C. Lawn,

Administrator.

Dated: August 28, 1989.

[FR Doc. 89-20695 Filed 9-1-89; 8:45 am]

BILLING CODE 4410-09-M

[Docket No. 89-31]

Anderson T. Scott, Jr., M.D., Covington, VA; Hearing

Notice is hereby given that on April 5, 1989, the Drug Enforcement Administration, Department of Justice, issued to Anderson T. Scott, Jr., M.D., an Order to Show Cause as to why the Drug Enforcement Administration should not revoke your DEA Certificate of Registration, AS1601954, and deny any pending applications for registration.

Thirty days have elapsed since the said Order to Show Cause was received by Respondent, and written request for a hearing having been filed with the Drug Enforcement Administration, notice is hereby given that a hearing in this matter will be held on Tuesday, August 29, 1989, commencing at 10:00 a.m., at the United States Court of Appeals for the Federal Circuit, Courtroom one, second floor, 717 Madison Place, NW., Washington DC.

Dated: August 23, 1989.

John C. Lawn,

Administrator, Drug Enforcement Administration.

BILLING CODE 4410-09-M

Office of Juvenile Justice and Delinquency Prevention

Meeting of State Advisory Group Chairs

AGENCY: Office of Juvenile Justice and Delinquency Prevention, Justice.

ACTION: Notice of advisory committee meeting.

SUMMARY: This notice sets forth the schedule for the forthcoming meeting of the State Advisory Groups. Notice of the meeting is required by the Federal Advisory Committee Act..

DATE: September 16, 1989–2:00 p.m.–5:00 p.m. September 17, 1989–9:00 a.m.–5:00 p.m. September 18, 1989–9:00 a.m.–12:00 p.m.

ADDRESS: Omni Georgetown Hotel, 2121 P Street, NW., Washington, DC 20037.

SUPPLEMENTARY INFORMATION: The State Advisory Groups, and advisory committee established pursuant to section 3(2)(A) of the Federal Advisory Committee Act (5 U.S.C. app. 2) will meet to carry out its advisory functions under section 241(f) of the Juvenile Justice and Delinquency Prevention Act of 1984, as amended. These sessions which will be open to the public, are scheduled at the above listed dates.

FOR FURTHER INFORMATION CONTACT: For information please contact Pamela Swain, Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice, Washington, DC 20531, (202) 724-5921.

Dated: August 31, 1989.

Terrence S. Donahue,

Acting Administration, Office of Juvenile Justice and Delinquency Prevention.

[FR Doc. 89-20933 Filed 9-1-89; 8:45 am]

BILLING CODE 4410-18-M

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

Advisory Council on Employee Welfare and Pension Benefits Plans; Meetings

Pursuant to section 512 of the Employee Retirement Income Security Act of 1974 (ERISA) 29 U.S.C. 1142, two meetings of the Advisory Council on Employee Welfare and Pension Benefits Plans will be held on Tuesday and Wednesday, September 26 and 27, 1989, in Suite N-3437, U.S. Department of Labor Building, Third and Constitution Avenue, NW., Washington, DC.

The purpose of the September 26 meeting, which will begin at 9:30 a.m., is to consider items listed below and to invite public comment on any aspect of the administration of ERISA.

1. Assistant Secretary's Report on:
(a) PWBA update and priorities.
(b) Miscellaneous Issues.
2. General Business of the Advisory Council.
3. Report of the Enforcement Work Group.
4. Report of the Access To Health Care Work Group.
5. Statements from the Public.

The purpose of the September 27 meeting, which will begin at 9:30 a.m., is to consider items listed below and to invite public comment on any aspect of the administration of ERISA.

1. General Business of the Advisory Council.
2. Chief, Division of Technical Assistance and Inquiries Report on:
(a) Participant Assistance.
(b) Benefit Recoveries.

3. Report of the National Retirement Income Policy Work Group.
4. Report of the Pension Portability Work Group.
5. Discussion of Current Proposed Legislation.
6. Statements from the Public.

Members of the public are encouraged to file a written statement pertaining to any topic concerning ERISA by submitting 20 copies on or before September 20, 1989, to William E. Morrow, Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, Suite N-5677, 200 Constitution Avenue, NW. Washington, DC 20210. Individuals wishing to address the Advisory Council should forward their request to the Executive Secretary or telephone (202/523-8753). Oral presentations will be limited to ten minutes, but an extended statement may be submitted for the record.

Organizations or individuals may also submit statements for the record without testifying. Twenty (20) copies of such statements should be sent to the Executive Secretary of the Advisory Council at the above address. Papers will be accepted and included in the record of the meeting if received on or before September 20, 1989.

Signed at Washington, DC this 30th day of August, 1989.

William E. Morrow,

Executive Secretary, ERISA Advisory Council.

BILLING CODE 4510-29-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Small Business Competitiveness Demonstration Program; Plan for Expansion in Targeted Industry Categories

AGENCY: Office of Small and Disadvantaged Business Utilization, NASA.

ACTION: Notice.

SUMMARY: This notice invites public comment on NASA's proposed plan to expand small business participation in 10 industry categories pursuant to Title VII of the "Business Opportunity Development Reform Act of 1988," Public Law 100-656.

DATES: Comments are due in writing on September 29, 1989.

ADDRESS: Comments should be addressed to Franz Hoffmann, National Aeronautics and Space Administration, Office of Small and Disadvantaged Business Utilization, Room 116, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Mr. Franz Hoffmann (202) 453-2088, Small Business Advisor.

SUPPLEMENTARY INFORMATION: Among other things, Title VII of the "Business Opportunity Development Reform Act of 1988" seeks to demonstrate whether targeted goaling and management techniques can expand Federal contract opportunities for small business in industry categories where such opportunities historically have been low despite adequate numbers of small business contractors in the economy. NASA has been identified as a participant in the demonstration program.

For purposes of the expansion portion of the demonstration program, NASA the targeted the following industries:

Industry number	Industry title
1. 3571	Electronic Computers.
2. 3577	Computer Peripheral Equipment, Not Elsewhere Classified (NEC).
3. 3663	Radio & TV Broadcasting and Communications Equipment.
4. 3764	Guided Missile and Space Vehicle Propulsion Units and Propulsion Units Parts.
5. 3769	Guided Missile and Space Vehicle Parts and Auxiliary Equipment, Not Elsewhere Classified (NEC).
6. 3812	Search, Detection, Navigation, Guidance, Aeronautical, and Nautical Systems and Instruments.
7. 3827	Optical Instruments and Lenses.
8. 7371	Computer Programming Services.
9. 7373	Computer Integrated Systems Design.
10. 7379	Computer Related Services, Not Elsewhere Classified (NEC).

NASA's Policy and Implementation Initiatives Proposed to Achieve the Goals.

The headquarters Office of Small and Disadvantaged Business Utilization (OSDBU) is responsible for the development and management of NASA programs to assist small businesses, as well as firms which are owned and controlled by socially and economically disadvantaged individuals. The office functionally oversees and directs the activities of corresponding offices at each of the nine NASA installations. The primary objective of the small business program is to increase the participation of small and disadvantaged businesses in NASA procurement. In support of this objective, the office offers individual counseling sessions to business people seeking advice on how to best pursue contracting opportunities with NASA. Specific guidance is provided regarding procedures for getting on bidder's mailing lists, current and planned procurement opportunities, arrangements for meeting with technical requirements personnel and various assistance or preference programs which might be available. The OSDBU will assist the contracting activities in implementing the Small Business Competitiveness Demonstration Program. NASA will implement this program by putting into effect the following initiatives:

—Develop instructional programs and train the Agency's procurement personnel in their roles and responsibilities in implementing the provisions under the law.

—Where possible, break out requirements to allow more participation by small businesses in areas where their participation has been historically low or nonexistent.

—Continue mailing copies of solicitations directly to small business.

—Enhance outreach programs to help small businesses become more competitively involved in the Agency acquisition activities.

—Increase sponsorship and participation in seminars and workshops which provide prospective vendors with detailed information on NASA's requirements.

—Conduct training sessions for middle and top management personnel.

—Encourage and promote joint ventures, teaming agreements and other similar arrangements, which permit small business concerns to effectively compete for contract solicitations for which an individual small business concern would lack the requisite capacity or capability needed to establish responsibility for the award of a contract.

—Small Business set-asides.

Dated: August 25, 1989.

Eugene D. Rosen,

Director, Office of Small and Disadvantaged Business Utilization.

[FR Doc. 89-20686 Filed 9-1-89; 8:45 am]

BILLING CODE 7510-01-M

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

Agency Information Collection Activities Under Office of Management and Budget Review

AGENCY: National Endowment for the Arts.

ACTION: Notice.

SUMMARY: The National Endowment for the Arts (NEA) has sent to the Office of Management and Budget (OMB) the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

DATE: Comments on this information collection must be submitted by October 5, 1989.

ADDRESSES: Send comments to Mr. Jim Houser, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., Room 3002, Washington, DC 20503; (202-395-7316). In addition, copies of such comments may be sent to Mrs. Anne C. Doyle, National Endowment for the Arts, Administrative Services Division, Room 203, 1100 Pennsylvania Avenue, NW., Washington, DC 20506; (202-682-5401).

FOR FURTHER INFORMATION CONTACT: Mrs. Anne C. Doyle, National Endowment for the Arts, Administrative Services Division, Room 203, 1100 Pennsylvania Avenue, NW., Washington, DC 20506; (202-682-5401) from whom copies of the documents are available.

SUPPLEMENTARY INFORMATION: The Endowment requests the reinstatement of a previously approved collection of information. This entry is issued by the Endowment and contains the following information:

(1) The title of the form; (2) how often the required information must be reported; (3) who will be required or asked to report; (4) what the form will be used for; (5) an estimate of the number of responses; (6) the average burden hours per response; (7) an estimate of the total number of hours needed to prepare the form. This entry is not subject to 44 U.S.C. 3504(h).

Title: International Panel "Exhibition Project Description". Frequency of Collection: Annually. Respondents: Non-profit institutions.

Use: The Arts Endowment and the United States Information Agency (USIA) cooperate in selecting cultural programming including exhibitions for overseas presentation by USIA. The form is needed to allow an International Panel to determine the suitability of exhibitions for international touring. The form will be sent to U.S. museum officials.

Estimated Number of Respondents: 200

Average Burden Hours per Response: 1

Total Estimated Burden: 200

Anne C. Doyle,

Administrative Services Division, National Endowment for the Arts.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

Abnormal Occurrences for First Quarter Calendar Year 1989; Dissemination of Information

Section 208 of the Energy Reorganization Act of 1974, as amended requires the NRC to disseminate information on abnormal occurrences (i.e., unscheduled incidents or events which the Commission determines are significant from the standpoint of public health and safety). The following incidents at NRC licensees were determined to be abnormal occurrences (AOs) using the criteria published in the **Federal Register** on February 24, 1977 (42 FR 10950). The AOs are described below, together with the remedial actions taken. The events are also being included in NUREG-0090, Vol. 12, No. 1 ("Report to Congress on Abnormal Occurrences: January–March 1989"). This report will be available in the NRC's Public Document Room, 2120 L Street, NW, (Lower Level), Washington, DC about three weeks after the publication date of this **Federal Register** notice.

Nuclear Power Plants

89-1 Plug Failure Resulting in Steam Generator Tube Leak at North Anna Unit 1

The second general AO criterion notes that major degradation of essential safety-related equipment can be considered an abnormal occurrence. Also, one of the AO examples notes that a major deficiency in design, construction, or operation having safety implications requiring immediate remedial action can be considered an abnormal occurrence. In addition, another AO example notes that an incident with implications for similar facilities (generic incidents) which create major safety concern can be considered an abnormal occurrence.

Date and Place—February 25, 1989; North Anna Unit 1, a Westinghouse-designed pressurized water reactor (PWR), operated by Virginia Electric and Power Company, and located in Louisa County, Virginia.

Nature and Probable Consequences—At 2:07 p.m., Unit 1 automatically tripped from 76 percent power. The initiating signal for the reactor trip was "C" steam generator (S/G) steam flow greater than feedwater flow coincident with a low S/G water level; this was later determined to be caused by the "C" main feedwater regulating valve closing due to a problem in the instrument air supply line.

During recovery operations, operators noted that primary system makeup was 50-60 gpm greater than letdown and that the condenser air ejector monitor indicated increased radiation. The licensee identified a primary-to-secondary leak of about 74 gpm in the "C" S/G and declared a Station Alert at 3:25 p.m. The licensee continued cooldown and depressurization. The plant entered cold shutdown at 10:12 p.m. and the Station Alert was terminated at 10:20 p.m. At the time of the event, Unit 2 was in a refueling shutdown.

Investigation showed that the leak was in tube R3C80 (Row 3 Column 60), about 4 inches above the seventh support plate. The tube had been plugged by Westinghouse in 1985. The leak was due to a hot leg mechanical plug failure. The top portion of the plug was severed from the body of the plug, was propelled up the inner diameter of the tube by the primary system pressure, and punctured the tube just above the U-bend transition. The puncture was approximately 2¼ inches long and ¾ inches wide. The plug dented an adjacent tube, R4C80. A small radioactive release occurred, resulting in dose rates less than approximately 3 percnet of technical specification limits.

Failure of the plug was attributed to primary water stress corrosion cracking of heat treated plug material (Inconel 600) due to low mill anneal temperatures which rendered the material highly susceptible to stress corrosion cracking.

The primary-to-secondary leak was well within the normal primary system makeup capability; in addition, the radiological releases were well below technical specification limits. However, the event identified major safety concerns because: (a) This was an unexpected failure mechanism for S/G tubes; (b) it was a potential common mode failure mechanism with the possibility of multiple S/G tubes failing; and (c) there were generic implications for other plants using such susceptible tube plugs.

Previously, North Anna Unit 1 experienced a S/G tube repture on July 15, 1987. This leak was also in the "C" steam generator, also near the seventh support plate. the 1987 event was not caused by plug failure, but occurred because of fatigue failure due to fluid elastic excitation. The tube had failed over 360 degrees of the circumference, and the fractured ends were displaced in the axial direction approximately one-half inch. The leak rate was estimated to be between 550 to 637 gpm. This event was reported as abnormal occurrence 87-15 in NUREG-0090, Vol. 10, No. 3.

Cause or Causes—As discussed above, the cause of the plug failure was attributed to primary water stress corrosion cracking of the heat treated Inconel 600 plug material.

Actions Taken To Prevent Recurrence

Licensee—The licensee's recovery plan was to investigate (with Westinghouse) the cause of the failure, determine corrective actions, and place Unit 1 into a refueling/maintenance outage so that S/G repairs could be done simultaneously. The susceptible plugs were identified in the S/Gs for both Unit 1 and Unit 2. Repairs consisted either of removing susceptible plugs and replacing them, or inserting a different type of plug into susceptible plugs. Repairs were completed for the S/Gs of both units and the NRC agreed that the plants could be restarted. Unit 2 returned to power operation by the end of April 1989. Unit 1 restarted in July 1989.

NRC—The NRC continues to investigate the potential generic implications of heat treated mechanical plugs used by Westinghouse, Combustion Engineering, and Babcock and Wilcox designed plants. On March 23, 1989, the NRC issued Information Notice No. 89-33 ("Potential Failure of Westinghouse Steam Generator Tube Mechanical Plugs") to all holders of operating licenses or construction permits for PWRs to alert licensees to the potential for plug failures.

On May 15, 1989, the NRC issued Bulletin No. 89-01 ("Failure of Westinghouse Steam Generator Tube Mechanical Plugs") to all holders of operating licenses or construction permits for PWRs. the bulletin requested the addressees to determine whether certain mechanical plugs supplied by Westinghouse are installed in their steam generators and, if so, that an action plan be implemented to ensure that these plugs will continue to provide adequate assurance of reactor coolant system pressure boundary integrity under normal operating, transient, and postulated accident conditions.

89-2 Steam Generator Tube Repairs at McGuire Unit 1

The second general AO criterion notes that major degradation of essential safety-related equipment can be considered an abnormal occurrence. Also, one of the AO examples notes that major degradation of the primary coolant pressure boundary can be considered an abnormal occurrence.

Date and Place—March 7, 1989; McGuire Unit 1, a Westinghouse-designed pressurized water reactor (PWR) operated by Duke Power Company, and located in Mecklenburg County, North Carolina.

Nature and Probable Consequences—At 11:40 p.m., Unit 1, while at 100 percent power, received a "B" main steam line radiation monitor alarm which could not be reset. A substantial and continual decrease in pressurizer level and steam generator (S/G) "B" feedwater flow were noted in the control room. The control room operators suspected a S/G tube leak. The licensee immediately took action to reduce plant load. At 11:45 p.m., the licensee declared a Station Alert. At 11:46 p.m. the reactor was manually tripped (which caused a turbine trip), and the licensee continued procedures for plant cooldown to equalize reactor coolant and S/G pressure to reduce the leak rate. the licensee terminated the Station Alert at 6:15 p.m. on March 8, 1989.

The maximum tube leak rate was estimated to be between 540 and 600 gpm. This leak rate considerably exceeds the normal primary system makeup capability (i.e., with the centrifugal charging pumps (CCPs) operating as part of the chemical and volume control system). In order to keep up with the leak, the licensee switched the pumps to their safety injection lineup—the pumps taking suction on the fueling water storage tank and injecting into all four cold legs of the reactor vessel. In this mode, each CCP can pump from about 150 gpm at normal operating pressure to over 300 gpm at reduced pressure.

Steam generator tube rupture is one of the design basis accidents considered in the NRC safety review of nuclear power plants. Significant S/G tube ruptures, where the leak rate considerably exceeds the normal primary system makeup capability, occasionally occur, as it did at McGuire Unit 1, and previously at Ginna and North Anna Unit 1. The event at Ginna occurred on January 25, 1982 with an estimated maximum leak rate of about 760 gpm; the event was reported as abnormal occurrence 82-4 in NUREG-0090, Vol. 5, No. 1. The event at North Anna Unit 1 occurred on July 15, 1987 with an estimated maximum leak rate between 550 to 637 gpm; the event was reported as abnormal occurrence 87-15 in NUREG-0090, Vol. 10, No. 3.

An Augmented Inspection Team (AIT) was sent by the NRC to investigate the McGuire Unit 1 event. The team concluded that the operating crew performed competently, but weaknesses in both normal and emergency operating procedures were identified. The tube failure did not result in a radiological release to the environment that exceeded regulatory limits. The event did not result in exceeding a technical specification (TS) safety limit. The whole body and thyroid doses from this event were a small fraction of the TS limits. All notifications to the NRC and offsite agencies were made in a timely manner. The AIT report, documented in Inspection Report Nos. 50-369/89-06 and 50-370/89-06, was issued to the licensee on April 10, 1989.

Cause or Causes—Investigation by the licensee determined that the leak was due to a crack in tube R18C25 on the cold leg side (preheater section) about 3¾ inches long, and about one foot above the top of the tube sheet. The licensee concluded that the cause of the tube rupture was intergranular stress corrosion cracking; the rupture was contained within a long, shallow, axial groove on the outside tube surface.

Actions Taken To Prevent Recurrence

Licensee—The licensee's recovery actions included inspection of all tubes in all four S/Gs, metallurgical analysis of the ruptured tube, removal or plugging of tubes as necessary, and revision of the procedures which the AIT identified as needing upgrading. The licensee committed to a 100 percent inspection of the inservice S/G tubes of all S/Gs at both McGuire Units 1 and 2 at their next refueling outages.

NRC—The NRC staff concurred with the corrective actions taken, and the commitments made by the licensee. Permission to restart Unit 1 was given on May 5, 1989. The plant attained criticality on May 9, 1989, and reached full power operation on May 13, 1989.

Other NRC Licensees

(Industrial Radiographers, Medical Institutions, Industrial Users, etc.)

89-3 Medical Therapy Misadministration

The general AO criterion notes that an event involving a moderate or more severe impact on public health or safety can be considered an abnormal occurrence.

Date and Place—January 23, 1989; Abbott Northwestern Hospital; Minneapolis, Minnesota.

Nature and Probable Consequences—A patient suffering from a malignant tumor on his right femur (thigh) received a 250 rad radiation dose to the left femur by mistake.

The patient was scheduled for 12 treatments of 250 rads each to the right thigh using a cobalt-60 teletherapy device. The procedure was for the patient to be brought to the teletherapy simulator to begin preparation for the actual treatment. The simulator is used to chart or map the exact area on the patient's body to be exposed to the cobalt-60. Once this area is determined, it is outlined with indelible ink by the simulator technologist. The patient is then transferred to the cobalt-60 teletherapy room for treatment.

On January 23, 1989, the patient was placed on the simulator table. Due to machine restrictions, however, the table had to be turned 180 degrees, placing the patient's left thigh closest to the technician and the thigh to be treated furthest away. With the patient's position reversed, the technician mistakenly marked the wrong thigh. Once the marking was completed, the therapy physician reviewed and approved the incorrect setup. The patient was then taken to the treatment room where the left femur was exposed to 250 rads of radiation. The therapy technologist discovered the error within minutes of the exposure when she received a copy of the simulator check list. The check list specified that the right femur was the area to be treated. Treatment was subsequently performed on the correct femur and the treatment schedule continued.

The patient's referring physician and the NRC's Region III Office were informed of the misadministration on January 23, 1989. The licensee determined that the misadministration could possibly cause the patient increased fatigue and possible bone marrow suppression in the left femur.

Cause or Causes—Several personnel errors occurred in this misadministration. The simulator technologist, in turning the table, apparently disoriented herself, and marked the wrong thigh. The therapy physician checked and approved the incorrect thigh marking and treatment. The therapy technologist should have waited until the patient's simulator check list was available in the teletherapy unit before commencing treatment.

Actions Taken To Prevent Recurrence

Licensee—As documented in an NRC Region III Confirmatory Action Letter dated January 25, 1989, the licensee committed to: (1) Provide additional guidance to the simulator and operator technologists and the therapy physician on procedures governing teletherapy administration; (2) inform the operator technologist that the completed simulation check list describing the treatment must be on hand and reviewed prior to setup; (3) provide NRC Region III within 30 days a comprehensive quality assurance/quality control (QA/QC) program which will incorporate Item 2; and (4) assure that the QA/QC procedure also will cover dosimetry, treatment planning and implementation, and radiation safety practices.

On February 16, 1989, the licensee notified NRC Region III that it had completed all items listed in the Confirmatory Action Letter. The licensee's QA/QC program includes dosimetry checks by three independent reviewers, chart checks by two independent reviewers, and treatment prescription by a physician. The hospital had a QA/QC policy prior to the misadministration that included some of the above procedures.

NRC—An NRC inspection was conducted on February 14–15, 1989, to review the circumstances associated with the event. Four minor violations of NRC requirements were identified—none relating to the misadministration. An NRC consulting physician reviewed the patient misadministration and determined that the misadministration would not likely have any significant or deleterious effect on the patient. The licensee's revised policy, and its implementation, will be reviewed by the NRC at the next routine inspection at the hospital.

89–4 Medical Therapy Misadministration

The general AO criterion notes that an event involving a moderate or more severe impact on public health or safety can be considered an abnormal occurrence.

Date and Place—March 9, 1989; Kennebec Valley Medical Center; Augusta, Maine.

Nature and Probable Consequences—A radiotherapy physician had prescribed therapeutic treatments in fractionated doses to two elderly patients from a Veterans' Administration facility. One patient was to be treated for a brain tumor, while the second patient was to be treated for a lesion near the lower palate. Both patients were brought to the hospital at the same time. Because of an identification error, the second (lower palate) patient was brought into the treatment room and the procedure for the brain tumor treatment was begun. When the error was discovered, the procedure was stopped. A total of 100 rads had been delivered to the brain of the patient. The patient had correctly received 2400 rads to the lower palate from previous treatments.

The licensee has advised the NRC that no adverse effects are anticipated as a result of the misadministration.

Cause or Causes—The misadministration was caused by human error on the part of the staff of the radiotherapy department at the medical center. The names, physical appearances, and treatment planning pictures of both patients were similar.

Action Taken To Prevent Recurrence

Licensee—The licensee's planned corrective actions include a strengthening of its patient identification policies along with second person confirmation of patient identity and treatment parameters.

NRC—NRC Region I will conduct an inspection to review the circumstances associated with this misadministration.

89–5 Medical Diagnostic Misadministration

The general AO criterion notes that an event involving a moderate or more severe impact on public health or safety can be considered an abnormal occurrence.

Date and Place—March 14, 1989; New England Center Hospitals; Boston, Massachusetts.

Nature and Probable Consequences—A patient was intended to receive an iodine-123 uptake and diagnostic scan. This would result in an exposure to the thyroid of about 7 rads. However, a staff endocrinologist mistakenly requested an iodine-131 upstage and scan. A floor administrator, transcribing the request to a computer, selected an iodine-131 whole body scan as the intended request. The dosage for this incorrect procedure was prepared and administered to the patient by nuclear medicine department personnel, resulting in the patient receiving five millicuries of iodine-131. This misadministration resulted in a therapeutic dose to the thyroid of approximately 4,000 to 5,000 rads, with a possible range between 1,200 and 9,000 rads. This dosage could affect the function of the thyroid.

The licensee stated that the patient, a cardiac patient under the care of an endocrinologist, might later have been administered a similar dosage of iodine-131 for thyroid ablation as treatment for his cardiac condition. However, this is no basis for the misadministration; the incident should not have occurred if

proper controls had been in place and followed.

Cause or Causes—The licensee stated that the misadministration was caused by human error on the part of the staff endocrinologist and lack of training of involved personnel. The root cause was done to inadequate supervision of activities.

Actions Taken To Prevent Recurrence

Licensee—The licensee stated that: (1) The Chief of Nuclear Medicine will review all requests for iodine-131 whole body scans, and (2) there will be weekly interdepartmental meetings of the Nuclear Medicine Department and the Department of Endocrinology.

NRC—NRC Region I conducted a special inspection on June 5, 1989, to review the circumstances associated with the event, and the appropriateness of the licensee's corrective actions. The results of the inspection are under review. Region I requested an NRC medical consultant to review the incident.

Dated at Rockville, MD this 29th day of August, 1989.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards; Revised Meeting Agenda

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the Advisory Committee on Reactor Safeguards will hold a meeting on September 7–9, 1989 in Room P–110, 7920 Norfolk Avenue, Bethesda, MD. Notice of this meeting was published in the Federal Register on July 26, 1989 and August 22, 1989.

Thursday, September 7, 1989, Room P–110, 7920 Norfolk Avenue, Bethesda, MD.

8:30 a.m.–8:45 a.m.: Comments by ACRS Chairman—The ACRS Chairman will report on items of current interest.

8:45 a.m.–12:00 Noon: Maintenance of Nuclear Power Plants (Open)—The Committee will review and report on the proposed NRC policy statement and an associated draft regulatory guide related to maintenance programs at nuclear power plants.

1:00 p.m.–2:00 p.m.: License Renewal (Open)—The Committee will hear and discuss a report from NRC staff representatives regarding the status of activities related to license renewal for nuclear power plants.

2:00 p.m.–4:30 p.m.: Individual Plant Examination for External Events (IPEEE) (Open)—A briefing and discussion with representatives of the NRC staff and the nuclear industry will be held regarding the status of the IPEEE program.

4:45 p.m.–5:45 p.m.: Industrial Sabotage (Open/Closed)—The Committee will review and report on a proposed resolution of Generic Issue A–29, Nuclear Power Plant Design for Reduction of Vulnerability to Industrial Sabotage.

Portions of this session will be closed as necessary to discuss information related to security provisions at nuclear power plants.

5:45 p.m.–6:30 p.m.: Accident Severity Scale (Open)—A briefing and discussion regarding proposed accident severity scale for use in the public announcement of nuclear power plant events and accidents will be held.

Friday, September 8, 1989, Room P–110, 7920 Norfolk Avenue, Bethesda, MD.

8:30 a.m.–12:00 Noon: Seabrook Nuclear Power Station, Unit 1 (Open)—The Committee will review and report on the proposed off-site emergency preparedness for full power operation of the Seabrook nuclear power plant.

1:00 p.m.–3:00 p.m. and 3:15 p.m.–4:15 p.m.: EPRI Requirements for Advanced Light Water Reactors (Open)—A briefing and discussion will be held regarding the status of the NRC review of the proposed EPRI Requirements for Advanced LWRs.

4:15 p.m.–5:15 p.m.: NUMARC Activities (Open)

A briefing and discussion will be held regarding NUMARC activities related to nuclear power plant IPEs and accident management.

5:15 p.m.–5:45 p.m.: Advanced Pressurized Water Reactors (Open)—A briefing and discussion will be held regarding the status of the NRC staff review of Westinghouse and Combustion Engineering standardized nuclear power plants.

5:45 p.m.–6:15 p.m.: Future ACRS Activities (Open)—The Committee will discuss anticipated ACRS subcommittee activities and items proposed for consideration by the full Committee.

Saturday, September 9, 1989, Room P–110, 7920 Norfolk Avenue, Bethesda, MD.

8:30 a.m.–12:00 Noon: Preparation of ACRS Reports to NRC (Open)—The Committee will continue the discussion of the proposed ACRS reports to NRC regarding items considered during this meeting.

1:00 p.m.–1:45 p.m.: Appointment of ACRS Members (Open/Closed)—The Committee will discuss qualifications of candidates proposed for nomination as ACRS Members.

Portions of this session will be closed as appropriate to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy.

1:00 p.m.–1:45 p.m.: Subcommittee Activities (Open)—The Committee will discuss the status of assigned ACRS subcommittee activities, including activities of NRC regional offices.

1:45 p.m.–2:30 p.m.: Miscellaneous (Open)—The Committee will complete discussion of items considered during this meeting.

Procedures for the conduct of and participation in ACRS meetings were published in the Federal Register on October 27, 1988 (53 FR 43487). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley, prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

I have determined in accordance with subsection 10(d) Public Law 92–463 that it is necessary to close portions of this meeting as noted above to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy (5 U.S.C. 552b(c)(6)) and Safeguards/Security Information applicable to specific nuclear facilities (5 U.S.C. 552b(c)(3)).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 310/492–8049), between 8:15 a.m. and 5:00 p.m.

Dated: August 28, 1989.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 89–20794 Filed 9–1–89; 8:45 am]

BILLING CODE 7590-01-M

Issuance and Availability of NUREG-1217, "Evaluation of Safety Implications of Control Systems in LWR Nuclear Power Plants—Technical Findings Related to USI A–47," and NUREG–1218, "Regulatory Analysis for Resolution of USI A–47"

The U.S. Nuclear Regulatory Commission (NRC) staff is issuing the resolution of Unresolved Safety Issue (USI) A–47, "Safety Implications of Control Systems." The resolution is documented in two final reports entitled "Evaluation of Safety Implications of Control Systems in LWR Nuclear Power Plants—Technical Findings Related to USI A–47" (NUREG–1217) and "Regulatory Analysis for Resolution of USI A–47 (NUREG–1218)." The proposed resolution and the draft NUREG reports had been published for public comment on May 27, 1988. All the comments received were addressed and summarized in appendix C of NUREG–1217. Safety Implications of Control Systems was identified as an Unresolved Safety Issue in the NRC 1980 Annual Report to the Congress pursuant to section 210 of the Energy Reorganization Act of 1974 as amended on December 13, 1977.

Nuclear power plant instrumentation and control systems are composed of safety-related protection systems and non-safety related control systems. The safety-related protection systems are designed to satisfy the General Design Criteria identified in appendix A to 10 CFR part 50. They are used in part to trip the reactor when certain plant parameters exceed allowable limits and to protect the core from overheating by actuating emergency core cooling systems. Non-safety-related control systems are used to maintain the plant within prescribed pressure and temperature limits during shutdown, startup, and normal power operation. The non-safety-related control systems are not relied on to perform any safety functions during or following postulated transients or accidents. They are used, however, to control plant processes that could have an impact on plant dynamics.

The purpose of the USI A–47 study was to perform a review of the non-safety-related control systems and to assess the effects of control system failures on plant safety. To this end, tasks were established to identify potential control system failures that, either singly or in selected combinations, could cause overpressure, overcooling, overheat, overfill, or reactivity events.

The NRC staff concluded from its A–47 investigations that certain actions should be taken to further enhance safety in LWR plants. These actions recommend that plants: (1) Provide systems to protect against reactor vessel/steam generator overfill events and to prevent steam generator dryout, (2) include in their plant procedures and their technical specifications provisions to periodically verify operability of these systems, and (3) modify selected emergency procedures to ensure safe plant shutdown following a small-break loss-of-coolant accident. Most plants already have substantial design protection against control system failures. The recommended safety improvements would apply to those plants for which additional or enhanced protection is warranted. The recommended actions are included in Appendix C of NUREG–1218.

Copies of the documents included in the final resolution for USI A–47 may be purchased from the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 37082, Washington, DC 20013–7082. Copies are also available from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. A copy is also available for public inspection and/or copying at the NRC Public Document Room, 2120 L Street, NW., Lower Level, Washington, DC.

Dated at Rockville, Maryland this 28th day of August 1989.

For the Nuclear Regulatory Commission.

R. Wayne Houston,

Director, Division of Safety Issue Resolution, Office of Nuclear Regulatory Research.

[FR Doc. 89–20741 Filed 9–1–89; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50–237 and 50–249]

Commonwealth Edison Co.; Withdrawal of Application for Amendments to Facility Operating Licenses

The United States Nuclear Regulatory Commission (the Commission) has granted the request of Commonwealth Edison Company (the licensee) to withdraw its October 29, 1985, application for proposed amendment to Provisional Operating License No. DPR–19 and Facility Operating License DPR–25 for the Dresden Nuclear Power Station, Unit Nos. 2 and 3, located in Grundy County, Illinois.

The proposed amendment would have revised the Technical Specifications to implement detection requirements of Generic Letter 84–11 for Dresden 2, revise the ISI time period to reflect the second 10-year program, and correct various typographical errors for Dresden Nuclear Power Station Unit Nos. 2 and 3.

The Commission has previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on April 23, 1986 (51 FR 15394). However, by letter dated August 4, 1989, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated October 29, 1985, and the licensee's letter dated August 4, 1989, which withdrew the application for the license amendment. The above documents are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and the Morris Public Library, 604 Liberty Street, Morris, Illinois 60450.

Dated at Rockville, Maryland this 28th day of August 1989.

For the Nuclear Regulatory Commission.

Byron L. Siegel,

Project Manager, Project Directorate III–2, Division of Reactor Projects III, IV, V, and Special Projects.

[FR Doc. 89–20742 Filed 9–1–89; 8:45 am]

BILLING CODE 7590-01-M

[License No. 21–24472–01; Docket No. 030–18655; EA 89–068]

Nuclear and Radiologic Imaging Physicians, Troy Professional Building, Order Suspending License and Revoking License

I

Nuclear and Radiologic Imaging Physicians, Troy Professional Building, 2151 Livernois, Suite 201, Troy, Michigan 48083 (the licensee) is the holder of Byproduct Material License No. 21–24472–01 (the license), which was issued by the Nuclear Regulatory Commission (Commission or NRC) on April 17, 1985 and is due to expire on April 30, 1990. The license authorizes Nuclear and Radiologic Imaging Physicians to possess byproduct material for use in

performing diagnostic and certain therapeutic medical procedures in accordance with the conditions specified in the license. Dr. Subhash C. Khullar is the only authorized user listed on the license.

II

During the period April 25 through May 25, 1989, NRC Region III conducted an inspection of the licensee's byproduct material program. As a result of this inspection, two apparent violations of NRC requirements were identified. These apparent violations included: (1) Byproduct material stored at locations not authorized by the license and (2) failure to make NRC-required records available to NRC inspectors upon reasonable notice.

On April 25, 1989, NRC inspectors arrived at one of the authorized locations listed in the license (2151 Livernois, Suite 201, Troy, Michigan). There they met an individual who indicated he was Dr. Khullar's business manager. When asked how to contact Dr. Khullar, he stated that the Doctor saw patients at Sanford Medical Center in Utica, Michigan. In Dr. Khullar's absence, the inspectors were unable to review NRC-required records of receipt, use and disposal of radioactive material for that facility. The Business Manager agreed to attempt to contact Dr. Khullar and inform him of an inspectors' request to review records.

A visit by the NRC inspectors to Sanford Medical Center (Sanford) on the afternoon of April 25, 1989, revealed several sealed sources containing byproduct material and three shipping cases which contained decayed unit doses of NRC-licensed radiopharmaceuticals. Sanford was previously an authorized location of use, but was not, at this time, authorized by any NRC license for use or storage of byproduct material. An attempt to contact Dr. Khullar by his Medical Assistant at Sanford was unsuccessful.

On April 26, 1989, in an attempt to locate Dr. Khullar, the inspectors visited another authorized location of use listed in the license, 31500 Schoolcraft, Livonia, Michigan. The inspectors were informed that the office was closed, but were allowed access into the facility. The facility appeared to be vacated and no records of receipt, use, or disposal of radioactive material were located; nor were the inspectors able to verify whether a closeout survey for radioactive contamination had been performed as required by 10 CFR 30.36(b).

Also on April 26, the inspectors returned to Sanford Medical Center and informed Dr. Khullar's medical assistant that Dr. Khullar could not possess radioactive material at that location. The Medical Assistant agreed to release the material for transfer to another licensee authorized for possession; however, she wanted to inform Dr. Khullar. While she was talking to Dr. Khullar, the inspectors requested to talk with him. They were promptly told by the Medical Assistant that he was in a meeting and could not talk to them.

On April 28, 1989, an inspector contacted the Medical Assistant at Sanford and informed her of the importance of talking with Dr. Khullar. The inspector was informed by the Medical Assistant that Dr. Khullar was busy and could not speak with him.

On May 2, 1989, as a result of numerous unsuccessful attempts to contact Dr. Khullar, a certified letter was mailed to Dr. Khullar requesting a date, time, and location where NRC could meet with him to perform an inspection of his licensed activities. The letter was received back at the NRC Region III office on May 25, 1989 and was marked as unclaimed.

On June 19, 1989, the Region III Deputy Regional Administrator attempted to contact the licensee and a message was left with Dr. Khullar's secretary stressing the importance of a response from Dr. Khullar; however, the call was not returned. On July 3, 1989, the Region III Regional Administrator sent a letter with an enclosed Notice of Violation (Notice), citing the license for violations involving storage of material at an unauthorized location and failure to allow NRC inspectors access to NRC-required records.

That letter with enclosed Notice was sent Certified Mail to all known locations where Dr. Khullar has worked. The certified letter as well as the enclosed Notice required that Dr. Khullar respond within 30 days. Both the letter and the Notice stated that failure to respond to the Notice within 30 days could result in revocation of the license. The certified letter was accepted at one of the licensee's addresses; however, NRC has not received a response to the letter or the Notice as of the date of this Order.

III

Dr. Khullar's failure to respond to the Notice of Violation and his apparent efforts to avoid his regulatory responsibilities raise substantial questions regarding Dr. Khullar's ability or willingness to comply with NRC requirements, and cannot and will not be tolerated. As a result of these actions on the part of the licensee, I lack the requisite reasonable assurance that the licensee's current operations can be conducted under Byproduct Material License No. 21–24472–01 in accordance with the Commission's requirements and that the health and safety of the public will be protected. Consequently, the public health, safety, and interest require that Byproduct Material License No. 21–24472–01 be suspended, that the licensee be required to transfer all licensed material to an authorized recipient, and, thereafter, that the license be revoked. Furthermore, pursuant to 10 CFR 2.201(c) and 2.202(f), I find that no prior notice is required and that this Order is effective immediately.

IV

In view of the above, pursuant to sections 81, 161b, 161c, 161i, 161o, 182 and 186 of the Atomic Energy Act of 1954, as amended, and the regulations in 10 CFR parts 2, 30, and 35, *it is hereby ordered*, effective imediately, that:

a. Byproduct Material License No. 21–24472–01 is suspended except for the activity set forth in Section IV.b. The licensee shall not receive any licensed material. The licensee shall cease and desist from any use of byproduct material in its possession and shall immediately place all such material in locked storage.
b. Within 30 days of the date of this Order, the licensee shall cause all licensed material in its possession to be transferred to an authorized recipient in accordance with 10 CFR 30.41 and shall submit for NRC approval: (1) A completed form NRC-314 and (2) a radiation survey report prepared in accordance with 10 CFR 30.36 to confirm the absence of radioactive materials or to establish the levels of residual radioactive contamination. This information should be addressed to the Regional Administrator, NRC Region III, 799 Roosevelt Road, Glen Ellyn, Illinois 60137.
c. Upon a written finding by the Regional Administrator, NRC Region III, that no licensed material remains in the licensee's possession, Byproduct Material License No. 21–24472–01 is revoked.

The Regional Administrator, NRC Region III, may, in writing, relax or rescind any of these provisions for good cause shown.

V

Pursuant to 10 CFR 2.202(b), the licensee may show cause why this Order, in whole or in part, should not have been issued by filing a written answer under oath or affirmation within 20 days of the date of issuance of this Order, setting forth the matters of fact

BEST COPY AVAILABLE

and law on which the licensee relies. The licensee may answer, as provided in 10 CFR 2.202(d), by consenting to the entry of this Order. If the licensee fails to file an answer within the specified time, consents to this order, or fails to request a hearing in accordance with section VI below, and in the absence of any other request for a hearing, this order shall be final without further proceedings.

VI

The licensee or any other person adversely affected by this Order may request a hearing on all or any aspects of this Order within 20 days of the date of this Order. Any answer to this Order or request for a hearing shall be addressed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555. Copies also shall be sent to the Assistant General Counsel for Hearings and Enforcement, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the Regional Administrator, Region III, U.S. Nuclear Regulatory Commission, 799 Roosevelt Road, Glen Ellyn, Illinois 60137. If a person other than the licensee requests a hearing, that person shall set forth with particularity the manner in which his interest is adversely affected by this Order and shall address the criteria set forth in 10 CFR 2.714(d). An answer to this order or a request for hearing shall not stay the immediate effectiveness of this Order.

If a hearing is requested by the licensee or a person whose interest is adversely affected, the Commission will issue an Order designating the time and place of the hearing. If a hearing is held, the issue to be considered shall be whether this Order shall be sustained.

For the Nuclear Regulatory Commission.

James Lieberman,

Director, Office of Enforcement.

Dated at Rockville, Maryland, this 23rd day of August 1989.

OFFICE OF PERSONNEL MANAGEMENT

Establishment of the Director's Task Force on Pay Reform

AGENCY: Office of Personnel Management.

ACTION: Notice.

Establishment of a Task Force. This notice is published in accordance with section 9(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463) and advises of the establishment of the Director's Task Force on Pay Reform. The Director of the Office of Personnel Management has determined that establishment of this Task Force is in the public interest.

Designation. Director's Task Force on Pay Reform.

Purpose. The purpose of the Task Force is to provide an opportunity for a wide spectrum of interested parties to have significant involvement in discussions on pay reform initiatives and to develop options to the current Federal pay system for the Director's consideration. Federal agencies, unions and management associations, public interest groups and private sector experts will be represented on the Task Force.

FOR FURTHER INFORMATION CONTACT: The Office of the Director, OPM, is the organization within the agency sponsoring this task force. For additional information, contact Mr. Vernon B. Parker, Counselor to the Director, OPM, on (202) 632–6101.

U.S. Office of Personnel Management.

Constance Berry Newman,

Director.

[FR Doc. 89–20642 Filed 9–1–89; 8:45 am]

BILLING CODE 6325-01-M

Director's Task Force on Pay Reform

AGENCY: Office of Personnel Management.

ACTION: Notice of meetings.

SUMMARY: According to provisions of section 10 of the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given that meetings of the OPM Director's Task Force on Pay Reform will be held on:

DATES:

September 20, 1989, 11:00 a.m., Office of Personnel Management, Room 1350, 1900 E Street, NW., Washington, DC.
September 27, 1989, 10:00 a.m., Office of Personnel Management, Room 1350, 1900 E Street, NW., Washington, DC.
October 4, 1989, 10:00 a.m., Office of Personnel Management, Room 1350, 1900 E Street, NW., Washington, DC.
October 11, 1989, 10:00 a.m., Office of Personnel Management, Room 1350, 1900 E Street, NW., Washington, DC.

Agenda: The Task Force will consider various alternatives for reforming the Federal white collar pay system and develop options for the Director's consideration.

FOR FURTHER INFORMATION CONTACT: Vernon B. Parker, Counselor to the Director, Room 5524, Office of Personnel Management, 1900 E Street, NW., Washington, DC 20415.

SUPPLEMENTARY INFORMATION: As time permits, an opportunity will be provided for members of the public in attendance at the meetings to provide their views.

Office of Personnel Management.

Constance Berry Newman,

Director.

[FR Doc. 20641 Filed 9–1–89; 8:45 am]

BILLING CODE 6325-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–27185; File Nos. SR–NYSE–89–01; SR–MSE–89–05]

Self-Regulatory Organizations; New York Stock Exchange, Inc. and Midwest Stock Exchange, Inc.; Order Approving and Notice and Order Granting Accelerated Approval to Proposed Rule Changes

On February 24, 1989, the New York Stock Exchange, Inc. ("NYSE") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to section 19(b)(1) under the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to establish specific written sales practice and suitability criteria and standards concerning uncovered short options transactions.[3]

The NYSE proposed rule change was noticed in Securities Exchange Act Release No. 26621 (March 9, 1989), 54 FR 10769 (March 15, 1989).[4] No comments

[3] On August 24, 1989, the NYSE amended its proposed rule change to modify the "Special Statement for Uncovered Option Writers" that is to be provided to uncovered options writers. *See* Letter from James E. Buck, Senior Vice President and Secretary, NYSE, to Joseph Furey, Branch Chief, Division of Market Regulation, SEC, dated August 23, 1989. In addition, on July 13, 1989, the Midwest Stock Exchange ("MSE") submitted to the Commission a proposed rule change (File No. SR–MSE–89–05) substantially identical to the amended NYSE proposed rule change and to proposed rule changes by the other options exchanges which were recently approved by the Commission. *See* Securities Exchange Act Release No. 26952 (June 21, 1989), 54 FR 27256. Hereinafter, the terms "self-regulatory organizations" and "exchanges" refer to the NYSE and MSE.

[4] Because the MSE proposed rule change is substantially identical to the NYSE amended proposed rule change this order also serves as the notice and order granting accelerated approval to File No. SR–MSE–89–05.

---

were received on the proposed rule change.

The exchanges' proposed rule changes require that member and member organizations transacting business with the public in writing uncovered short options contracts develop, implement, and maintain specific written criteria and standards for approving customer accounts for uncovered short options transactions. The proposed rule changes also require that member and member organizations establish a minimum net equity requirement for approving and maintaining such customer accounts. If a customer does not meet the member or member organization's specific criteria/standards, the customer's account may be approved for uncovered short options transactions only by the member or member organization's Senior Registered Options Principal or Compliance Registered Options Principal. The reasons for approving any such account must be recorded and the records maintained by the member or member organization. The exchanges' proposed rule changes further require that the member or member organization develop, implement, and maintain specific written procedures concerning the member or member organization's supervisory review of customer accounts which have established uncovered short options positions. In addition, the exchanges' proposed rule changes require that members and member organizations furnish to customers a written description of the risks involved in uncovered short options transactions, at or prior to the customers' initial uncovered short options transaction.[5] This written disclosure document must be furnished to customers in addition to the Options Disclosure Document required to be provided to customers trading in options pursuant to existing rules of the exchanges.[6]

The exchanges state that the proposed rule changes are designed to increase customer awareness of the risks entailed in writing uncovered options contracts and to intensify member and member organization supervision of customer accounts engaged in writing uncovered options contracts.

The Commission finds that the proposed rule changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6 and the rules and regulations thereunder.[7] Specifically, the Commission believes that the exchanges' development and implementation of specific written procedures governing: (1) The suitability of customers for writing uncovered short options transactions; (2) the approval of accounts engaged in such uncovered writing; and (3) the establishment of specific minimum net equity requirements for initial approval and maintenance of customer accounts will protect investors by ensuring that only those investors suitable for writing uncovered options will be approved to do so. In particular, the proposed rule change is designed to ensure that only those investors who possess the financial resources, investment background and objectives, and suitable risk tolerance will be approved for writing uncovered options.

In addition, the Commission believes that the distribution to customers of a short succinct written statement that describes the risks associated with uncovered options writing, at or prior to the customers' initial uncovered short options transaction, will help ensure investor protection because it will increase customer awareness of the potential for significant losses in writing uncovered short options contracts. In this regard, the Commission notes that since disclosure is an important component of investor protection under the federal securities laws, providing investors with a special uncovered short options risk statement may help ameliorate problems associated with uncovered short options transactions (*e.g.*, significant margin calls), especially during volatile markets such as those experienced in October 1987.[8]

The Commission finds good cause for approving the MSE proposed rule change prior to the thirtieth day after the date of publication in the **Federal Register** because the MSE proposed rule change is substantially identical to the amended NYSE proposed rule change. In addition, the Commission recently approved substantially identical proposed rule changes submitted by the other options exchanges.[9] Moreover, the MSE rule change is part of an agreement among the options exchanges to adopt new uniform sales practice standards for short uncovered options writing.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule changes that are filed with the Commission, and all written communications relating to the proposed rule changes between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filings also will be available for inspection and copying at the respective principal offices of the above-mentioned self-regulatory organizations. All submissions should refer to the file numbers in the caption above and should be submitted by September 26, 1989.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[10] that the proposed rule changes (SR–NYSE–89–01) and SR–MSE–89–05) be, and hereby are, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[11]

Dated: August 25, 1989.

Shirley E. Hollis,

Assistant Secretary.

Exhibit A—Rule 726 Risk Description

Special Statement for Uncovered Option Writers

There are special risks associated with uncovered option writing which expose the investor to potentially significant loss. Therefore, this type of strategy may not be suitable for all customers approved for options transactions.

1. The potential loss of uncovered call writing is unlimited. The writer of an uncovered call is in an extremely risky position, and may incur large losses if the value of the underlying instrument increases above the exercise price.

2. As with writing uncovered calls, the risk of writing uncovered put options is substantial. The writer of an uncovered put option bears a risk of loss if the value of the underlying instrument declines below the exercise price. Such loss could be substantial if there is a significant decline in the value of the underlying instrument.

3. Uncovered option writing is thus suitable only for the knowledgeable investor who understands the risks, has the financial capacity and willingness to incur potentially substantial large losses, and has sufficient

liquid assets to meet applicable margin requirements. In this regard, if the value of the underlying instrument moves against an uncovered writer's options position, the investor's broker may request significant additional margin payments. If an investor does not make such margin payments, the broker may liquidate stock or options positions in the investors account with little or no prior notice in accordance with the investor's margin agreement.

4. For combination writing, where the investor writes both a put and a call on the same underlying instrument, the potential risk is unlimited.

5. If a secondary market in options were to become unavailable, investors could not engage in closing transactions, and an option writer would remain obligated until expiration or assignment.

6. The writer of an American-style option is subject to being assigned an exercise at any time after he has written the option until the option expires. By contrast, the writer of a European-style option is subject to exercise assignment only during the exercise period.

Note: It is expected that you will read the booklet entitled "Characteristics and Risks of Standardized Options" available from your broker. In particular your attention is directed to the chapter entitled Risks of Buying and Writing Options. This statement is not intended to enumerate all of the risks entailed in writing uncovered options.

BILLING CODE 8010-01-M

[Release No. 34-27187; File No. SR-MSE-88-11]

Self-Regulatory Organizations; Midwest Stock Exchange, Inc.; Filing and Order Granting Accelerated Approval of a Proposed Rule Change Relating to the Arbitration Process and the Use of Predispute Arbitration Clauses

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on December 23, 1988, the Midwest Stock Exchange, Inc. ("Exchange" or "MSE") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule changes as described in Items I and II below, which Items have been prepared by the self-regulatory organization ("SRO"). Amendment No. 1, submitted on August 14, 1989, proposed additional changes to the Exchange's rules. The MSE has requested accelerated approval of this proposal because the filing is substantially identical to rule filings of the New York Stock Exchange ("NYSE"), National Association of Securities Dealers ("NASD"), and American Stock Exchange ("AMEX") that were approved by the Commission on May 10, 1989,[1] and by the Chicago Board Options Exchange ("CBOE") approved on August 2, 1989.[2] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule changes would amend the Exchange's rules for administering arbitration proceedings and address many issues regarding the fairness and efficiency of the arbitration process administered by the Exchange, as well as institute new requirements applicable to the use by Exchange members of predispute arbitration clauses in agreements with customers.

The MSE developed these proposed rule changes through the auspices of the Securities Industry Conference on Arbitration ("SICA"). The SROs have worked together over the past twelve years to develop uniform arbitration rules through SICA, which is comprised of a representative from each SRO that administers an arbitration program,[3] a representative of the securities industry, and four representatives of the public.

On September 10, 1987, after a review of securities industry-sponsored arbitration, the Commission sent to SICA a letter that set out its views regarding the need for changes to the Uniform Code of Arbitration ("Uniform Code").[4] The Commission also sent letters to the SROs on July 8, 1988 requesting that the SROs review the issues raised by the current use of mandatory predispute arbitration agreements by their member firms.[5] Since September 1987, SICA and its subcommittees have met regularly to develop proposals in response to the Commission's letters.

The majority of the proposals to amend the MSE's rules were based on changes in the Uniform Code made by SICA largely in response to the September 1987 and July 1988 Commission letters.[6] The other proposals included in this order were developed to meet concerns that have arisen through the administration of the arbitration programs.

Substantially identical rule filings submitted by the NYSE, AMEX and NASD were approved by the Commission on May 10, 1989. The comparable rule filing of the CBOE was approved on August 2, 1989. In its May 10, 1989 Order, the Commission addressed fully the significant public dialogue and comment that preceded its action. This notice and order granting accelerated approval of the proposed rule change is consistent with the substance of the May 10, 1989 Order, and the discussion set out in that order is fully applicable to the MSE rules approved herein.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The text of the proposed rule changes is available at the Office of the Secretary, MSE, and at the Commission's Public Reference Section.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Purpose.

(a) *Service of Pleadings.* The MSE proposes to modify the procedures for service of pleadings. Currently, the arbitration department of the MSE serves all pleadings on the parties. As cases have increased, using the arbitration department as an intermediary for the service of pleadings has added unnecessarily to delays in processing cases and to the cost of operating the arbitration system. The MSE proposes to serve only the initial pleading in a case, the "claim," and to require that parties serve all subsequent pleadings directly upon one another. This approach is intended to save administrative time and costs while continuing to ensure that respondents receive adequate notice of the institution of arbitration proceedings.

[3] The SROs that administer an arbitration program are the MSE, NYSE, NASD, AMEX, CBOE, Municipal Securities Rulemaking Board, Pacific Stock Exchange, Boston Stock Exchange, Cincinnati Stock Exchange and Philadelphia Stock Exchange.

[4] *See* letter from Richard G. Ketchum, Director, Division of Market Regulation, SEC, to James E. Buck, Senior Vice President, NYSE, dated September 10, 1987. This letter was also addressed separately to each of the other members of SICA.

[5] *See* letter from David S. Ruder, Chairman, SEC, to John J. Phelan, Jr., Chairman, NYSE dated July 8, 1988. This letter was also addressed to the senior executive officers of all other SROs that administer arbitration facilities.

[6] The Exchange's rules developed in response to the Commission's letters are MSE sections 8, 9, 11, 14, 21, 28, 30, 32(b) and 34.

Under amended MSE section 13, parties also will be required to supply the department of arbitration with sufficient additional copies of the pleadings for the arbitration department staff and each of the arbitrators. Additionally, the proposal specifies that service by first-class postage prepaid or by overnight mail service is considered to be made on the date of mailing and service by other means is considered to be made on the date of delivery.

This proposed rule change would apply both to arbitration proceedings conducted pursuant to the simplified procedures for small claims under MSE section 13 and regular cases initiated pursuant to MSE section 13.

Additionally, amended MSE section 13 provides that where both an MSE member firm and a person associated with the member firm are named parties to an arbitration proceeding, service on the associated person may be made either on the associated person, or on the member firm, which would then have the obligation to perfect service on the associated person. Proposed section 13 also provides that if the firm does not undertake to represent the associated person, the member firm must serve the associated person, advise all parties and the director of arbitration that the firm is not representing the associated person, and must provide the associated person's current address.

(b) *Classification of Arbitrators.* The arbitration panels at the SROs for cases involving public customers have historically been composed of a majority of "public arbitrators" and a minority of "industry arbitrators". However, there have not been clear requirements or specifications for who may serve as a public arbitrator. Under the Exchange's proposal, amended MSE section 8 would specify who may not serve as a public arbitrator and who may serve as an industry arbitrator.

The MSE's proposal addresses the potential for real or apparent bias on the part of public arbitrators who may have some professional or personal association with the securities industry. MSE section 8 defines as an industry arbitrator one who is associated with a member of an SRO, broker, dealer, government securities broker, government securities dealer, municipal securities dealer, or registered investment adviser. MSE Section 8 also deals with the appropriate role in the arbitration system of professionals such as attorneys or accountants who provide services to securities industry clients. The rule would classify as industry arbitrators, rather than public arbitrators, attorneys, accountants and other professionals who devoted twenty percent or more of their professional work effort to securities industry clients within the last two years. In addition, the rule excludes from service as a public or industry arbitrator persons who are spouses or other members of the household of a person associated with a registered broker-dealer, municipal securities dealer, government securities dealer or investment adviser.

MSE Section 8 permits an individual who had been associated with the securities industry to become a public arbitrator after three years, if the individual has gone on to other work and is not retired from the securities industry. Also, under the rule, industry retirees will no longer be permitted to serve as public arbitrators, although they may continue to serve as industry arbitrators. The MSE is also proposing disclosure provisions designed to assist parties in assuring that the panel assigned to each case is appropriately balanced. Under proposed MSE section 9, the employment histories of the arbitrators for the past ten years as well as the information provided by arbitrators pursuant to separate disclosure obligations contained in proposed MSE section 11 will be disclosed.[7]

The amendments regarding the classification of arbitrators are designed to promote impartial and knowledgeable decisions in the arbitration of disputes between investors and broker-dealers. The reclassification of securities industry retirees to the industry arbitrator pool and the establishment of a three year period before a former securities industry employee may serve as a public arbitrator should relieve most doubts that investors may have had regarding the impartiality of the public arbitrator pool. Similarly, the judgment to exclude from the public arbitrator pool lawyers, accountants and other professionals who regularly service the securities industry makes clearer the distinctions between the two arbitrator pools.

(c) *Arbitrator Disclosure and Background Information to be Supplied to the Parties.* The MSE is also proposing changes to its rules dealing with disclosures to be made by arbitrators, and with supplying arbitrator disclosures to the parties. Under the current rules, parties have been provided only with the names and current business affiliations of the arbitrators proposed for their cases. The Exchange's proposed rule change would provide the necessary guidance to arbitrators about the types of relationships that may create conflicts of interest. Moreover, parties have had to request specifically any other information from the arbitration departments within very short time frames. The Exchange's proposed rule change would provide to the parties all of the information disclosed by arbitrators pursuant to the amended disclosure rules at the time when the parties are first given the arbitrators' names. This change would provide full disclosure of arbitrators' backgrounds to parties at the earliest possible stage in the process, and should therefore avoid unnecessary postponements of hearings and promote knowledgeable use of challenges.

Accordingly, proposed MSE section 11(a) establishes specific disclosure obligations of arbitrators. The rule requires that arbitrators disclose any existing or past financial, business, professional, family or social relationships that are likely to affect impartiality or might reasonably create an appearance of partiality or bias. These disclosures extend to any relationships the arbitrators may have with any party, or its counsel, or with any individual whom they have been advised will be a witness. The rule also requires arbitrators to disclose any such relationship involving members of their families or their current employers, partners or business associates.

MSE section 11(b) admonishes prospective arbitrators to make a reasonable effort to inform themselves of any interests or relationships described in subsection (a). MSE section 11(c) advises arbitrators that the duty to disclose under subsection (a) of the rule is an ongoing duty, and that any person who serves as an arbitrator must disclose at any stage of the arbitration proceeding any such interests, relationships, or circumstances that arise, or that are recalled or discovered. Also, under section 11(d), the MSE has clarified that prior to the first session, the director of arbitration may remove an arbitrator based on information disclosed pursuant to the rule. Parties are to be informed of any information disclosed pursuant to the rule, if the arbitrator has not been removed.[8]

---

[7] The disclosure rules are proposed rule changes discussed in subsection (c) of this notice. The rules would require arbitrators to make extensive disclosures to the parties.

As discussed above, MSE Section 9 provides that parties will be informed of the names and business affiliations of the arbitrators for the past ten years, as well as any information disclosed pursuant to MSE section 11 at least eight days prior to the date fixed for the initial hearing session. Under MSE section 9, parties may also make further inquiry through the department of arbitration concerning the arbitrators' background.

(d) *Appointment of Replacement Arbitrators on a Panel.* The MSE is also proposing two changes with respect to its ability to appoint a replacement arbitrator on a panel when a vacancy occurs. The first of these changes concerns the ability of the director of abritration to replace an arbitrator who becomes unavailable to serve less than eight days prior to the first hearing session. Under the proposed amendment, if after appointment and prior to the first hearing session an arbitrator residgns, dies, withdraws, is disqualified or otherwise unable to perform as an arbitrator, MSE section 9 authorizes the director of arbitration to appoint a replacement arbitrator. The rule permits the appointment of replacement arbitrators closer than eight days to the hearing. The rule also explicitly provides that parties are entitled to receive the same disclosure regarding the background of the replacement arbitrator as they received for the initial arbitrator(s), and have the same right to request more information, and to challenge the arbitrator as provided in the rules, although within a shorter time frame.

The second change concerning the ability to appoint replacement arbitrators addresses situations where an arbitrator resigns, dies, withdraws, is disqualified or otherwise unable to perform as an arbitrator after the commencement of the first hearing session. Under the MSE's existing rules, if a vacancy occurs after the hearings have begun, both parties must consent either to the appointment of a replacement arbitrator to hear the rest of the case, or to continuing with the remaining arbitrator(s). Otherwise, if that consent cannot be obtained, the case must be reheard from the beginning with a full panel.

The proposed amendment to MSE section 12 permits the remaining arbitrators to continue with the hearing and determination of the controversy. However, under the proposal, if a party objects, a replacement arbitrator would be appointed by the director of arbitration under the same procedures as for the replacement of an arbitrator prior to the first hearing. The rule is designed to permit parties in particular cases to make the decision that makes the most sense for their case. For example, in cases where only peripheral issues have been dealt with and relatively little progress has been made, it may make sense for parties to request a replacement arbitrator. Conversely, where the hearings have progressed significantly, or are in fact substantially completed, it would make less sense for parties to request a replacement arbitrator, who then would have to learn all that had occurred in his absence.

In the event that parties do request a replacement arbitrator, it is clear that the arbitrators have the authority to require the rehearing of part or all of the case, or to withdraw from the case, effectively requiring the appointment of another panel, as is appropriate in their judgment. With this rule change, however, a party may no longer delay the resolution of the dispute by insisting on a rehearing whenever an arbitrator unexpectedly is unable to continue in his hearing of a case.

(e) *Availability of Small Claims Procedures and the Number of Arbitrators Required to Hear a Claim.* The MSE proposes to amend section 2(a) to increase to $10,000 from $5,000 the monetary claim limit for cases to be heard under the simplified procedures developed in the Uniform Code. Under these expedited procedures, a single arbitrator decides a case based upon the papers submitted by the parties. No oral hearing is held unless requested by the investor, or ordered by the arbitrator. This change is designed to decrease the cost of arbitration.[9]

MSE section 8(a) would change the number of arbitrators generally used for large cases from five to three. The rule currently provides for the appointment of five arbitrators in cases brought by public customers in which the claim exceeds $500,000. In order to alleviate administrative delays and costs frequently encountered in such cases, the proposed rule would eliminate the requirement of five-member panels, allowing the director of arbitration to exercise discretion in appointing panels of no fewer than three and no more than five arbitrators in cases not heard under the MSE's simplified arbitration procedures.

The MSE also proposed a technical amendment, in MSE section 2(f), regarding the single arbitrators used in cases administered under the simplified procedures. The amendment codifies the existing practice of appointing a public arbitrator as the single arbitrator in the case.

(f) *Discovery.* The MSE is proposing significant changes to its arbitration discovery rules, which should assist in the early resolution of discovery disputes and encourage the efficient resolution of cases on their merits. Under current Exchange rules, parties have been expected to exchange documents informally and voluntarily. Parties may also request documents pursuant to subpoena under the existing rules, but these do not have to be produced until the day of the hearing.

The MSE's proposed discovery rule expands party access to prehearing discovery and provides specific time frames for parties to request information from parties and for responding to such an information request. The rule also establishes a mechanism for prehearing conferences and for arbitrator involvement in prehearing matters where needed. Under the MSE's proposed rule change, arbitrators may also order depositions when appropriate.

Proposed MSE section 14(a) continues the policy established under existing rules for parties to cooperate to the fullest extent possible in the voluntary exchange of documents and information. In the event that voluntary exchanges are not sufficient, the rule establishes a clear framework for document production and information requests.

Proposed MSE section 14(b) provides that a party may serve a written request for information or documents twenty days after service of the claim or upon the filing of the answer, whichever is earlier. All parties are to receive copies of the request, and parties are required to endeavor to work out disputes regarding the request between themselves before an objection to the request is filed. Unless the requesting party allows more time, information requests must either be satisfied or objected to within thirty calendar days from the date of service. The party who made an information request has ten

---

[8] Once the arbitration panel is sworn, it controls all of the procedural aspects of the hearing. Accordingly, under the Uniform Code and the MSE's Uniform Arbitration Code, the director of arbitration may not remove an arbitrator after the hearings have begun. An arbitrator should be alert to the guidelines set out in the American Bar Association/American Arbitration Association Code of Ethics for Arbitrators in Commercial Disputes ("ABA/AAA Code") and the applicable law with respect to arbitrator bias, and remove himself from the panel when conflicts arise after hearings have begun. *See* Canon II, E.(2) of the ABA/AAA Code.

[9] MSE section 2(c) would establish a filing fee of $200 in cases where the amount in controversy is more than $5,000 but does not exceed $10,000.

days from receipt of the objection to respond to the objection.

Under the proposal, a party whose information request has not been satisfied may request in writing that the director of arbitration refer the matter to a prehearing conference. Parties may also find that there are other matters in addition to unresolved information requests that require the assistance of a prehearing conference. MSE section 14(d) provides that the director of arbitration may appoint someone to preside over the prehearing conference. The prehearing conferences could be held either in person or by telephone conference call, and are designed to help the parties to reach agreement on such matters as the exchange of information, exchange or production of documents, identification of witnesses, identification and exchange of hearing documents, stipulations of fact, identification and briefing of contested issues, and any other matter which will expedite the arbitration proceedings.

When a prehearing conference is unable to resolve any of these issues, MSE section 14(e) provides for the director of arbitration to appoint a single arbitrator to decide the issues outstanding. The rules allows the arbitrator to issue subpoenas, direct appearances of witnesses, direct the production of documents and depositions, and set deadlines and issue any other ruling which will expedite the hearing and permit any party to develop fully its case. MSE section 14(e) provides that the single arbitrator appointed to decide prehearing matters would be a public arbitrator in those cases where public customers have requested a majority of public arbitrators for their panel.

Other amendments to the prehearing provisions require parties to serve on one another at least ten days prior to the first hearing copies of documents in their possession that they intend to present at the hearing and identify witnesses they intend to present at the hearing. Under proposed MSE section 14(c), arbitrators may exclude from the arbitration, documents not exchanged or witnesses not identified at that time. The provision does not extend to documents or witnesses that parties may use for cross-examination or rebuttal. In addition, the MSE is proposing to amend its rules regarding subpoenas. In MSE section 21, the Exchange proposes to require parties to serve copies of all subpoenas on all parties.

(g) *Preservation of a Record.* The MSE is amending its arbitration rules to assure that records of arbitration proceedings are made and preserved. These records are necessary for courts to use in conjunction with any review of the proceedings they may make. MSE section 26 would codify a requirement that a verbatim record by stenographic reporter or tape recording be maintained. The rule further provides that, if a party to a proceeding elects to have the record transcribed, the cost of such transcription shall be born by that party unless the arbitrator(s) direct otherwise. If a record is transcribed at the request of a party, the rule requires that a copy shall be provided to the arbitrators.

(h) *Content and Public Availability of Arbitration Awards.* The MSE's proposed rule for arbitration awards expands both the content and public availability of arbitration awards. Prior to the Commission's May 10, 1989 approval of the amended arbitration rules of the Amex, NASD and NYSE, and prior to the submission of the proposal made in this filing, the only information generally available to the public regarding SRO arbitration cases was the percentage of investors that received some portion of the amount they claimed against their broker-dealer. No data had been previously available with respect to particular arbitrators' awards. The MSE's proposal affords substantially more public access to the results of this process of dispute resolution.

Proposed MSE section 30(e) provides that awards shall contain the names of the parties, a summary of the issues in controversy, the damages and/or other relief requested, the damages and/or other relief awarded, a statement of any other issues resolved, the dates the claim was filed and the award rendered, the number and dates of hearing sessions, the location of the hearing(s), the names of the arbitrators and the signatures of the arbitrators concurring in the award. The awards, including any written opinion voluntarily prepared by the arbitrators, are to be made public, except that the names of customer parties to the arbitration will be excluded pursuant to proposed MSE section 30(f) if the customer parties request in writing that their names not be included on the public version of the award.

(i) *Arbitration Fees.* Under proposed MSE section 32, the fees that may be assessed by the arbitrators for particular cases have been significantly increased in order to defray the MSE's costs of administering its arbitration program.[10] For example, MSE section 32(a) proposes that all parties who file claims, such as counterclaims, cross-claims and third party claims, now should be required to pay deposits. Under the existing rules, deposits are required only of original claimants. This significantly increases the potential fees that may be recovered by the Exchange and assessed against a party since arbitrators may assess costs against a single party. Proposed MSE section 32(d) would raise to $200 from $100 the minimum deposit for cases where no money damages are claimed. Proposed MSE section 32(h) sets a fee for prehearing sessions with an arbitrator of seventy-five percent of hearing session fees.

Proposed MSE section 32(c) also clarifies that arbitrators may assess the costs of conducting a hearing against the parties as they deem appropriate. These costs include not only the fees for each session, but all other costs of conducting the hearing comtemplated under the rules, such as the costs of transcribing a record, or producing witnesses or documents, and any other cost contemplated by the agreement between the parties or permitted by applicable law.

Finally, the MSE is proposing to codify its definition of a "hearing session". Under proposed MSE section 32(b), a "hearing session" would be a meeting between the parties and arbitrators that lasts less than four hours.

(j) *Predispute Arbitration Clauses.* The MSE also proposes two rule changes designed through the auspices of SICA to improve disclosure to customers in account opening agreements and to restrict the content of the arbitration clauses. Under the proposed rule change, MSE Section 34 would require broker-dealers that employ predispute arbitration clauses to place immediately before the clause introductory language that would inform customers that they are waiving their right to seek remedies in court, that arbitration is final, that discovery is generally more limited than in court proceedings, that the award is not required to contain factual findings and legal reasoning, and that the arbitration panel typically will include a minority of arbitrators associated with the securities industry.

Proposed MSE section 34 would require that the disclosure language be highlighted four ways. First, large or otherwise distinguishable type must be used. Second, the disclosure language must be set out in outline form so as to be noticeable to readers. Third, a statement, also highlighted, that provides that the agreement contains a predispute arbitration clause, and where that clause is located in the contract, must be inserted into the agreement immediately preceding the signature line. Fourth, a copy of the agreement containing a predisupute arbitration clause must be given to the customer, who is to acknowledge receipt of the agreement, either in the agreement itself or in a separate document.

---

[10] The MSE has advised the Commission that its costs for administering its arbitration program for the years 1987 and 1988 were $10,000 and $15,000, respectively.

Additionally, proposed MSE section 34 prohibits SRO members from having agreements with customers that limit or contradict the rules of any SRO, or limit the ability of a party to file any claim in arbitration or limit the ability of the arbitrators to make any award.

(2) Statutory Basis

The Exchange believes that the proposed rule change is consistent with section 6(b) and the Act, 15 U.S.C. 78f(b), which requires that national securities exchanges have rules designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, provide for an equitable allocation of fees, and, in general, protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

This proposed rule change will not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Commission finds that there is good cause to approve the MSE's proposed rule change prior to the thirtieth day after the date of publication of notice of filing in the **Federal Register.**[11] The proposal is substantially identical to the NYSE, NASD and Amex rule filings that were the subject of the Commission's May 10, 1989 approval order. [12] The NYSE's, NASD's and AMEX's versions of the same rules were published for public comment in the **Federal Register**, providing both the public and broker-dealer community with ample opportunity to comment on the proposed rule change that is the subject of this release. All public comments directed at the other SROs' arbitration filings were considered in the context of the review undertaken for the Commission's May 10, 1989 approval order. In light of the Commission's thorough consideration of all comments directed at the SRO arbitration filings that were the subject of the Commission's May 10, 1989 approval order, the substantially identical nature of the MSE's arbitration proposal, and the benefits that will accrue to investors from the availability of these improved arbitration procedures, the Commission believes that a good cause finding is justified.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of sections 6(b)(4) and (5) of the Act, [13] which require that national securities exchanges and registered securities associations have rules designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, provide for an equitable allocation of fees, and, in general, protect investors and the public interest.

The Commission believes that the proposed rules appropriately balance the need to strengthen investor confidence in the arbitration systems at the SROs, both by improving the procedures for administering the arbitrations and by creating clear obligations regarding the use by SRO members of predispute arbitration clauses, with the need to maintain arbitration as a form of dispute resolution that provides for equitable and efficient administration of justice. In particular, the rule changes affecting the classification of arbitrators, arbitrator disclosure, discovery, the preservation of a record, the form and public availability of awards, and guidelines for the use of predispute arbitration clauses dynamically advance the public interest in SRO arbitration.[14] Likewise, the SROs' initiatives with respect to the handling of pleadings, appointment of replacement arbitrators, the use of small claims procedures, and the number of arbitrators should improve the efficiency and speed of arbitration, maintaining those bargained for qualities of traditional arbitration. Because these rules will aid in the just resolution of disputes between investors and broker-dealers, we conclude that these rules are designed to prevent fraudulent and manipulative practices, promote just and equitable principles of trade and in general, protect investors and the public interest consistent with section 6(b)(5) of the Act. The fee increases represented by these changes appear to be reasonable and provide for an equitable allocation of fees among SRO members and investors using the arbitration facilities consistent with section 6(b)(4) of the Act.

IV. Solicitation of Comments and Conclusion

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington DC 20549. Copies of the submission, all subsequent amendments, all written statements addressing the proposed rule changes that are filed with the Commission, and all written communications relating to the proposed rule changes between the Commission and any person, other than those that may be withheld from the public in accordance with 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of the filings and comment letters will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should prefer to the file number in the caption above and should be submitted by September 26, 1989.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, [15] that the above mentioned proposed rule changes be, and hereby are, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[16]

---

[11] The proposed rule changes to MSE sections 8, 9, 11, 12, 14, 21, 22, 26 and 30 are effective October 1, 1989. The proposed rule changes to MSE sections 2, 12 and 32 are effective only for cases filed with the MSE after October 1, 1989. The proposed rule change to MSE section 34 will become effective September 7, 1989.

[12] *See* note 1, *supra*. The proposal is also substantially identical to the CBOE rule filing. *See* note 2, *supra*.

[13] 15 U.S.C. 78f(b) (4) and (5).

[14] The Commission's approval of MSE Rule 34, and the comparable rules of the NYSE, NASD and AMEX, is consistent with the conclusion of the Court of Appeals for the Sixth Circuit in Roney v. Goren, No 88-1874 (May 26, 1989), that the Commission has the authority to assure customer choice among SRO arbitration forums.

[15] 15 U.S.C. 78s(b)(2) (1982).

[16] 17 CFR 200.30-3(a)(12) (1988).

Dated: August 25, 1989.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 35-24945]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

August 25, 1989.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by September 18, 1989 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Louisiana Power and Light Company (70-7653)

Louisiana Power and Light Company ("LP&L"), 317 Baronne Street, New Orleans, Louisiana 70112, a wholly owned subsidiary of Energy Corporation, formerly known as Middle South Utilities, Inc., a registered holding company, has filed a further amendment to its previously amended application-declaration pursuant to sections 6(a), 7, 9(a), 10 and 12(d) of the Act and Rules 44 and 50(a)(5) thereunder.

On June 29, 1989, the Commission issued a notice (HCAR No. 24911) ("June Notice") of a proposal by LP&L to sell and leaseback approximately 20% of its 100% undivided ownership ("Undivided Interest") in Unit 3 of the Waterford Steam Electric Generating Station ("Waterford 3") for a fair market value expected not to exceed $515 million. The June Notice indicated that LP&L proposes to enter into one or more Participation Agreements providing for the sale of its Undivided Interest to a trustee ("Owner Trustee/Lessor") acting on behalf of an equity investor or investors ("Owner Participant"). Additionally the June Notice indicated that LP&L proposed to cause a letter of credit to be issued which the Owner Participants would be entitled to draw on under certain circumstances.

LP&L now proposes to sell and leaseback to up to three undivided interests totaling approximately 14% of its ownership interest in Waterford 3, having an aggregate appraised value expected not to exceed approximately $360 million.

LP&L now proposes that no letter of credit will be required for the first five years of the Lease. During the period of time that a letter of credit is not provided, however, the Owner Participant would be entitled to withdraw from the lease upon the occurrence of certain adverse financial events ("Financial Events") with respect to LP&L and to receive payment from LP&L of amounts (casualty value or special casualty value, as the case may be) equivalent to amounts that would have been provided through a letter of credit.

LP&L now states that in order to fulfill its obligation to pay the Owner Trustee/Lessor (or the Owner Participant) an amount sufficient to permit the Owner Participant to withdraw from the Lease upon the occurrence of a loss event ("Loss Event"), a Financial Event or a Lease event of default (in each case as specified in the Lease and related documents), it proposes to execute and deliver to the Owner Participant one or more promissory notes ("Notes"). The Notes will have stated maturity coincident with the end of the basic term of the Lease, and will have an aggregate principal amount equal to the equity portion of the maximum Casualty Value or the maximum Special Casualty Value (whichever is higher). LP&L estimates that the initial principal amount of the Notes will be approximately $200 million. The Notes will bear interest at a rate not to exceed 2% over the higher of (1) the prime rate of interest of a bank to be designated or (2) the highest rate payable with respect to the long-term secured lease obligation bonds issued with respect to the portion of the cost to be borrowed.

The Notes may be payable during the basic term of the lease but they will not become payable, and interest will not accure, until the occurrence of Loss Events, Financial Events or Lease events of default. All payments by LP&L of the principal of and/or interest on any overdue principal of the Notes will be credited against LP&L's obligation under the Lease of other transaction documents to pay the equity portion of Casualty Value or Special Casualty Value, as the case may be.

Upon (1) expiration of the basis term of the Lease, and assuming no amount of such Casualty Value or Special Casualty Value or any accrued interest thereon is due any payable, or (2) payment in full of the principal amount of and any accrued interest on the Notes, or (3) the timely furnishing by LP&L to the Owner Participant of a letter of credit as generally described in the June Notice, the Notes will be returned by the Owner Participant to LP&L for retirement and cancellation. If LP&L elects to renew and extend the Lease beyond the basis term of the Lease, LP&L must issue to the Owner Participant new promissory notes ("Renewal Notes") having the same terms as the retired Notes and a stated maturity coincident with the expiration of the related renewal term.

The Notes and Renewal Notes will be nontransferable except to a permitted successor Owner Participant. Prior to such time (if any) as the Notes or any Renewal Notes are collateralized with Collateral Bonds (as defined below), the Notes or any Renewal Notes will be secured by a security interest in LP&L's right, title and interest (including its leasehold interest) in and to the Undivided Interest.

By the beginning of the sixth year of the Lease, LP&L will be obligated to provide the Owner Participant with financial support as security for such payment in the form of either (1) a letter of credit (as described in the June Notice), or (2) collateral first mortgage bonds ("Collateral Bonds") issued by the LP&L under its Mortgage and Deed of Trust dated as of April 1, 1944, as supplemented ("Mortgage"). If LP&L chooses to issue Collateral Bonds then the Notes will remain outstanding whereas if LP&L chooses to issue a letter of credit, then the Notes will be returned and cancelled.

The Collateral Bonds issued by LP&L would have an aggregate stated principal amount and a stated maturity date equal to the principal amount and maturity date of the Notes. The Collateral Bonds would be issued as a separate series of bonds under LP&L's Mortgate so that there would be a separate series of Bonds for each Owner Participant.

The Bonds will serve to collateralize LP&L's payment obligations on the Notes. In the event that any principal amount of the Notes became due and payable (by virtue of a Loss event, a Financial Event or a Lease event of default), LP&L would be required to redeem Collateral Bonds having an aggregate principal amount equal to the principal amount of the Notes then due.

No payment obligation on the Collateral Bonds would arise (whether for principal or interest), unless and until an obligation to make payment of principal on the Notes arose. Upon (1) expiration of the basic term of the Lease, and assuming no amount of principal of the Notes were due and payable, or (2) payment by LP&L in full of the principal of and accrued interest (if any) on the Collateral Bonds, the Collateral Bonds would be required to be returned by the Owner Participant to LP&L for retirement and cancellation. If LP&L elects to extend and renew the Lease beyond the basic term under circumstances where Collateral Bonds were previously issued and delivered to the Owner Participant, LP&L would issue to the Owner Participant new collateral first mortgage bonds of a new series ("Renewal Collateral Bonds") in an aggregate principal amount equal to the principal amount of the Renewal Notes described above. Such renewal Collateral Bonds would have the same terms as the retired Collateral Bonds and a stated maturity coincident with the maturity of the related Renewal Notes. The Collateral Bonds and any Renewal Collateral Bonds would be nontransferable except to a permitted successor Owner Participant to whom the Notes or any Renewal Notes were transferred.

In the amendment, LP&L has requested an exception from the competitive bidding requirements of Rule 50 of the Act pursuant to Rule 50(a)(5) in order to negotiate and privately place the Notes and Collateral Bonds. It may do so.

System Fuels, Inc., et al. (70–7686)

System Fuels, Inc. ("SFI"), 639 Loyola Avenue, New Orleans, Louisiana 70113, a fuel procurement subsidiary company of Louisiana Power & Light Company, 142 Delaronde Street, New Orleans, Louisiana 70174, Arkansas Power & Light Company, 425 West Capitol, 40th Floor, Little Rock, Arkansas 72201, and System Energy Resources, Inc., Echelon One, 1340 Echelon Parkway, Jackson, Mississippi 39213, (collectively "Operating Companies"), each an electric public-utility subsidiary company of Entergy Corporation ("Entergy"), a registered holding company, and the Operating Companies have filed a declaration under sections 6(a), 7, 12(b), and 13(b) of the Act and Rules 45, 90 and 91 thereunder.

In order to finance its nuclear materials and services inventory, SFI proposes to borrow an aggregate principal amount of up to $45 million at any one time outstanding under a Revolving Credit Agreement ("Credit Agreement") with The Yasuda National Trust and Banking Co., Ltd., New York Branch ("Yasuda"), and possibly with one or more other banks and Yasuda as agent (collectively "Banks"), such borrowings to be evidenced by the issuance of a master note. Loans under the Credit Agreement would be due and payable by, and the Credit Agreement would expire on, September 30, 1992, unless otherwise extended, with the consent of the Banks, for additional one-year periods. SFI requests authorization for additional extensions of the Credit Agreement without seeking further Commission authorization.

Loans under the Credit Agreement will bear interest at SFI's option at either (i) Yasuda's Base Rate, (ii) the Eurodollar Rate, plus 0.4375%, or (iii) the CD Rate, plus 0.5625%. Assuming full utilization by SFI of the $45 million commitment under the Credit Agreement with Yasuda, SFI estimates that its effective cost of money per annum in respect of Base Rate Loans, Eurodollar Rate Loans, and CD Rate Loans, as of July 10, 1989, would be approximately 11%, 10.0625% and 10%, respectively.

SFI will grant Yasuda a security interest in SFI's nuclear materials and services inventory financed under the Credit Agreement together with the proceeds thereof from sales to the Operating Companies pursuant to the Purchase Agreement, SFI's accounts receivable for such inventory, and certain other rights and instruments incident thereto.

The Operating Companies, SFI and Yasuda also propose to enter into a Consent and Agreement acknowledging and consenting to SFI's granting of a security interest in SFI's accounts receivable arising from sales by SFI to the Operating Companies of nuclear materials and services under the Purchase Agreement. Under the Consent and Agreement, the Operating Companies will agree to pay amounts due to SFI under the Purchase Agreement for nuclear fuel inventory financed by the Banks directly to an account maintained by SFI with Yasuda, which account SFI will pledge to Yasuda as agent for the Banks, and, in the event that the loans should become due and payable under the Credit Agreement and not be paid by SFI. SFI will sell and the Operating Companies will purchase the inventory of nuclear materials financed under the Credit Agreement.

General Public Utilities Corporation (70–7670)

General Public Utilities Corporation ("GPU"), 100 Interpace Parkway, Parsippany, New Jersey 07054, a registered holding company, has filed an application-declaration pursuant to sections 6(a), 7, 9(a), 10, and 12(c) of the Act and Rule 42 and 50(a)(5) thereunder.

GPU proposes to issue and sell, from time-to-time through December 31, 1995, up to 2,500,000 shares of its common stock ("Common Stock"), $2.50 par value pursuant to a dividend reinvestment and stock purchase plan ("Plan") to be adopted by GPU. GPU requests an exception from the competitive bidding requirements of Rule 50 pursuant to Rule 50(a)(5) for its issuance of the Common Stock.

Under the Plan, holders of GPU common stock ("Shareholders") would be able to have all cash dividends automatically reinvested in additional GPU common stock and to purchase additional common stock by making optional cash payments of not less than $50 nor more than $6,000 each quarter. Common Stock held pursuant to the Plan will be voted by the Plan administrator ("Plan Administrator"), to be appointed by GPU, only in accordance with Shareholders' instructions.

Common Stock will be purchased under the Plan either on the open market or directly from GPU, as GPU may direct, by the Plan Administrator. Open market purchases will be priced at the average price of such shares purchased with respect to a dividend payment date, excluding any related brokerage fees or commissions which will be paid by GPU. Shares issued directly by GPU under the Plan will be priced at the average of the high and low sales prices of GPU common stock as reported in the Wall Street Journal for New York Stock Exchange Composite Transactions for the 10 trading days immediately preceding the relevant dividend payment date.

GPU will use the proceeds from the sale of the Common Stock issued under the Plan to make capital contributions to its subsidiaries, as authorized by orders of the Commission dated November 2, 1988 and March 22, 1989 (HCAR Nos. 24738 and 24848, respectively) and advances to its subsidiaries, which will be the subject of a future application with the Commission, and for other corporate purposes.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement; Clark County, Nevada

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an Environmental Impact Statement will be prepared for a proposed highway project in Clark County, Nevada.

FOR FURTHER INFORMATION CONTACT:

Anton J. Horner, Division Administrator, Federal Highway Administration, Nevada Division, 1535 Hot Springs Road, Suite 100, Carson City, Nevada 89706–0602, Telephone: 702/885–5320, or

Walter W. Wagner, Supervisor, Environmental Services Division, Nevada Department of Transportation, 1263 South Stewart Street, Carson City, Nevada 89712, Telephone: 702/885–5880.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Nevada Department of Transportation (NDOT) and Clark County, will prepare an Environmental Impact Statement (EIS) on a proposal to construct a new limited access freeway from Boulder Highway (US 93) on the east to Durango Road on the west in a corridor that generally lies between McCarran International Airport on the north and the City of Henderson on the south.

Alternatives to be considered in the EIS will include the no action alternative and various alignment and design alternatives. The development of the specific alternatives is an ongoing process that will incorporate possibilities and features brought forth during the scoping and public involvement activities in addition to those identified by project engineers as preliminary design activities progress.

Scoping Process: Two scoping meetings addressing the project will be held in Training Room B at McCarran International Airport, Las Vegas, Nevada. The first will be at 9:30 a.m. on September 20, 1989; the second is planned for early December 1989. In addition, three public informational meetings will be held from 3 to 8 p.m. as follows:

October 10, 1989 Commissioners' Meeting Room.

October 11, 1989 Green Valley Community Library.

October 12, 1989 Henderson Convention Center.

Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State and local agencies, and to private organizations and citizens who have previously expressed interest in this proposal. Also planned are early coordination and exchanges of information with the public and agencies through public information meetings, scoping meetings, direct request to other agencies to become cooperating agencies, and early notification and solicitation with entities affected by the proposed action through the Clearinghouse process. In addition, at least one formal location public hearing will be held. Public notice will be given of the time and place of any hearings. The Draft EIS will be available for public and agency review and comment.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues are identified, comments and suggestions are invited from all interested parties. Comments or suggestions concerning this proposed action and the EIS should be directed to the NDOT or FHWA at the addresses provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Anton J. Horner,

Federal Highway Administration, Carson City, Nevada.

[FR Doc. 89–20748 Filed 9–1–89; 8:45 am]

BILLING CODE 4910-22-M

DEPARTMENT OF THE TREASURY

Treasury Advisory Committee of Commercial Operations of the U.S. Customs Service

AGENCY: Departmental Offices, Treasury.

ACTION: Notice of meeting.

SUMMARY: This notice announces the date of the next meeting and the agenda for consideration by the Treasury Advisory Committee on Commercial Operations of the U.S. Customs Service.

DATE: The next meeting of the Treasury Advisory Committee on Commercial Operations of the U.S. Customs Service will be held on September 22, 1989 at 9:30 a.m. in Room 4121 of the Department of the Treasury, 1500 Pennsylvania Avenue, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Dennis M. O'Connell, Director, Office of Trade and Tariff Affairs, Office of the Assistant Secretary (Enforcement), Room 4004, Department of the Treasury, 1500 Pennsylvania Avenue, NW., Washington, DC 20220. Tel.: (202) 566–8435.

SUPPLEMENTARY INFORMATION: Agenda items for the fourth meeting of the Treasury Advisory Committee on Commercial Operations of the U.S. Customs Service on June 22, 1989 will include:

I. Old Business

1. User fee legislation update
2. Follow-up on Customs administration and enforcement of export licensing requirements
3. Impact of customs commercial operations on ports and carriers

II. New Business

1. Triangle processing
2. Customs invoice standards
3. Discussion of preparation of annual report
4. Other new business

The meeting is open to the public. Owing to the security procedures in place at the Treasury Building, it is necessary for any person other than an Advisory Committee member who wishes to attend the meeting to give advance notice. In order to be admitted to the building to attend the meeting, contact Dennis M. O'Connell at (202) 566–8435, no later than September 18, 1989.

Dated: August 30, 1989.

Salvatore R. Martoche,

Assistant Secretary (Enforcement).

[FR Doc. 89–20720 Filed 9–1–89; 8:45 am]

BILLING CODE 4810-25-M

DEPARTMENT OF VETERANS AFFAIRS

Privacy Act of 1974; Amendment of Systems Notice

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

Notice is hereby given that the Department of Veterans Affairs (VA) is considering amending routine use statements. The proposed changes are for the system of records entitled

Compensation, Pension, Education and Rehabilitation Records—VA (58VA 21/22) as set forth in **Federal Register** publication, "Privacy Act Issuances," 1987 Compilation, Volume V, pages 808–812. A change is also proposed to the section, Policies and Practices for Storing, Retrieving, Accessing, Retaining and Disposing of Records in the System, regarding the location of Target terminals.

Department of Defense (DOD) and Department of Transportation (Coast Guard) finance centers have requested access to the information contained in the VA's Compensation, Pension, Education and Rehabilitation system to assist them in disbursing benefits. It is VA's belief that release of information from 58VA 21/22 will prove beneficial to VA beneficiaries.

VA is proposing to allow disclosure of all records in the Compensation, Pension, Education and Rehabilitation system of records through on-line computer terminal access using the VA telecommunications network. Terminals will be located in the service finance centers and will permit access to records maintained in automated data processing format at VA Data Processing Centers. Authorized employees at the service finance centers will have read-only access to information relevant to the reconciliation and/or waiver of service department or retired pay, and will not be able to change VA records. Service finance center employees will not have access to any other information or to information on other individuals. Information in the system is routinely provided to service finance centers upon their request to reconcile discrepant accounts.

To provide the information for the service finance centers, VA is proposing to amend two routine use statements. The proposed change to routine use number 17 will permit the disclosure of any information from 58VA 21/22 to service finance centers. This information will facilitate reconciliation of discrepant accounts and reduce correspondence between the military and VA regional offices. VA is also proposing to change routine use number 17 to restrict its use to specific activities pertaining to the reconciling of the amount and/or waiver of service department and retired pay. Separate routine uses are proposed for the release by VA of certain information to the Department of Health and Human Services (HHS) so that it can reconcile the amounts of Supplemental Security Income (SSI) paid to individuals by HHS and for VA's disclosure of certain information to DOD for DEERS and CHAMPUS purposes. These disclosures are currently contained in routine use number 17, but for administrative purposes of this proposal will provide clear and concise routine uses thereby avoiding any misunderstanding of the purpose of each disclosure. The proposed change to routine use number 26 will permit the disclosure of information for other payees, in addition to veterans. The proposed change regarding location of Target terminals will include the service finance centers.

VA has determined that release of information for this purpose is a necessary and proper use of information in this system of records and that a specific routine use for transfer of this information is appropriate.

A "Report of Altered System" and an advance copy of the revised system notice have been sent to the majority and minority chairmen of the Committee on Government Operations of the House of Representatives and, the Committee on Governmental Affairs of the Senate, and the Office of Management and Budget, as required by 5 U.S.C. 552a(o) (Privacy Act) and guidelines issued by the Office of Management and Budget December 24, 1985, and Public Law 100–503.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposed amended routine use statements to the Secretary of Veterans Affairs (271A), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420. All relevant material received before October 5, 1989, will be considered. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m., Monday through Friday (except holidays) until October 16, 1989.

If no public comment is received during the 30-day review period allowed for public comment or unless otherwise published in the **Federal Register** by the Department of Veterans Affairs, the amendments to 58VA 21/22 included herein are effective October 5, 1989.

Approved: August 21, 1989.

Edward J. Derwinski,

Secretary of Veterans Affairs.

The system identified as 58VA 21/22, "Compensation, Pension, Education and Rehabilitation Records—VA" as set forth in **Federal Register** publication "Privacy Act Issuances," 1987 Compilation, Volume V, pages 808–812, is amended by revising the following entries:

58 VA 21/22

SYSTEM NAME:

Compensation, Pension, Education and Rehabilitation Records—VA.

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

* * * * *

17. The name, address, VA file number, effective date of compensation or pension, current and historical benefit pay amounts for compensation or pension, service information, date of birth, date of death, competency payment status, incarceration status, and social security number of veterans and their surviving spouses may be disclosed to the following agencies upon their official request. Department of Defense; Defense Manpower Data Center; Marine Corps; Department of Transportation (Coast Guard); PHS (Public Health Service), NOAA (National Oceanic and Atmospheric Administration) Commissioned Officer Corps in order for these departments and agencies and VA to reconcile the amount and/or waiver of service department and retired pay. These records may also be disclosed as a part of an ongoing computer matching program to accomplish these purposes. This purpose is consistent with 10 U.S.C. 684, 38 U.S.C. 3101, 38 U.S.C., 3104 and 38 U.S.C. 3301.

26. Identifying and payment information may be disclosed, upon the request of a Federal agency, to a State or local government agency to determine a beneficiary's eligibility under programs provided for under Federal legislation and for which the requesting Federal agency has responsibility. These records may also be disclosed as a part of an ongoing computer matching program to accomplish these purposes. This purpose is consistent with 38 U.S.C. 3301.

* * * * *

51. The name, address, VA file number, date of birth, date of death, social security number, and service information may be disclosed to the Defense Manpower Data Center. The Department of Defense will use this information to identify retired veterans and dependent members of their families who have entitlement to Department of Defense benefits but who are not identified in the Defense Enrollment Eligibility Reporting System (DEERS) program and to assist in determining eligibility for Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) benefits. This purpose is consistent with 38 U.S.C. 3301. These records may also be disclosed as part of an ongoing computer matching program to accomplish this purpose.

52. The name, address, VA file number, social security number, sex of veteran, date(s) of birth of the veteran and dependents, current benefit pay amounts for compensation or pension, pay status, check amount, aid and attendance status, veteran and spouse annual income amounts and type and combined degree of disability will be disclosed to the Department of Health and Human Services. The Social Security Administration will use the data in the administration of the supplemental security income (SSI) payment system as prescribed by Pub. L. 92–603. These records may also be disclosed as a part of an ongoing computer matching program to accomplish these purposes. This purpose is consistent with 38 U.S.C. 3301.

* * * * *

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records (or information contained in records) are maintained on paper documents in claims file folders (e.g., "C" file folders, educational file folders and vocational rehabilitiation folders) and on automated storage media (e.g., microfilm, microfiche, magnetic tape and magnetic disks). Such information may be accessed through a data telecommunications terminal system designated the Target System. Target terminal locations include VA Central Office, regional offices, some VA medical health care facilities, U.S. Army Finance and Accounting Center, Navy Finance Center, Marine Corps Finance Center, Air Force Accounting and Finance Center, U.S. Coast Guard Pay and Personnel Center. Information relating to receivable accounts owed to VA, denominated the Centralized Accounts Receivable System (CARS), is maintained on magnetic tape, microfiche and microfilm. CARS is accessed through a data telecommunications terminal system at St. Paul, Minnesota.

* * * * *

RETRIEVABILITY:

Authorized service finance center employees will have read only access to the portions of the data base containing information relevant to the reconciliation of the amount and/or waiver of service department or retired pay for individuals currently receiving or entitled to receive these payments.

SAFEGUARDS:

Access to service finance centers is limited to authorized employees. The centers are protected by armed guards. Access to terminals within each center is limited to those employees who need access to the date to perform their assigned duties.

Sunshine Act Meetings

Federal Register
Vol. 54, No. 170
Tuesday, September 5, 1989

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:05 p.m. on Tuesday, August 29, 1989, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider: (1) An administrative enforcement matter; (2) matters relating to the possible closing of certain insured banks; (3) matters relating to the Corporation's corporate activities; and (4) a personnel matter.

In calling the meeting, the Board determined, on motion of Chairman L. William Seidman, seconded by Director M. Danny Wall (Director of the Office of Thrift Supervision), concurred in by Director C.C. Hope, Jr. (Appointive), and Director Robert L. Clarke (Comptroller of the Currency), that corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: August 30, 1989.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

BILLING CODE 6714-01-M

NEIGHBORHOOD REINVESTMENT CORPORATION

Regular Meeting of the Board of Directors

TIME AND DATE: 2:30 p.m, Thursday, September 7, 1989.

PLACE: Neighborhood Reinvestment Corporation, 1325 G Street, NW., Eighth Floor-Board Room, Washington, DC 20005.

STATUS: Open.

CONTACT PERSON FOR MORE INFORMATION: Martha A. Diaz-Ortiz, Assistant Secretary 376-2400.

AGENDA:

I. Call to Order and Remarks of Chairman
II. Approval of Minutes, February 21, 1989
III. Executive Director's Activity Report
IV. Ad Council Campaign Report
V. Budget Committee Report
  a. Proposed FY'89 Reallocation
  b. Proposed FY'90 Line Item Budget
  c. Proposed FY'91 OMB Submission
VI. Treasurer's Report
  a. Financial Statements
  b. Pension Plan Technical Amendments

Martha A. Diaz,

Assistant Secretary.

Part II

Department of Transportation

Federal Aviation Administration

14 CFR Part 108

Explosives Detection Systems for Checked Baggage; Final Rule

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 108

[Docket No. 25956; Amdt. No. 108–7]

RIN 2120–AD12

Explosives Detection Systems for Checked Baggage

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: The Federal Aviation Administration is amending the airplane operator security regulations to require U.S. air carriers to use explosives detection systems to screen checked baggage for international flights in accordance with their respective approved security programs. This action is intended to protect passengers and crewmembers from acts of sabotage directed against civil aviation and is responsive to recent legislation.

EFFECTIVE DATE: October 5, 1989.

ADDRESSES: The complete docket for this rule, including the Regulatory Impact Analysis, may be examined at the Federal Aviation Administration, Rules Docket (AGC–10), Room 915–G, 800 Independence Ave. SW., Washington, DC 20591, between 8:30 a.m. and 5 p.m. weekdays, except Federal holidays.

For copies of performance criteria and implementation procedures for explosives detection systems, prospective manufacturers may write to the Federal Aviation Administration, Director of Civil Aviation Security (Attn: ACS–200), 800 Independence Ave. SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: Quinten T. Johnson, Civil Aviation Security Division (ACS–100), Office of Civil Aviation Security, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267–8058.

SUPPLEMENTARY INFORMATION:

Introduction

On July 6, 1989, the Federal Aviation Administration (FAA) issued a Notice of Proposed Rulemaking (NPRM) to amend part 108 of the Federal Aviation Regulations (FAR) to require certain U.S. air carriers to use explosives detection systems (EDS's) to screen checked baggage on international flights in accordance with their respective security programs (54 FR 28985, July 10, 1989). This regulation was proposed on the FAA's own initiative and in response to legislation because attacks against international civil aviation have increased in sophistication over the past decade. In recent years, explosive devices have been used to damage or destroy civilian aircraft resulting in the loss of many lives. For example, 259 people on board Pan American World Airways (Pan Am) Flight 103 plus 11 people on the ground in Lockerbie, Scotland, were killed by an explosion aboard that flight in December 1988. As a result of such incidents, security has become a greater concern of the aviation community, and more sophisticated measures are required to prevent recurrences of such incidents. Therefore, the regulation requiring U.S. air carriers to use EDS's to screen checked baggage for international flights in accordance with their respective security programs is adopted as final.

Background

FAR Part 108, promulgated in 1981 (46 FR 3782, January 15, 1981), is part of the FAA's Civil Aviation Security Program initiated in 1973. Section 108.9 requires certain U.S. carriers to conduct security screening of passengers and their baggage "to prevent or deter the carriage aboard airplanes of any explosive, incendiary, or deadly or dangerous weapon on or about each individual's person or accessible property, and the carriage of any explosive or incendiary in checked baggage."

For many years, this screening program was effective in countering the threat to domestic and international civil aviation, which came primarily from hijackers. In recent years an additional threat has come from persons seeking to bomb or sabotage aircraft. To counter this threat, improved methods of detecting explosives are needed.

The U.S. Government has actively supported research and development in explosives detection. For example, between fiscal years 1982 and 1989, the FAA spent over $47 million on vapor detection and thermal neutron analysis equipment alone. In February 1989, the International Civil Aviation Organization (ICAO) convened a special session of its Council to discuss acts of sabotage directed against civil aviation and the need to expedite research and development on the detection of explosives. In March 1989, the ICAO held a meeting of world experts in explosives detection to address the issue. Similar discussions have taken place in European organizations as well.

The FAA has tested several explosives detection systems and has purchased six Thermal Neutron Analysis (TNA) units for initial installation at selected airports. These units detect explosives using Californium-252 as a thermal neutron emitter to activate nitrogen atoms. Testing was performed over a period of several months during 1987 and 1988 at Los Angeles International and San Francisco International Airports. During these testing periods, over 40,000 actual passenger bags were subjected to TNA screening. This operational experience demonstrated that TNA is one technology that can be successfully deployed for the detection of explosives.

After the destruction of Pan Am Flight 103, the FAA conducted a comprehensive review of security procedures to determine where improvements or new procedures were needed. On April 3, 1989, Secretary of Transportation Samuel K. Skinner announced a number of aviation security initiatives. Among the most significant of these was the deployment of explosives detection systems being addressed in this rule, and the establishment of a Security Directive and Information Circular system, for which a regulation was promulgated on July 10, 1989 (54 FR 28982; July 10, 1989).

There has also been substantial Congressional interest in improving aviation security. One Congressional response was legislation (Pub. L. 101–45), signed by the President on June 30, 1989, that directs the FAA to require EDS's at airports where the Administrator of the Federal Aviation Administration determines the use of EDS's is necessary. This legislation provided that—

> Not later than thirty days after the date of the enactment of this Act, the Federal Aviation Administrator shall initiate action, including such rulemaking or other actions as necessary, to require the use of explosive detection equipment that meets minimum performance standards requiring application of technology equivalent to or better than thermal neutron analysis technology at such airports (whether located within or outside the United States) as the Administrator determines that the installation and use of such equipment is necessary to ensure the safety of air commerce. The Administrator shall complete these actions within sixty days of enactment of this Act[.]

Discussion of the Proposed Regulation

In its July 6, 1989, proposed rule, the FAA requested comments on three alternative plans for deploying EDS's. The alternatives identified in the NPRM were as follows:

I. Domestic and International Alternative—Install EDS's at 427 airports in the United States and 95 foreign airports over a 10-year phase-in period (100% checked baggage screening of domestic and U.S. international flights, eventually requiring 1,250 EDS's by 1999).

II. International Alternative—Install only enough EDS's to screen U.S. carrier international flights at domestic and foreign airports over a three year phase-in period (100% checked baggage screening of all U.S. international flights, eventually requiring 400 EDS's by 1999).

III. Threat-Driven Alternative—Install 200 EDS's at an unspecified number of domestic and foreign airports over a three year phase-in period, based on the need to counter threats (100% checked baggage screening of all international flights at selected airports, eventually requiring 270 EDS's by 1999).

The FAA stated that, while comments were welcome on the feasibility of all three alternatives, it was proposing Alternative II. It proposed that for international flights each air carrier conducting screening under an approved security program use an EDS that has been approved by the Administrator to screen checked baggage. This proposal would enable the FAA to require air carriers to use EDS's for all international flights.

Thus, in the proposed rule, the FAA sought the authority to require EDS's for all international operations through subsequent amendments to each air carrier's security program, although initial deployment of EDS's would be limited to approximately 40 airports. The FAA stated that before extending EDS requirements to international locations beyond the initial deployment, it would consider a variety of factors such as successful consultation with foreign governments, level of vulnerability at the particular location, and the projected level of usage. The FAA also stated that it would look closely at benefits and costs.

Discussion of Comments

The FAA received comments from 28 individuals and organizations. Although the proposed rule addressed only the screening of international baggage, the FAA also invited comments on the feasibility of either requiring EDS's for domestic operations or requiring EDS's on a threat-driven basis. Several other issues were also raised by commenters, the major points of which are discussed below.

Domestic Application

Most commenters oppose any requirement for EDS's for domestic operations because, they believe, there is no significant domestic threat. In the absence of identifiable threat, they believe, the cost of these proposed systems is not warranted. The FAA believes the current level of threat to domestic operations does not require EDS screening and that current security practices for countering threats to domestic operations are adequate. Therefore, the FAA intends to limit the scope of the rulemaking to international flights as originally proposed. The FAA will continue to review all threats against civil aviation, both domestic and foreign, and will take action to require use of EDS's for domestic operations if warranted. In the meantime, if there were a threat against a specific domestic flight at a specific airport that has an EDS in operation, the FAA would take that EDS into account when developing appropriate countermeasures.

Threat-Driven Approach

Some commenters believe that the practice of using EDS's only where known threats exist would satisfy the Congressional mandate in Public Law 101–45 and that carrier flights not operating from high threat locations would then be spared the expense of using an EDS to screen checked baggage. One commenter said that if terrorists didn't know where EDS's are, this approach would deter criminal acts. Other commenters said that the FAA should use mobile EDS's to counter site- or time-specific threats. The FAA believes that the value of widescale use of EDS's is in their general deterrence and not simply in response to specific threats. Moreover, the FAA does not believe it is presently feasible to employ mobile EDS's because of the large size of the EDS equipment currently available and because of the long lead times needed to acquire, install, and operate EDS's. However, as indicated elsewhere in this preamble, the FAA will carefully evaluate where to require the use of EDS's.

Cost

Some commenters believe that the FAA underestimated the costs of acquiring and operating EDS's. While some comments could not be evaluated because of lack of supporting data on underlying assumptions, the FAA acknowledges that a number of points raised by the comments are valid and has made adjustments in the cost estimates. The final rule cost estimates are considerably higher than those identified in the NPRM. The revised cost estimates, addressing such factors as cost of structures to house EDS's, number of systems needed, operator training, and maintenance are discussed later in this preamble under "Regulatory Impact Analysis Summary." The Regulatory Impact Analysis, not published in the **Federal Register**, is part of the docket for this rule and contains a thorough analysis of costs. It may be examined at the location stated under **ADDRESSES.**

Some commenters express the opinion that the Government should fund implementation of this regulation since, they said, the U.S. Government, not the air carriers, is actually the terrorists' target. The FAA does not agree with commenters who say that the Government should fund EDS's. The FAA notes that the Federal government does not currently fund implementation of other mandatory security programs. The FAA recognizes that this rule will have a cost impact on air carriers, but it is projected to be modest on a per-passenger basis, and the FAA expects air carriers to recover the cost as they would other operational costs.

One commenter expresses concern that small carriers would be competitively disadvantaged in foreign operations if they had to pay for EDS equipment. Furthermore, the commenter points out that the larger carriers would be so overwhelmed by screening their own baggage that they would not be able to serve small carriers. The FAA recognizes that cooperation among air carriers in the use of available EDS equipment is critical to minimize costs and maximize EDS use. The FAA's cost estimates are predicated on cooperation that allows for maximum utilization of EDS equipment. Shared use of EDS equipment is also necessary to permit carriers with relatively low passenger volume from a given location to be competitive. It is expected that, as with other security equipment in the past, air carriers will enter into agreements among themselves to achieve shared use of EDS equipment. If unforeseen problems arise in specific situations, the FAA will work with the carrier involved to address appropriate checked baggage screening procedures.

One commenter suggests that foreign carriers should also be covered by this regulation since many Americans travel on foreign carriers. These travelers, the commenter said, should receive the same protection as those on U.S. carriers. The FAA believes that the aviation security threat is directed primarily at U.S. air carriers and not U.S. citizens per se. Should this situation change, the FAA will reconsider the applicability of the rule. Furthermore, it is important to work through the International Civil Aviation Organization to achieve unified, coordinated, worldwide improvements in aviation security. To this end the FAA is actively working with the member states of ICAO to prevent and deter threats against all of civil aviation.

The same commenter adds that Americans might find it preferable to use foreign carriers in order to avoid check-in delays, and that this would worsen the trade deficit. The FAA believes it has adequately projected the number of machines that will be required to process passengers based on current check-in procedures and thus does not agree that there will be significant additional delays. In addition, the increased level of security recognized by the traveling public could work to the advantage of those carriers using EDS equipment to screen checked baggage.

Premature Adoption of EDS Requirement

Some commenters believe the FAA would discourage technological development by adopting an EDS rule at this time, since the FAA acknowledges that only one system, TNA, is currently available that can meet the performance criteria. Several commenters express concern that the TNA system is not ready for operational use and is being deployed too rapidly.

Not only has Congress directed the FAA to require explosives detection equipment, the FAA believes there is an urgent need to establish such requirements. The FAA decided to purchase TNA systems because, after operational testing, the TNA system proved to have the highest degree of explosives detection capability currently available. It is the FAA's belief that by implementing the first generation of EDS technology, it is creating an incentive for manufacturers to make technological advances and produce smaller, less costly equipment. Although one commenter advises the FAA to be certain that vendors will be able to produce EDS equipment quickly enough to meet any deployment schedules that may be established through amendments to air carriers' security programs, the FAA believes, based on consultation with the manufacturer of TNA, that there will be an adequate supply of machines. Also, deployment schedules will be subject to the manufacturers' ability to produce the equipment. The FAA recognizes that other systems are in development and welcomes the opportunity to test and approve them when they meet the performance criteria established by the Administrator. The phased-in implementation of EDS technology will facilitate further research and development of alternatives.

The FAA has established the following minimum performance criteria for all EDS's:

1. The systems must be automated.
2. They must detect defined quantities and configurations of FAA-defined explosives.
3. They must be safe for operators and baggage.

Some commenters remark that the FAA should have spelledout the performance criteria and described the method by which the Administrator will approve EDS technology. The rule, however, is not the means by which a manufacturer's equipment is approved; it is an enablement of the FAA to require EDS's. More detailed information about the capabilities, use, compliance dates, locations, and deployment schedules of the system will be incorporated into each air carrier's approved security program. Specific performance criteria will be made available to manufacturers upon request. However, in accordance with § 191.5 of the FAR, the FAA will not publish this information in any document generally available to the public. The Director of Civil Aviation Security has determined that disclosure of this information would be detrimental to the safety of the traveling public. For the same reasons, the specific locations and numbers of EDS units will not be made available to the public. Persons with an operational need to know may write to the Federal Aviation Administration, Director of Civil Aviation Security (Attn: ACS–200), 800 Independence Ave., SW., Washington, DC 20591, for further information.

Another issue raised by commenters is the ability to set TNA equipment to detect small enough levels of explosives to adequately ensure passenger safety. The current performance criteria are reflective of the amounts of various explosives which have been determined to pose a threat.

One commenter points out that the size of the opening of the FAA-purchased TNA precludes oversized bags. It should be noted, however, that the vast majority of passenger bags do fit into the opening of the TNA equipment, and air carriers may contract for different machines with larger openings if they wish. The FAA will address screening procedures for oversize bags in connection with the air carriers' security programs.

Alarm Resolution

Concern has been expressed over how alarms will be handled and the amount of time it will take to clear suspect baggage. Procedures that will take into account the type of threat, limitations on terminal facilities, availability of law enforcement personnel, and explosives ordnance disposal support will be required under each air carrier's security program. While alarm resolution is not intended to be a wholly automated function of EDS's, as one commenter thinks, procedures appropriate to each type of technology and location will be developed. Alarm resolution may induce some operational difficulties, such as delays for individual passengers being unable to board their flights because of uncleared baggage. These operational difficulties will be addressed jointly by the FAA and the affected air carriers in the individual air carriers' security programs.

Delays

A number of comments address the concern that use of EDS equipment would lead to delays and disruptions. Some of this concern is over alarm resolution (discussed above), and some is related to the logistics of processing large amounts of baggage with a limited number of EDS's. In all locations, the FAA made careful estimates of how many EDS's will be needed to prevent delays at each airport based on the number of flights peaking and locations of the terminals. The FAA believes that EDS screening at foreign airports may actually reduce delays at locations where physical searches are now conducted, especially in Western Europe.

Carry-On Baggage

A few commenters state that carry-on baggage should be subject to EDS screening as well as checked baggage because dupes and suicidal individuals may carry their explosives aboard in hand baggage. While the FAA is actively looking at the carry-on baggage screening process, requiring EDS for carry-on baggage is beyond the scope of this rulemaking. Improvements in carry-on baggage screening requirements have already been instituted in a number of geographic locations, and other improvements are being considered as part of other FAA security initiatives. The FAA will continue to evaluate the feasibility of requiring that EDS screening be applied to carry-on baggage.

Potential Radiation Effects

Some commenters voice concern regarding possible radiation from the use of any EDS that uses a radioactive source. The commenters advise that baggage handlers and the public may suffer ill effects from exposure to the radiation emitted during the decay of the induced radioactivity, and that the baggage may retain radioactivity after screening. Because of the possible effects of exposure, one commenter has suggested that the National Environmental Policy Act of 1969 requires an environmental impact statement for this rulemaking.

While this final rule regulates air carriers under part 108, it should be noted that the FAA has previously addressed the subject of security equipment in connection with the acquisition of such equipment by airports under part 107 of the Federal Aviation Regulations (14 CFR part 107). Such acquisition has been categorically excluded from environmental assessment under FAA Order 5050.4A, "Airport Environmental Handbook."

With respect to the use of security equipment, the key difference between part 107 and part 108 is that, under part 107 it is the airport that acquires the security equipment for installation and use, whereas under part 108 the air carrier does so. There are no differences between these regulations that suggest that the categorical exclusion under part 107 should not apply with respect to part 108. Nevertheless, because of particular concerns raised regarding EDS's that use radioactive sources, and since the Nuclear Regulatory Commission (NRC) determined that an environmental assessment (EA) was appropriate with respect to its role in licensing EDS's that use radioactive sources, an EA has been prepared to aid of the FAA's response to these docketed comments and has been included in the docket.

As stated in the FAA's EA, the NRC conducted its environmental review in amending the FAA's Materials License (which permits the use of equipment employing thermal neutron activation technology at John F. Kennedy International Airport) to authorize the FAA to install and operate this equipment at other airports. In an "Environmental Assessment and Finding of No Significant Impact" (published in the **Federal Register** at 54 FR 33636; August 15, 1989), the NRC examined the environmental impacts of installing and operating TNA devices at airports, including possible external exposure of workers and passengers, possible internal exposure of passengers or other members of the public who may consume irradiated food items packed in baggage, anticipated radiation doses, potential exposure due to malfunctions of the EDS, and several accident scenarios. The NRC concluded that the environmental effects of normal TNA use in baggage or cargo handling ramps will be insignificant. The NRC found that while some short-term residual radioactivity is induced in baggage at the time of screening, by the time the baggage emerges from the machine, the radioactivity is negligible. The NRC further found that "the maximum unrestricted area concentrations are calculated to be well below the maximum permissible concentrations specified in 10 CFR 20.106 and 10 CFR part 20, appendix B."

The FAA's EA for this rulemaking adopts the NRC's "Environmental Assessment and Finding of No Significant Impact." It provides that, in order to assure that implementation of the new regulation through the air carrier security programs will not permit a degrading of the minimal radiation exposure described in the NRC's EA, the FAA will provide, in each security program covered by new § 108.20, that no EDS (using a specific radiation source such as californium-232 that is subject to NRC jurisdiction) will be finally approved by the FAA unless the carrier demonstrates to the FAA that—

(1) For systems intended for use in the U.S., the EDS is covered by a license issued by the NRC (as required by 10 CFR 30.3), or by the appropriate Agreement State (as also required by the NRC's regulations);

(2) For systems intended for use outside the U.S., the carrier demonstrates either that the system is the same as one that has been previously licensed under NRC requirements, or that the system is registered by the NRC under 10 CFR 32.210. This is in addition to any requirements imposed by the country of installation.

The EA also indicates that, for each EDS that is approved by the FAA under § 108.20, each security program will also require that the carrier continue to comply with all conditions imposed on the installation and operation of that system under the NRC licensing and registration process.

The purpose of these requirements is to provide additional assurance that there will be no significant exposure to radiation. For these reasons, the FAA's EA concludes that the implementation of this final rule with respect to the installation and use of EDS's involving radioactive sources will not cause a significant impact on the quality of the human environment.

In consideration of the foregoing, the FAA environmental assessment included in the docket for this final rule contains a finding of no significant impact.

Two commenters doubt whether certain foreign governments opposed to the presence of nuclear materials would allow TNA machines to be installed. Where needed, the FAA will work to effect coordination with foreign governments. The FAA recognizes that it cannot require air carriers to comply with EDS regulations if they are precluded from doing so by a foreign government. Should such an instance arise, the FAA would require alternate procedures.

Miscellaneous

Wet leases—One commenter expresses concern over aircraft operated under wet leases. Wet leasing is the practice of air carriers leasing aircraft and flightcrews (except flight attendants) to foreign carriers. Usually foreign carriers paint the aircraft and operate them as though they were their own. The commenter feels that because the baggage on flights on such aircraft would be subject to EDS screening, the resulting delays would mean foreign carriers would want to avoid leasing U.S. aircraft and therefore be able to bid more successfully for wet leases among themselves.

Because wet leases may present special circumstances, especially where the aircraft is not readily identifiable as a U.S. aircraft, the FAA will work with carriers regarding the application of EDS requirements and consider the use of alternative procedures.

Insurance—One commenter believes the FAA should assume responsibility for obtaining adequate insurance for suppliers of EDS equipment. The FAA does not agree with this comment as suppliers of aircraft and other aviation products have the capability of building the price of insurance into their product costs.

Discussion of the Final Rule

The final rule is being adopted as originally proposed. Thus, the FAA will have the authority to amend each air carrier's approved security program to require use of EDS's to screen all checked baggage on all international flights by U.S. carriers for which screening is required.

In its initial exercise of its authority under this final rule, the FAA intends to require deployment of about 150 EDS's at approximately 40 international airports that are served by U.S. air carriers, taking current security procedures and threat information into account. The FAA has already issued a proposed amendment to the security programs of U.S. air carriers relating to the initial deployment. If the proposed amendment is adopted, the FAA projects that as many as 50 EDS's may be in use by the end of 1990, and approximately 150 EDS's may be in use by the end of 1991. The FAA will work closely with the industry in the implementation of the rule and evaluate operational experience to determine whether changes to these projections are necessary. As indicated in the NPRM, the FAA intends to phase-in implementation of this rule and may later expand the deployment to international flights at additional locations.

As stated in the proposed rule, the FAA will carefully consider whether and when to require the installation of EDS's at locations beyond the initial deployment. Any further deployment would occur only after additional action by the FAA to amend air carriers' security programs. This amendment process is established in § 108.25 of the Federal Aviation regulations (14 CFR 108.25). The process provides the affected air carriers notice and an opportunity to comment before final action is taken. The amendment process will provide a mechanism to evaluate the need for EDS use at specific locations, projected level of usage, level of vulnerability, availability of alternative security procedures, and other relevant factors that may affect a decision to expand the use of EDS's to new locations.

Section 108.7(b)(8)

Section 108.7(b)(8) will require certificate holders (air carriers) to describe in their approved security programs the procedures, facilities, and equipment used to comply with the new EDS requirements.

Section 108.20

This new section will require that each certificate holder conducting screening under an approved security program use an approved EDS to detect explosives in checked baggage on international flights in accordance with its security program. The rule does not require each individual certificate holder to own an EDS, nor does it preclude use of a single EDS by several air carriers. Indeed, the FAA believes that cooperation among air carriers is critical to the effective implementation of this rule.

Regulatory Impact Analysis Summary

Executive Order 12291, dated February 17, 1981, directs Federal agencies to promulgate new regulations or modify existing regulations only if the potential benefits to society for the regulatory change outweigh the potential costs to society. The Order also requires the preparation of a Regulatory Impact Analysis of all "major" proposals except those responding to emergency situations or other narrowly defined criteria. A "major" proposal is one that is likely to result in an annual effect on the economy of $100 million or more, a major increase in consumer costs, or a significant adverse effect on competition.

This final rule is determined to be a "major" rule as defined in the Executive Order, so a full Regulatory Impact Analysis evaluating alternative approaches has been prepared. This analysis is included in the docket, and quantifies, to the extent practicable, estimated costs to the private sector, consumers, Federal, State, and local governments, as well as anticipated benefits and impacts.

A summary of the Regulatory Impact Analysis is contained in this section. For a more detailed analysis, the reader is referred to the full Regulatory Impact Analysis contained in the docket (see **ADDRESSES**).

This section summarizes the cost and benefit assessment of an amendment to Part 108 of the Federal Aviation Regulations which would require U.S. air carriers conducting screening under an approved security program to use an explosives detection system (EDS) approved by the Administrator to screen checked baggage on international flights. The addition of new § 108.20 will require affected air carriers to use explosives detection systems in accordance with the provisions established by the Administrator and contained in their approved security programs. In addition, the economic analysis also considers two other alternatives; these include the option of broadening the scope of coverage to include screening all domestic and international baggage with EDS, and one in which screening would be conducted only for international operations at airports selected on a threat-driven basis.

The primary objective of this rule is the prevention of criminal acts or acts of terrorism against U.S. air carriers by individuals using explosive devices. Toward this end, the FAA has conducted extensive research aimed at detecting explosives. This research has concentrated on explosives detection system devices, including the Thermal Neutron Analysis (TNA) system and vapor detection systems, as well as advanced x-ray systems. The TNA device is the most advanced explosives detection system now available. Its capabilities can be enhanced by equipping them with x-ray systems. Therefore, the FAA has elected to analyze three alternative proposals for explosive detection using these enhanced TNA systems over the ten-year period of 1990 to 1999. These are—

I. *Domestic and International Alternative.* Install explosives detection systems at 427 airports in the U.S. and at airports in 88 foreign countries over a ten-year phase-in period (100% checked baggage screening of U.S. domestic and international flights, eventually requiring 1,825 explosives detection systems by 1999).

II. *International Alternative (The Final Rule).* Install only enough explosives detection systems to examine U.S. carrier international flights at domestic and foreign airports over a five year phase-in period (100% checked baggage screening of all U.S. international flights, eventually requiring 860 explosives detection systems by 1999).

III. *Threat-Driven Alternative.* Install 200 explosives detection systems at an unspecified number of domestic and foreign airports over a three year phase-in period, based on a threat-driven approach (100% checked baggage screening of all international flights at selected airports, eventually requiring 300 explosives detection systems by 1999).

It is important to note that in the NPRM, Alternative II's phase-in period was three years, while here, it is five years. The number of TNA systems required to screen all international flights at current enplanement levels rose from 179 in the NPRM to 491 in the final rule. The production capacity does not exist to install this many systems within three years, but will exist within five years.

The methods and assumptions used in the analyses for the alternatives have been developed by the FAA. A major consideration guiding this analysis is the assumption that 100% screening of checked baggage on flights where passenger screening is currently required would be conducted under all three scenarios at those airports where EDS are to be used. The analyses assume enough systems to take into account peak hour travel, the projected growth in enplanements, and air carrier logistical difficulties. Preliminary cost factors were obtained from manufacturers and research organizations. Information for the formulation of benefits was obtained form the safety records of the International Civil Aviation Organization (ICAO) and the FAA. The costs and benefits of each of these alternatives have been analyzed over the ten-year span of 1990 to 1999.

The costs associated with the acquisition, installation, operation, and repair and maintenance of the TNA systems were difficult to quantify because these systems are still in an early stage of development. As such, there is limited experience on which to draw. At the present, there is only one manufacturer now capable of producing TNA systems. The FAA encourages other manufacturers to develop and produce explosives detection systems to meet the anticipated worldwide demand. In addition, the FAA believes that the entry of other manufacturers into the market would stimulate competition and would reduce costs. Thus, the unit costs used in the analysis assume that mass production techniques and the efficiency with which enhanced TNA and other EDS and x-ray systems are produced would reduce prototype and initial production cost estimates. The FAA assumes that production capacity in 1990, the first year that the rule would be in effect, could be as high as 50 units. Production capacity could increase to as many as 100 units in 1991 and could expand to an annual rate of more than 150 units thereafter.

The FAA has estimated costs for explosives detection system equipment, x-ray enhancement apparatus, equipment maintenance and repair, airport space rental, and labor; these have been used to estimate the cost of compliance with the three alternatives. The cost of a prototype TNA system is estimated to be $1 million in 1990. Based on discussions with the manufacturer on a quantity purchase, the FAA projects that the acquisition cost of a basic EDS unit, including delivery, installation, and operator training, would be $750,000 in 1990 and 1991. The FAA further believes that the effect of competition and the expected increases in the efficiency with which these units would be produced over time, which would yield economies of scale, would cause the cost of $750,000 to decline to $500,000 per TNA unit. On the basis of the limited operating history of the equipment and information furnished by the manufacturer, the annualized cost of maintenance and repair for an explosives detection system is estimated to be $26,200 per year. The FAA expects that the acquisition cost of x-ray enhancement units, including delivery and installation and training, is assumed to be $150,000 per unit in 1990 and 1991 and fall to $75,000 per unit in 1992 and the ensuing years. The estimated annual cost of maintenance and repair for the x-ray system is estimated to be $15,000 per unit in 1990 and 1991, which would then decline to $7,500 per unit per year in 1992 and the following years.

The FAA assumes for this analysis that airport space for the system would be rented at an estimated $25 per square foot per year which would cover all costs for site preparations (such as floor reinforcing or new construction), electrical power availability, space rental, etc. Using the estimated rental rate of $25 per square foot per year, this yields an average yearly rental fee of approximately $19,000 per system. This stream of revenues is expected to enable the airport authorities to recover all capital expenses over time.

Operating a TNA system with an enhanced x-ray system would require a system-wide average of two technical operators per eight hour shift. The annual salary, including appropriate overhead rate, for this type of operator is estimated to be $30,000. Accordingly, the direct labor cost to the affected air carriers is $120,000 per year per unit. In addition, the FAA has determined that each operator would initially require eight weeks of training, and this cost of training would amount to approximately $5,000 per operator per year or $20,000 for the four operators who are needed per unit. The FAA assumes that the job turnover rate is 25%; thus, there would be a recurring training cost of $5,000 per operator per year for each established system.

To estimate the potential benefits of this rule, and of the alternatives, the FAA reviewed the safety record for the ten year period between 1979 and 1988. This review reveals that 19 separate criminal acts and incidents of terrorism using explosives were perpetrated against U.S. air carriers during this period. The FAA has classified these incidents into Class I and Class II categories. The Class I category includes those incidents, such as the explosion aboard Pan American (Pan Am) Flight 103, that involve the loss of an entire aircraft and a large number of fatalities. Class II accounts for all other incidents in which airplanes were only partially damaged or the incident was partially averted, such as explosions that occurred outside the aircraft (usually somewhere in the airport itself). These two types of incidents vary significantly both in terms of costs and their frequency. The FAA estimates that those Class II incidents that would occur over the ten years from 1990 to 1999 would result in a discounted cost of $31.0 million.

The losses associated with Class I or major incidents would, of course, be substantially greater. For example, the loss in human life and property, and reduced revenues from the loss of U.S. carriers' market share associated with Pan Am Flight 103 are estimated to have a present value range of $411.0 million to $520.0 million depending on the extent of market reduction. It is difficult to predict the extent to which international terrorism will increase. Nevertheless, the FAA believes that in the absence of additional preventive measures, terrorist attacks against U.S. air carriers would continue. The FAA can not predict the number and severity of future incidents. The frequency of such incidents would depend on several factors, including, but not limited to, the world-wide political climate, the skill and technical sophistication of terrorist organizations, and the success of efforts to avert these incidents. Given the historical record of one such incident in each of the past two decades and the expectation that the general threat will increase, and moreover, that the specific threat of sabotage will also increase, the FAA estimates total benefits on the basis of two Class I incidents. Therefore, in this case, the present value of the benefit associated with the prevention of these incidents would be as high as $1.071 billion. Table I of this summary shows the estimated costs and benefits of these alternatives:

TABLE I.—SUMMARY OF COSTS AND BENEFITS

[Net present value in millions of dollars]

Options	Estimated costs	Percentage of total incidents avoided for breakeven[1]	Calculations
Alternative I (Domestic and International Alternative)	$1,420	133	$1,420/$1,071=133%
Alternative II (International Alternative—The Final Rule)	896	84	896/$1,071=84%

BEST COPY AVAILABLE

TABLE I.—SUMMARY OF COSTS AND BENEFITS—Continued

[Net present value in millions of dollars]

Options	Estimated costs	Percentage of total incidents avoided for breakeven[1]	Calculations
Alternative III (Threat-Driven Alternative)	393	37	393/$1,071=37%

[1] The sum of the total incidents is equal to two Class I incidents and all Class II incidents avoided. The discounted present value of these incidents avoided is $1,071 million. The percentages do not represent a judgment of the relative effectiveness of each alternative.

Table I examines how many Class I and Class II incidents would have to be prevented by each alternative for the alternatives to be cost beneficial. The percentages in the table do not represent a judgment of the relative effectiveness of each alternative; they show the percentage of total incidents whereby each of the three alternatives will have different breakeven points so as to become cost beneficial. The costs associated with each alternative are compared with those benefits projected from avoiding two Class I incidents and a discounted present value of the $31 million worth of projected costs from all Class II incidents. For the purposes of this analysis, this is the projected universe of incidents that these alternatives are designed to address.

For Alternative II to be cost beneficial, it would have to prevent roughly four-fifths (84%) of this projected set of Class I and Class II incidents. If EDS screening includes domestic operations (Alternative I), this option would have to prevent more than the entire set of projected Class I and Class II incidents to be cost beneficial; in other words, it is not cost beneficial. The costs associated with limiting installation of EDS to those international operations at locations selected on a threat-driven basis (Alternative III) are roughly one third of the assumed set of incidents.

Because the number and potential severity of future attacks and the scope and location of threats are difficult to predict, the FAA has elected not to attempt to quantify the percentage of possible attacks that would be prevented by each alternative. For similar reasons, the FAA will not assign values to the probabilities of a Class I or Class II event for each alternative scenario.

In addition to these quantifiable benefits, the FAA expects further significant unquantifiable benefits. The rule would result in public recognition of additional security measures implemented by U.S. air carriers. The public's subsequent higher confidence levels should result in more passengers and higher revenues.

The deterrence of terrorist attacks against U.S. civil aviation also has significant public and foreign policy benefits. In addition to the tragic effects on those involved and their families and friends, an attack on an American aircraft disrupts the lives and plans of great numbers of people who have suffered no direct loss in the incident. (Indeed, this is presumably one of the goals of those who perpetrate terrorist attacks.) The FAA cannot calculate the cost of uncompleted business, disrupted education, and deferred vacations. Nevertheless, that cost is unquestionably significant, and it will be avoided if the public retains a high level of confidence in the safety of the civil air transportation system. Maintaining and improving the public's confidence, while at the same time reducing the threat to human life and property, is the central goal of this rulemaking.

Comments—A total of 12 commenters raise economic issues. Some of those comments that dealt directly with economic issues as described in the NPRM will be briefly summarized in this section.

Several of the comments point out that the NPRM analysis did not include the costs of constructing housing and/or supporting structures for those EDS's that would need them. The FAA specifically had requested comments on such costs, and, based on these comments, has added housing costs by means of the calculation of space rental data. It is the FAA's view that the costs involved would depend on the individual circumstances and that the actual location of each EDS would be determined by individual airport layout and other factors.

One commenter believes that the analysis seriously underestimates the number of systems needed at New York-Kennedy Airport and other similarly configured and heavily utilized airports. This commenter believes that 2400 systems would be needed under Alternative II, which is six times the number of systems estimated in the NPRM. The assumption used in the commenter's analysis revolves around the belief that 30, instead of 5, systems would be needed for New York-Kennedy Airport. (Five TNA systems were assumed for New York-Kennedy Airport in the NPRM's Alternative II). Therefore, because six times as many systems would be needed for this airport, the commenter estimates that six times the number of systems would be needed at all airports, both now and through 1999. The commenter did not disclose the methodology by which it was calculated that 30 machines would be needed for this gateway airport, so it is impossible for the FAA to analyze these assertions. Very few other airports included in the FAA's analysis are similarly configured or as heavily utilized as New York-Kennedy Airport. Therefore, while the FAA recognizes that the NPRM analysis underestimated the EDS requirements at a few major airports, it does not follow that the agency's analysis underestimated such requirements at all airports. As is discussed in the following paragraph, the FAA has recalculated the number of required systems.

The analysis presented in the Regulatory Impact Analysis may address some of the assumptions that were inherent in this commenter's analysis. To obtain the daily average number of outbound passengers, the annual numbers of outbound passengers for each airport was divided by 312 days; 312 days was used instead of 365 days of reflect the fact that many flights do not operate 7 days a week. The international peak hour percentage was increased from 15% to a range of 25% to 50%, depending on annual passenger flow, to take into account the demands on such heavily utilized airports. The per hour baggage requirements on the systems was lowered to 540 an hour to take into account the fact that baggage probably will not always be able to be fed into the system at a steady stream. In addition, extra machines were added to the busiest domestic and foreign airports to account for airport layout and baggage interline and transfer

problems. For example, this analysis' estimate for the number of TNA systems required at New York-Kennedy is nineteen, which the FAA belives is realistic.

This commenter also believes that the annual maintenance and repair costs for the basic TNA unit was too low. The figure used ($25,000 per year unit) was the data provided, based on the limited operating history of the equipment and on information furnished by the manufacturer. However, even if the costs were 60% higher ($40,000 per year per unit), the overall effect on costs would not be greater; total discounted costs would rise by less than 5%.

Another commenter interprets the FAA's statement in the NPRM that "in the absence of additional preventive measures", terrorist attacks against U.S. carriers will continue, and that this implied that the FAA considers that the proposed EDS is "the ultimate security solution." The FAA has never stated that EDS is the ultimate security solution; rather, the FAA believes it to be one of many security improvements which will be needed.

Several commenters stated that alternative EDS technologies exist that are less expensive than TNA. Currently, the TNA is the only explosives detection system that has been approved for use by the FAA. The FAA welcomes other EDS technology that will be less expensive than the TNA. TNA costs are used in the FAA's analysis because it is the only existing, proven system.

Several commenters raise environmental concerns with respect to the potential radiation effects of TNA systems. One comment called for the FAA to prepare an environmental impact statement with respect to this potential impact. In response to these comments the FAA has prepared an environmental assessment. This assessment has resulted in the conclusion that the adoption and implementation of this final rule will not have an adverse impact on the quality of the human environment. The assessment and Finding of No Significant Impact are included in the docket.

Several commenters state that since terrorism is being perpetrated against the U.S. government and not the air carriers, the government should pay for these systems. The U.S. government has traditionally not funded security measures needed to protect passengers on privately owned air carriers and does not intend to do so in this instance.

There has been concern expressed that requiring all U.S. air carriers to purchase EDS equipment would be an unrealistic drain on many of them, especially small carriers and those with unscheduled service. The rule does not require carriers individually to purchase EDS systems for their own private use. Such carriers have the commonly used option of renting the use of such facilities from other carriers.

Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to ensure that small entities are not unnecessarily and disproportionately burdened by Government regulations. The RFA requires Federal agencies to review rules which may have a "significant economic impact on a substantial number of small entities." Issuance of the amendment to part 108 of the FAR will affect some small air carriers. The FAA's Order prescribing small entity size standards identifies a small air carrier as one with nine or fewer operating aircraft. According to FAA data for the period ending December 31, 1988, there were 54 air carriers subject to the rules of part 121 that operated nine or fewer airplanes. These 54 carriers are the entities affected by the rule.

The criteria for a "substantial number of small entities" is one-third of the small firms subject to the final rule, but no fewer than 11 firms. A review of the 54 small carriers engaged in scheduled and unscheduled service shows that only 10 firms would be subject to this rule. Therefore, it is certified that the amendment to Part 108 would not have a significant economic impact on a substantial number of small entities. In any event, if unforeseen problems arise in specific situations, the FAA will work with the air carrier involved to address appropriate checked baggage screening procedures.

Trade Impact Statement

The FAA finds that this rule will only impact part 121 operators and thus it is not likely to affect international trade. This final rule is expected to have no impact on trade opportunities for either U.S. firms doing business overseas or foreign firms doing business in the United States. While there will be an increased cost to U.S. air carriers as a consequence of this rule, these increased costs will be offset by the increase in public confidence, the avoidance of incidents, and by the ability to reduce the use of certain costly security procedures now required of U.S. air carriers.

Paperwork Reduction Act

The FAA finds that this final rule will not result in an additional burden under the Paperwork Reduction Act.

Federalism Implications

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that these rules will not have sufficient Federalism implications to warrant the preparation of a Federalism Assessment.

Conclusion

For the reasons discussed above, the FAA has determined that this regulation is major under Executive Order 12291. In addition, the FAA certifies that this rule will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. This final rule is considered significant under the Regulatory Policies and Procedures of the Department of Transportation (44 FR 11034; February 26, 1979) because of its cost and the substantial public interest in aviation security. A Regulatory Impact Analysis of this rule, including a Regulatory Flexibility Determination and a Trade Impact Analysis, has been placed in the docket. A copy may be obtained by writing to the Director of Civil Aviation Security (see **ADDRESSES**).

List of Subjects in 14 CFR Part 108

Air carriers, Aircraft, Airmen, Airports, Arms and munitions, Explosives, Law enforcement officers, Reporting and recordkeeping requirements, Security measures, X-rays.

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends part 108 of the Federal Aviation Regulations (14 CFR part 108) as follows:

PART 108—AIRPLANE OPERATOR SECURITY

1. The authority citation is revised to read as follows:

Authority: 49 U.S.C. 1354, 1356, 1357, 1421, 1424, and 1511; 49 U.S.C. 106(g) (revised, Pub. L. 97–449, January 12, 1983).

2. Section 108.7 is amended by adding a new paragraph (b)(8) to read as follows:

§ 108.7 Security program; Form, content, and availability.

* * * * *

(b) * * *

(8) The procedures and a description of the facilities and equipment used to comply with the requirements of § 108.20 regarding explosives detection systems.

3. Section 108.20 is added to read as follows:

§ 108.20 Use of Explosives Detection Systems.

When the Administrator shall require by amendment under § 108.25, each certificate holder required to conduct screening under a security program shall use an explosive detection system that has been approved by the Administrator to screen checked baggage on international flights in accordance with the certificate holder's security program.

Issued in Washington, DC, on August 30, 1989.

James B. Busey,

Administrator.

Part III

Environmental Protection Agency

40 CFR Part 52

Assessment of Visibility Impairment; Proposed Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[AD-FRL-3526-9]

Assessment of Visibility Impairment: Proposed Rule

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This proposal addresses the necessity of revising the federally promulgated implementation plans (FIP's) for the States of Maine, Arizona, and Utah to include best available retrofit technology (BART) or other control strategies to remedy visibility impairments within the Moosehorn Wilderness, Grand Canyon National Park, and Canyonlands National Park attributable to specific sources. Today's action is in accordance with a settlement agreement with the Environmental Defense Fund (EDF) and others which requires EPA to propose appropriate measures to remedy certified visibility impairments in mandatory Class I Federal areas where the impairment in the area is reasonably attributed to specific sources. Parties in this settlement agreement negotiated revisions which allowed EPA to defer decisions concerning impairments in these three Class I areas until August 31, 1989 (52 FR 45132 (Nov. 24, 1987) and 53 FR 3595 (Sept. 15, 1988)).

DATES: Comments on this notice of proposed rulemaking must be submitted to the Central Docket Section no later than November 6, 1989.

ADDRESSES: Comments should be submitted (in duplicate, if possible) to Air Docket (LE-131), Attention: A-89-02, U.S. EPA, Rm. M1500 Waterside Mall, 401 M Street, SW., Washington, DC 20460.

Docket: Pursuant to section 307(d)(1)(B) of the Clean Air Act (Act), 42 U.S.C. 7607(d)(1)(B), this action is subject to the procedural requirements of section 307(d). Therefore, EPA has established a docket for this notice, Docket Number A-89-02. Materials related to the development of this notice have been placed in this docket. For background information, materials related to the development of the visibility protection program (40 CFR 51.300 et seq.) are available in Docket A-79-40. Also, materials related to the development of the visibility new source review and visibility monitoring strategies are available in Docket A-84-32. Finally, materials related to the visibility long-term strategy, implementation of control strategy, and integral vista program are available in Docket A-85-26. All dockets are available for public inspection and copying between 8:00 a.m. and 4:00 p.m. Monday through Friday at EPA's Central Docket Section, Office of General Counsel, Room 1500, 401 M Street, SW., Washington, DC. A reasonable fee may be charged for copying.

Public Hearing: Any request for a public hearing should be submitted in writing to: Ms. Denise Scott, Air Quality Management Division (MD-15), Office of Air Quality Planning and Standards, U.S. EPA, Research Triangle Park, NC 27711.

FOR FURTHER INFORMATION CONTACT: Denise Scott at telephone number (919) 541-0870 or FTS 629-0870.

SUPPLEMENTARY INFORMATION:

Background

A. Regulatory Requirements

Section 169A of the Act, 42 U.S.C. 7491, sets as a national goal "the prevention of any future, and the remedying of any existing impairment of visibility in mandatory Class I Federal areas which impairment results from manmade air pollution." Mandatory Class I Federal areas are certain national parks, wildernesses, and international parks as described in section 162(a) of the Act, 42 U.S.C. 7472(a). Section 169A requires that EPA promulgate regulations to assure reasonable progress toward meeting the national goal for mandatory Class I Federal areas where EPA has determined that visibility is an important value. On November 30, 1979, EPA identified 156 areas, including Moosehorn Wilderness in Maine, Canyonlands National Park in Utah, and Grand Canyon National Park in Arizona, where visibility is an important air quality related value (44 FR 69122). Section 169A specifically requires EPA to promulgate regulations requiring States to amend their State implementation plans (SIP's) to provide reasonable progress toward meeting the national goal for the 156 areas.

On December 2, 1980, EPA promulgated the required visibility regulations (45 FR 80084, codified at 40 CFR 51.300 et seq.). In broad outline, the visibility regulations require the 36 States listed in section 51.300(b), including Arizona, Maine, and Utah, to: (1) Coordinate SIP development with the appropriate Federal land managers (FLM's), (2) develop a program to assess and remedy visibility impairment from new and existing sources, (3) develop a long-term (10 to 15 years) strategy to assure reasonable progress toward the national goal, (4) develop a visibility monitoring strategy to collect information on visibility conditions, and (5) consider in all aspects of visibility protection any "integral vistas" (important views of landmarks or panoramas that extend outside of the boundaries of the Class I area) identified by the FLM's as critical to the visitor's enjoyment of the Class I areas. The affected States were required to submit revised SIP's satisfying these provisions by September 2, 1981. See 45 FR 80091, codified at 40 CFR 51.302(a)(1).

The second requirement listed above is of particular relevance to today's action. 40 CFR 51.302(c)(2) requires that each affected State include in its SIP such emission limitations, schedules of compliance, and other measures as may be necessary to make reasonable progress toward the national visibility goal. In addition, under 40 CFR 51.302(c)(1), an FLM may certify to a State that there exists impairment of visibility in any mandatory Class I Federal area. Pursuant to 40 CFR 51.302(c)(4)(i), where impairment is certified at least 6 months prior to plan submission, an affected State must (1) identify each existing stationary facility which may "reasonably be anticipated to cause or contribute" to any such impairment which is "reasonably attributable" to that facility, and (2) analyze for BART any facility so identified. "Reasonably attributable" impairment is impairment "attributable by visual observation or any other technique the State deems appropriate" [40 CFR 51.301(s)]. Where a State defaults on its obligations under the visibility regulations, EPA may act in place of the State pursuant to a FIP under section 110(c) of the Act, 42 U.S.C. 7410(c).[1] In such cases, all of the rights and duties that would otherwise fall to the State accrue instead to EPA. Thus, EPA may utilize attribution techniques it deems appropriate, must identify "reasonably attributable" sources of impairment, conduct BART analyses, adopt BART requirements, and may promulgate such other control strategies that EPA, in its discretion, deems necessary to make reasonable progress toward the national visibility goal.

---

[1] Section 110(c) requires EPA to promulgate FIP's whenever (a) a State fails to submit an implementation plan (or portion thereof) which meets the requirements of section 110; (b) the Administrator determines that a plan (or portion) is not in accordance with the requirements of section 110; or (c) the State fails to revise its plan within 60 days after notification by the Administrator (or some longer period, if so prescribed by the Administrator) in accordance with section 110(a)(2)(H).

In December 1982, environmental groups, including EDF, filed a citizen's suit in the United States District Court for the Northern District of California alleging that EPA had failed to perform a nondiscretionary duty under section 110(c) of the Act, 42 U.S.C. 7410(c), to promulgate visibility FIP's for the 35 States [2] that, at that time, had failed to submit SIP's to EPA as called for by the 1980 visibility regulations (*EDF* v. *Reilly*, No. C826850 RPA).

The EPA and the plaintiffs negotiated a settlement agreement for the remaining States which the court approved by order on April 20, 1984. For more information on details of the provisions of the settlement, including a schedule of actions by EPA, see EPA's announcement of the agreement at 49 FR 20647 (May 16, 1984).

B. Settlement Agreement

The settlement agreement required EPA to promulgate FIP's on a specified schedule for those States that had not submitted visibility SIP revisions to EPA. Specifically, the first part of the agreement required EPA to promulgate FIP's which cover the monitoring and new source review (NSR) provisions of 40 CFR 51.305 and 51.307. The EPA promulgated its monitoring strategy for 23 States and its NSR provisions for 21 States (50 FR 28544, 51 FR 5504, and 51 FR 22937). In separate notices, EPA approved the SIP's of the other States with respect to monitoring and NSR.

The second part of the settlement agreement required EPA to determine the adequacy of the SIP's to meet the remaining provisions of the visibility regulations. These provisions are the general plan provisions, including BART and other implementation control strategies (§ 51.302), integral vista protection (§ 51.302-307), and long-term strategies (§ 51.306). The settlement agreement required EPA to promulgate FIP's to remedy any deficiencies on a specified schedule.

On November 14, 1985, the U.S. Department of the Interior (DOI) certified to EPA, under 40 CFR 51.302(c)(1), the existence of visibility impairment in Moosehorn Wilderness and identified a pulp and paper mill as the probable source of this impairment. On March 24, 1986, the DOI sent another letter to EPA pursuant to 40 CFR 51.302(c)(1) supplementing its November 1985 certification. This letter certified the existence of visibility impairment in Grand Canyon National Park and Canyonlands National Park and identified the Navajo Generating Station (NGS), a 2250 megawatt coal-fired power plant located near Page, Arizona, as the probable source of the impairment in these two Class I areas. Copies of the letters certifying the impairments have been placed in the docket for this rulemaking.

On January 23, 1986, EPA determined that the SIP's of 32 States (including Arizona, Maine, and Utah) were deficient with respect to the remaining visibility provisions (51 FR 3046). Thereafter, EPA and the plaintiffs negotiated revisions to the settlement agreement which extended the deadlines for proposing FIP's to remedy these deficiencies. The court approved these revisions by its order of September 9, 1986.[3]

In accordance with the revised settlement agreement, on March 12, 1987 (52 FR 7802), EPA proposed to disapprove the SIP's of 32 States (including Arizona, Maine, and Utah) for failing to meet the remaining provisions of the visibility regulations, including general plan requirements (which in turn includes BART and other control strategies (section 51.302) and long-term strategies (§ 51.306). Also in accordance with the agreement, on November 24, 1987 (52 FR 45132), EPA took final action disapproving the affected SIP's and promulgating, as FIP measures under section 110(c), general plan requirements and long-term strategies for these States. Under the revised agreement, EPA's decision regarding the need for BART or other control measures in the FIP's for these States to address certified visibility impairments in seven Class I areas which potentially could be reasonably attributed to a specific source in the States of Arizona, Maine, Minnesota, and Utah was deferred until August 31, 1988 pending acquisition and evaluation of additional monitoring information regarding the potential sources of impairment. The EPA required additional information to determine whether the impairment in any of these Class I areas is "reasonably attributable" to an existing stationary facility, and to enable a BART analysis for any source so identified as causing or contributing to visibility impairment (40 CFR 51.302(c)(4)(i)).

On May 19, 1989, EPA, in accordance with the revised settlement agreement, promulgated decisions concerning certified visibility impairments in four Class I areas. Based on monitoring conducted in these areas, EPA found that the visibility impairments were not reasonably attributable to any specific source. Therefore, EPA determined that it was not necessary at that time to revise the FIP's for the States of Arizona, Maine, and Minnesota to include BART or other control strategies to remedy impairments in Roosevelt Campobello International Park (Canada), Voyageurs National Park (Minnesota), Saguaro Wilderness (Arizona), and Petrified Forest National Park (Arizona).

Because EPA was unable to resolve certain questions regarding the need to remedy the impairments found in three additional Class I areas (the Grand Canyon National Park in Arizona, the Canyonlands National Park in Utah, and the Moosehorn Wilderness in Maine), EPA sought and received a 1-year extension of its August 31, 1988 deadline to address the impairment in these areas.

The National Park Service (NPS) has submitted to EPA a final draft report which analyzes the data from a wintertime impairment attribution study. The Winter Haze Intensive Tracer Experiment (WHITEX) was conducted in 1987 in the Colorado Plateau. The National Park Service report on WHITEX [4] identifies the NGS in Page, Arizona, as a source of a substantial portion of the impairment in the Grand Canyon National Park. The EPA has reviewed this report and concurs preliminarily with the findings of the NPS that NGS is a contributor to visibility impairment in Grand Canyon National Park. The NGS is located approximately 20 km from the Grand Canyon National Park boundary and 110 km from the WHITEX monitoring site at Hopi Point in the Park.

The proposal to find impairment in the Grand Canyon National Park attributable to NGS was not based on any single analysis, but rather on the collection of analyses performed by the NPS on the WHITEX data. Of particular import to this proposal, however, was the tracer mass balance regression analysis which documented the presence of the NGS plume (and sulfur emissions from NGS) in the Grand Canyon. As part of the BART analysis, EPA will quantify sulfur compounds attributable to NGS.

The EPA expects that the NPS will submit additional analyses concerning the accuracy of the attribution techniques and a final report in early September. The EPA does not anticipate any significant changes in the conclusions of this report. When these documents are made available to EPA, they will be placed in the docket for this rulemaking.

---

[2] The State of Alaska had submitted a SIP which was approved on July 5, 1983 at 48 FR 30623.

[3] A copy of the settlement agreement and revisions is available in docket A-85-26 at the address given at the beginning of this notice.

[4] "The National Park Service report on the Winter Haze Intensive Tracer Experiment Draft Final Report," William Malm, Kristie Gebhart, Douglas Latimer, Thomas Cahill, Robert Eldred, Roger Pilke, Roger Stocker, and John Watson, April 7, 1989.

Because of the delay in receiving the NPS report, EPA and EDF filed a joint motion to revise the settlement agreement to allow adequate time to conduct a BART analysis for NGS in the event that EPA proposed to find impairment reasonably attributable to NGS. By order dated July 6, 1989, the court approved revision of the settlement agreement to require EPA to:

- Issue a notice of proposed rulemaking by August 31, 1989 (as previously scheduled) concerning the need to revise any FIP to address visibility impairments in Moosehorn Wilderness and Canyonlands National Park.
- Issue a notice of proposed rulemaking by August 31, 1989 addressing whether any facility can be identified which may reasonably be anticipated to cause or contribute to impairment in Grand Canyon National Park.
- Analyze for BART any facility identified as a contributor of impairment in the Grand Canyon National Park and issue a notice of proposed rulemaking by February 1, 1990.

The EPA must provide at least a 60-day comment period for each of the above proposed rulemakings. The EPA will promulgate the final rule for each proposal 6 months after the close of the comment period on the proposed rule with the exception of EPA's proposal to attribute impairment in the Grand Canyon National Park to NGS. In this case, EPA will finalize its attribution decision when it makes a final decision regarding BART requirements, which will be 6 months after close of any comment period on the proposal to require BART. The EPA also intends to make regulatory decisions regarding the need for control measures other than BART in accordance with this schedule.

C. Today's Action

In today's proposal, EPA addresses certified visibility impairments in three Class I areas. With respect to Moosehorn Wilderness, EPA believes that, based on the modifications to the pulp and paper mill in Woodland, Maine, owned by Georgia-Pacific Corporation (GP) and the prevention of significant deterioration (PSD) permit requirements for the mill, it is unnecessary at this time to revise the FIP for the State of Maine to include BART requirements or other control strategies. Any future information regarding impairment in this Class I area will be addressed in the periodic review required by the State's long-term strategy (40 CFR 51.306 and 52.29).

With respect to the Canyonlands National Park, EPA has no data at this time to attribute the impairment in the park to any specific source. Thus, EPA believes that it is unnecessary at this time to revise the FIP for the State of Utah to include BART requirements or other control strategies. If additional data become available which permit EPA or the State to attribute the impairment in this Class I area, it will be addressed in the periodic review required by the State's long-term strategy.

Based on the NPS report on the WHITEX data, EPA believes that a substantial portion of visibility impairment in Grand Canyon National Park is attributable to a specific source—NGS. The EPA, in accordance with the recently revised settlement agreement, will issue a notice of proposed rulemaking to address whether to revise the FIP for the State of Arizona to include BART requirements for this facility or other control strategies by February 1, 1990.

Discussion of Impairment

A. Moosehorn Wilderness, Maine

The Fish and Wildlife Service (FWS) previously noted the existence of elevated layered hazes of differing colors in the Moosehorn Wilderness (see discussion at 52 FR 7802). However, the existing data were inadequate to positively identify the sources of the impairment or to complete a BART analysis. Consequently, the FWS and the Interagency Monitoring of Protected Visual Environments Technical Steering Committee directed its contractor to install an 8-millimeter, time-lapse camera system at Moosehorn Wilderness. The camera started operation on October 5, 1987.

The FWS had identified the GP pulp and paper mill as the probable source of impairment existing within the Moosehorn Wilderness. The mill is approximately 7 kilometers (km) from the northern section of Moosehorn Wilderness. The camera system installed at Moosehorn recorded a visible plume emitted nearly every day from the mill. Under certain conditions, the plume appeared to cross the Wilderness boundary causing visibility impairments in the Wilderness. Thus, EPA believes that the impairment certified by the DOI in 1985 is attributable to the GP pulp and paper mill in Woodland, Maine.

As part of a modernization and modification of the mill, GP had applied for a PSD permit. Since the emission limitations required by the PSD permit could significantly affect the pollutants which cause the visibility impairment, EPA deferred its decision pending completion of the PSD permit process. This permit process has now been completed. The PSD permit process included a review of existing sources of plume blight at the mill. It is anticipated that the impairment will be reduced by additional air pollution controls required by the PSD permit for existing facilities and the retirement of two existing facilities which contributed to the observed impairment. Based upon the PSD permit requirements, EPA believes that existing impairment will be adequately remedied such that revisions to the Maine FIP are not necessary to address the impairment certified in 1985 by DOI. A copy of the State of Maine's Air Emission License (PSD permit) for GP has been placed in the docket for this rulemaking.

B. Canyonlands National Park, Utah, and Grand Canyon National Park, Arizona

The DOI has documented the occurrence of visibility impairments at Canyonlands and Grand Canyon National Parks during winter inversion conditions (see discussion at 52 FR 7802). Both of these parks are mandatory Class I Federal areas located in the Colorado River area of the Colorado Plateau. Canyonlands National Park is located approximately 200 km northeast of Grand Canyon National Park. The visibility impairment identified in these Class I areas during the winter months has been described as a haze "with a bright white layer and a distinct upper edge and it occasionally includes one or more perceptible layers." [8]

WHITEX, a 6-week study conducted in January and February 1987 in the Colorado River area, was designed to evaluate the ability of a variety of receptor modeling approaches to attribute visibility impairment in several Class I areas to a single source. WHITEX was a cooperative effort between several utility groups including Salt River Project (SRP), the operators of NGS, and several government agencies including NPS. As discussed below, WHITEX employed several attribution methodologies including the use of a unique tracer injected into the NGS stack to track the power plant's plume. A meteorological analysis was conducted to document the wind flow patterns and stagnation events occurring during the winter months.

---

[8] Ibid. p. 4.

The study area consisted of three major and five satellite monitoring sites. Major monitoring sites were located in Grand Canyon National Park (at Hopi Point), Canyonlands National Park, and Page, Arizona (near the Glen Canyon Dam). Satellite sites were located in major transport corridors of the study area. Extensive air quality monitoring was conducted at these eight sites to evaluate NGS' contribution to visibility impairment in the area.

The NPS calculated a light extinction budget for each of the three major sites based on optical and aerosol measurements taken simultaneously at each site. The light extinction budgets express the relative contribution to light extinction by various aerosol constituents (e.g., sulfates or organics) or the type of extinction observed (e.g., scattering or absorption). Light extinction, a standard method used to monitor visibility impairment, is the combined effect of light scattering and absorption. The NPS found that fine particle scattering due to sulfates accounted for the largest share of anthropogenic visibility impairment during the WHITEX study period at all three sites.

The NPS then attributed the extinction (due to fine sulfates) to specific source(s) using various receptor modeling techniques. Three statistical methods and one deterministic model were used to estimate the relative contributions of sources within the study area to visibility impairment observed during the 6-week study. Receptor modeling methods used included chemical mass balance, tracer mass balance regression, and differential mass balance.

Other less quantitative techniques were also used to attribute the impairment observed to specific sources. An emissions analysis was conducted along with a meteorological analysis and an analysis of the spatial patterns and temporal trends in ambient sulfate concentrations. In all, nine techniques were used by NPS to attribute the visibility impairment observed to specific sources.

Canyonlands National Park

Only a few tracer samples from the Canyonlands National Park WHITEX monitoring site have been analyzed to date. Although tracer was detected at Canyonlands National Park, there is insufficient data to determine whether NGS contributed significantly to total ambient sulfate. Analysis of wind flow patterns and the spatial and temporal trends indicate that the NGS plume might have contributed to impairment at Canyonlands National Park on various days for which tracer data have been analyzed. Based on the data analyses currently available, the NPS concluded that NGS appears to be less of a contributor to visibility impairment at Canyonlands than are more local sources, and the NPS is unable to attribute the impairment in Canyonlands National Park to any specific source at this time. Thus, EPA believes that it is not necessary at this time to revise the FIP for the State of Utah to include BART requirements or other control strategies to address impairment in this Class I area.

Grand Canyon National Park

The NPS report on WHITEX concludes that NGS was the largest single contributor to visibility impairment in Grand Canyon National Park during the 6-week study period. The data analyses conducted by the NPS indicate that under certain meteorological conditions, which are common in the area during the winter months, large quantities of sulfur dioxide from NGS are transported into the Grand Canyon. One of these analyses included measurement at Hopi Point in the Grand Canyon National Park of the unique tracer which was injected into the NGS stack. Another of these analyses further showed that the high sulfate episodes observed during WHITEX were typical results of transport and transformation of pollutants during the wintertime.

The NPS analyzed extensively the data collected at Hopi Point during the three major sulfate episodes. All nine analytical techniques used by NPS support the conclusion that NGS is a significant contributor to visibility impairment during the winter months in Grand Canyon National Park. The NPS data indicate that NGS contributes approximately 40 percent on the average to the observed wintertime visibility impairment and approximately 60–70 percent during the worst visibility impairment episodes. During one episode, the NPS analysis identified copper smelters located in southern Arizona and Mexico as major contributors to visibility impairment. It is important to note that subsequent to the 1987 study timeframe, these sources have either been controlled to reduce emissions or shut down.

Based on the NPS report, EPA is proposing to find that NGS may reasonably be anticipated to cause or contribute to visibility impairment in this Class I area. Under the requirements of the settlement agreement, EPA is proceeding with a BART analysis for NGS (see discussion below). In accordance with the latest revision to the settlement agreement, a decision by EPA on the need for BART (or other control measures) will be proposed by February 1, 1990.

Legal and Regulatory Issues

On May 15, 1989, the SRP submitted comments on the technical merits of the draft NPS report and on legal and regulatory issues pertaining to potential regulatory action affecting NGS. In addition, SRP and Alabama Power Company, *et al.*, a consortium of firms representing the electric utility industry, have submitted further legal arguments in support of a motion seeking revision of the current settlement agreement and consent order in *EDF* v. *Reilly* (Memorandum in Support of Motion of Intervenors Alabama Power Company, *et al.*, and SRP, *et al.*, for Modification of Order Granting Joint Motion to Extend Deadline, August 1, 1989. (Both documents have been placed in Docket No. A–89–02.)) The EPA will respond to the technical comments following submission of a final report on the WHITEX study by NPS. However, it is appropriate to summarize here the legal and regulatory issues identified by SRP, and present EPA's views on them, to enable more informed participation in the public comment process. The EPA specifically solicits comment on these issues.

A. Scope of the Current Visibility Regulations

The SRP asserts that the type of visibility impairment in the Grand Canyon is a "homogeneous regional haze," and thus beyond the scope of EPA's current visibility regulations, which are allegedly limited to "plume blight." The EPA disagrees with this contention. The current regulations focus on impairment due to discrete, discernible plumes, but they are not limited to "plume blight." Rather, as SRP acknowledges, the visibility rules regulate any impairment that "can be traced to a single existing stationary facility or small group of * * * facilities" (45 FR 80085, col. 3). Thus, it appears that the core of SRP's argument is the claim that impairment in the Grand Canyon cannot, in fact, be attributed to NGS.

B. Attribution of Impairment to a Significant Contributor

The SRP argues that a finding of reasonable attribution cannot be made unless one source (or a small group of sources) is the sole contributor to visibility impairment. In support of this view, SRP states that control of one source would result in significant improvement in visibility only if the impairment was being caused only by that source, whereas if many sources are contributing, all must be controlled to result in improved visibility. The EPA disagrees, because SRP's position is flawed logically, and assumes key facts that the WHITEX data indicate are untrue, or which must await a BART analysis. Specifically, if NGS is a significant contributor to wintertime impairment in the Grand Canyon, notwithstanding that other sources may also contribute to the impairment, it follows that the addition of emissions controls at NGS alone may result in significant improvement in visibility. In addition, as discussed above, the WHITEX data indicate that NGS is, in fact, a significant contributor to wintertime impairment in the Grand Canyon. Thus, in today's notice, EPA has preliminarily determined that the impairment in question may be reasonably attributable to NGS. Whether control of NGS alone would result in a significant improvement in visibility will be addressed in depth by the BART analysis that EPA will conduct, and is not at issue here.

C. Attribution Techniques

The SRP and Alabama Power Company, *et al.*, also claim that the visibility regulations prohibit EPA from basing a finding of reasonable attribution on the WHITEX study, pointing to 40 CFR 51.301(s), which defines "reasonably attributable" as "attributable by visual observation or any other techniques the State deems appropriate." In their view, the rules on their face authorize only States, and not EPA, to use techniques other than visual observation to make a reasonable attribution decision.

The EPA disagrees with this view. The part 51 visibility regulations, including the definition in question, contain numerous references to the duties of "States" in the SIP planning process for the obvious reason that those regulations' principal purpose is to set forth the requirements that SIP's must meet to comply with the regulations. In this instance, however, Arizona has defaulted on its responsibility, as it has failed to submit a visibility SIP or any portion thereof. Consequently, EPA has an obligation under section 110(c)(1)(A) of the Act to promulgate such visibility measures as may be necessary to fulfill the requirements of the visibility regulations at 40 CFR 51.300 *et seq.* In so doing, EPA stands in the shoes of the defaulting State, and all of the rights and duties that would otherwise fall to the State accrue instead to EPA. Thus, in this instance, EPA is in effect acting as a "State," and may utilize any attribution technique it deems appropriate, not just visual observation. (Moreover, there is no inherent reason why EPA should be limited to visual observation when it acts under section 110(c) if a State is not so limited in developing a SIP.) Similarly, 40 CFR 51.302(c)(4)(i) provides that the "State" must identify and analyze for BART any source as to which a reasonable attribution finding is made. Nevertheless, where EPA is acting in place of the "State" under section 110(c), these duties, as well as other duties of "States" under the part 51 visibility regulations, fall to EPA. In this case, EPA has found that the Arizona SIP is deficient for failing to meet the requirements of 40 CFR 51.302, including reasonable attribution and BART requirements, and has disapproved the SIP for that failure (51 FR 3046, 3048 (January 23, 1986); 52 FR 45132, 45133). The EPA believes that its position represents a reasonable interpretation of the Act and its own regulations, and is fully in keeping with the language, goals, and purposes of the Act and those regulations. However, EPA solicits comments on whether it would be appropriate to make changes in the definitional provisions of 40 CFR part 51 in order to provide additional clarification on EPA's interpretation that the Administrator, like a "State," may utilize whatever techniques he deems appropriate in making "reasonable attribution" findings in promulgating a plan under section 110(c) of the Act. After the close of the comment period that commences today, EPA may proceed to make clarifying changes without further public notice.

D. Sequence of Reasonable Attribution and BART Decisions

The SRP and Alabama Power Company, *et al.*, assert that, with respect to visibility impairment in the Grand Canyon, EPA has no authority to conduit a BART analysis or propose or promulgate emissions limitations representing BART until (1) the Administrator has made a final reasonable attribution decision, and (2) the State has been given an opportunity to conduct its own BART analysis. The EPA disagrees with these assertions because they seriously misread the applicable statutory and regulatory requirements.

Regarding the purported need for a "final" attribution determination before proceeding to a BART analysis, there is no support in the regulations for the notion that EPA must proceed in this fashion. Indeed, 40 CFR 51.302(c)(4) speaks of a single requirement to "identify and analyze for BART." Because of a need for additional time, the court in *EDF* v. *Reilly* has granted the parties' joint request that EPA be given additional time to conduct a BART analysis and issue a proposal on the need for BART, but the regulations do not suggest that it is necessary to formalize this voluntary bifurcation of a single decision, and make a "final" determination on the first portion before proceeding to the second. Nor is it necessary to proceed in the fashion these commenters suggest in order to satisfy the rulemaking requirements of the Act or the Administrative Procedure Act, because neither a "proposed" nor a "final" reasonable attribution determination is a promulgated rule or other "final action" within the meaning of those statutes, and is not subject to judicial review. Rather, it is a preliminary finding that may lead to a final rule or other final action (i.e., a final decision that emission limitations representing BART are unnecessary, or the imposition of such limitations) that is subject to review.

Regarding the purported need to afford Arizona an opportunity to perform its own BART analysis, there is likewise no basis for such a requirement. As explained above, the prerequisite for remedial action by EPA to promulgate appropriate FIP measures under section 110(c)(1)(A) of the Act has already been met because Arizona failed completely to submit any visibility SIP provisions. Moreover, EPA has already issued a notice of SIP deficiency and disapproved the State's SIP for this reason. No other preliminary steps are necessary under the Act.

BART Analysis

Once impairment has been certified by the FLM and the impairment has been reasonably attributed to a specific source(s), a State (or EPA if the State's visibility protection program addressing BART has not been approved and a FIP has been promulgated instead) is required by the visibility regulations at 40 CFR 51.302(c)(4)(i) to analyze the facility for BART.

Pursuant to 40 CFR 51.302(c)(4)(iii), the procedure that EPA will use to conduct the BART analysis for NGS is found in "Guidelines for Determining Best Available Retrofit Technology Analysis for Coal-Fired Power Plants and Other Existing Stationary Facilities" (EPA-450/3-80-009b). A copy of this document has been placed in the docket established for this rulemaking. In analyzing a facility for BART, the following must be considered: the costs of compliance, the energy and nonair quality environmental impacts, any

existing pollution control technology in use at the facility, the remaining useful life of the plant, and the degree of improvement in visibility anticipated to result from application of controls (see 40 CFR 301(c)). According to section 169A(c)(2) of the Act, an exemption from BART requirements may only be granted if NGS can demonstrate that the facility is located at such a distance from the Class I area so as not to contribute to significant visibility impairment in that area.

Format for Remedial Action

With respect to implementation of other visibility requirements, because of the large number of States involved and the ongoing nature of the regulatory requirements, EPA deemed it appropriate to promulgate generic Federal implementing regulations and insert them into the SIP's of the affected States. See, e.g., 40 CFR 52.26 (visibility monitoring strategy, implementing 40 CFR 51.305); 40 CFR 52.27 and 52.28 (visibility new source review, implementing 40 CFR 51.307); 40 CFR 52.29 (implementing long-range strategies, 40 CFR 51.306); and 40 CFR 52.145 (b) and (c) (incorporating these provisions into the Arizona SIP). With respect to source attribution and BART, however, Arizona is the only State for which remedial Federal measures are even potentially needed at this time. Accordingly, EPA proposes to simply follow the appropriate provisions of the part 51 visibility regulations in making source attribution and BART findings regarding NGS and, if those findings result in the imposition of actual emissions limitations representing BART, to amend the visibility FIP for Arizona in 40 CFR 52.145 to incorporate such limitations.

The EPA deems it appropriate to interpret references to the rights, duties, and responsibilities of a "State" under 40 CFR part 51, subpart P, as referring to the "Administrator" in the case of a plan promulgated under section 110(c) of the Act. However, as noted above, EPA is soliciting comments on whether it would be appropriate to revise the definitional provisions of 40 CFR part 51 to clarify that the Administrator, like a "State," may utilize whatever techniques he deems appropriate in making "reasonable attribution" findings.

Solicitation of Comments

The EPA solicits comments on the proposed finding that, because of the major modifications completed at GP's pulp and paper mill in Woodland, Maine, and the additional control measures required by the PSD permit issued to this facility, it is unnecessary at this time to include BART or other control measures in the FIP for the State of Maine.

In addition, EPA solicits comments on the proposed finding that because EPA does not have data at this time to attribute the impairment in Canyonlands National Park to any source, it is unnecessary at this time to revise the FIP for the State of Utah to include BART requirements or other control measures.

Also, EPA solicits comments on the proposed finding that a portion of the visibility impairment in Grand Canyon National Park is attributable to NGS.

Finally, EPA solicits comments on the legal and regulatory issues noted above, and on whether to clarify the visibility regulations by specifying that the Administrator as well as the States may use any attribution technique he deems appropriate in determining reasonably attributable impairment.

The EPA has established a docket for this proposal, Docket Number A-89-02. The docket is an organized and complete file of all significant information submitted to or otherwise considered by EPA during this proceeding. This docket will serve as the record in the case of judicial review under section 307(b) of the Act, 42 U.S.C. 7607(b).

Classification

The Administrator certifies pursuant to the provisions of 5 U.S.C. 605(b) that the attached rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.

The proposed rules do not contain any information collection requirements subject to Office of Management and Budget (OMB) review under the Paperwork Reduction Act of 1980, U.S.C. 3501 et seq.

The proposed rule implements part of subpart P (40 CFR 51.300 through 51.307) which was promulgated on December 2, 1980. An economic impact assessment was made for promulgation of subpart P and can be found in Docket Number A-79-40.

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This action is not major because: (1) The national annualized costs total less than $100 million; (2) the action does not cause a major increase in prices or production costs; and (3) the action does not cause significant adverse effects on domestic competition, employment, investment, productivity, innovation, or competition in foreign markets. This regulation was submitted to OMB for review as required by Executive Order 12291. Any written communication between OMB and EPA pertaining to the standards has been put in Docket Number A-89-02.

Dated: August 29, 1989.

F. Henry Habicht,

Acting Administrator.

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

Last List August 22, 1989

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

New units issued during the week are announced on the back cover of the daily **Federal Register** as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $620.00 domestic, $155.00 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, DC 20402. Charge orders (VISA, MasterCard, or GPO Deposit Account) may be telephoned to the GPO order desk at (202) **783-3238** from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] No amendments to this volume were promulgated during the period Jan. 1, 1988 to Dec. 31, 1988. The CFR volume issued January 1, 1988, should be retained.

[3] No amendments to this volume were promulgated during the period Jan. 1, 1987 to Dec. 31, 1988. The CFR volume issued January 1, 1987, should be retained.

[4] The July 1, 1985 edition of 32 CFR Parts 1-189 contains a note only for Parts 1-39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1-39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[5] No amendments to this volume were promulgated during the period July 1, 1986 to June 30, 1988. The CFR volume issued as of July 1, 1986, should be retained.

[6] The July 1, 1985 edition of 41 CFR Chapters 1-100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 54 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

ATLANTA, GA

WHEN: September 20; at 9:00 a.m.

Rules and Regulations

Federal Register
Vol. 54, No. 171
Wednesday, September 6, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 29

[TB-89-009]

RIN 0581-AA19

Tobacco Inspection; Fees and Charges for Inspection and Grading of Imported Tobacco

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Tobacco Adjustment Act of 1983, as amended requires the Secretary of Agriculture to fix and collect fees and charges for the inspection and grading of all tobacco offered for importation into the United States, except cigar and oriental tobacco. This action would increase the fees charged to importers from $.0035 per pound to $.0040. The increased fees are necessary in order to cover the Department's costs of providing services under the Act.

EFFECTIVE DATE: October 1, 1989.

FOR FURTHER INFORMATION CONTACT: Director, Tobacco Division, AMS, USDA, Room 502 Annex Building, P.O. Box 96456, Washington, DC 20090-6456. Telephone (202) 447-2567.

SUPPLEMENTARY INFORMATION: Notice was given (54 FR 27883, July 3, 1989) that the Department proposed to amend the regulations governing the inspection of all imported tobacco, except cigar and oriental tobacco, to increase the fees for inspection and grading.

Interested parties were given an opportunity to comment on the proposed rule. No comments were received. This action makes final the fee increase as proposed. This fee increase is necessary to cover the cost of providing the service, including administrative and supervisory costs. The authority for this rule is contained in the Tobacco Adjustment Act of 1983, as amended (7 U.S.C. 511r).

Imported tobacco is inspected for grade and quality using the same standards applied to tobacco marketed through a warehouse in the United States. Fees are assessed to cover the cost of providing this grading service. The fee for grading imported tobacco has been $.0035 per pound since 1984.

The Department proposed to increase the fee to $.0040 per pound. This fee was determined after an annual review and analysis was conducted of the financial status of the program. The major factors generating the need for additional funds are increases in salaries, travel allowances and overall administrative costs since 1984.

This final rule has been reviewed under USDA procedures established to implement Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be "nonmajor" because it does not meet any of the criteria established for major rules under the Executive order.

Additionally, in conformance with the provisions of Public Law 96-354, the Regulatory Flexibility Act, full consideration has been given to the potential economic impact on small business. Few, if any, of the firms which would be affected by this rule are small businesses. The Administrator, Agricultural Marketing Service, has determined that this action would have no significant economic impact upon any entity, small or large, and would not substantially affect the normal movement of the commodity in the marketplace. Compliance with this revision would not impose substantial direct economic costs, recordkeeping, or personnel workload changes on small entities, and it would not alter the market share or competitive positions of small entities relative to large entities. Furthermore, the Department is required by law to fix and collect fees and charges to cover the Department's cost in operating the tobacco inspection program.

List of Subjects in 7 CFR Part 29

Administrative practice and procedure, Tobacco.

Accordingly, the Department hereby amends the regulations in 7 CFR part 29, subpart B, as follows:

PART 29—[AMENDED]

1. The authority citation for part 29, Subpart B, continues to read as follows:

Authority: 7 U.S.C. 511m and 511r.

Subpart B—Regulations

2. Section 29.500 is amended by revising paragraph (a) to read as follows:

§ 29.500 Fees and charges for inspection and testing of imported tobacco.

(a) The fee for inspection of imported tobacco is $.0040 per pound, and shall be paid by the importer. This inspection fee applies to all tobacco imported into the United States except as provided in § 29.400. Fees for services rendered shall be remitted by check or draft in accordance with a statement issued by the Director, and shall be made payable to "Agricultural Marketing Service".

BILLING CODE 3410-02-M

---

7 CFR Part 915

[Docket No. FV-89-045FR]

Avocados Grown in South Florida; Minimum Weight and Diameter Maturity Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department is adopting as a final rule with appropriate corrections the provisions of an interim final rule which changed the minimum maturity requirements in effect on a continuous basis for Florida and imported avocados. That rule changed the maturity shipping schedules for the Hardee, Nadir, and Pinkerton varieties of avocados, and the maturity schedule in Table I of the regulation to synchronize it with the 1989-90 calendar years. The corrections incorporated into the final rule make the shipping periods for the Black Prince variety sequentially correct, delete the Kosel and Fairchild varieties from the maturity schedule, and add the Chica and Gossman varieties to the maturity schedule. The final rule is designed to promote orderly

---

---

marketing conditions for Florida and imported avocados in the interest of growers and consumers by assuring shipment of only mature fruit, thereby creating and maintaining consumer satisfaction and avocado sales.

DATES: Section 915.332 is adopted as a final rule effective September 6, 1989. This section is applicable to avocados imported into the United States under § 944.31 as of September 11, 1989.

FOR FURTHER INFORMATION CONTACT: Gary D. Rasmussen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456, telephone (202) 475–3918.

SUPPLEMENTARY INFORMATION: This final rule is issued under the Marketing Agreement and Marketing Order No. 915, both as amended (7 CFR Part 915), regulating the handling of avocados grown in South Florida. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1, and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act and rules issued thereunder are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 34 handlers subject to regulation under the marketing order for avocados grown in South Florida, and an estimated 20 importers who import avocados into the United States. In addition, there are approximately 330 avocado producers in South Florida. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of these avocado handlers, importers, and producers may be classified as small entities.

An interim final rule was issued June 2, 1989, and published in the **Federal Register** (54 FR 24322, June 7, 1989), changing the maturity requirements for avocados grown in Florida under § 915.332, and for imported avocados under § 944.31. That rule provided that interested persons could file written comments through July 7, 1989. A comment was filed by the committee identifying provisions in the interim final rule which needed correction in this final rule. The corrections incorporated in this action: (1) Change the Black Prince variety shipping period date beginning the 4th Monday of September to the 2nd Monday of September so that it is sequentially correct; (2) delete the Kosel and Fairchild varieties from the maturity schedule since they are no longer shipped; and (3) add the Chica and Gossman varieties to the maturity schedule since they are expected to be shipped this season. Since these corrections reflect the original recommendations of the committee, are based upon shipping data and maturity test data developed last season and rectify inadvertent errors made in the interim final rule, it is necessary and appropriate to incorporate such changes in this final rule.

The interim final rule revised Table I appearing in paragraph (a)(2) of § 915.332 to change the maturity requirements for the Hardee, Nadir, and Pinkerton varieties of avocados, based on last season's test data on the maturity characteristics of these varieties. The test data indicate that the Hardee and Nadir varieties mature later in the season, the Hardee variety matures at a lower weight, and the Pinkerton variety matures sooner in the season than the dates currently reflected in the shipping schedule. In recognition of these factors, the seasonal shipping schedule for the Hardee variety was shifted two weeks later into the season, with the starting date moved from the second Monday in June to the fourth Monday in June. Also for the Hardee variety, the minimum weight requirement is reduced by two ounces, with starting minimum weight reduced from 18 to 16 ounces. For the Nadir variety, the shipping schedule was shifted one week later into the season, with the starting date moved from the third Monday in June to the fourth Monday in June. For the Pinkerton variety, shipments are permitted one week earlier beginning the first Monday in October. Also, the interim final rule made calendar date adjustments in the varietal shipping schedules in the Florida avocado maturity regulation to synchronize them with the 1989–90 calendar years.

The Avocado Administrative Committee (committee) recommended the specified maturity requirements for 1989–90 season Florida avocado shipments, at its meeting of April 12, 1989. The committee works with the Department in administering the marketing agreement and order. The committee meets prior to and during each season to consider recommendations for modification, suspension, or termination of the regulatory requirements for Florida avocados. Committee meetings are open to the public and interested persons may express their views at these meetings. The Department reviews committee recommendations and information submitted by the committee and other available information, and determines whether modification, suspension, or termination of the regulatory requirements would tend to effectuate the declared policy of the Act.

Section 8e of the Act (7 U.S.C. 608e–1) requires that whenever specified commodities, including avocados, are regulated under a Federal marketing order, imports of that commodity into the United States must meet the same or comparable grade, size, quality, or maturity requirements as those in effect for the domestically produced commodity. The Act further provides that the requirements on imports shall not become effective until giving not less than three days notice.

Avocado import maturity requirements are in effect on a continuous basis under § 944.31 (7 CFR § 944.31), issued under Section 8e of the Act. That section provides that minimum weight and diameter maturity requirements for avocados imported into the United States from northern hemisphere countries be the same as such maturity requirements specified in § 915.332 for Florida avocados, and that the requirements contained in paragraph (a)(2) of § 915.332 do not apply to imported avocados grown in the southern hemisphere. Since the interim final rule changed the minimum weight and diameter maturity requirements for Florida produced avocados, these same changes apply to imported avocados grown in northern hemisphere countries. No change is needed in the text of the import regulation by this action.

Further, avocado import grade requirements are currently in effect on a continuous basis under § 944.28 (7 CFR § 944.28). A minimum grade requirement of U.S. No. 2 is also currently in effect on a continuous basis for Florida avocados under § 915.306 (7 CFR § 915.306). Since this action does not change the grade requirements for Florida avocados, the avocado grade import requirements appearing in § 944.28 are not affected.

Some Florida avocado shipments are exempt from the maturity requirements, including gift fruit shipments of up to 20 pounds in individually addressed containers. Florida avocados utilized in commercial processing are not covered by the maturity requirements. In addition, the Florida and import avocado maturity and Florida and import grade requirements permit shipments up to 55 pounds of avocados exempt from such requirements.

The maturity requirements in the final rule reflect the committee's and the Department's appraisal of the appropriate maturity requirements for domestic and import shipments of avocados. The Department's view is that the requirements do not adversely impact growers, handlers, and importers. The application of the maturity requirements to both Florida and imported avocados over the past several years have helped to assure that only mature avocados are shipped to fresh markets. The committee considers the Florida avocado maturity requirements to be necessary to improve grower returns.

Similar maturity requirements have been in effect for several seasons, and Florida avocado growers and handlers have found such requirements beneficial in the successful marketing of the avocado crop. While compliance with these maturity requirements affect handlers' and importers' costs, these costs would be offset by the benefits derived from the more successful marketing of the crop.

Based on the above, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, the information and recommendations submitted by the committee, and other available information, it is found that the interim final rule, as published in the **Federal Register** (54 FR 24322) on June 7, 1989, along with the corrections herein specified, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) This final rule maintains handling requirements currently in effect, with appropriate corrections incorporated, for Florida and imported avocados; (2) Florida avocado handlers are aware of these handling requirements, which were recommended by the committee at a public meeting and they will need no additional time to continue complying with such requirements; (3) the grade and maturity requirements for imported avocados are mandatory under section 8e of the Act; and (4) the interim final rule provided a 30-day comment period, and the comment received is fully addressed in this final rule.

List of Subjects in 7 CFR Part 915

Marketing agreements and orders, avocados, Florida.

For the reasons set forth in the preamble, 7 CFR part 915 is amended as follows:

Note: This section will appear in the Code of Federal Regulations.

PART 915—AVOCADOS GROWN IN SOUTH FLORIDA

1. The authority citation for 7 CFR part 915 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Accordingly, the interim final rule amending the provisions of § 915.332, which was published in the **Federal Register** (54 FR 24322, June 7, 1989), is adopted as a final rule with the following changes. In § 915.332, Table I in paragraph (a)(2) is amended by: (1) Removing from the table the Kosel and Fairchild varieties; (2) changing on the table for the Black Prince variety the effective period entry "4th Mon. Sept" to "2nd Mon. Sept"; and (3) adding to the table the Chica variety between the Simpson and Choquette varieties, and the Gossman variety between the Zio (P) and Wagner varieties reading as follows:

§ 915.332 Florida avocado maturity regulation.

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This interim final rule establishes grade and size requirements for California processed olives used in the production of limited use styles of olives such as wedges, halves, slices, or segments and establishes similar requirements in the olive import regulation to bring that regulation into conformity with the domestic requirements. The grade and size requirements are the same as implemented last season. Olives used in limited use styles are too small to be desirable for use as whole or pitted canned olives because their flesh-to-pit ratio is too low. However, they are satisfactory for use in the production of limited use styles. Their use in such products over the years has helped the California olive industry meet the increasing market needs of the food service industry. The requirements for domestic olives were unanimously recommended by the California Olive Committee (committee), which works with the Department in administering the marketing order program for olives grown in California. The establishment of such requirements for imported olives is required pursuant to section 8e of the Agricultural Marketing Agreement Act of 1937.

DATES: This interim final rule becomes effective September 6, 1989. Comments which are received by October 6, 1989, will be considered prior to issuance of a final rule.

ADDRESSES: Written comments concerning this rule should be submitted in triplicate to the Docket Clerk, F&V Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, DC 20090-6456. All comments submitted will be made available for public inspection in the above office during regular business hours. Comments should reference the docket number and the date and page number of this issue of the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: Patrick Packnett, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96458, Room 2530-S, Washington, DC 20090-6456; telephone (202) 475-3862.

SUPPLEMENTARY INFORMATION: This interim final rule is issued under Marketing Agreement and Order No. 932 (7 CFR part 932), as amended, regulating the handling of olives grown in California, hereinafter referred to as the order. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This interim final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are seven handlers of California olives subject to regulation under the order and approximately 1,400 producers in California. Approximately 25 importers of olives are subject to the olive import regulation. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. Most but not all of the olive producers and importers may be classified as small entities. None of the olive handlers may be classified as small entities.

Nearly all of the olives grown in the United States are produced in California. The growing areas are scattered throughout California with most of the commercial production coming from inland valleys. About 75 percent of the production comes from the San Joaquin Valley and 25 percent from the Sacramento Valley.

Olive production has fluctuated from a low of 24,200 tons during the 1972-73 crop year to a high of 146,500 tons during the 1982-83 crop year. The committee indicated that 1988 production totalled about 84,600 tons. The various varieties of olives produced in California have alternate bearing tendencies with high production one year and low the next. The industry expects the 1989-90 crop to be about 97,500 tons.

The primary use of California olives is for canned ripe olives which are eaten out of hand as hors d'oeuvres or used as an ingredient in cooking and in salads. The canned ripe olive market is essentially a domestic market. Very few California olives are exported.

This action will allow handlers to market more olives than would be permitted in the absence of this relaxation in size requirements. This additional opportunity is provided to maximize the use of the California olive supply, facilitate market expansion, and benefit both growers and handlers.

This interim rule modifies § 932.153 of Subpart—Rules and Regulations (7 CFR 932.108-932.161). The modification establishes grade and size regulations for 1989-90 crop limited use size olives. The modification is issued pursuant to paragraph (a)(3) of § 932.52 of the order. This rule also makes necessary conforming changes in the olive import regulation (Olive Regulation 1; 7 CFR 944.401). The import regulation is issued pursuant to section 8e of the Act. Section 8e provides that whenever grade, size, quality, or maturity provisions are in effect for specified commodities, including olives, under a marketing order, the same or comparable requirements must be imposed on the imports.

Paragraph (a)(3) of § 932.52 of the marketing order provides that processed olives smaller than the sizes prescribed for whole and pitted styles may be used for limited uses if recommended by the committee and approved by the Secretary. The sizes are specified in terms of minimum weights for individual olives in various size categories. The section further provides for the establishment of size tolerances.

To allow handlers to take advantage of the strong market for halved, segmented, sliced, and chopped canned ripe olives, the committee recommended that grade and size requirements again be established for limited use olives for the 1989-90 crop year (August 1, 1989, through July 31, 1990). The grade requirements are the same as those applied during the 1988-89 crop year, as are the sizes and the size tolerances. Permitting handlers to use small olives in the production of limited use style canned olives will have a positive impact on industry returns. In the absence of this action, the undersized fruit would have to be used for non-canning uses, like oil, for which returns are lower. Except for the changes necessary in the effective date, the provisions, hereinafter set forth in § 932.153, are the same as those established last season.

Paragraph (b)(12) of § 944.401 of the olive import regulation allows imported bulk olives which do not meet the minimum size requirements for canned whole and pitted ripe olives to be used for limited use styles if they meet specified size requirements. Continuation of the limited use authorization for California olives by this interim rule requires that similar changes be made in paragraph (b)(12) of § 944.401 to keep the import regulation in conformity with the applicable domestic requirements. These conforming changes will benefit importers because they will be able to import small-sized olives for limited use during the 1989-90 season which ends July 31, 1990.

Based on available information, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities because it provides handlers and importers more marketing flexibility.

After consideration of all relevant matter presented, the information and recommendations submitted by the committee, and other available information, it is found that authorizing the use of smaller olives in the production of limited use styles will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is found and determined that upon good cause it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice prior to putting this rule into effect, and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) Compliance with this action will require no special preparation by handlers and importers; (2) it is important that these requirements apply to as much of the 1989-90 marketing season as possible; (3) the olive import requirements are mandatory under section 8e of the Act; (4) this action relieves restrictions on handlers and importers; and (5) the rule provides a 30-day comment period, and any comments received will be considered prior to finalization of this interim final rule.

List of Subjects

7 CFR Part 932

California, Marketing agreements and orders, Olives.

7 CFR Part 944

Fruits, Import regulations, Marketing agreements and orders.

For the reasons set forth in the preamble, 7 CFR parts 932 and 944 are amended as follows.

Note: These sections will appear in the Code of Federal Regulations.

1. The authority citations for 7 CFR parts 932 and 944 continue to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

PART 932—OLIVES GROWN IN CALIFORNIA

2. Section 932.153 is revised to read as follows:

§ 932.153 Establishment of grade and size requirements for processed 1989-90 crop year olives for limited use.

(a) *Grade.* On and after September 6, 1989, any handler may use processed olives of the respective variety group in the production of limited use styles of canned ripe olives if such olives were processed after July 31, 1989, and meet the grade requirements specified in paragraph (a)(1) of § 932.52 as modified by § 932.149.

(b) *Sizes.* On and after September 6, 1989, any handler may use processed olives in the production of limited use styles of canned ripe olives if such olives were harvested during the period August 1, 1989, through July 31, 1990, and meet the following requirements:

(1) The processed olives shall be identified and kept separate and apart from any olives harvested before August 1, 1989, or after July 31, 1990.

(2) Variety Group I olives, except the Ascolano, Barouni, or St. Agostino varieties, shall be of a size which individually weigh 1/90 pound: *Provided,* That no more than 35 percent of the olives in any lot or sublot may be smaller than 1/90 pound.

(3) Variety Group 1 olives of the Ascolano, Barouni, or St. Agostino varieties shall be of a size which individually weigh 1/140 pound: *Provided,* That no more than 35 percent of the olives in any lot or sublot may be smaller than 1/140 pound.

(4) Variety Group 2 olives, except the Obliza variety, shall be of a size which individually weigh 1/180 pound: *Provided,* That no more than 35 percent of the olives in any lot or sublot may be smaller than 1/180 pound.

(5) Variety Group 2 olives of the Obliza variety shall be of a size which individually weigh 1/140 pound: *Provided,* That no more than 35 percent of the olives in any lot or sublot may be smaller than 1/140 pound.

PART 944—FRUITS; IMPORT REGULATIONS

5. Section 944.401 is amended by revising the introductory text of paragraph (b)(12) to read as follows:

§ 944.401 Olive Regulation 1.

* * * * *

(b) * * *

(12) Imported bulk olives when used in the production of canned ripe olives must be inspected and certified as prescribed in this section. Imported bulk olives which do not meet the applicable minimum size requirements specified in paragraphs (b)(2) through (b)(11) of this section may be imported during the period September 6, 1989, through July 31, 1990, for limited use, but any such olives so used shall not be smaller than the following applicable minimum size:

7 CFR Part 993

[FV-89-082FR]

Expenses and Assessment Rate for Dried Prunes Produced in California

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule authorizes expenditures and establishes an assessment rate for the 1989-90 crop year under Marketing Order No. 993 for dried prunes produced in California. Authorization of this budget will allow the Prune Marketing Committee (Committee), the agency responsible for local administration of the order, to

incur expenses that are reasonable and necessary to administer the program. Funds to administer this program are derived from assessments on handlers.

EFFECTIVE DATES: August 1, 1989 through July 31, 1990.

FOR FURTHER INFORMATION CONTACT: Allen Belden, Marketing Specialist, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2525–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 447–5120.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order No. 993 (7 CFR part 993), hereinafter referred to as the "order," regulating the handling of dried prunes produced in California. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this final rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 16 handlers of prunes produced in California subject to regulation under the California prune marketing order and approximately 1,200 producers in the production area. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having average gross annual revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of prune handlers and producers may be classified as small entities.

The marketing order for California prunes requires that the assessment rate for a particular crop year shall apply to all assessable prunes handled from the beginning of such year. An annual budget of expenses is prepared by the Committee and submitted to the U.S. Department of Agriculture for approval. The members of the Committee are handlers and producers of regulated prunes. They are familiar with the Committee's needs and with the costs for goods, services, and personnel in their local areas and are, therefore, in a position to formulate an appropriate budget. The budget is formulated and discussed in public meetings. Thus, all directly affected persons have an opportunity to participate and provide input.

The assessment rate recommended by the Committee is derived by dividing anticipated expenses by expected shipments of assessable prunes. Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the Committee's expected expenses. The recommended budget and assessment rate are usually acted upon by the Committee shortly before a crop year begins, and expenses are incurred on a continuous basis. Therefore, budget and assessment rate approvals must be expedited so that the Committee will have funds to pay its expenses.

The Committee met on June 27, 1989, and unanimously recommended 1989–90 crop year expenditures of $250,895 and an assessment rate of $1.39 per salable ton of prunes. In comparison, 1988–89 crop year budgeted expenditures were $248,320 and the assessment rate was $1.60 per ton. Assessment income for 1989–90 is estimated at $250,895 based on a crop of 180,500 salable tons of prunes.

While this final action imposes some additional costs on handlers of California prunes, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs will be significantly offset by the benefits derived from the operation of the marketing order. Therefore, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

This action adds a new § 993.340 and is based on Committee recommendations and other available information. A proposed rule was published in the **Federal Register** on August 2, 1989 (54 FR 31847). Comments on the proposed rule were invited from interested persons until August 14, 1989. No comments were received.

After consideration of the information and recommendations submitted by the Committee and other available information, it is found that this final rule will tend to effectuate the declared policy of the Act.

This action should be expedited because the Committee needs to have sufficient funds to pay its expenses, which are incurred on a continuous basis. In addition, handlers are aware of this action, which was recommended by the Committee at a public meeting. Therefore, it is also found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** (5 U.S.C. 553).

List of Subjects in 7 CFR Part 993

California, Dried prunes, and Marketing agreements and orders.

For the reasons set forth in the preamble, 7 CFR Part 993 is amended as follows:

PART 993—DRIED PRUNES PRODUCED IN CALIFORNIA

1. The authority citation for 7 CFR Part 993 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 993.340 is added to read as follows:

Note: This section will not appear in the annual Code of Federal Regulations.

§ 993.340 Expenses and assessment rate.

Expenses of $250,895 by the Prune Marketing Committee are authorized, and an assessment rate payable by each handler in accordance with § 993.81 is fixed at $1.39 per ton for salable dried prunes for the 1989–90 crop year ending July 31, 1990.

Dated: August 30, 1989.

[T.D. 89–83]

Customs Regulations Amendment Relating to the Definition of Fraud Under 19 U.S.C. 1592

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations to incorporate a revision of the definition of "fraud" in the penalty guidelines for violations of 19 U.S.C. 1592 published as appendix B to part 171 (19 CFR 171, appendix B). The definition of "fraud" is changed by removing the requirement that intent to defraud the revenue of the United States be proven as an element of the violation. This change brings the Customs guidelines into conformity with the current legal requirements applicable to the Government's burden of proof in civil fraud cases. Under the new definition, the critical element necessary to prove the violation is the intent to commit the fraudulent act or omission. The document also modifies the definition of "gross negligence" to maintain the distinctions between the two types of violations.

EFFECTIVE DATE: October 6, 1989.

FOR FURTHER INFORMATION CONTACT: Sandra L. Gethers, Regulatory Procedures and Penalties Division (202–566–8317).

SUPPLEMENTARY INFORMATION

Background

Appendix B to part 171, Customs Regulations (19 CFR part 171, appendix B), sets forth the revised penalty guidelines for violations of 19 U.S.C. 1592. Section 1592 imposes monetary penalties and other sanctions for entering, introducing, or attempting to enter or introduce any merchandise into the commerce of the U.S. by means of any document, written or oral statement, or act which is material and false, or any omission which is material. The guidelines provide for, among other things, mitigation of the monetary penalty according to the degree of culpability involved in the violation of section 1592.

Section (B) of the revised penalty guidelines in appendix B to part 171 lists and defines three degrees of culpability as: negligence, gross negligence, and fraud. In a **Federal Register** notice of December 10, 1986, (51 FR 44483), the Customs Service announced a proposed amendment of the definition of fraud in these guidelines. The guidelines are intended to provide internal guidance to Customs employees, and are not a part of the Customs Service Regulations. Although they are not technically subject to the requirements of the Administrative Procedures Act (5 U.S.C. 553(b)(A)), members of the public were offered the opportunity to submit comments on the proposed amendment to the definition.

As originally proposed, the definition for fraud under section 1592 would have been changed to read:

> A violation is determined to be fraudulent if the material false statement or act in connection with the transaction was committed (or omitted) knowingly, i.e., was done voluntarily and intentionally, and not because of mistake or accident or other innocent reason, as established by clear and convincing evidence.

Discussion of Comments

The Customs Service received sixty-five comments from members of the public. The great majority of these opposed some aspect of the proposed redefinition.

Comment: Several comments expressed concern that by placing the phrase, "as established by clear and convincing evidence" after the phrase, "and not because of mistake or accident or other innocent reason", Customs was changing the burden of proof so that an alleged violator would have to prove his innocence in order not to be accused of fraud.

Response: It was not the intention of Customs to change the Government's burden of proof in such instances. Accordingly, a modification of the definition has been made to clarify this point.

Comment: That "fraud", in general, requires intent to commit an act with knowledge of its consequences and with intent to bring about such consequences.

Response: Since section 1592 is a civil statute, the elements of fraud that must be established for penalties thereunder differ in some respects from those relating to criminal fraud. The required element of intent in civil fraud cases is intent that a representation be made, that it be directed to a particular person or class of persons, that it convey a certain meaning, that it be believed and that it shall be acted upon in a certain way.

By amending the definition of fraud under the guidelines, Customs merely is adhering to the general principle applied in civil fraud cases that "the intent which becomes important is the intent to deceive, to mislead, to convey a false impression." Thus, the intent under the new definition is directed to the making of the false representation or omission, as opposed to causing the consequences of such representation or omission (e.g. duty loss, quota violation, etc.).

Comment: The proposed change to the definition of fraud destroys the distinction between fraud and gross negligence.

Response: Under the new definition of fraud, the degree of culpability of fraud and gross negligence will remain distinguishable. For fraud, Customs still will be required to establish by clear and convincing evidence that the violator knew at the time of the import transaction involved, that the material false statement was made or that a material omission had occurred.

Inasmuch as the phrase, "deliberate intent to defraud the revenue or otherwise violate the law" will not be a part of the new definition of fraud under the guidelines, the phrase, "but without intent to defraud the revenue or violate the laws of the United States", is being eliminated from the definition of "gross negligence" under the guidelines. The latter language no longer will be needed to distinguish the definition of "gross negligence" from the succeeding definition of "fraud" set forth in the guidelines.

Comment: That Congress intended that "fraud" under section 1592, include the element of "intent to defraud the revenue or intent to violate the law", since this was a part of the definition of fraud that existed in the Customs guidelines at the time of the 1978 amendment of the statute.

Response: Customs believes that if Congress had intended that Customs not be free to adopt a definition consistent with the current trends in the law with respect to the degrees of culpability specified in the statute, Congress would have included a definition in the statute. For example, to eliminate the possibility that a lesser burden of proof, i.e. "preponderance of the evidence," might be employed in civil forfeiture cases, Congress specifically required that section 1592 violations based upon fraud be established by the Government by "clear and convincing evidence." (19 U.S.C. 1592(e)(2)) Thus, by its inaction, Congress preserved the agency's ability to define the terms.

Comment: That small importers, brokers, as well as multinational companies, while having good intentions will be more susceptible to penalties and seizures under section 1592 based upon fraud.

Response: Customs does not believe that the size, frequency, or complexity of the importer's business will have any bearing on the decision of whether or not to allege fraud in the prosecution of violations of section 1592. The actions, rather than the identities, of the parties are the determining factors considered by Customs when seizure or other actions are initiated for violations of section 1592.

Determination

After consideration of all the comments received in response to the publication of the notice of proposed amendment, and upon further review of the matter, it has been determined to adopt the amendments with the modifications discussed.

Executive Order 12291

This is not a "major rule" as defined in section 1(b) of E.O. 12291. Accordingly, a regulatory impact analysis is not required.

Regulatory Flexibility Act

Under the provisions of the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*), it is certified that these amendments will not have a significant impact on a substantial number of small entities.

Drafting Information

The principal author of this document was Peter T. Lynch, Regulations and Disclosure Law Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices participated in its development.

BILLING CODE 4820-02-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 524

Ophthalmic and Topical Dosage Form New Animal Drugs Not Subject To Certification; Selenium Disulfide Suspension

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by CEVA Laboratories, Inc., providing for a change from prescription to over-the-counter (OTC) distribution of a selenium disulfide suspension for use on dogs as a cleansing shampoo and as an agent for removing skin debris associated with dry eczema, seborrhea, and nonspecific dermatoses.

EFFECTIVE DATE: September 6, 1989.

FOR FURTHER INFORMATION CONTACT: Marcia K. Larkins, Center for Veterinary Medicine (HFV-112), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3430.

SUPPLEMENTARY INFORMATION: CEVA Laboratories, Inc., 7101 College Blvd., Suite 610, Overland Park, KS 66210, filed a supplement to NADA 8-422 providing for OTC distribution of a selenium disulfide suspension for use on dogs as a cleansing shampoo and as an agent for removing skin debris associated with dry eczema, seborrhea, and nonspecific dermatoses. The supplement is approved and the regulations in 21 CFR 524.2101 are amended in paragraph (c) and removed in paragraph (d) to reflect the approval. The basis for approval is stated in the freedom of information summary.

In accordance with the freedom of information provisions of part 20 (21 CFR part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 524

Animal drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR part 524 is amended as follows:

PART 524—OPHTHALMIC AND TOPICAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

1. The authority citation for 21 CFR part 524 continues to read as follows:

Authority: Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)); 21 CFR 5.10 and 5.83.

§ 524.2101 [Amended]

2. Section 524.2101 *Selenium disulfide suspension* is amended in the introductory text of paragraph (c) by removing "and 023851" and adding in its place "023851, and 050604", and by removing paragraph (d).

Dated: August 24, 1989.

Robert C. Livingston,

Deputy Director, Office of New Animal Drug Evaluation, Center for Veterinary Medicine.

New Animal Drugs for Use in Animal Feeds; Fenbendazole

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by Hoechst-Roussel Agri-Vet Co., providing for safe and effective use of Safe-Guard™ (fenbendazole) Type A articles to make Type C free-choice vitamin/mineral feeds for cattle.

EFFECTIVE DATE: September 6, 1989.

FOR FURTHER INFORMATION CONTACT: Dianne T. McRae, Center for Veterinary Medicine (HFV-135), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4913.

SUPPLEMENTARY INFORMATION: Hoechst-Roussel Agri-Vet Co., Route 202-206 North, P.O. Box 2500, Somerville, NJ 08876-1258, filed supplemental NADA 137-600 providing for use of 4 or 20 percent Safe-Guard™ (fenbendazole) Type A articles to make 1.9- and 5-gram-per-pound fenbendazole vitamin/mineral free-choice feeds for use as cattle anthelmintics. The feed is given for 3 to 6 days for a total dose of 5 milligrams fenbendazole per kilogram of body weight (2.27 milligrams per pound) for the removal and control of lungworms and certain stomach and intestinal worms. The supplemental application is approved and the regulations in 21 CFR 558.258(c) are amended to reflect the approval. The basis for approval is discussed in the freedom of information summary.

Fenbendazole is a new animal drug used in a Type A article to make a Type C feed. It is a Category II drug which, as provided in 21 CFR 558.4, requires an approved form FDA-1900 for making a Type C feed from a Type A article as in this NADA as amended and in the regulations in 21 CFR Part 558 as amended.

In accordance with the freedom of information provisions of part 20 (21 CFR part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.24(d)(1)(iii) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR part 558 is amended as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

1. The authority citation for 21 CFR part 558 continues to read as follows:

Authority: Section 512, 82 Stat. 343-351 (21 U.S.C. 360b); 21 CFR 5.10 and 5.83.

2. Section 558.258 is amended by adding new paragraph (c)(3) to read as follows:

§ 558.258 Fenbendazole.

* * * * *

(c) * * *

(3) It is used in free-choice cattle feed as follows:

(i) *Amount.* 5 milligrams fenbendazole per kilogram body weight (2.27 milligrams per pound).

(ii) *Indications for use.* For the removal and control of infections of lungworms (*Dictyocaulus viviparus*), barberpole worms (*Haemonchus contortus*), brown stomach worms (*Ostertagia ostertagi*), small stomach worms (*Trichostrongylus axei*), hookworms (*Bunostomum phlebotomum*), thread-necked intestinal worms (*Nematodirus helvetianus*), small intestinal worms (*Cooperia oncophora* and *C. punctata*), bankrupt worms (*Trichostrongylus colubriformis*), and nodular worms (*Oesophagostomum radiatum*) in cattle.

(iii) *Limitations.* Feed a total of 5 milligrams of fenbendazole per kilogram (2.27 milligrams per pound) of body weight to cattle over a 3 to 6 day period. Retreatment may be needed after 4 to 6 weeks. Do not slaughter within 13 days following last treatment. Do not use in dairy cattle of breeding age. Consult your veterinarian for assistance in the diagnosis, treatment, and control of parasitism.

(iv) May be fed in a Type C feed as follows:

	Percent	International Feed No.
(A) Ingredient:		
Copper sulfate	0.45	6-01-720
Dried Cane Molasses	3.12	4-04-695
Monosodium phosphate	31.16	6-04-288
Salt (sodium chloride)	59.00	6-04-152
Zinc sulfate	0.76	6-05-556
Fenbendazole Type A article (200 grams per kilogram)	5.51	
(B) Ingredient:		
Dicalcium phosphate	32.31	6-00-080
Limestone	17.13	6-02-632
Magnesium oxide	9.79	6-02-756
Zinc sulfate	1.47	6-05-556
Copper sulfate	0.29	6-01-720
Potassium iodide	0.0098	6-03-759
Dried Cane Molasses	0.98	4-04-695
Selenium	0.0002	
Salt	35.93	6-04-152
Fenbendazole Type A article (200 grams per kilogram)	2.09	

(C) The content of any added vitamin and trace mineral may be varied; however, they should be comparable to those used by the firm for other free-choice feeds. Formulation modifications require FDA approval prior to marketing. The amount of selenium must comply with published regulations. For selenium (21 CFR 573.920) up to 120 parts per million in a mixture for free-choice feeding at a rate not to exceed an intake of 3 milligrams per head per day.

Dated: August 29, 1989.

Robert C. Livingston,

Deputy Director, Office of New Animal Drug Evaluation, Center for Veterinary Medicine.

BILLING CODE 4160-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 913

Illinois Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule; removal of condition.

SUMMARY: OSMRE is announcing the removal of a condition placed on the Illinois permanent regulatory program (hereinafter referred to as the Illinois program) by the Secretary of the Interior in his conditional approval of the program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This condition, known as condition (b), required Illinois to promulgate regulations or otherwise amend its program to require, that, in permanent impoundments, a minimum of 10 meters of water cover the pit floor or the highest exposed coal seam to prevent oxidation of acid-forming materials. Illinois has now repealed the provision precipitating imposition of the condition, thus rendering the condition moot.

EFFECTIVE DATE: September 6, 1989.

FOR FURTHER INFORMATION CONTACT: James F. Fulton, Director, Springfield Field Office, Office of Surface Mining Reclamation and Enforcement, 600 East

Monroe Street, Room 20, Springfield, Illinois 62701; Telephone: (217) 492–4495.

SUPPLEMENTARY INFORMATION:

I. Background
II. Secretary's Findings
III. Public and Agency Comments
IV. Secretary's Decision
V. Procedural Matters

I. Background

On June 1, 1982, the Secretary of Interior conditionally approved the Illinois program. Information pertinent to the general background, revisions, modifications, and amendments to the Illinois program submission, as well as the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval can be found in the June 1, 1982, **Federal Register** (47 FR 23883 *et seq.*). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 913.15, 913.16, and 913.17.

II. Secretary's Findings

As originally submitted to OSMRE, the Illinois program at 62 IAC 1816.103(a)(1) allowed the creation of permanent "last cut lake" impoundments, provided the pit floor and highest exposed coal seam were covered with a minimum of four feet of water. While the Secretary found merit in the general concept of covering acid-forming materials with water to prevent oxidation, he also found that technical studies had demonstrated that a minimum water depth of 9 meters (29.5 feet) was necessary to do so.

Therefore, the Secretary, with the State's concurrence, imposed condition (b) on his approval of the Illinois program. As codified at 30 CFR 913.11(b), condition (b) required the State to submit promulgated regulations or otherwise amend its program to require that the pit floor and highest coal seam be covered with a minimum of 10 meters (33 feet) of water. It also specified that, pending completion of the above, Illinois could not approve impoundments in which these materials would be covered with less than 10 meters of water.

By letter dated March 28, 1986 (Administrative Record No. IL–1028), Illinois submitted a major regulatory reform package, which it subsequently revised and resubmitted on May 22, 1987 (Administrative Record No. IL–1029A). With a few exceptions, the Director approved the revised regulations on October 25, 1988 (53 FR 43137). As part of this package, Illinois repealed 62 IAC 1816.103(a)(1), which originally resulted in the imposition of condition (b), and replaced it with new 62 IAC 1816.102(f), which requires exposed coal seams to be "adequately covered with nontoxic and noncombustible materials." Since this language is identical to that of the corresponding Federal rule at 30 CFR 816.102(f), and since the State has deleted those provisions of its program authorizing the creation of permanent impoundments with less than adequate cover, the Secretary finds that Illinois has satisfied the requirements of 30 CFR 913.11(b).

III. Public and Agency Comments

Pursuant to 30 CFR 732.17(b)(3) and (11)(i), the Director solicited comments on both the March 28, 1986, proposed amendments and the May 22, 1987, revisions from the public and various Federal agencies with an actual or potential interest in the Illinois program (51 FR 23858, May 9, 1986, and 52 FR 24035, June 26, 1987). No substantive comments regarding condition (b), the repeal of 62 IAC 1816.103(a)(1), or the addition of 62 IAC 1816.102(f) were received. Since no one requested an opportunity to testify at a public hearing, none was held.

In addition, as announced in the May 19, 1989, **Federal Register** (54 FR 21630), OSMRE provided a separate public comment period and opportunity to request a public hearing on the removal of condition (b). No comments or request for a hearing were received either during or after this comment period, which closed June 19, 1989.

IV. Secretary's Decision

Based on the above finding, the Secretary is removing the condition of approval of the Illinois program codified at 30 CFR 913.11(b) and is amending 30 CFR part 913 to implement this decision. This final rule is being made effective immediately since consistency of State and Federal standards is required by SMCRA.

V. Procedural Matters

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared for this rulemaking.

2. *Executive Order 12291 and the Regulatory Flexibility Act:* On July 12, 1984, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, for this action OSMRE is exempt from the requirement to prepare a Regulatory Impact Analysis and this action does not require regulatory review by OMB.

The Department of the Interior has determined that the removal of this condition will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 913

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: August 29, 1989.

Scott Sewell,

Deputy Assistant Secretary—Land and Minerals Management.

For the reasons set out in the preamble, title 30, chapter VII, subchapter T of the Code of Federal Regulations is amended as set forth below:

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL-3640-1]

Approval and Promulgation of Implementation Plans; Wisconsin

AGENCY: U.S. Environmental Protection Agency.

ACTION: Notice of final rulemaking.

SUMMARY: USEPA announces final approval of a revision to the Wisconsin State Implementation Plan (SIP) for sulfur dioxide (SO_2). The revision consists of the incorporation of section NR 154.12(6) of the Wisconsin Administrative Code (WAC), Milwaukee Sulfur Limitations, into the Wisconsin SIP. The revision sets SO_2 emission limits for large electric utility sources in the City of Milwaukee, and provides a compliance schedule for meeting these limits. USEPA's action is based upon a SIP revision request that was submitted by the Wisconsin Department of Natural Resources (WDNR) on January 23, 1984. A notice of proposed rulemaking on this revision appeared in the August 17, 1984, **Federal Register** (49 FR 32865).

EFFECTIVE DATE: This final rulemaking becomes effective on October 6, 1989.

ADDRESSES: Copies of this revision to the Wisconsin SIP are available for inspection at: (It is recommended that you telephone Uylaine E. McMahan, at (312) 886–6031, before visiting the Region V office).

U.S. Environmental Protection Agency,
Region V, Air and Radiation Branch,
230 South Dearborn Street, Chicago,
Illinois 60604.

Copies of this SIP revision and other materials relating to this rulemaking are available for inspection at the following addresses:

U.S. Environmental Protection Agency,
Public Information Reference Unit, 401
M Street, SW., Washington, DC 20460.

Resources, Bureau of Air
Management, 101 South Webster,
Madison, Wisconsin 53707.

FOR FURTHER INFORMATION CONTACT: Uylaine E. McMahan, (312) 886–6034.

SUPPLEMENTARY INFORMATION:

Background

In today's final rulemaking action, USEPA is approving a revision to the Wisconsin SIP consisting of sections NR 154.12(6)(a) and NR 154.12(6)(b) of the WAC NR 154.12(6).[1] Section NR 154.12(6)(a) modifies the SIP to limit the SO_2 emissions of all large (greater than 250 million BTU heat input per hour) electric utility plants in the City of Milwaukee, on which construction or modification was begun prior to December 1, 1983.

This SIP revision specifies emission limits based on the type of fuel used. The emission limits are as follows:

Type of fuel	Emission limit
Solid fossil fuel or coal	3.28 lbs. of SO_2/MMBTU.
Residual fuel oil (fuel oil #6)	1.60 lbs. of SO_2/MMBTU.
All other fuels (fuel oil #2 and natural gas).	0.50 lbs. of SO_2/MMBTU.
Combination of fuels	Weighted average of the individual emission limits for each fuel type, based on the percentage of each fuel type in the fuel combination.

The WEPCo Valley Station, which burns coal, is subject to these emission limits, this is the only major SO_2 source in the area. USEPA has reviewed the State's technical support document, including the modeling analysis, which was submitted to USEPA with the SIP revision request. Based on the dispersion modeling used to set the SO_2 limits for the Milwaukee nonattainment area, USEPA has determined that a 3.28 lbs. of SO_2 per million BTU emission limitation for the WEPCo Valley Station will protect the constraining 24-hour standard, as well as the 3-hour and annual standards, thus ensuring attainment of the SO_2 National Ambient Air Quality Standards (NAAQS) in the Milwaukee area. The determination was based on a block average interpretation of the SO_2 NAAQS. Other SO_2 sources in Milwaukee County will be governed by SIP provisions such as the Wisconsin Statewide SO_2 Rule, when it is approved, and applicable New Source Review requirements.

The model technique used in the demonstration supporting this revision are based on modeling guideline in place at the time the analysis was performed (i.e. USEPA guideline 1978). Since that time, the revision has been promulgated (September 7, 1985). Since the model was completed prior to publication of revised guidance, USEPA accepts the analysis as it stands.

Section NR 154.12(6)(b) of Wisconsin's proposed SIP revision sets a compliance timetable by which compliance with the proposed emission limits must be achieved. The schedule begins on December 1, 1983, and ends on November 9, 1985, with interim milestones for compliance plan submittal, contracting, and construction. If compliance is achieved through fuel switching, however, then effective compliance is required by August 9, 1985. USEPA is approving this timetable because it is consistent with USEPA policy, as contained in "Guidance Document for Correction of Part D SIP's for Nonattainment Areas" (January 27, 1984) and "Compliance with the Statutory Provisions of Part D of the Clean Air Act, Final Rule" (48 FR 50686), and the requirements of the Clean Air Act.

The compliance test method for the emission limitations is Method 6 stack test (see 40 CFR Part 60 appendix A), this test method was approved by USEPA on May 31, 1972 (37 FR 10842), for the State and it remains in effect for these emission limitations.

On July 8, 1985 (50 FR 27892), USEPA promulgated Stack Height Rules, pursuant to section 123 of the Clean Air Act. These rules do not apply to stack heights "in existence" before December 31, 1970. A stack is "in existence" if the owner or operator had, by December 31, 1970: (1) Begun a continuous program of physical on-site construction of the stack; or, (2) entered into a binding agreement or contractual obligation, which could not be cancelled or modified without substantial loss, to undertake a program of stack construction to be completed within a reasonable time.

On October 7, 1985, the WDNR certified that the two existing stacks (serving four boilers) at WEPCo's Valley plant were "in existence" prior to December 31, 1970. Thus, the physical stack height for these two stacks is not subject to the Stack Height Rules and is fully creditable. Credit for merged gas streams is also allowed, because dispension techniques, such as merging gas streams, instituted before December 31, 1970, are "grandfathered" under Section 123 of the Clean Air Act, and the merging at WEPCo's Valley plant was part of the original facility construction and occurred before December 31, 1970.

---

[1] NR 154.12(6) was recodified without substantive changes to NR 418.04. For the purposes of this notice, USEPA is using the original codification numbers for the preamble, because that is how the rule was originally submitted to USEPA and proposed by us. However, USEPA is using the recodified number for the purpose of incorporating the rule into the SIP, because the rule with this codification is that which the State currently has the authority to enforce.

Discussion of Comments

No public comments on the August 7, 1984, proposed rulemaking were received during the designated comment period. However, some two years later the Natural Resources Defense Council (NRDC), submitted a letter commenting on the proposal, and the Utility Air Regulatory Group (UARG) filed responsive comments. Both submissions were confined to the issue of averaging methods. USEPA will respond to those comments here.

NRDC argues that "USEPA may not lawfully approve the WEPCo Valley Station emission limits as adequate to attain and maintain the SO_2 NAAQS based on a 'block' average modeling analysis". NRDC also incorporated by reference several other letters sent to USEPA by NRDC in 1984 which address the issue of block versus running averages. In this correspondence NRDC argues that the use of block averages violates Section 110 of the Clean Air Act, which requires that emission limitations ensure attainment and maintenance of the air quality standards, and further, that running averages are the Agency's officially adopted interpretation of the NAAQS.[2]

USEPA disagrees with NRDC's comments. In 1971 USEPA promulgated NAAQS for sulfur oxides. The primary standard was to be measured on both an annual and 24-hour basis, and the secondary standard measured on a 3-hour basis. Since the inception of the standard in 1971 it has been USEPA's general practice to use block averages to determine attainment of the NAAQS for SO_2. In 1981 the D.C. Circuit issued an opinion in *PPG Industries, Inc.* v. *Costle*, 659 F.2d 1239 (D.C. Cir. 1981), which held that in rules implementing a national ambient air quality monitoring system USEPA could not change the NAAQS measurement method to running averages without meeting notice requirements of the Administrative Procedure Act.

From late 1985 to March 1986 USEPA conducted internal discussions concerning whether the long-standing use of block averages in SO_2 NAAQS implementation should be continued. As a result, on March 28, 1986, the Director of the Office of Air Quality Planning and Standards (OAQPS) issued a memo and supporting staff paper explaining the Agency's longstanding policy of accepting block averages and announcing that block averages were proper and would continue to be accepted. The memorandum also made it clear that in accordance with Section 116 of the Clean Air Act, States were free to submit plans to USEPA on the basis of either block or running averages.

In May 1988 the D.C. Circuit issued an opinion in *NRDC.* v. *Thomas*, 845 F.2d 1088 (D.C. Cir. 1988) dismissing NRDC's petition for review of the March 28, 1986, OAQPS memorandum. In that case, the D.C. Circuit stated that the status quo recognized in *PPG Industries* established that "block averages are a proper practice". 845 F.2d at 1094. Furthermore, the Court stated that USEPA must not act inconsistently with the D.C. Circuit's prior opinion in PPG Industries, which held that in order to require running averages, rulemaking would be necessary. 659 F.2d at 1250. Thus, contrary to NRDC's claims, USEPA's approval of Wisconsin's SIP submission based on block averages is appropriate and in accordance with law.

UARG's comments supported USEPA's approval of the Wisconsin submission. However, USEPA disagrees with UARG's contention that block averages are the only legal interpretation of the SO_2 NAAQS. As the OAQPS memorandum stated, the States are free, under Section 116 of the Clean Air Act, to provide more stringent requirements than USEPA. Also, the *NRDC* v. *Thomas* decision indicated that until rulemaking is conducted limiting the averaging method to one type or the other, USEPA should accept submissions from the States using either one.

Conclusion

USEPA reviewed NR 154.12(6)(a) and concluded that the emission limit of 3.28 lbs. of SO_2 per million BTU proposed for WEPCo's Valley Generating Station would attain and maintain the SO_2 NAAQS. In addition, USEPA concluded that the compliance schedule set forth in NR 154.12(6)(b) was consistent with USEPA policy and the Clean Air Act requirements. Therefore, on August 17, 1984 (49 FR 32865), USEPA published a rulemaking action proposing to approve Section NR 154.12(6). The comments received have not persuaded USEPA to change its position. Thus, USEPA is taking final action to approve this revision to the Wisconsin SIP.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 6, 1989. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

F. Henry Habicht,

Acting Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Wisconsin

Title 40 of the Code of Federal Regulations, Chapter I, Part 52 is amended as follows:

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

2. Section 52.2570 is amended by adding paragraph (c)(38) to read as follows:

§ 52.2570 Identification of plan.

* * * * *

(c) * * *

(38) On January 23, 1984, the Wisconsin Department of Natural Resources (WDNR) submitted SO_2 emission limits for large electric utility sources located in the City of Milwaukee, Milwaukee County, Wisconsin.

WDNR recodified the rule and on October 23, 1987, submitted it as recodified.

(i) Incorporation by reference.

(A) Wisconsin Administrative Code, Natural Resources (NR) 418.04 as found at (Wisconsin) Register, September 1986, No. 369, effective October 1, 1986.

[FRL-3641-2]

Land Disposal Restrictions; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; correction.

SUMMARY: On August 17, 1988, EPA published regulations promulgating the congressionally-mandated prohibitions on land disposal of certain hazardous wastes listed in 40 CFR 268.10 (First Third wastes). On May 2, 1989, EPA published a rule amending certain of the "No Land Disposal" standards promulgated in the First Third final rule. This notice corrects errors and clarifies the language in the preamble and regulations of the August 17, 1988 final rule, and makes several corrections required by the May 2, 1989 rule.

EFFECTIVE DATE: This rule is effective on September 6, 1989.

ADDRESSES: The OSW docket is located at the following address, and is open from 9:30 to 3:30, Monday through Friday, excluding Federal holidays: EPA RCRA Docket (M–2427)(OS–305), 401 M Street, SW., Washington, DC 20460.

The public must make an appointment by calling (202) 475–9327 to review docket materials. Refer to Docket numbers F–88 LDR9–FFFFF and F–89–LD10–FFFFF when making appointments to review any background documentation for this rulemaking. The public may copy a maximum of 50 pages of material from any one regulatory docket at no cost; additional copies cost $0.20 per page. Copies of not easily obtainable references are available for viewing and copying only in the OSW docket.

FOR FURTHER INFORMATION CONTACT: The RCRA Hotline, Office of Solid Waste (OS–305), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (800) 424–9346 (toll-free) or (202) 382–3000 in the Washington, DC metropolitan area. For technical information contact Wanda LeBleu, Office of Solid Waste (OS–333), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 382–7392.

SUPPLEMENTARY INFORMATION:

I. Reasons and Basis for Today's Amendment

The Agency's on-going review of the clarity and accuracy of the existing hazardous waste regulations has resulted in the need to make a number of corrections and clarifications in today's rule.

Any correspondence regarding these corrections and clarifications should be sent to Wanda LeBleu at the address shown in the "**FOR FURTHER INFORMATION CONTACT**" section of this notice.

II. Summary of Clarifications and Corrections to the First Thirds Final Rule

1. In the preamble to the final rule (53 FR 31144), third column, fourth line from the top, "provisions of § 268.8." is a typographical error and in today's notice it is corrected to read "prohibitions of § 268.33(f).".

2. Certain issues have arisen regarding the use of a cost test to satisfy the requirement applicable to soft hammer wastes to utilize the best treatment practically available as an alternative to landfill or surface impoundment disposal. RCRA section 3004(g)(6). EPA interpreted this requirement to mandate use of practically available treatment that provides the greatest environmental benefit. Section 268.8(a)(1). In assessing whether treatment is practically available, EPA stated that considerations of cost could be considered, and offered by way of guidance a particular cost ratio (if treatment costs are double or more than the cost of disposal). 53 FR 31182. EPA reemphasizes here, however, as it did in the preamble to the August 17, 1988 rule, that this cost ratio is not a binding rule and therefore does not automatically mean that treatment that costs double the cost of current disposal is not practically available. *Id.* Nor are cost considerations the only ones that are relevant. Other factors that EPA considers are technical feasibility, previous practices of the generator submitting the demonstration and certification, that entity's size and financial status, and other case-specific considerations. *Id.* at 31182–83; *see also* Letter of J. Winston Porter, Assistant Administrator of the Office of Solid Waste and Emergency Response to the Regional Administrators, October 19, 1988 (also detailing that the cost ratio is only one of a number of factors that the Agency will consider).

3. In both the preamble to the final rule (53 FR 31171) and in § 268.43(a), EPA set treatment standards for hazardous waste number K101 wastewaters and low arsenic nonwastewaters, and for K102 wastewaters and low arsenic nonwastewaters. K101 and K102 high arsenic nonwastewaters have no promulgated treatment standards and are prohibited from landfill and surface impoundment disposal under the soft hammer provisions. Section 268.33(a) lists only those wastes for which treatment standards have been promulgated and, therefore, only K101 wastewaters and low arsenic nonwastewaters and K102 wastewaters and low arsenic nonwastewaters should be included in § 268.33(a). Today's notice corrects these errors.

4. On May 2, 1989, EPA amended the treatment standards for a number of First Third nonwastewaters for which the promulgated treatment standard was no land disposal. 54 FR 18836. The no land disposal standard applies only to wastes generated from the process described in the waste's listing description and disposed after August 17, 1988. EPA rescheduled all other forms of these wastes to the Third Third. *Id.* EPA, however, omitted to cross-reference these revisions in section 268.33(a), the regulation codifying First Third waste prohibitions. Today's correction adds this crossreference.

In addition, EPA rescheduled all K015 and K083 nonwastewaters to the Third Third as part of the May 2, 1989 notice. EPA is thus removing these wastecodes from § 268.33(a).

5. In the preamble to the final rule (53 FR 31145 and 31186), the Agency stated that First Third wastes for which treatment standards or effective dates have not been promulgated, as well as national capacity variance wastes, that are disposed of in a landfill or surface impoundment, must be disposed of in a landfill or surface impoundment unit (as opposed to facility) that is in compliance with the minimum technological requirements of RCRA Section 3004(o). This interpretation of minimum technological requirements was recently upheld in *Mobil Oil* v. *EPA*, 871 F. 2d 149 (D.C. Cir. 1989). In § 268.5(h)(2), the Agency stated that these restricted wastes must be disposed of in a landfill or surface impoundment unit that meets the minimum technological requirements of parts 264 and 265. The Agency intended that the language of § 268.5(h)(2) apply to all existing landfill and surface impoundment units as well as new, replacement, and lateral expansion units. However, § 268.5(h)(2) (i) and (ii) refer to § 265.301 and § 264.301, respectively, which apply only to new, replacement, and lateral expansion units. Thus, § 268.5(h)(2) can improperly be construed as not applying to existing units. Today's notice clarifies this issue by modifying § 268.5(h)(2) to specify that all landfill and surface impoundment units where these wastes are disposed are within the scope of that section.

6. In the preamble to the final rule (53 FR 31200), the Agency inadvertently stated that commenters and applicants

for site-specific treatability variances should write to the Assistant Administrator for the Office of Solid Waste and Emergency Response. These commenters and applicants should send their materials to the Administrator, or his delegated representative. Today's notice corrects this error.

7. EPA included in the proposed and final regulations an extended discussion of the meaning and ramifications of the respective terms "restricted" and "prohibited" hazardous wastes (53 FR 17620 (May 17, 1988) and 53 FR 31208–09 (August 17, 1988)). This discussion was essentially accurate, but contains several features requiring further clarification. In some cases, clarifying rule changes are necessary to match the preamble language.

In the preamble (53 FR 31208), EPA indicated that restricted wastes are those that are prohibited from land disposal by either statute or regulation, "regardless of whether subcategories of such wastes are subject to a § 268.5 extension, § 268.6 'no migration' exemption, or national capacity variance, any of which makes them currently eligible for land disposal." EPA did not intend to imply that these three enumerated circumstances are the only ones to consider in determining whether a waste is "restricted." Thus, the correct formulation is that any hazardous waste that is exempt from a prohibition on some form of land disposal, but nevertheless subject to at least one type of prohibition, is still "restricted." An example not mentioned in the preamble is a waste going to an underground injection well if such a waste is prohibited from one or more other methods of land disposal. Another example is a soft hammer waste, which is prohibited under § 268.8 from disposal in some landfills and impoundments, but not prohibited from other methods of land disposal (e.g., land treatment units). EPA is consequently amending this paragraph of the preamble to make this point more clear.

EPA, however, has never intended to regulate certain wastes under the land disposal restriction program, even though the August 17, 1988 preamble technically characterized such wastes as "restricted" hazardous wastes. These wastes are farmers' wastes being disposed of on a farmer's own land, conditionally exempt small quantity generator wastes, and newly listed or identified wastes for which EPA has not promulgated a regulatory land disposal prohibition within six months of the final rule identifying or listing the waste. The regulations are already clear that conditionally exempt small quantity generator wastes and certain farmer wastes are not subject to any provisions of part 268 (see § 261.5 (b), (c), (e), (f), and (g), and § 262.70), and EPA has certainly never suggested that newly identified or listed wastes become subject to part 268 requirements until EPA promulgates regulations prohibiting such wastes from land disposal. EPA is adding clarifying regulatory language today to make this point absolutely clear.

EPA also suggested in the preamble that restricted wastes would invariably be subject to the prohibitions on storage and on dilution (53 FR 31209). Although generally true, this overstates the case for certain wastes that are not subject to or are exempt from a land disposal prohibition, and that are actually disposed using a method allowed by the regulations or statute. Examples are soft hammer wastes not destined for landfill or impoundment disposal, or wastes subject to national capacity variances. As written, both the preamble discussion and the regulations subject these wastes to the dilution and storage prohibitions (through the use of the term "restricted" in section 268.3 and the broad introductory language in § 268.50(a) and a limited number of exceptions in § 268.50(d)). This was not EPA's intent. The general principle is that the dilution and storage prohibitions apply only if the waste is disposed by a prohibited method of land disposal. There is no reason to prohibit dilution or storage if the waste can be land disposed by a method that is not prohibited. For example, conditionally exempt small quantity generator wastes (as defined by § 261.5) can be diluted or stored for any length of time before being land disposed, because such wastes are not subject to the land disposal prohibitions. The Agency is consequently using this opportunity to clarify the preamble language regarding § 268.3 and correcting the language of § 268.50 to be consistent with this overall principle. (EPA does not believe that the regulatory language of § 268.3 requires any change, because that provision is written essentially in terms of a person's diluting as a means of avoiding a prohibition—which language applies only if there is a prohibition to be avoided. The regulatory language in § 268.3 continues to apply provided it is interpreted in accord with the above paragraph and the paragraph that follows.)

EPA cautions, however, that if a person dilutes a restricted waste which is not subject to a land disposal prohibition when diluted but which becomes subject to a land disposal prohibition before it is land disposed, the § 268.3 dilution prohibition could apply. For example, if generator A dilutes a national capacity variance waste before the expiration of the variance but disposes of it after the variance expires, EPA may consider the dilution to have been for the purpose of avoiding a prohibition and therefore impermissible. The following chart summarizes which restricted wastes are subject to the dilution prohibition and the storage prohibition. It also clarifies which restricted wastes are subject to the waste analysis and tracking requirements.

Waste	Waste analysis and tracking (§ 268.7)	Dilution (§ 268.3)	Storage (§ 268.50)
National capacity variance (Subpart C)	YES	NO*	NO
Case-by-case extension (§ 268.5)	YES	NO*	NO
No migration exemption (§ 268.6)	YES	NO*	NO
Soft hammer wastes:			
a. disposed in landfill or impoundment	YES	YES	NO
b. disposed by another method	YES	NO*	NO
Wastes injected underground where there is a treatment standard applicable to one or more other methods of land disposal	YES	NO*	NO
Wastes treated in § 268.4 impoundments	YES	YES	YES
Conditionally Exempt Small Quantity Generator wastes (§ 261.5)	NO	NO	NO
Farmer disposing on own land (§ 262.70)	NO	NO	NO
Newly identified or listed wastes for which EPA has not promulgated a treatment standard	NO	NO	NO
Wastes that meet all applicable treatment standards and prohibition levels	YES	NO	NO

YES=subject to regulatory requirement; NO=not subject.

* These wastes are not subject to the dilution prohibition in § 268.3 if they are disposed using a permissible method of land disposal during the period of the variance, extension, or exemption.

---

8. EPA stated in the preamble to the final regulation that "soft hammer" wastes (*i.e.*, First Third or Second Third wastes for which treatment standards are not established by August 8, 1988 and June 8, 1989, respectively) that are not being disposed in landfills or surface impoundments remain subject to the tracking requirements in § 268.7 (53 FR 31209)). EPA had also indicated at proposal that § 268.7 would apply to all soft hammer wastes (53 FR 11765, April 8, 1988). A tracking requirement is necessary for these wastes in order to provide a consistent method of tracking all restricted wastes, and to inform facilities receiving the wastes of other applicable regulatory requirements (*id.*).

The regulatory language codifying these statements, however, could be read as applying only to soft hammer wastes that are destined for disposal in landfills and surface impoundments. See § 268.7(a)(4). This is because § 268.7(a)(4) cross-references § 268.33(f), which in turn cross-references § 268.8, both of which can be read to apply only to soft hammer wastes intended for landfill and surface impoundment disposal. In order to ensure that the regulations more clearly reflect EPA's intent that tracking is required for all soft hammer wastes (as proposed and as discussed in the final preamble), EPA is amending § 268.7(a)(4) to make this requirement clear.

9. Section 268.7(b)(6) of the regulations was added as part of the First Third rule to clarify the certification and notification obligations of a treatment, storage, or disposal facility that sends its prohibited wastes to another treatment facility or storage facility rather than to a land disposal facility. Today's notice reiterates that § 268.7(b)(6) does not relieve treatment facilities of their testing obligations, which are set out in the introductory paragraph of § 268.7(b). Thus, they must continue to test at the frequency specified in their waste analysis plan.

10. A number of commenters found § 268.8 to be confusing; this probably was due to the fact that the provisions covering the certification/demonstration requirements were spread out in several regulatory paragraphs. Today's notice rearranges § 268.8 to consolidate these requirements.

11. In the preamble to the final rule (53 FR 31185), EPA stated that the owner or operator of a TRSF (treatment, recovery, or storage facility) must, only for the initial shipment of a soft hammer waste, send a copy of the generator's demonstration and certification and the TRSF's certification (if applicable) to the disposal facility receiving the waste or treatment residues. Subsequent shipments generally require only the certifications. Section 268.8(c)(2) does not explicitly state this point. Today's notice revises § 268.8(c)(2) to state that the demonstration requirements only apply to the initial shipment of a soft hammer waste.

However, it should be noted that if there are any changes in the conditions that formed the basis of the demonstration and certification(s), the generator must notify the Regional Administrator of the changes (see § 268.8(b)(1)). EPA indicated in the preamble that the generator would also have to prepare a new demonstration and certification to account for these changed circumstances (52 FR 31185). The TRSF must send this new demonstration, along with the applicable certifications, to the receiving facility along with the initial shipment of the waste after the change in circumstances.

12. In § 268.8(d) of the final rule, "under § 263.33(f)" is a typographical error and should read "under § 268.33(f)". Today's notice corrects this error.

13. In the preamble to the final rule (53 FR 31145), wastewaters are defined as wastes that contain less than 1% total organic carbon (TOC) and less than 1% total suspended solids (TSS). The preamble then goes on to use the terms TSS and total filterable solids interchangeably. These terms are not necessarily the same. TSS corresponds to a test method called the Non-filterable Residues Test (Method No. 160.2, Methods for Chemical Analysis of Water and Wastes, EPA–600/4–79–020, March, 1983). The term filterable solids refers to a different test method called the Filterable Residues Test. The Agency intended the use of only TSS (and the Non-filterable Residues Test) to determine whether a waste is a wastewater. Today's notice clarifies this ambiguity in the preamble. Section 268.12(b) of the final rule refers only to TSS and does not need to be changed.

14. In § 268.32(f) of the final rule, "if such disposal" is a typographical error and should read "if such unit". Today's notice corrects this error.

15. In the final rule (53 FR 31217), second column, in § 268.33(f), "of this part are not applicable," and "or surface impoundment unless the wastes are the subject of a valid demonstration and certification pursuant to § 268.8." have typographical errors and should read "of this part have not been promulgated," and "or surface impoundment unless a demonstration and certification has been submitted pursuant to § 268.8.", respectively. Today's notice corrects these errors.

16. Section 268.6(f)(1) indicates that a consequence of detecting migration of hazardous constituents at a unit which has received a no migration variance is that receipt of "restricted" waste at the unit must be suspended. The reference to "restricted" wastes is erroneous, and EPA intended the slightly less broad term "prohibited" waste. (*See* § 268.6(f)(3), a parallel provision, where EPA used the correct term "prohibited".) Use of the term "restricted" would, for example, prevent the unit from receiving treated soft hammer wastes or wastes that are subject to a type of capacity variance. The Agency did not intend to impose such requirements and is therefore correcting the error.

17. EPA amended § 266.20 to provide that materials that are recycled by being used in a manner constituting disposal would be exempt from subtitle C regulation only if they meet the treatment standards for every prohibited hazardous waste that they contain. 53 FR 31212 and 53 FR 31197–98 (preamble). EPA also stated that fertilizers produced from waste K061 continued to be exempt from subtitle C regulation. *Id.*

In codifying these provisions, however, EPA inadvertently deleted the final sentence of the pre-existing § 266.20, which provided that "[c]ommercial fertilizers produced for the general public's use that use recycled materials also are not presently subject to regulation." It is clear from the preamble (cited above) that the result EPA intended was for all such fertilizers (except those produced from waste K061 and not containing any other hazardous waste) to remain exempt from subtitle C regulation provided that they meet applicable treatment standards for every hazardous waste that they contain. In other words, such fertilizers would be subject to the same regulatory requirements as all other prohibited wastes being used in a manner constituting disposal. EPA consequently is correcting the regulatory language to achieve this result.

EPA also notes that commercial fertilizers that are produced from waste K061 are not subject to the tracking requirements in § 268.7(b)(8) for other wastes that are used in a manner

BEST COPY AVAILABLE

constituting disposal. EPA meant the reference in § 268.7(b)(8)—"subject to the provisions of § 266.20(b)"—to refer to wastes that are subject to substantive provisions of § 266.20(b), namely those required to meet substantive treatment standards. EPA is amending § 268.7(b)(8) to state that the tracking provision applies to wastes used in a manner constituting disposal that must meet treatment standards.

EPA also is adding a conforming subparagraph (4) to § 268.7(c) to cross-reference the determination that users of waste-derived products used in a manner constituting disposal are not subject to § 268.7 with respect to these wastes (and assuming the wastes meet all applicable treatment standards). See 53 FR 31198, August 17, 1988.

EPA also is changing the inaccurate parenthetical reference in § 266.20(b) to "hazardous waste constituent" as synonymous to "recyclable material" to the correct "hazardous waste." See § 261.6(a).

18. In § 268.33(g) of the final regulation, EPA indicated, incorrectly, that initial generators could determine whether they are in compliance with applicable first third treatment standards only by testing their waste. In fact, EPA's rules have stated since the inception of the land disposal prohibition program that generators also have the option of determining if the waste meets a treatment standard based on their own knowledge of the waste. Section 268.7(a). EPA is correcting § 268.33(g) to include this option, and to correct the unintended inconsistency with § 268.7(a). (Of course, a generator who also treats is subject to the testing requirements of § 268.7(b).)

III. Rationale for Immediate Effective Date

Today's notice does not create any new regulatory requirements. Rather, it restates and clarifies existing requirements by correcting a number of errors in the August 17, 1988 final rule (53 FR 31138) and the May 2, 1989 rule (54 FR 18836). For these reasons, EPA finds that good cause exists under section 3010(b)(3) of RCRA, 42 U.S.C. 9903(b)(3), to provide for an immediate effective date. In addition, there already was full opportunity to comment on all of these issues during the rulemaking so that further comment is unnecessary. For the same reasons, EPA finds that there is good cause under 5 U.S.C. 553(b)(3)(B) to promulgate today's corrections in final form and that there is good cause under 5 U.S.C. 533(d)(3) to waive the requirement that regulations be published at least 30 days before they become effective.

Finally, EPA notes that although it is not withdrawing any existing regulatory language, all of today's revisions operate prospectively.

IV. Regulatory Impact Analysis

Under Executive Order 12291, EPA must judge whether a regulation is "major" and, therefore, subject to the requirement of a Regulatory Impact Analysis. Due to the nature of this regulation (technical correction), the amendment is not "major"; therefore, no Regulatory Impact Analysis is required.

List of Subjects

40 CFR Part 148

Environmental protection, Hazardous materials, Imports, Insurance, Labeling, Packaging and containers, Recycling, Security measures, Surety bonds, Waste treatment and disposal.

40 CFR Part 268

Hazardous waste, Reporting and recordkeeping requirements.

Dated: August 29, 1989.

Jonathan Z. Cannon,

Acting Assistant Administrator for Solid Waste and Emergency Response.

The following corrections are made in the preamble to SWH-FRL-3420-4, the Hazardous Waste Management System; Land Disposal Restrictions; Final Rule, published in the Federal Register on August 17, 1988 (53 FR 31138):

1. On page 31144, third column, fourth line from the top, "provisions of § 268.6.", should read "prohibitions of § 268.33(f).".

2. On page 31145, third column, 21st line from the top, "(*i.e.*, total filterable solids)" should read "(TSS)".

3. On page 31145, third column, second paragraph, fifth line, "filterable solids content (*i.e.*, total suspended solids (TSS) levels)," should read "TSS levels".

4. On page 31145, third column, second paragraph, eighth line and 14th line, "filterable solids" should read "suspended solids".

5. On page 31145, third column, second paragraph, 11th line, "filtered solids" should read "suspended solids".

6. On page 31200, second column, 14th line from the bottom, "Assistant Administrator for the Office of Solid Waste and Emergency Response" should read "Administrator, or his designated representative,".

7. On page 31200, second column, 3rd line from the bottom, and third column, 7th line from the top, "Assistant Administrator (or Regional Administrator, if authority is delegated)" should read "Administrator, or his designated representative,".

8. On page 31208, third column, the second paragraph should read as follows:

> "Restricted" wastes are those categories of hazardous wastes that are prohibited from one or more methods of land disposal either by regulation or statute (regardless of whether subcategories of such wastes are subject to a § 268.5 extension, § 268.6 "no migration" exemption, or any other exemption, any of which makes them currently eligible for one or more methods of land disposal). In other words, a hazardous waste is "restricted" no later than the date of the first automatic prohibition established in, or pursuant to, RCRA section 3004 (d), (e), (f), or (g).

The following corrections are made in the rules for SWH-FRL-3420-4, the Hazardous Waste Management System; Land Disposal Restrictions; Final Rule, published in the Federal Register on August 17, 1988 (53 FR 31138):

§ 266.20 [Corrected]

9. On page 31212, first column, § 266.20(b) is revised to read as follows:

(b) Products produced for the general public's use that are used in a manner that constitutes disposal and that contain recyclable materials are not presently subject to regulation if the recyclable materials have undergone a chemical reaction in the course of producing the products so as to become inseparable by physical means and if such products meet the applicable treatment standards in Subpart D of Part 268 (or applicable prohibition levels in § 268.32 or RCRA section 3004(d), where no treatment standards have been established) for each recyclable material (*i.e.*, hazardous waste) that they contain. Commercial fertilizers that are produced for the general public's use that contain recyclable materials also are not presently subject to regulation provided they meet these same treatment standards or prohibition levels for each recyclable material that they contain. However, zinc-containing fertilizers using hazardous waste K061 that are produced for the general public's use are not presently subject to regulation."

§ 268.1 [Corrected]

10. In § 268.1(c), the introductory text is revised by changing "prohibited" to "restricted", §§ 268.1(c)(3) and 268.1(c)(4) are removed, and a new § 268.1(e) is added to read as follows:

(e) The following hazardous wastes are not subject to any provision of part 268:

(1) Waste generated by small quantity generators of less than 100 kilograms of non-acute hazardous waste or less than 1 kilogram of acute hazardous waste per month, as defined in § 261.5 of this chapter;

(2) Waste pesticides that a farmer disposes of pursuant to § 262.70;

(3) Wastes identified or listed as hazardous after November 8, 1984 for which EPA has not promulgated land disposal prohibitions or treatment standards.

§ 268.5 [Corrected]

11. On page 31213, third column, § 268.5(h)(2) is revised to read as follows:

(h) * * *

(2) Such hazardous waste may be disposed in a landfill or surface impoundment only if such unit is in compliance with the technical requirements of the following provisions regardless of whether such unit is existing, new, or a replacement or lateral expansion.

§ 268.6 [Corrected]

12. On page 31213, second column, § 268.6(f)(1) is revised to read as follows: "(1) Immediately suspend receipt of prohibited waste at the unit, and".

§ 268.7 [Corrected]

13. On page 31213, third column, § 268.7(a)(3) is revised to read as follows:

(a) * * *

(3) If a generator's waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under § 268.5, an exemption under § 268.6, or a nationwide capacity variance under subpart C), with each shipment of waste he must submit a notice to the facility receiving his waste stating that the waste is not prohibited from land disposal. The notice must include the following information:

* * * * *

§ 268.7 [Corrected]

14. On page 31214, first column, § 268.7(a)(4) is revised to read as follows:

(a) * * *

(4) If a generator determines that he is managing a waste that is subject to the prohibitions under § 268.33(f) (including wastes that are disposed of in disposal units other than landfills or surface impoundments) and is not subject to the prohibitions set forth in § 268.32 of this part, with each shipment of waste the generator must notify the treatment, storage or disposal facility, in writing, of any applicable prohibitions set forth in § 268.33(f). The notice must include the following information:

* * * * *

§ 268.7 [Corrected]

15. On page 31214, second column, the first sentence of § 268.7(b)(8) is revised to read as follows: "Where the wastes are recyclable materials used in a manner constituting disposal subject to the provisions of § 266.20(b) regarding treatment standards and prohibition levels, the owner or operator of a treatment facility (*i.e.*, the recycler) is not required to notify the receiving facility, pursuant to paragraph (b)(4) of this section."

§ 268.7 [Corrected]

16. On page 31214, third column, the following paragraph (c)(4) is added:

(c) * * *

(4) Where the owner or operator is disposing of any waste that is a recyclable material used in a manner constituting disposal subject to the provisions of § 266.20(b), the owner or operator is not subject to paragraphs (c)(1)–(3) of this section with respect to such waste.

§ 268.8 [Corrected]

17. On page 31214, third column, and page 31215, first and second columns, § 268.8(a) is revised to read as follows:

(a) * * *

(2) If a generator determines that there is no practically available treatment for his waste, he must fulfill the following specific requirements:

(i) Prior to the initial shipment of waste, the generator must submit a demonstration to the Regional Administrator that includes: a list of facilities and facility officials contacted, addresses, telephone numbers, and contact dates, as well as a written discussion of why he was not able to obtain treatment or recovery for that waste. The generator must also provide to the Regional Administrator the following certification:

> I certify under penalty of law that the requirements of 40 CFR 268.8(a)(1) have been met and that disposal in a landfill or surface impoundment is the only practical alternative to treatment currently available. I believe that the information submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

The generator does not need to wait for Regional Administrator approval of the demonstration/certification before shipment of the waste. However, if the Regional Administrator invalidates the demonstration/certification for the reasons outlined in § 268.8(b)(2), the generator must immediately cease further shipments of the waste, and immediately inform all facilities that received the waste of such invalidation, and keep records of such communication on-site in his files.

(ii) With the initial shipment of waste, the generator must submit a copy of the demonstration and the certification discussed above in § 268.8(a)(2)(i) to the receiving facility. With each subsequent waste shipment, only the certification is required to be submitted provided that the conditions being certified remain unchanged. Such a generator must retain on-site a copy of the demonstration (if applicable) and certification required for each waste shipment for at least five years from the date that the waste that is the subject of such documentation was last sent to on-site or off-site disposal. The five-year record retention requirement is automatically extended during the course of any unresolved enforcement action regarding the regulated activity or as requested by the Administrator.

(3) If a generator determines that there are practically available treatments for his waste, he must contract to use the practically available technology that yields the greatest environmental benefit. He must also fulfill the following specific requirements:

(i) The generator must submit to the Regional Administrator, prior to the initial shipment of waste, a demonstration that includes: a list of facilities and facility officials contacted, addresses, telephone numbers, and contact dates, as well as a written discussion explaining why the treatment or recovery technology chosen provides the greatest environmental benefit. The generator must also provide to the Regional Administrator the following certification:

> I certify under penalty of law that the requirements of 40 CFR 268.8(a)(1) have been met and that I have contracted to treat my waste (or otherwise provide treatment) by the practically available technology which yields the greatest environmental benefit, as indicated in my demonstration. I believe that the information submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

The generator does not need to wait for Regional Administrator approval of the demonstration/certification before shipment of the waste.

(ii) With the initial shipment of waste, the generator must submit to the receiving facility a copy of the demonstration and the certification discussed above in § 268.8(a)(3)(i). With each subsequent waste shipment, only the certification is required to be submitted provided that the conditions being certified remain unchanged. Such a generator must retain on-site a copy of the demonstration (if applicable) and certification required for each waste shipment for at least five years from the date that the waste that is the subject of such documentation was last sent to on-site or off-site disposal. The five-year record retention requirement is automatically extended during the course of any unresolved enforcement action regarding the regulated activity or as requested by the Administrator.

§ 268.8 [Corrected]

18. On page 31215, second column, § 268.8(b)(1) is revised by adding the following language before the period at the end of the sentence: ", and submit a new demonstration and certification as provided in § 268.8(a) to the receiving facility."

* * * * *

§ 268.8 [Corrected]

19. On page 31215, third column, first paragraph, § 268.8(c)(2) should read:

(c)(2) The owner or operator of a treatment, recovery or storage facility must, for each initial shipment of waste, send a copy of the generator's demonstration (if applicable) and certification under § 268.8(a)(2)(i) or § 268.8(a)(3)(i) and certification under § 268.8(c)(1) (if applicable) to the facility receiving the waste or treatment residues. With each subsequent waste shipment, only the certification is required to be submitted provided that the conditions being certified remain unchanged.

§ 268.8 [Corrected]

20. On page 31215, third column, second paragraph, § 268.8(d), "prohibited under § 263.33(f)" should be changed to read "prohibited under § 268.33(f)."

§ 268.32 [Corrected]

21. On page 31216, third column, in § 268.32(f), "such disposal" should be changed to "such unit."

§ 268.33 [Corrected]

22. On page 31217, first column, in § 268.33(a), "K004 (nonwastewater)" should read "K004 wastes specified in § 268.43(a)."

23. On page 31217, first column, in § 268.33(a), "K008 (nonwastewaters)" should read "K008 wastes specified in § 268.43(a)."

24. On page 31217, first column, in § 268.33(a), "K015 wastewaters" should be removed.

25. On page 31217, first column, in § 268.33(a), "K021 (nonwastewater)" should read "K021 wastes specified in § 268.43(a)."

26. On page 31217, first column, in § 268.33(a), "K025" should read "K025 nonwastewaters specified in § 268.43(a)."

27. On page 31217, first column, in § 268.33(a), "K083 (nonwastewaters)" should be removed.

28. On page 31217, first column, in § 268.33(a), "K100" should read "K100 nonwastewaters specified in § 268.43(a)."

29. On page 31217, first column, in § 268.33(a), "K101" should read "K101 (wastewater), K101 (nonwastewater, low arsenic subcategory—less than 1% total arsenic)."

30. On page 31217, first column, in § 268.33(a), "K102" should read "K102 (wastewater), K102 (nonwastewater, low arsenic subcategory—less than 1% total arsenic)."

§ 268.33 [Corrected]

31. On page 31217, second column, in § 268.33(f), "are not applicable" is revised to read "have not been promulgated,"; and "unless the wastes are the subject of a valid demonstration and certification pursuant" is revised to read "unless a demonstration and certification have been submitted."

§ 268.33 [Corrected]

32. On page 31217, second column, in § 268.33(g), "extract of the waste" should read "extract of the waste, or the generator may use knowledge of the waste."

§ 268.44 [Corrected]

33. On page 31221, second column, second paragraph, in § 268.44(h), "facility may apply to the Assistant Administrator of the Office of Solid Waste and Emergency Response, or his delegated representative," should read "facility may apply to the Administrator, or his delegated representative,".

§ 268.50 [Corrected]

34. On page 31221, third column, § 268.50(d) is revised to read as follows:

(d) If a generator's waste is exempt from a prohibition on the type of land disposal utilized for the waste (for example, because of an approved case-by-case extension under § 268.5, an approved § 268.6 petition, or a national capacity variance under subpart C), the prohibition in paragraph (a) of this section does not apply during the period of such exemption.

40 CFR Part 271

[FRL-3636-1]

North Carolina; Recommencement of Proceedings to Determine Whether To Withdraw Hazardous Waste Program Approval

AGENCY: Environmental Protection Agency.

ACTION: Notice of continuation of hearing to determine whether to withdraw hazardous waste program approval.

SUMMARY: On April 20, 1989 (54 FR 15940), EPA issued a Notice of its intent to hold a hearing to determine whether to withdraw hazardous waste approval of North Carolina's Hazardous Waste Program. A hearing was held during July 18–21, 1989 and July 24–28, 1989, in Raleigh, North Carolina. On August 23, 1989, the presiding Administrative Law Judge provided notice that the hearing would continue beginning Monday, September 18, 1989, at the Radisson Plaza Hotel, 420 Fayetteville Street, Raleigh, North Carolina.

DATES: These proceedings will continue beginning September 18, 1989. A block of rooms has been reserved for those persons needing overnight lodging through September 29, 1989. Reservations must be made by September 8, 1989, at the location listed below. Tenants are responsible for costs involving overnight stay.

ADDRESS: Radisson Plaza Hotel, 420 Fayetteville Street Mall, Raleigh, North Carolina 27601.

FOR FURTHER INFORMATION CONTACT: Otis Johnson, Jr., Chief, Waste Planning Section, RCRA Branch, Region IV, 345 Courtland Street NE., Atlanta, Georgia 30365.

Lee A. DeHihns, III,

Acting Regional Administrator.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6744

[CA-940-09-4214-10; CA 24903]

Partial Revocation of Public Land Order No. 2729; California

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes a public land order insofar as it affects 80.79 acres of public land withdrawn for use of the Bureau of Reclamation in connection with the Central Valley Reclamation Project. This action will open the land to allow the sale of the Federally reserved minerals underlying privately owned lands to the surface owner.

EFFECTIVE DATE: October 6, 1989.

FOR FURTHER INFORMATION CONTACT: Judy Bowers, BLM California State Office, Federal Office Building, 2800 Cottage Way, Sacramento, California 95825, 916-978-4820.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Public Land Order No. 2729 which withdrew land for the Central Valley Project, Nashville Unit, Consumnes River Division, is hereby revoked insofar as it affects the following described land:

Mount Diablo Meridian

T. 9 N., R.10 E., Sec. 25, lots 1 to 4 inclusive.

The area described contains 80.79 acres in El Dorado County.

2. At 10 a.m. on October 6, 1989, the land described in paragraph 1 shall be opened to the operation of Section 209 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2757; 43 U.S.C. 1719, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law.

Dated: August 28, 1989.

Frank A. Bracken,

Under Secretary of the Interior.

43 CFR Public Land Order 6745

[OR-943-09-4214-10; GP9-235; OR 39912]

Withdrawal of Public Land for U.S. Air Force Radar Transmitter Site; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order withdraws 2,622 acres of public land from surface entry and mining for 20 years to be used as a U.S. Air Force radar transmitter site. The land has been and remains open to mineral leasing.

EFFECTIVE DATE: September 6, 1989.

FOR FURTHER INFORMATION CONTACT: Champ Vaughan, BLM, Oregon State Office, P.O. Box 2965, Portland, Oregon 97208, 503-231-6905.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Subject to valid existing rights, the following described public land is hereby withdrawn from settlement, sale, location, or entry under the general lands laws, including the United States mining laws (30 U.S.C. ch. 2), but not from leasing under the mineral leasing laws, and reserved for use by the Department of the Air Force in connection with the Over-the-Horizon Backscatter West Coast Transmitter Site:

Willamette Meridian

A parcel of land situated in secs. 19, 30, 31, and 32, T. 26 S., R. 20 E., and sec. 6, T. 27 S., R. 20 E., described as follows:

Commencing at the southwest corner of said section 31; thence N. 0°50′01″ E. along the west line of said section 4,682.15 feet to the Point of Beginning; thence continuing along said line N. 0°50′01″ E., 18.26 feet; thence N. 67°22′48″ E., 5,402.59 feet; thence N. 54°09′10″ W., 4,023.04 feet; thence N. 35°51′06″ E., 6,213.18 feet; thence S. 54°09′28″ E., 6,100.18 feet; thence S. 35°50′47″ W., 6,213.99 feet; thence S. 22°36′50″ E., 2,985.54 feet; thence S. 78°51′00″ E., 5,087.51 feet; thence S. 11°09′00″ W., 6,499.77 feet; thence N. 78°50′00″ W., 6,122.13 feet; thence N. 11°08′47″ E., 4,055.50 feet; thence S. 67°22′48″ W., 4,277.00 feet; thence N. 22°37′12″ W., 6,196.46 feet to the Point of Beginning.

The area described contains approximately 2,622 acres in Lake County.

2. This withdrawal will expire 20 years from the effective date of this order unless, as a result of a review conducted before the expiration date pursuant to section 204(f) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714(f), the Secretary of the Interior determines that the withdrawal shall be extended.

3. If the site is abandoned, or the withdrawal is relinquished or expires without being extended, all structures and facilities shall be timely removed and the land shall be restored to the satisfaction of the Secretary of the Interior, in consultation with the head of the holding agency. In the event the withdrawal expires without being extended, the holding agency shall undertake no activities on the land except in connection with decontamination, restoration, and the removal of structures and facilities.

Dated: August 28, 1989.

Frank A. Bracken,

Under Secretary of the Interior.

43 CFR Public Land Order 6746

[AK-932-09-4214-10; AA-721]

Partial Revocation of Air Navigation Site No. 157, Iliamna, for Selection of Land by the State of Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes a Departmental Order insofar as it affects 4.77 acres of public land withdrawn for Air Navigation Site No. 157, at Iliamna, Alaska. The land is no longer needed for the purpose for which it was withdrawn. This action will also open the land for selection by the State of Alaska, if such land is otherwise available. If the land is not selected by the State, this order opens the land to metalliferous mining. The land has been and will remain closed to nonmetalliferous mining and mineral leasing pursuant to Public Land Order No. 5180, as amended.

EFFECTIVE DATE: September 6, 1989.

FOR FURTHER INFORMATION CONTACT: Sandra C. Thomas, BLM Alaska State Office, 222 W. 7th Avenue, No. 13, Anchorage, Alaska 99513-7599, 907-271-3342.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, and by section 17(d)(1) of the Alaska Native Claims Settlement Act, 85 Stat. 708 and 709; 43 U.S.C. 1616(d)(1), it is ordered as follows:

1. The Departmental Order dated April 19, 1941, as amended, which

withdrew public land for Air Navigation Site No. 157 is hereby revoked insofar as it affects the following described land:

Iliamna, Alaska

Beginning at meander corner No. 4 of U.S. Survey 2944, proceed approximately N. 60° W., 925 feet, more or less, to the center of the approximately 12 ft. x 30 ft. concrete slab (formerly supporting a generator building), thence N. 5° W., 240 feet, more or less, to the centerline of the Iliamna Airport-Roadhouse Bay Road, to corner No. 1, the true point of beginning:

From corner No. 1 by metes and bounds,
N. 85° E., along the centerline of the Iliamna Airport-Roadhouse Bay Road, 267 feet, to corner No. 2;
S. 5° E., 390 feet, to corner No. 3;
S. 85° W., 533 feet, to corner No. 4;
N. 5° W., approximately 390 feet, to corner No. 5, a point on the centerline of the Iliamna Airport-Roadhouse Bay Road;
N. 85° E., 266 feet, to corner No. 1, the place of beginning.

The area described contains approximately 4.77 acres.

2. Subject to valid existing rights, the land described above is hereby opened to selection by the State of Alaska under either the Alaska Statehood Act of July 7, 1958, 72 Stat. 339, *et seq.*; 48 U.S.C. prec. 21, or section 906(b) of the Alaska National Interest Lands Conservation Act, 94 Stat. 2371, 2437–2438; 43 U.S.C. 1635.

3. As provided by section 6(g) of the Alaska Statehood Act, the State of Alaska is provided a preference right of selection for the land described above, for a period of ninety-one (91) days from the date of publication of this order, if the land is otherwise available. Any of the land described herein that is not selected by the State of Alaska will be subject to the terms and conditions of Public Land Order No. 5180, as amended, and any other withdrawal of record.

4. At 10 a.m. on December 6, 1989, the land will be opened to location and entry under the United States mining laws for metalliferous minerals, subject to valid existing rights, the provisions of existing withdrawals, and the requirement of applicable laws. Appropriation of any of the land described in this order under the general mining laws for metalliferous minerals prior to the date and the time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

Dated: August 22, 1989.

Frank A. Bracken,

Under Secretary of the Interior.

[CGD 76-080]

RIN 2115-AA11

Hopper Dredge Working Freeboard; Load Line and Stability Requirements

AGENCY: Coast Guard, DOT.

ACTION: Final Rule.

SUMMARY: The U.S. Coast Guard is amending the load line and stability regulations to allow self-propelled hopper dredges to obtain working freeboards. This rulemaking was initiated because of the interest of a segment of the dredging industry to load to a deeper draft (working freeboard) in order to carry more spoil per trip and this rule will allow the authorization of that carriage.

EFFECTIVE DATE: October 6, 1989.

ADDRESSES: 1. The comments and materials referenced in this rulemaking are available for examination and copying between 8 a.m. and 4 p.m., Monday through Friday, except holidays, at the Marine Safety Council (G-LRA-2), U.S. Coast Guard Headquarters, Room 3600, 2100 Second Street SW., Washington, DC 20593-0001.

2. A Final Regulatory Evaluation is available for inspection or copying as explained in the preceding paragraph or by contacting the person listed below under **FOR FURTHER INFORMATION CONTACT.** The Categorical Exclusion from the requirements of the National Environmental Policy Act (NEPA) is available for inspection and copying at the same address or from the same person.

FOR FURTHER INFORMATION CONTACT: Dr. J.S. Spencer, Marine Technical and Hazardous Materials Division. Office of Marine Safety, Security and Environmental Protection, (202) 267-2988.

SUPPLEMENTARY INFORMATION: On August 2, 1976, the Coast Guard published in the **Federal Register** (41 FR 32237) an Advance Notice of Proposed Rulemaking (ANPRM) to consider developing damage stability standards for hopper dredges which elicited several responses. On December 10, 1979, a Notice of Proposed Rulemaking (NPRM) was published in the **Federal Register** (44 FR 70791). On January 24, 1980, a Supplemental Notice of Proposed Rulemaking (SNPRM) was published (45 FR 5780) to insert some inadvertently omitted text. Eight comments were received after publication of the NPRM raising some additional technical questions. Because of the time elapsed since the NPRM and the reconstruction of the proposal due to the eight comments, the Coast Guard published a second SNPRM in the **Federal Register** (52 FR 47422 of December 14, 1987) for public comment. This SNPRM incorporated all but two of the comments received after publication of the NPRM and was a complete restatement of the proposed rules as changed by those comments. On February 22, 1988, the comment period was reopened and extended until March 23, 1988 (53 FR 5200).

Drafting Information.

The principal persons involved in drafting this document are Mr. William Hayden, Project Manager, Office of Marine Safety, Security and Environmental Protection, and Mr. Stanley Colby, Project Counsel, Office of the Chief Counsel.

Discussion of Comments and Changes Made

Ten letters commenting on the proposed regulations were received. Eight letters were received following the publication of the NPRM in 1979 and some of the major comments from those were discussed in the December 14, 1987, SNPRM. The two other letters were received following the publication of that SNPRM. Of the ten letters, seven were from organizations having direct involvement in the dredging industry. Six letters were received from civilian dredge operators, one from an unidentified company, one from the Army Corp of Engineers, one from the Maritime Administration and one from a Goast Guard field office.

Several commenters questioned whether the proposed regulations applied to existing hopper dredges and to vessels which do not load their own hoppers yet still transport dredged material or processed sludge. One commenter requested that the definition of hopper dredge be clarified to reduce confusion.

The rules are applicable only to self-propelled dredges which have machinery permanently installed for the purpose of loading internal tanks (hoppers) with dredge spoils. Also, the damage stability requirements are applicable only to those hopper dredges, both new and existing, for which a working freeboard assignment is desired. These regulations are not applicable to hopper barges, sludge barges or other vessels incapable of performing dredging functions. As such, the definition in § 44.310 has been clarified to avoid confusion.

Several commenters recommended, in response to the NPRM, to change the maximum specific gravity of the dredge spoils from 2.0 to 1.8. The SNPRM published on December 14, 1987, agreed with these comments and reduced the maximum specific gravity from 2.0 to 1.8. From the comments received in response to the second SNPRM, it appears that there is some disagreement as to what the maximum specific gravity of dredged spoils can be. In response to these comments, the Coast Guard is modifying § 174.210 (formerly § 174.830) to allow calculations to be performed at the highest specific gravity of dredge spoils the operator expects to encounter in the operation of the vessel. This maximum specific gravity will be stated on the load line certificate by the Assigning Authority.

Several commenters recommended that dumping of the spoils be allowed as one of the assumed situations to demonstrate compliance with the damage stability requirements. These commenters argue that the first action of the Master of a dredge after a casualty would be to dump the spoil.

The Coast Guard agrees with these commenters. Further, the Coast Guard agrees that the impact on the design and cost of a dredge resulting from the "no-dumping" assumption greatly exceeds the hazard that results from the few instances where the spoil may not be able to be dumpad after a casualty. Therefore, the proposed regulations contained in the SNPRM, § 174.845 (now § 174.330), were relaxed to permit the designer to assume that the spoil has been dumped immediately after damage provided the dredge meets certain operating requirements, such as the time required to open and the means of opening the bottom dump doors.

One commenter felt that the proposed requirement in § 174.843(a) (now § 174.325(c)) for maintaining at least 2 inches of positive metacentric height should be applied only in the case of symmetric flooding. The commenter proposed several other criteria for maintaining positive stability after cross flooding.

The Coast Guard believes that the maintenance of at least 2 inches of metacentric height after damage is necessary to provide for an acceptable amount of residual stability after damage and ensure that the righting arm curve is positive. This is also in keeping with the damage stability requirements of vessels that are not hopper dredges.

One commenter questioned why the proposed regulations would require that the stability calculations take into account the spillage of the dredge spoils resulting from the changing heel and trim of the vessel. They felt that in order to meet the requirements of § 174.310 it would require a significant amount of calculations which would dramatically increase the amount of work and cost involved.

The Coast Guard agrees with this comment; by not accounting for the spillage of dredge spoils, a more conservative righting arm curve will result. Therefore, the word "must" has been replaced with the word "may" in § 174.310(d) (formerly § 174.820(e)). The provision to account for the spillage is retained to provide a means for the designer who wishes to account for the spillage of dredge spoils.

Several commenters questioned why the proposed discharge area in § 174.845 (now § 174.335) for the hoppers must be 30% of the vessel waterplane area rather than some percentage of the hopper area.

The Coast Guard intended, in the proposed rules, that the discharge area should be 30% of the maximum hopper waterplane area, not the vessel's waterplane area. This wording as proposed has been redrafted for the final rule to prevent confusion.

Several commenters questioned the proposed requirements in § 174.845 (now § 174.330) that the bottom doors or split hull actuating mechanism be able to dump the spoils in two minutes or less even if the vessel is damaged.

The Coast Guard intends that the actuating systems be designed to fail in the open position so that in the event of damage or loss of power the spoils can be easily jettisoned. This requirement is necessary to validate the assumptions made for damage stability calculations that the spoil is dumped.

One commenter questioned why no special mark will be placed on the vessel when issued a working freeboard.

The International Load Line Convention and U.S. laws require that only one freeboard mark may be visible on the vessel at any time. This means that vessels with multiple load line marks must paint out one mark while operating in accordance with the second. The Coast Guard felt that it would be an undue burden on the industry to require the load line marks to change from the working freeboard marks to the standard freeboard marks when the vessel changed service. Vessels meeting the requirements for the assignment of working freeboard marks will be issued a load line exemption certificate which will permit the operator to submerge the load line to the working freeboard. The Coast Guard expects the master will not load his vessel deeper than the authorized working freeboard but violations would subject the perpetrator to the penalty provisions of 46 U.S.C. 5116.

Several commenters felt that the requirements in proposed § 93.40.20 in the NPRM to demonstrate that the vessel would survive an assumed bottom damage would be overly burdensome to the industry.

This comment has been considered and the proposed calculation for bottom damage has been withdrawn.

During review of the comments on the SNPRM, the Coast Guard realized that some of the problems commenters found with the proposed regulations stemmed from its less than clear organization. In addition, much of the text of the proposed rules was not trenchantly stated. In order to assist readers in meeting these requirements, the Coast Guard has reorganized the final rule by combining material that was related, eliminating redundancies, and clarifying text when necessary. None of these editorial changes affect the substantive content of the proposal. The following table will help readers locate the proposed rules in the new system.

Section title	SNPRM sec.	Final rule sec.
Specific applicability	174.800	174.300
Definitions	174.810	174.305
Calculations (Renamed General)	174.820	174.310
Assumptions (Added to General)	174.830	174.310
Extent and character of damage	174.841	174.315
Permeability (Added to General)	174.842	174.310
Damage survival	174.843	174.320
Equalization	174.844	174.325
Jettisoning of spoil	174.845	174.330
Watertight doors	174.850	174.335
Collision bulkhead	174.860	174.340

RIN Number

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulation. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this

---

Subpart C—Rules for Assigning Working

(i) Show the fore, aft, and mean draft

maximum specific gravity allowed for

document can be used to cross reference this action with the Unified Agenda.

Regulatory Evaluation

This rule is considered to be non-major under Executive Order 12291 and nonsignificant under the DOT regulatory policies and procedures (44 FR 11034; February 28, 1979).

The economic impact of this proposal would involve calculation hours spent by naval architecture and engineering firms hired by the dredge owners and operators. The dredge owners and operators would have to pay for the services of the naval architects and engineers but would recoup their costs quickly because they would be able to load to deeper drafts and carry more dredged spoil per trip to the dump site. Vessels which have been granted working freeboards during the past six years on a case by case basis already meet the damage stability requirements in the proposed rules. The proposed rules are not a requirement for all hopper dredges. Only those dredges desiring an increased capacity would be required to meet the requirements promulgated by this document.

Compared to the current procedure for obtaining a working freeboard, the procedures set out in these rules would cost dredge owners less money. This is because the necessary procedure would be clearly provided by the rules promulgated in this document. Costs are estimated at $5800 for each new hopper dredge built over the next 10 years which is estimated to be 10 vessels. For that period, the estimated costs for existing vessels is $17,400. The estimated cost for industry for the next ten years would be $75,400.

Environmental Impact

It has been determined that this regulation is categorically excluded from further environmental documentation. The Categorical Exclusion for Hopper Dredge Working Freeboard, Load Line and Stability Requirements has been prepared and placed in the rulemaking docket (CGD 76.080). It is available for examination and copying as noted in the ADDRESSES above.

Federalism Implications

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the final rule does not have sufficient federalism to warrant the preparation of a Federalism Assessment.

Paperwork Reduction Act

An increase in information collection requirements for the vessels under these rules would result to the extent that the industry chooses to utilize this voluntary rule. The OMB control number for this rulemaking is 2115–0565 which is approved through March 31, 1991.

Regulatory Flexibility Act

Based upon the information in the evaluation, the Coast Guard certifies, under section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that these regulations will not have a significant economic impact on a substantial number of small entities. For the purposes of this rulemaking, a small entity has been defined as a business with gross revenues less than $500,000 per year. The rules contained in this rulemaking are voluntary and provide an economic benefit to industry, therefore no further evaluation is necessary.

List of Subjects

46 CFR Part 42

Penalties, Reporting and record-keeping requirements, Vessels.

46 CFR Part 44

Reporting and record-keeping requirements, Vessels.

46 CFR Part 45

Great Lakes, Reporting and record-keeping requirements, Vessels.

46 CFR Part 170

Marine safety, Reporting and record-keeping requirements, Vessels.

46 CFR Part 174

Marine safety, Vessels.

In accordance with the foregoing, subchapters E and S of title 46, Code of Federal Regulations, are amended as follows:

PART 42—DOMESTIC AND FOREIGN VOYAGES BY SEA

1. The authority citation for part 42 continues to read as follows:

Authority: 46 U.S.C. 5115; 49 CFR 1.45, 1.46; sec. 42.01–5 also issued under the authority of 44 U.S.C. 3507.

2. Section 42.03–5 is amended by adding paragraph (e) to read as follows:

§ 42.03–5 U.S.-flag vessels subject to the requirements of this subchapter.

* * * * *

(e) Hopper dredges engaged in limited service domestic voyages. Self-propelled hopper dredges over 79 feet (24 meters) in length with working freeboards, on limited service domestic voyages within 20 nautical miles (37 kilometers) from the mouth of a harbor of safe refuge, are subject to the provisions of this subchapter that apply to a Type "B" vessel and to the provisions of Subpart E of Part 44 of this chapter.

3. Section 42.03–30 is amended by adding paragraph (b)(4) to read as follows:

§ 42.03–30 Exemptions for vessels.

* * * * *

(b) * * *

(4) For self-propelled hopper dredges engaged on international voyages or on limited service domestic voyages by sea. These vessels may be exempt from applicable hatch cover requirements of § 42.15–25 of this part by showing they meet the requirements in § 174.310 of this chapter. When a Load Line Exemption Certificate is issued for this exemption, it must have an endorsement that only seawater is allowed in the vessel's hoppers.

* * * * *

4. Section 42.20–5 is amended by revising the introductory text of paragraph (c) to read as follows:

§ 42.20–5 Freeboard assignment: Type "B" vessel.

* * * * *

(c) Any Type "B" vessel that is greater than 100 meters (328 feet) in length and any hopper dredge meeting the requirements in Subpart C of Part 44 of this chapter may have a reduced freeboard from that assigned under Table 42.20–15(b)(1) in accordance with paragraph (d) or paragraph (e) of this section if—

* * * * *

PART 44—VARIANCE FOR CERTAIN VESSELS

5. The authority citation for part 44 continues to read as follows:

Authority: 46 U.S.C. 5115; 49 CFR 1.46.

6. Part 44 is amended by revising its title to read as follows:

PART 44—SPECIAL SERVICE LIMITED DOMESTIC VOYAGES

7. Part 44 is amended by redesignating subpart 44.01 as subpart A while retaining the title, "Administration", and redesignating subpart 44.05 as subpart B and revising the title of the new subpart B to read as follows:

Subpart B—Rules for Assigning Special Service Load Lines

8. Part 44 is amended by adding a new Subpart C to read as follows:

Subpart C—Rules for Assigning Working Freeboards to Hopper Dredges

Sec.
44.300 Applicability.
44.310 Definitions.
44.320 Submission of plans and calculations.
44.330 Obtaining working freeboards for hopper dredges.
44.340 Operating restrictions.

Subpart C—Rules for Assigning Working Freeboards to Hopper Dredges

§ 44.300 Applicability.

This subpart applies to each self-propelled hopper dredge—

(a) For which a working freeboard assignment is desired after January 1, 1990; and

(b) That operates with a working freeboard assigned under this subpart.

§ 44.310 Definitions.

Hopper dredge means a self-propelled dredge with an open hold or hopper in the hull of the dredge that receives dredged material.

Working freeboard means one-half the distance between the mark of the load line assigned under this subchapter and the freeboard deck.

§ 44.320 Submission of plans and calculations.

To request a working freeboard, calculations, plans, and stability information necessary to demonstrate compliance with this subpart must be submitted to the:

(a) Commanding Officer, U.S. Coast Guard Marine Safety Center (G–MSC), 400 Seventh Street SW., Washington, DC 20590–0001; or

(b) American Bureau of Shipping, 45 Eisenhower Drive, Paramus, New Jersey 07652–0910.

§ 44.330 Obtaining working freeboards for hopper dredges.

A hopper dredge may be issued a working freeboard on a limited service domestic voyage load line certificate or a Great Lakes load line certificate if the following are met:

(a) The hopper dredge structure must have adequate strength for any draft up to the working freeboard draft. Dredges built and maintained in conformity with the requirements of a classification society recognized by the Commandant usually meet this requirement.

(b) The hopper dredge must—

(1) Meet subpart I of part 174 of this chapter; and

(2) Have on its bridge remote draft indicators that:

(i) Show the fore, aft, and mean draft of the dredge at all times while the dredge is operating; and

(ii) Have each indicator marked with the assigned freeboard and the working freeboard.

§ 44.340 Operating restrictions.

(a) Each hopper dredge assigned a working freeboard may be operated at drafts from the normal freeboard to the working freeboard if the—

(1) Seas are not more than 10 feet;

(2) Winds are not more than 35 knots;

(3) Area of operation is not more than 20 nautical miles (37 kilometers) from the mouth of a harbor of safe refuge; and

(4) Specific gravity of the spoil carried is not more than the highest specific gravity of spoil used in the stability calculations required by subchapter S of this chapter.

(b) The Assigning Authority designates on the face of the dredge's load line certificate—

(1) Each restriction contained in paragraph (a)(1) through (a)(3) of this section; and

(2) The maximum specific gravity of the spoils allowed to be carried.

PART 45—GREAT LAKES LOAD LINES

9. The authority citation for part 45 continues to read as follows:

Authority: 46 U.S.C. 5115; 49 CFR 1.46.

10. Section 45.9 is amended by revising paragraph (b) to read as follows:

§ 45.9 Seasonal application of load lines for vessels not marked under this part.

* * * * *

(b) Except for hopper dredges operating at working freeboards in accordance with subpart C of part 44 of this chapter, the Assigning Authority may not allow for lesser freeboards.

PART 170—STABILITY REQUIREMENTS FOR ALL INSPECTED VESSELS

11. The authority citation for part 170 continues to read as follows:

Authority: 43 U.S.C. 1333; 46 U.S.C., 3306, 3703, 5115; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

12. Section 170.110 is amended by adding paragraph (d)(16) to read as follows:

§ 170.110 Stability booklet.

* * * * *

(d) * * *

(16) For each self-propelled hopper dredge with a working freeboard, the maximum specific gravity allowed for dredge spoil.

* * * * *

13. Section 170.248 is amended in paragraph (a) by adding the words "or paragraph (c)" after the words "paragraph (b)" and adding paragraph (c) to read as follows:

§ 170.248 Applicability.

* * * * *

(c) A watertight door on a self-propelled hopper dredge with a working freeboard must comply with § 174.335 of this subchapter.

14. Part 170 is amended by adding § 170.300 to read as follows:

§ 170.300 Special consideration for free surface of spoil in hopper dredge hoppers.

The calculations required by this subchapter for each self-propelled hopper dredge must include—

(a) The free surface effect of consumable liquids and the free surface effect of the dredged spoil in the hoppers; and

(b) Either of the following assumptions when performing the calculations required by § 174.310(b) of this chapter:

(1) If the dredged spoil is assumed to be jettisoned, the free surface of the dredged spoil may be disregarded.

(2) If the dredged spoil is not assumed to be jettisoned. the free surface of the dredged spoil must be calculated.

PART 174—SPECIAL RULES PERTAINING TO SPECIFIC VESSEL TYPES

15. The Authority citation for part 174 continues to read as follows:

Authority: 42 U.S.C. 9118, 9119, 9153; 43 U.S.C. 1333; 46 U.S.C. 3306, 3703, 5115; E.O. 12334; 45 FR 58801. 3 CFR, 1980 comp. p. 277; 49 CFR 1.46.

16. Section 174.005 is amended by adding paragraph (f) to read as follows:

§ 174.005 Applicability.

* * * * *

(f) Self-propelled hopper dredge having an assigned working freeboard.

17. Part 174 is amended by adding subpart I to read as follows:

Subpart I—Hopper Dredges With Working Freeboard Assignments

Sec.
174.300 Specific applicability.
174.305 Definitions.

Calculations

174.310 General.
174.315 Extent and character of damage.
174.320 Damage survival.
174.325 Equalization.

Sec.
174.330 Jettisoning of spoil.

Design

174.335 Watertight doors.
174.340 Collision bulkhead.

Subpart I—Hopper Dredges With Working Freeboard Assignments

§ 174.300 Specific applicability.

This subpart applies to each self-propelled hopper dredge for which a working freeboard assignment is being sought under part 44, subpart C, of this chapter.

§ 174.305 Definitions.

Hopper dredge has the same meaning as contained in § 44.310 of this chapter.

Length has the same meaning as contained in § 42.13–15(d) of this chapter.

Working freeboard has the same meaning as contained in § 44.310 of this chapter.

Calculations

§ 174.310 General.

(a) Each hopper dredge under this subpart must be shown by design calculations based on the assumptions under paragraphs (b), (c), (d), and (e) of this section, that it meets—

(1) The requirements in §§ 170.170, 170.173, and 170.300 of this chapter in each condition of loading and operation; and

(2) The survival conditions of § 174.320 in each condition of loading and operation assuming the character and extent of damage specified in § 174.315.

(b) The calculations required by paragraph (a) of this section must assume:

(1) The hoppers are full of seawater;

(2) The permeability of flooded spaces is as provided by Table 174.310;

(3) The equalization provisions of § 174.325; and

(4) The jettisoning provisions of § 174.330.

(c) The calculations required by this section must take into account a sufficient number of loading conditions to identify the condition in which the vessel is least stable, including, but not limited to, the most severe loading condition, and the:

(1) Specific gravity of the dredge spoil, from 1.02 up to and including the maximum required by paragraph (e)(1) of this section; and

(2) Draft, up to and including the draft corresponding to the working freeboard for the full range of trim.

(d) The calculations required by this section for a dredge with open hoppers may include spillage of spoil from the hopper resulting from changing the angle of heel and trim.

(e) The following assumptions must be made when doing the calculations required by this section:

(1) Dredged spoil in the hopper is a homogeneous liquid with a maximum specific gravity for the areas of operation.

(2) When calculating the vessel's righting arm, it is assumed at each angle of heel that the vessel trims free and the trimming moment is zero.

TABLE 174.310—PERMEABILITY OF FLOODABLE SPACES

Spaces and tanks	Permeability
Storerooms	0.60
Accommodation spaces	0.95
Consumable liquid tanks	0.00 or 0.95—whichever results in the more disabling condition.
Machinery space	0.85—unless otherwise supported by calculations.
Cargo tanks	Determined from the actual density and amount of liquid carried in the tank.

§ 174.315 Extent and character of damage.

(a) The calculations required by § 174.310 must show that the dredge can survive damage at any location along the length of the vessel including at a transverse bulkhead in accordance with paragraph (b) of this section.

(b) The calculations required by paragraph (a) of this section must assume the most disabling side penetration with the damage collision penetration provided by Table 174.315, except that if the most disabling damage collision penetrations would be less than those provided by Table 174.315, the smaller damage collision penetration must be assumed.

TABLE 174.315—EXTENT OF DAMAGE COLLISION PENETRATION

Longitudinal extent	$0.495L^{2/3}$ or 47.6 feet. [$(\frac{1}{3})(L)^{2/3}$ or 14.5 meters] whichever is less.
Transverse extent [1]	B/5 or 37.7 feet. (11.5 meters), whichever is less.
Vertical extent	From the base line upward without limit.

[1] Damage applied inboard from the vessel's side at a right angle to the centerline at the draft corresponding to the working freeboard assigned under subchapter E of this chapter.

§ 174.320 Damage survival.

A hopper dredge survives assumed damage if it meets the following conditions:

(a) The maximum angle of heel in each stage of flooding must not exceed 30 degrees or the angle of downflooding whichever is less.

(b) The final waterline, taking into account sinkage, heel, and trim, must be below the lowest edge of each opening through which progressive flooding may take place.

(c) The righting arm curve calculated after damage must:

(1) Have a minimum positive range of 20 degrees beyond the angle of equilibrium; and

(2) Reach a height of at least 4 inches (100mm) within the 20 degree positive range.

(d) Each opening within, or partially within, the 20 degree range beyond the angle of equilibrium must be weathertight.

(e) After flooding or equalization as allowed by § 174.325, the hopper dredge's metacentric height must be at least 2 inches (50mm) when the dredge is in an upright position.

§ 174.325 Equalization.

When doing the calculations required by § 174.310 of this subpart—

(a) Equalization arrangements requiring mechanical aids, such as valves, may not be assumed to be effective in reducing the angle of heel; and

(b) Spaces joined by ducts may be assumed to be common spaces only if equalization takes place within 15 minutes after flooding begins.

§ 174.330 Jettisoning of spoil.

(a) When doing the calculations required by § 174.310 for a hopper dredge with bottom doors, it may be assumed that the spoil is jettisoned immediately after damage and that the bottom doors remain open if:

(1) The bottom doors are designed so that they may be fully opened from:

(i) The closed position within two minutes even if the main power source is lost or the bottom door actuating mechanism is damaged; and

(ii) The navigating bridge;

(2) The discharge area through the bottom doors is equal to or greater than 30 percent of the maximum cross sectional area of the hopper measured in a plane parallel to the waterline; and

(3) Asymmetrical jettisoning of the spoil is impossible.

(b) When doing the calculations required by § 174.310 for a hopper dredge with a split hull, it may be assumed that the spoil is jettisoned immediately after damage if—

(1) The hull is designed so that—

(i) The complete separation is effected within two minutes even if the main power source is lost or the actuating means is damaged; and

(ii) The actuating means can be operated from the navigating bridge;

(2) It is shown to the Commanding Officer, Marine Safety Center, either by calculations or by operational tests, that the hulls can separate sufficiently to allow the dredged material to dump without bridging; and

(3) Asymmetrical jettisoning of the spoil is impossible.

Design

§ 174.335 Watertight doors.

(a) Each hopper dredge must have sliding watertight doors (Class 3) approved under subpart 163.001 of this chapter if the sill for the door is—

(1) Installed below the bulkhead deck; and

(2) Less than 24 inches above the final waterline as shown by the calculations required by § 174.310 in each damage condition up to and including the maximum amount of assumed damage.

(b) Each hopper dredge must have sliding watertight doors (Class 3) approved under subpart § 163.001 of this chapter, or quick acting hinged watertight doors (Class 1) approved under the same Subpart if the sill of the watertight door is—

(1) Installed below the bulkhead deck; and

(2) Greater than 24 inches above the final waterline as shown by the calculations required by § 174.310 in each damage condition up to and including the maximum amount of assumed damage.

§ 174.340 Collision bulkhead.

Each hopper dredge must have a collision bulkhead that is located not less than 5 percent of the length abaft of the forward perpendicular.

Dated: August 11, 1989.

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

48 CFR Parts 1515 and 1552

[FRL-3640-5]

Acquisition Regulation; Submission of General Financial and Organizational Information and Purchasing System Information by Offerors

AGENCY: Environmental Protection Agency.

ACTION: Provisional rule.

SUMMARY: This document establishes a provisional rule on the submission of general financial and organizational information and purchasing system information by offerors. This rule is necessary to permit a more thorough initial evaluation of proposals received from offerors, and to identify those contractors which the Environmental Protection Agency (EPA) has the responsibility for the conduct of Contractor Purchasing System Reviews (CPSR). The intended effect of this rule is to require offerors to submit information with their proposals to assist in the evaluation process and determination of CPSR responsibility.

EFFECTIVE DATE: October 15, 1989.

FOR FURTHER INFORMATION CONTACT: Edward N. Chambers, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, telephone: (202) 382–5028.

SUPPLEMENTARY INFORMATION:

A. Background

The EPA currently requires general financial and organizational information only from offerors in the competitive range. This information is obtained by offerors' completion of the questions under Environmental Protection Agency Acquisition Regulation (EPAAR) 1552.215–76, or their certification or updating of previously submitted information as directed by EPAAR 1552.215–75. Pertinent general financial and organizational information has therefore not been available for the initial evaluation of proposals.

Federal Acquisition Regulation 44.302 requires that Contractor Purchasing System Reviews (CPSR) be conducted for each contractor whose qualifying sales to the Government are expected to exceed $10 million over the next 12 months. The cognizant contract administration agency conducts these reviews at least every three years for contractors that continue to exceed the $10 million threshold.

The general and organizational information prescribed under EPAAR 1552.215–76 does not include information concerning an offeror's purchasing system. The EPA attempts to identify contractors for which it has CPSR responsibility through its Contract Information System (CIS). The CIS is an automated tracking system of all contract actions processed by EPA. The CIS does not enable EPA to identify all contractors for which EPA has CPSR responsibility since the CIS does not contain information on subcontractors and contracts with other Government agencies.

Information to be provided by offerors under this rule will enable EPA to identify contractors with qualifying Government sales in excess of $10 million and to ascertain the cognizant contract administration agency for these contractors.

This rule was published as a proposed rule in the **Federal Register** on February 16, 1989. The Office of Federal Procurement Policy (OFPP) by letter of March 29, 1989, identified provisions of the rule as having potential government-wide application. In accordance with the OFPP letter, EPA has submitted a request to the FAR Councils for initiation of a FAR case. When a rule contains issues submitted to the FAR Councils for initiation of a FAR case, OFPP guidance permits publication of the rule as provisional. If the FAR Councils adopt a rule, EPA will rescind the provisional rule. If FAR coverage is determined to be unnecessary, EPA will publish this provisional rule as final, taking the FAR Councils' deliberations into account.

B. Executive Order 12291

Office of Management and Budget (OMB) Bulletin No. 85–7, dated December 14, 1984, establishes the requirements for OMB review of agency acquisition regulations. This regulation does not fall within any of the categories cited in the Bulletin requiring review.

C. Paperwork Reduction Act

The information collection requirements contained in this provisional rule were approved by the Office of Management and Budget and have been assigned OMB Control Number 2030–0006.

D. Regulatory Flexibility Act

The provisional rule is not expected to have a significant impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 et seq. The information requested for submission is readily available and will require only a minimal effort for offerors to compile.

The EPA certifies that this provisional rule will not exert a significant economic impact on a substantial number of small entities. Therefore, no regulatory flexibility analysis has been prepared.

E. Public Comments

No comments were received in response to the notice of proposed rule making.

List of Subjects in 48 CFR Parts 1515 and 1552

Government procurement.

For the reasons set out in the preamble, chapter 15 of title 48 Code of Federal Regulations is amended as set forth below.

1. The authority citation for 48 CFR Parts 1515 and 1552 continues to read as follows:

Authority: Sec. 205(c), 63 Stat. 390, as amended, 40 U.S.C. 486(c).

PART 1515—[AMENDED]

2. Section 1515.407 is amended by revising paragraph (a)(3) to read as follows:

1515.407 Solicitation provisions.

(a) * * *

(3) 1552.215-76, General Financial and Organizational Information.

* * * * *

1515.407 [Amended]

3. In § 1515.407, paragraph (b) is deleted and paragraph (c) is redesignated as paragraph (b).

PART 1552—[AMENDED]

1552.215-75 [Removed and Reserved]

4. Section 1552.215-75 is removed and reserved.

5. Section 1552.215-76 is amended by revising the introductory paragraph and paragraph (q) to read as follows:

1552.215-76 General financial and organizational information.

As prescribed in 1515.407(a)(3), insert the following provisions:

* * * * *

(q) Purchasing System: FAR 44.302 requires EPA, where it is the cognizant Government agency, to conduct a Contractor Purchasing System Review for each contractor whose sales to the Government, using other than sealed bid procedures, are expected to exceed $10 million (annual billings) during the next twelve months. The $10 million sales threshold is comprised of prime contracts, subcontracts under Government prime contracts, and modifications (except when the negotiated price is based on established catalog or market prices or is set by law or regulation). Has your purchasing system been approved by a Government agency?

Yes ________ No ________

If yes, name and location of the Government agency:

____

Period of Approval: ________________________

If no, do you estimate that your negotiated sales to the Government during the next twelve months will meet the $10 million threshold?

Yes ________ No ________

If you respond yes to the $10 million threshold question, is EPA the cognizant agency for your organization based on the preponderance of Government contract dollars?

Yes ________ No ________

If EPA is not your cognizant Government agency, provide the name and location of the cognizant agency ________________________

____

Are your purchasing policies and procedures written?

Yes ________ No ________

BILLING CODE 6560-50-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1056

[Ex Parte No. MC-19 (Sub-No. 40)]

Return of Proportional Freight Charges by Motor Carriers of Household Goods

AGENCY: Interstate Commerce Commission.

ACTION: Adoption of final rule.

SUMMARY: After review of the comments of the parties to this proceeding we adopt the revision of our rule at 49 CFR 1056.15 proposed in our Notice of Proposed Rulemaking previously entitled *Refund of Tariff Charges on Shipments With Less Than Total Loss or Destruction*, 53 FR 50270, published December 14, 1988. The docket number is also corrected in this notice and in our decision adopting the final rule from Ex Parte No. MC-19 (Sub-No. 39) to Ex Parte No. MC-19 (Sub-No. 40) because Docket No. Ex Parte No. MC-19 (Sub-No. 39) was used in another proceeding. The revised rule requires motor common carriers of household goods to refund proportional freight charges on shipments with less than total loss or destruction in transit at the time corresponding loss and damage claims are processed. We believe that the rule change will eliminate the difficulties the moving industry has experienced in complying with the present rule and, at the same time, will assure that shippers will be refunded appropriate tariff charges for articles lost or destroyed in transit.

EFFECTIVE DATE: The revised rule is effective October 6, 1989.

FOR FURTHER INFORMATION CONTACT: Heber P. Hardy (202) 275-7148 or John W. Fristoe (202) 275-7844, [TDD for hearing impaired (202) 275-1721].

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call or pickup in person from Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call (202) 289-4357/4359 (DC Metropolitan area), [assistance for the hearing impaired is available through TDD services (202) 275-1721].

Energy and Environmental Considerations

This action does not affect significantly either the quality of the human environment or the conservation of energy resources.

Regulatory Flexibility Analysis

We certify that the adoption of this final rule will not have a significant impact on a substantial number of small entities.

List of Subjects in 49 CFR Part 1056

Advertising, Consumer protection, Freight, Insurance, Motor carriers, Moving of household goods, Reporting and recordkeeping requirements.

This action is taken under the authority of 49 U.S.C. 10321, 11109, 11110 and 5 U.S.C. 553.

Decided: August 28, 1989.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners André, Lamboley, and Phillips.

Noreta R. McGee,

Secretary.

For the reasons set forth in the preamble, title 49, chapter X, part 1056 of the Code of Federal Regulations is amended as follows:

PART 1056—TRANSPORTATION OF HOUSEHOLD GOODS IN INTERSTATE OR FOREIGN COMMERCE

1. The authority citation for Part 1056 continues to read as follows:

Authority: 49 U.S.C. 10321, 11109, 11110 and 5 U.S.C. 553.

2. Section 1056.15(b) is revised to read as follows:

§ 1056.15 Collection of freight charges on household goods shipments involving loss or destruction in transit.

* * * * *

(b) In the event that any portion, but less than all, of a shipment of household goods is lost or destroyed in transit, a motor common carrier of household goods in interstate or foreign commerce shall, at the time it disposes of claims for loss, damage, or injury to the articles in the shipment as provided in part 1005 of this chapter, refund that portion of its published freight charges (including any charges for accessorial or terminal services) corresponding to that portion of the shipment which is lost or destroyed in transit. To calculate the charges applicable to the shipment as delivered, the carrier shall multiply the percentage corresponding to the portion of the shipment delivered by the total charges (including accessorial and terminal charges) applicable to the shipment tendered by the shipper. If the charges computed in the manner set forth above exceed the charges otherwise applicable to the shipment as delivered, the lesser of those charges shall apply. The provisions of this paragraph shall apply only to the transportation of household goods as defined in § 1056.1(b)(1) of these rules. Notwithstanding any other provisions of this paragraph, a carrier shall collect, and the shipper shall be required to pay, that proportion of any charges for accessorial or terminal services rendered which corresponds to the proportion of the shipment not lost or destroyed in transit and any specific valuation charge that may be due. The provisions of this paragraph shall not be applicable to the extent that any such loss or destruction is due to the act or omission of the shipper. Carriers shall determine, at their own expense, the proportion of the shipment not lost or destroyed in transit.

* * * * *

BILLING CODE 7035-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

RIN 1018-AA24

Migratory Bird Hunting; Final Frameworks for Selecting Early Hunting Seasons on Certain Migratory Game Birds in the United States, Including Alaska, Puerto Rico and the Virgin Islands, for the 1989–90 Season

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule; amendment.

SUMMARY: The Fish and Wildlife Service (hereinafter the Service) is amending the final rule prescribing the frameworks for early open seasons in Alaska that appeared in the **Federal Register** on August 11, 1989 (54 FR 32975). This amendment allows a season on canvasbacks in Alaska.

EFFECTIVE DATE: Effective on September 6, 1989.

FOR FURTHER INFORMATION CONTACT: Byron K. Williams, Acting Chief, Office of Migratory Bird Management, Fish and Wildlife Service, Department of the Interior, Room 634—Arlington Square, Washington, DC 20240, (703) 358-1714.

SUPPLEMENTARY INFORMATION: In the August 11, 1989, **Federal Register** (54 FR 32975) the Service published a final rule prescribing the early open seasons, hunting hours, hunting areas, and daily bag and possession limits for certain migratory game birds in the United States, including Alaska, Puerto Rico and the Virgin Islands. In that rule, there was no open season on canvasbacks in Alaska. The rule was developed prior to complete information on the status of canvasbacks as measured by the Waterfowl Breeding Population Survey and presented in the "1989 Status of Waterfowl & Fall Flight Forecast," July 25, 1989. Following harvest guidelines in the "1983 Environmental Assessment on Canvasback Hunting," canvasbacks are managed as "western" and "eastern" populations, with 3-year average breeding populations of 140,000 and 360,000 canvasbacks, respectively, being thresholds below which no hunting would be considered. The populations have been below these thresholds, and the season was not open in any state in 1988. The 1989 index for the Western Population was 168,400 canvasback, 57 percent above that of last year and 28 percent above the 1955–88 average. The 1989 index increased the average index to 141,300, a level which could allow hunting. Therefore, this amendment allows a season on canvasbacks in Alaska, but with daily bag and possession limits more restrictive than those which had been permitted prior to the season closure.

List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Transportation, Wildlife.

The rules that eventually will be promulgated for the 1989–90 hunting season are authorized under the Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755; 16 U.S.C. 701–718h); the Fish and Wildlife Improvement Act of 1978 (92 Stat. 3112; 16 U.S.C. 712); and the Alaska Game Act (43 Stat. 739; as amended, 54 Stat. 1103–04).

The following amendment is made in Migratory Bird Hunting; Final Frameworks for Selecting Early Hunting Seasons on Certain Migratory Game Birds in the United States, Including Alaska, Puerto Rico and the Virgin Islands, for the 1989–90 Season published in the August 11, 1989, Federal Register (54 FR 32975).

On page 32983, under the heading "Final Frameworks for Selecting Open Season Dates for Hunting Migratory Birds in Alaska, 1989–90," bag limits are amended to read as follows:

Daily Bag and Possession Limits

Ducks—Except as noted, a basic daily bag limit of 5 and a possession limit of 15 ducks. Daily bag and possession limits in the North Zone are 8 and 24, and in the Gulf Coast Zone they are 6 and 18, respectively. The basic limits may not include more than 2 pintails daily and 6 pintails in possession, and 1 canvasback daily and 3 canvasbacks in possession. In addition to the basic limit, there is a daily bag limit of 15 and a possession limit of 30 scoter, eider, oldsquaw, harlequin, and common and red-breasted mergansers, singly or in the aggregate of these species.

Dated: August 30, 1989.

Richard N. Smith,

Acting Director.

Proposed Rules

Federal Register
Vol. 54, No. 171
Wednesday, September 6, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 52

[FV-89-206]

RIN 0581-AA19

Processed Fruits and Vegetables, Processed Products Thereof, and Certain Other Processed Food Products; Inspection and Certification

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would revise the Regulations Governing Inspection and Certification of Processed Fruits and Vegetables and Certain Other Products by increasing the fees charged for the inspection of processed fruits and vegetables and certain other products. The proposed fees would recover the costs of performing inspection services, as authorized by the Agricultural Marketing Act of 1946.

DATES: Comments must be received on or before October 6, 1989.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in duplicate to the Office of the Branch Chief, Processed Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, P.O. Box 96456, Room 0709 South Building, Washington, DC 20090-6456. Comments should note the date and page number of this issue of the **Federal Register** and will be made available for public inspection in the office of the Branch Chief during regular business hours.

FOR FURTHER INFORMATION CONTACT: Mr. Raymondo O'Neal, Processed Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, P.O. Box 96456, Room 0709 South Building, Washington, DC 20090-6456, Telephone (202) 447-5021.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been designated as a "nonmajor" rule. It will not result in an annual effect on the economy of $100 million or more. There will be no major increase in cost or prices to consumers, individual industries, Federal, State, or local government agencies, or geographic regions. It will not result in significant adverse effects on competition, employment, investments, productivity, innovations, or the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Administrator, Agricultural Marketing Service (AMS), has certified that this action will not have a significant economic impact on a substantial number of small entities, as defined in the Regulatory Flexibility Act, Public Law 96-354 (5 U.S.C. 601).

The proposed rule reflects fee increases needed to recover the costs of services rendered in accordance with the Agricultural Marketing Act (AMA) of 1946. Furthermore, the inspection, grading and certification program for processed fruits and vegetables and related products is voluntary.

The AMA authorizes voluntary official inspection, grading, and certification on a user-fee basis, of processed food products including processed fruits, vegetables, and processed products made from them. The AMA provides that reasonable fees be collected from the user of the program services to cover as nearly as practicable the costs of services rendered. This proposal would amend the schedule for fees and charges for services rendered to the processed fruit and vegetable industry to reflect the costs currently associated with the program.

AMS regularly reviews these programs to determine if fees are adequate. Since the last fee change June 5, 1986, (51 FR 20438), program operating costs have increased. The major contributing factors have been two salary increases for Federal employees—a 3-percent pay increase effective January 1, 1987, and a 2-percent pay increase effective January 1, 1988.

Employee salary and fringe benefits are major program costs that account for approximately 85 percent of the total operating budget. In fiscal year 1989, the following increases occurred in program operating expenses: (1) A Government-wide salary increase of 4.1 percent effective January 1, 1989; (2) a 28.3 percent increase in the Agency's contribution to the Federal Employees Health Benefits Program (applicable to all Government agencies) effective January 1, 1989; (3) a 10 percent Government-wide increase in travel entitlements effective in October 1988; and (4) a projected inflationary cost increase of 3.8 percent for fiscal year 1989. The Agency has determined that due to the aforementioned increases in program operating costs, these programs will incur over a $900,000 loss in fiscal year 1989.

Based on the Agency's analysis of increased costs since 1986, AMS proposes to increase the fees relating to such services. The following table compares current fees and charges with proposed fees and charges for processed fruit and vegetable inspection as found in 7 CFR 52.42-52.52. Unless otherwise provided for by regulation or written agreement between the applicant and the Administrator, the charges in the schedule of fees as found in § 52.42:

Current	Proposed
$29.00 inspector hour, plus $5.50/hr. overtime.	$31.00 inspector hour, plus $7.00/hr. overtime.

Charges for copies of score sheets as found in § 52.49:

Current	Proposed
$25.00/hr	$31.00/hr.

Charges for additional copies of inspection certificates as found in § 52.50:

Current	Proposed
$25.00/hr	$31.00/hr.

Charges for travel and other expenses as found in § 52.51:

Current	Proposed
$29.00/hr	$31.00/hr.

Charges for year-round in-plant inspection services on a contract basis as found in § 52.52(c):

Current	Proposed
(1) For inspector assigned on a year-round basis: $22.00/hr	(1) For inspector assigned on a year-round basis: $25.00/hr.

Current	Proposed
(2) For inspector assigned on less than a year-round basis:	(2) For inspector assigned on less than a year-round basis:
Each Inspector $27.00/hr	Each inspector: $28.00/hr.
In-plant sampler—$14.00/hr	In-plant sampler—$14.00/hr.
(5) Overtime: All overtime hours charged at regular rate specified in (c) (1) and (2) plus $5.50 per hour.	(5) Overtime: All overtime hours charged at regular rate specified in (c) (1) and (2) plus $7.00 per hour

Current	Proposed
Charges for less than year-round in-plant inspection services (four or more consecutive 40 hour weeks) on a contract basis as found in § 52.52(d):	

Current	Proposed
(1) Each inspector $27.00/hr	(1) Each inspector: $28.00/hr.[1]

Current	Proposed
(2) In-plant sampler—$14.00/hr	(2) In-plant sampler—$14.00/hr.
(5) Overtime: All overtime hours charged at regular rate specified in (d) (1) and (2) plus $5.50 per hour.	(5) Overtime: All overtime hours charged at regular rate specified in (d) (1) and (2) plus $7.00 per hour.

[1] Except a minimum of 8 hours per day will be billed for intermittent type in-plant services in lieu of a minimum of 40 hours a week. Assignments in-plant for less than four weeks will be billed in accordance with § 52.42.

List of Subjects in CFR Part 52

Processed fruits and vegetables, Food grades, Standards.

Accordingly, for the reasons set forth in the preamble, it is proposed that the Regulations Governing Inspection and Certification of Processed Fruits and Vegetables, Processed Products Thereof, and Certain Other Processed Food Products (7 CFR 52.42, 52.49, 52.50, 52.51, 52.52c, 52.52d) would be amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: Agricultural Marketing Act of 1946, Secs. 203, 205, 60 Stat. 1087, 1090 as amended (7 U.S.C. 1622, 1624).

2. Section 52.42 would be revised to read as follows:

§ 52.41 Schedule of fees.

Unless otherwise provided in a written agreement between the applicant and the Administrator, the fee for any inspection service performed under the regulations in this part, shall be at the rate of $31.00 per hour plus an additional $7.00 per hour for all scheduled overtime hours. When work is performed on a holiday, an additional hour shall be charged at the regular hourly rate for each hour worked.

3. Section 52.49 would be revised to read as follows:

§ 52.49 Charges for copies of inspection documents and/or inspection data.

If the applicant for inspection service requests additional copies of inspection documents and/or inspection data referable to the processed product covered thereby, the applicant may obtain such copies from the supervisor in the office of inspection serving the area where the service was performed at a charge of ½ hour per copy in accordance with the rate in § 52.42: *Provided*, that no charge shall be made for one copy if requested at the time of the original request for inspection. Inspection certificates issued in accordance with § 52.21 may be supplied to any financially interested party at a charge of ½ hour per certificate for each seven (7), or fewer copies in accordance with the rate in § 52.42.

§ 52.50 [Removed]

§§ 52.51 and 52.52 [Redesignated as §§ 52.50 and 52.51]

4. Section 52.50 would be removed and §§ 52.51 and 52.52 would be redesignated as §§ 52.50 and 52.51 and newly redesignated § 52.50 would be revised to read as follows:

§ 52.50 Travel and other expenses.

Charges may be made to cover the cost of travel time incurred in connection with the performance of any inspection service, including appeal inspections, at the rate of $31.00 per hour. This includes time spent waiting for transportation as well as time spent traveling, but not to exceed eight hours of travel time for any one person for any one day: *And provided further*, that if travel is by common carrier, no hourly charge may be made for travel time outside the employee's official work hours.

5. Newly designated section 52.51 would be amended by republishing (c) introductory text and by revising paragraphs (c)(1), (c)(2), (c)(5), (d) introductory text, (d)(1), (d)(2), and (d)(5) to read as follows:

§ 52.51 Charges for inspection services on a contract basis.

* * * * *

(c) Charges for year-round in-plant inspection services on a contract basis will be billed to the applicant monthly for all hours worked with a minimum of 40 hours per week for each inspector assigned to perform the inspection services in accordance with the following schedule:

(1) For personnel assigned to a year-round basis:
Each inspector—$25.00 per hour.

(2) For personnel assigned on less than a year-round basis:
Each inspector—$28.00 per hour.
In-plant sampler—$14.00 per hour.

* * * * *

(5) Overtime. All overtime hours will be charged at the regular rates specified in paragraphs (c)(1) and (2) of this section plus $7.00 per hour.

(d) Charges for less than year-round in-plant inspection services (four or more consecutive 40 hour weeks) on a contract basis will be billed to the applicant monthly for all hours with a minimum of 40 hours for each inspection assigned to perform the inspection services in accordance with the following schedule:[1]

(1) Each inspector—$28.00 per hour.[2]

(2) In-plant sampler—$14.00 per hour.

* * * * *

(5) *Overtime.* All overtime hours will be charged at the regular rates specified in (d)(1) of this section plus $7.00 per hour.

* * * * *

Dated: August 30, 1989.

Kenneth C. Clayton,

Acting Administrator.

7 CFR Part 920

[FV-89-091]

Kiwifruit Grown in California; Proposed Rule To Establish an Interest Charge on Delinquent Assessments

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would establish an interest charge for delinquent handler assessments. This action would encourage California kiwifruit handlers to pay their assessments in a timely manner so that the Kiwifruit Administrative Committee would be assured that there are adequate funds available to cover program expenses.

DATES: Comments must be received by October 6, 1989.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposal to: Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, DC 20090-6456. Three copies of all written material shall be submitted, and they will be made available for public inspection at the office of the Docket Clerk during regular business hours. All comments should reference the docket number and the date and page number of this issue of the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Robert F. Matthews, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, DC 20090-6456, telephone (202) 447-2431.

SUPPLEMENTARY INFORMATION: This rule is proposed under Marketing Agreement No. 920 and Marketing Order No. 920 (7 CFR Part 920), regulating the handling of kiwifruit grown in California. The marketing agreement and order are authorized by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposal on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 145 handlers of California kiwifruit subject to regulation under the marketing order and approximately 1,225 producers in the production area. The Small Business Administration (13 CFR 121.2) has defined small agricultural producers as those having annual gross revenue for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of California kiwifruit may be classified as small entities.

The Kiwifruit Administrative Committee (committee), which is responsible for local administration of the marketing order, met on July 19, 1989, and recommended that an interest charge be established for delinquent handler assessments. Under § 920.40 of the marketing order, the committee is authorized to incur expenses that are reasonable and necessary to operate the program. Section 920.41 provides that handlers be assessed on a pro-rata basis to cover such costs. Further, § 920.41 authorizes the committee, with the approval of the Secretary, to establish an interest charge on assessments that are not paid within a time period prescribed by the committee.

The timely payment of assessments is important to the efficient functioning of the committee. The committee incurs expenses on a continuous basis and must be assured of a positive cash flow in order to meet its financial obligations, such as salaries and rent.

At its meeting on July 19, 1989, the committee recommended that handlers whose assessments were in arrears be subject to an interest charge of 18 percent per year or 1.5 percent per month on the balance owed. In order to give handlers ample time to make payment before being subject to this charge, assessments would not be considered subject to interest charges until 60 days after billing by the committee office. Interest would begin to accrue immediately following this 60-day grace period.

Therefore, it is proposed that a new § 920.112 be added to the rules and regulations under the kiwifruit marketing order which would specify that an interest charge of 18 percent per year or 1.5 percent per month will be charged on assessments not received 60 days after billing by the committee.

Based on the above, the Administrator of the AMS has determined that this action would not have a significant economic impact on a substantial number of small entities.

A 30-day comment period is provided to allow interested persons to respond to this proposal. All written comments timely received will be considered before a final determination is made on this matter.

List of Subjects in 7 CFR Part 920

California, kiwifruit, marketing agreements and orders

For the reasons set forth in the preamble, it is proposed that 7 CFR Part 920 be amended as follows:

PART 920—KIWIFRUIT GROWN IN CALIFORNIA

1. The authority citation for 7 CFR part 920 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

2. Part 920 is amended by adding a new § 920.112 to read as follows:

§ 920.112 Late payments.

Pursuant to § 920.41(a), late payment of assessments shall be subject to an interest charge of 1–½ percent per month on the balance due. Assessments shall be deemed late 60 days after the invoice date.

---

[1] Except a minimum of 8 hours per day will be billed in lieu of a minimum of 40 hours a week. Assignments in-plant for less than four weeks will be billed in accordance with § 52.42.

[2] See footnote 1 in introductory text of § 52.51(d).

Dated: August 30, 1989.

William J. Doyle,

Acting Deputy Director, Fruit and Vegetable Division.

7 CFR Part 932

[Docket No. FV-89-070]

Olives Grown in California; Change in Procedures for Nominating Producer Members To Serve on the California Olive Committee

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would change the mail balloting procedure used to nominate producer members and alternate producer members to serve on the California Olive Committee (Committee). The change would allow producers who are interested in serving on the Committee, but are unable to attend meetings at which candidates are selected for nomination, to submit their names to the Committee to be included on the mail ballot. Thus, more producers would be able to participate in the nomination process.

DATES: Comments must be received by October 6, 1989.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, DC 20090-6456. Comments should reference the docket number and date and page number of this issue of the **Federal Register** and will be available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Patrick Packnett, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2530-S, Washington, DC 20090-6456, telephone 202-475-3862.

SUPPLEMENTARY INFORMATION: This rule is proposed under Marketing Order No. 932 (7 CFR 932) regulating the handling of olives grown in California. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately seven handlers of California olives regulated under this marketing order each season, and approximately 1,390 olive producers in California. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. Most, but not all, of the olive producers and none of the olive handlers may be classified as small entities.

The Committee works with the Department in administering the marketing order. The Committee consists of 16 members and alternates. Eight members represent producers and eight members represent handlers. The producer members are apportioned among four districts within the State of California. Four handler members represent handlers who are cooperative handler organizations, and four represent handlers who are not cooperative handler organizations.

Sectioin 932.129 of Subpart-Rules and Regulations (7 CFR 932.108-932.161) specifies that producer members and alternates may be nominated by mail ballot or at nomination meetings as the Committee may determine. When mail ballot voting is used in lieu of nomination meetings, the Committee is required to schedule a meeting in each producing district for the purpose of selecting candidates for member and alternate member nominations. The mail ballot voting procedures set forth in paragraph (a)(1) of § 932.129 do not permit a producer who is not present at a candidate selection meeting and who is not recommended as a candidate by a producer in attendance at such a meeting to be included on a nomination ballot.

Experience has shown that there are instances where producers are unable to attend these meetings but would like to offer themselves as candidates for nomination. It is the Committee's view that all producers interested in serving on the Committee should be provided an opportunity to be considered by their fellow producers for nomination, and that circumstances preventing a producer from attending a meeting should not be cause for denying that producer a chance to be nominated to serve on the Committee.

At its June 6, 1989, meeting, the Committee unanimously recommended that provision be added to paragraph (a)(1) to allow producers who are unable to attend the candidate selection meeting in their respective districts to submit their name to the Committee office, no later than seven days after such meeting, to be placed on the ballot as a candidate for a member or an alternate member position. The proposed change would be made in § 932.129(a)(1) by redesignating paragraph (iv) as paragraph (v) and adding a new paragraph (iv) specifying that in the event a producer cannot attend a meeting but wishes to be included on the ballot, that producer may notify the Committee office in writing no later than 7 days after the date of the nomination meeting for the producer's district.

The proposed change would not impose any additional costs on producers or handlers. Furthermore, the change is for the benefit of producers and will provide an opportunity for greater producer participation in the Committee nomination process.

Based on the Committee's recommendation and other available information, the Administrator of the AMS has determined that this proposal would not have a significant economic impact on a substantial number of small entities.

List of Subjects in 7 CFR Part 932

California, Marketing agreements and orders, Olives.

For the reasons set forth in the preamble, 7 CFR Part 932 is proposed to be amended as follows:

PART 932—OLIVES GROWN IN CALIFORNIA

1. The authority citation for 7 CFR Part 932 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

2. Paragraph (a)(1)(iv) of § 932.129 is redesignated as paragraph (a)(1)(v) and

a new paragraph (a)(1)(iv) is added to read as follows:

§ 932.129 Nomination procedures for producer members.

(a) * * *

(1) * * *

(iv) In the event a producer cannot attend a meeting but wishes to be included on the ballot, that producer may notify the Committee office in writing no later than 7 days after the date of the nomination meeting for the producer's district and request that the producer's name be included on the ballot.

[Milk Order Nos. AO-231-A56 and AO-210-A48; DA-88-110]

Milk in the Texas and Southwest Plains Marketing Areas; Termination of Proceeding on Proposed Amendments to Tentative Marketing Agreements and to Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Withdrawal of proposed rule.

SUMMARY: This action terminates the current proceeding on proposals to amend the producer-handler definitions of the Texas and Southwest Plains Federal milk orders. A public hearing was held September 7-8, 1988, to consider proposals by three cooperative associations that represent a substantial number of the dairy farmers who supply the markets. On June 22, 1989, the Department issued its recommendation to deny the proposals. Subsequently, the cooperative associations have asked that the proceeding be terminated.

DATES: This withdrawal is effective September 6, 1989.

FOR FURTHER INFORMATION CONTACT: John F. Borovies, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, (202) 447-2089.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing: Issued June 10, 1988; published June 16, 1988 (53 FR 22499).

Notice of Rescheduled Hearing: Issued July 14, 1988; published July 19, 1988 (53 FR 27174).

Recommended Decision: Issued June 22, 1989; published June 28, 1989 (54 FR 27179).

Statement of Consideration

A public hearing was held to consider proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the Texas and Southwest Plains marketing areas. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), at Irving, Texas, on September 7-8, 1988, pursuant to notices issued June 10, 1988 (53 FR 22499) and July 14, 1988 (53 FR 27174).

The hearing was held to consider proposals by three cooperative associations (Associated Milk Producers, Inc., Mid-America Dairymen, Inc., and Southern Milk Sales, Inc.) to amend the producer-handler definitions of the two orders. A recommended decision, based on evidence presented at the hearing and the record thereof, denying the proposals was issued on June 22, 1989 (54 FR 27179). The recommended decision concluded, in part, that there was insufficient evidence to demonstrate the existence of disorderly marketing conditions that could warrant the adoption of the proposals. Interested parties were afforded an opportunity to file written exceptions thereon by July 28, 1989.

Although no exceptions were filed to the recommended decision, the proponent cooperative associations requested that the proceeding be terminated. As a result of their withdrawal of support for this proceeding, there is no apparent support for a further consideration of the proposals by any party with respect to this proceeding. Since the recommended decision was to deny the adoption of the proposals, recognition should be given to the proponent's request to terminate the proceeding.

Termination Order

In view of the foregoing, it is hereby determined that the aforesaid proceeding with respect to proposed amendments to the tentative marketing agreements and to the orders should be and is hereby terminated.

List of Subjects in 7 CFR Parts 1106 and 1126

Dairy products, Milk, Milk marketing orders.

The authority citation for 7 CFR Parts 1126 and 1106 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

Signed at Washington, DC, on: August 30, 1989.

Kenneth C. Clayton,

Acting Administrator.

BILLING CODE 3410-02-M

Animal and Plant Health Inspection Service

9 CFR Part 92

[Docket No. 85-061]

Horse Quarantine Facility Standards; Collection of Fees at Animal Quarantine Facilities

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: We propose to amend the regulations concerning quarantine facilities for animals being imported into the United States. We propose: (1) To include requirements for approval of permanent, privately operated quarantine facilities for horses (there are currently no requirements in the regulations for these facilities); and (2) to add new requirements to those already in the regulations for approval of temporary, privately operated quarantine facilities for horses. We believe these amendments are needed to ensure that private facilities meet minimum standards for disease control. We are also proposing that the government collect payment from each privately operated quarantine facility for services the government provides at that facility. We believe this amendment is necessary to ensure that the government is fully reimbursed for services it provides at private facilities.

DATE: Consideration will be given only to comments received on or before November 6, 1989.

ADDRESSES: To help ensure that your written comments are considered, send an original and three copies of Chief, Regulatory Analysis and Development, PPD, APHIS, USDA, Room 866, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refer to Docket No. 85-

061. Comments received may be inspected at USDA, Room 1141, South Building, 14th Street and Independence Avenue, SW., Washington, DC., between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Harvey A. Kryder, Senior Staff Veterinarian, Import-Export Products Staff, VS, APHIS, USDA, Room 756, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-7885.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR part 92 (referred to below as the regulations) govern the importation into the United States of specified animals and animal products in order to help prevent the introduction into the United States of various diseases. The regulations require that some of these animals be quarantined upon arrival in the United States as a condition of importation. There are two types of quarantine facilities for animals being imported into the United States: government operated facilities and privately operated facilities. The regulations currently contain requirements for the approval of various privately operated quarantine facilities, including temporary, privately operated quarantine facilities for horses. (See 9 CFR 92.11(d) (2) and (3)).

Permanent, Privately Operated Quarantine Facilities

The regulations do not contain requirements for the approval of permanent, privately operated quarantine facilities for horses. There is occasional public demand for quarantine services for horses in excess of those available at existing federal facilities. This demand may not be able to be filled by temporary, privately operated quarantine facilities because such facilities are established, approved, and operated by importers to handle only their own horses or to handle only horses imported for one unique importation, race, or show. Only the importer's horses or the horses involved in the event are quarantined in a temporary, privately operated quarantine facility. Therefore, in order to meet unfilled demand for quarantine services, we are proposing to add a new § 92.11(e) [1] containing requirements for approval of permanent, privately operated quarantine facilities for horses. In conjunction with the addition of these regulations, the existing regulations concerning temporary, privately operated quarantine facilities for horses would be modified as appropriate (see explanation under "Temporary, Privately Operated Quarantine Facilities," below).

We are not proposing to apply the existing regulations concerning approval of temporary, privately operated quarantine facilities for horses to permanent, privately operated quarantine facilities for horses. Though most of the requirements would be the same for both types of facilities, there are basic differences between permanent and temporary quarantine facilities. The most important difference is that the risk of disease spread within and from permanent facilities is greater than similar risks at temporary facilities. A permanent facility would be occupied on a continuing basis by a large number of animals in different lots. Smaller numbers of animals, in a single group, are quarantined in a temporary facility, and temporary facilities are only in operation a short period of time before all the animals are removed and the facility closed. These differences in operation dictate that security measures must be tighter, and disease detection and prevention measures must be stricter at permanent facilities than at temporary facilities. The proposed requirements for permanent and temporary facilities would appropriately reflect the differences between the two types of facilities, as noted in the following discussion.

With respect to permanent, privately operated quarantine facilities for horses, the regulations would be amended to add a definition of "permanent, privately operated quarantine facility," and to add requirements concerning cooperative agreements; responsibility for costs of operating facilities; supervision of facilities; physical plant requirements, including location and construction; sanitation and security; operating procedures for personnel, handling of horses, cleaning and disinfecting, and recordkeeping; and environmental responsibilities. Information would also be added to the regulations concerning how to apply for approval of permanent, privately operated quarantine facilities for horses, and concerning denial and withdrawal of approval.

The proposed definition of "permanent, privately operated facility" would state that a permanent, privately operated quarantine facility is a facility that offers quarantine services for horses to the general public on a continuing basis, and that is operated by an entity other than the Federal government.

Proposed § 92.11(e)(1) would require that no facility shall operate as a permanent, privately operated quarantine facility for horses unless it is operated in accordance with a cooperative agreement executed by the operator or other representative of the facility and by the Administrator, and unless the cooperative agreement includes all the requirements of proposed § 92.11(e). This provision is necessary to ensure that permanent, privately operated quarantine facilities for horses operate only in accordance with the regulations. As discussed below, we are proposing to add this requirement to § 92.11(d)(2) to apply to temporary facilities.

Proposed § 92.11(e)(1) would also provide that the cost of the facility and all costs associated with its maintenance and operation must be borne by the operator of the facility in accordance with § 92.12 of the regulations. This requirement would be necessary to ensure that all costs associated with the facility, which is a private enterprise, are borne by the individuals responsible.

Under the proposed regulations, Animal and Plant Health Inspection Service (APHIS) personnel would provide services at permanent, privately operated quarantine facilities. Proposed § 92.11(e)(2) provides that facilities meet the minimum requirements detailed in paragraph (e) in order to be approved, but that approval of any permanent, privately operated quarantine facility for horses is contingent upon a determination by the Administrator that sufficient APHIS personnel are available to provide services at the facility. This requirement is necessary to ensure that APHIS has enough personnel to provide the inspection, testing, and other services that the regulations require for horses in quarantine. Assignment of APHIS personnel will be carried out on a "first-come-first served" basis—*i.e.*, if sufficient personnel are available, they will be assigned to a facility as soon as the facility meets all other requirements for approval in proposed § 92.11(e). Because the deployment of these personnel at one facility might result in another facility not being approved due to insufficient APHIS personnel, we would provide in proposed § 92.11(e)(2) that the operator of an approved facility be required to make its services available to the general public on an equitable basis.

Proposed § 92.11(e)(2)(i) requires that the facility be operated in the presence of an APHIS veterinarian. This proposed requirement is intended to ensure that the facility operates in accordance with all applicable rules and regulations.

---

[1] Current § 92.11(e) would be redesignated § 92.11(f), and other redesignations would be made as needed, if this proposal is adopted.

Physical Plant Requirements—Permanent Facilities

Proposed § 92.11(e)(2)(ii) details the physical plant requirements necessary for approval of a permanent, privately operated quarantine facility for horses. The proposed requirements would ensure that the facility is capable of operating in accordance with the regulations, and of handling horses as the regulations require, to prevent the spread of diseases to horses in different lots or outside the facility. Under the proposed requirements, the facility must be located near enough to a port listed in § 92.3(a), or to any other port designated as an international port or airport by the U.S. Customs Service, to minimize the risk of imported horses introducing and disseminating diseases while moving from the port of entry to the quarantine facility. (See proposed § 92.11(e)(2)(ii)(A)). No similar provision exists with regard to temporary facilities. This is because in the case of temporary, privately operated quarantine facilities, APHIS personnel accompany the horses from the port to the quarantine facility. This could not be done with horses imported through permanent, privately operated quarantine facilities, because of the large number of shipments of horses into these facilities. Therefore, the requirement that permanent facilities be located near enough to the ports of entry to minimize disease risk while the animals are in transit is designed to offer the same degree of disease protection as that provided by APHIS personnel personally supervising the movement of horses to temporary facilities. Section 92.11(e)(2)(ii)(A) would also require that the quarantine facility be located at least ½ mile from any livestock. We have determined that disease agents for various infectious diseases of horses can travel in aerosol fashion, but are unlikely to do so for more than ½ mile.

The proposed requirements for permanent facilities also include construction requirements in proposed § 92.11(e)(ii)(B). The regulations would require that the facility be enclosed by a chain link security fence that is at least 8 feet high and that is made of a minimum of 11–½ gauge wire. A fence of this nature can reasonably be expected to prevent unauthorized persons, and horses and other animals from outside the facility, from having contact with horses quarantined in the facility. Also included would be requirements that all floors and the surfaces of that part of the walls with which the horses, their excrement or discharges have contact be constructed of materials that are impervious to moisture or than can undergo cleaning and disinfection between shipments without deterioration. The cleaning and disinfection of all of these surfaces would help ensure that disease agents would not be spread from one lot of horses to another. The surfaces most likely to be contaminated by disease agents would be those nearest the horses. The risk of surface contamination would decrease as the distance from the animals increased. For this reasons, the floors and lower part of the walls with which the horses, their excrement, or discharges would have contact, would need more frequent or more intensive cleaning and disinfection. The ceilings and the upper part of the walls would require considerably less maintenance to keep them clean and disinfected and would not need to be impervious to moisture. However, the regulations would require that they be able to undergo cleaning and disinfection between shipments without deterioration. Except in situations where the Administrator specifically approves alternative doors or openings, it would be required that all entryways be equipped with a series of two doors that are either solid or covered with double screening of 16-gauge or finer mesh, and that all other openings be covered with double screening of 16-gauge or finer mesh, to prevent disease-carrying insects or animals from entering or leaving the facility. Because we recognize that other methods of preventing the entry or exit of disease-carrying insects or animals might exist or might be developed, the proposed regulations would provide that the Administrator may approve alternative types of doors or openings if he or she determines that they are adequate to prevent the entry of insects that are vectors of diseases of horses.

It would also be required that the facility be constructed so that different lots of horses held at the facility at the same time are separated by physical barriers in such a manner that horses in one lot do not have physical contact with horses in another lot, or with their excrement or discharge. A "lot" of horses would be defined as a group of horses that, while being held on a conveyance or premises, have had opportunity for commingling (physical contact with other horses in the group or with their excrement or discharges) at any time during shipment to the United States. These provisions would help ensure that disease-affected or exposed horses in the facility do not spread that disease or expose other horses to it. Those horses that have already been commingled with other horses (and therefore are horses of the same lot) would be considered affected by a disease if any one horse in the lot has the disease. Therefore, it would not be necessary to separate horses within the same lot.

The proposed regulations also require that permanent facilities have ventilation capable of controlling moisture and odors and maintaining them at levels that are not injurious to the health of the horses in the facility. Those facilities that are approved to handle more than one lot of horses at a time would be required to have a separate, forced air ventilation system for each lot of horses that is housed in the facility, to prevent exposure of other lots of horses. No similar provision applies to temporary facilities. Unlike permanent facilities, temporary facilities cannot house more than one lot of horses. If an infectious disease is discovered, all horses in the temporary facility are considered to have been exposed to the disease. Ventilation would not be considered to be a contributing cause of further spread of the disease, since all the horses in the facility would be considered to have already been exposed.

The proposed regulations also require, for approval of permanent facilities, that certain areas, rooms and equipment necessary to conduct quarantine operations, to maintain the facility, and to keep it clean, are located within the facility. These include a vermin-proof feed storage area; enough office space to contain a chair, a desk, and a filing cabinet for recordkeeping; a storage area for equipment used in the facility; an area for washing clothes and equipment used in the facility; and a shower at the entrance to the necropsy area.

Showers would be required in the facility, to be located according to the configuration of the facility. To clarify these provisions regarding showers, we would add definitions for the terms "horse-holding area" and "horse-holding compound" to the regulations. A horse-holding area would be defined as that area in a privately operated quarantine facility in which a single lot of horses is held at one time. A horse-holding compound would be defined as that area in a permanent, privately operated quarantine facility that is comprised of all of the horse-holding areas in the facility. We would require that in those facilities where it is possible to move from each horse-holding area to a shower without passing through any

other horse-holding area, a shower be located at the entrance to the horse-holding compound. In those facilities where it is not possible to move from each horse-holding area to a shower without passing through any other horse holding area, the regulations would require that a shower be located at the entrance to each horse holding area. The regulations would require that a clothes storage and a clothes change area be located at each end of the shower areas. The regulations would also require that the facility contain a necropsy area that is at least 15′ × 15′ and that is illuminated by at least 70 footcandles—to provide sufficient space and light to conduct an adequate necropsy of a horse—and that is equipped with running water, a drain, a cabinet for storing instruments, and a refrigerator-freezer for storage of laboratory specimens. These requirements are all necessary to ensure that the facility is operated in a manner that will not spread disease into or out of the facility or among lots of horses in quarantine in the facility.

As noted above, the requirements for a permanent, privately operated quarantine facility would be more extensive than those for temporary facilities. Office space is not required at temporary facilities because they are not in operation long enough for paperwork to become a major concern for the APHIS veterinarian servicing the facility. A separate storage area for equipment for each lot of horses would be required at permanent, privately operated quarantine facilities. This would help ensure that equipment used on a horse in one lot does not come into contact with horses from another lot or with equipment used on those other horses. However, a separate storage area for equipment is not needed at temporary facilities. All horses in a temporary facility are considered to be one lot, and in the event that an infectious disease is discovered, all the animals are considered to have been exposed to the disease. A separate storage area would therefore not be effective in preventing further spread of disease in the temporary facility, since all the horses would be considered to have already been exposed.

A separate necropsy area is not required at temporary facilities, but would be required for permanent facilities. Based on our experience with regard to temporary facilities, we believe such a requirement would be impractical for those facilities, because they operate for only a short period of time and handle only a small number of horses. With regard to blood samples that must be drawn for all horses in quarantine, it has been our experience that this is less time-consuming to do at temporary facilities than at other facilities. Historically, there have been only a few horses in the temporary facility; therefore only a few samples need to be drawn. Because the horses are all in one lot, the APHIS veterinarians have been able to take all the samples during one visit. The number of samples is small; therefore, the APHIS veterinarian taking the samples has been able to carry the necessary equipment, supplies, and sample preparation and packaging materials with him or her. Because the number of samples is small, the APHIS veterinarian has also been able to retain duplicate samples under his or her supervision, and does not need a place to store them at the facility. This system has worked well at temporary facilities. However, we believe that at permanent facilities, with multiple lots of horses entering and leaving the facility on a continuing basis, this system would not be practical. Generally, many samples would have to be drawn, for numerous shipments, and it would be impractical for the veterinarian to carry the necessary equipment and supplies with him. Storage space for these items, work space for preparing and packaging samples for mailing, and storage space for duplicate samples, would be required.

With regard to examination of horses that have died in quarantine, temporary facilities are not required to have necropsy areas because, historically, they have not needed them. Temporary, privately operated quarantine facilities for horses have been operating for more than 15 years, and no horse has ever died while in quarantine at one of these facilities. The possibility of a horse dying while in quarantine at a temporary, privately operated quarantine facility is very low, because so few horses are imported through these facilities and they remain at the facilities for a very short time. However, we believe it is likely that some horses imported through permanent, privately operated quarantine facilities would die while in these facilities. We base this belief on the fact that some horses imported into the United States through Federally operated quarantine facilities, which are similar to the proposed permanent, privately operated quarantine facilities for horses in that they operate continuously and handle a large number of animals, have died while in quarantine in such facilities. Therefore, a necropsy area would be required at permanent, privately operated quarantine facilities for horses. Providing for necropsies within the facility would reduce the risk of spreading disease to horses outside the facility, by minimizing the transporting of the carcass of a horse that may have been diseased. The necropsy area would be necessary to perform post-mortem inspection of animals that die in the quarantine facility and to collect samples for laboratory diagnosis—actions that are taken to determine if the death of the horse was associated with a disease, of if it was caused by other factors, such as colic or physical injury.

The proposed regulations also specify additional sanitation and security requirements for permanent, privately operated quarantine facilities for horses. These appear at proposed § 92.11(e)(2)(ii)(C). These provisions include requirements that adequate equipment and supplies for cleaning, disinfecting, and maintaining the facility, and for controlling pests, be available. In addition, these provisions require that there be an adequate supply of potable water; that wastes be disposed of by either incineration or burial, or in a public sewer system; and that arrangements be made for carcasses to be disposed of by incineration, burial, or grinding and then heating for at least 1 hour at a temperature of not less than 285°F. Grinding and heating a carcass according to the time and temperature specified (also known as rendering) is effective in destroying any disease agents that might be present in the carcass. The proposed provisions also include a requirement that surface drainage into and out of the facility be controlled in such a manner that no agent of livestock diseases can be spread into or from the facility; that clean clothing and footwear, and receptacles for clothing that has been worn, be provided; and that feed and bedding for horses in quarantine be stored in the facility and originate in an area not under quarantine for cattle fever ticks. These requirements are all designed to ensure that disease is not spread into or out of an approved quarantine facility.

Personnel at Permanent Facilities

Specific regulations concerning personnel at permanent, privately operated quarantine facilities for horses are contained in § 92.11(e)(2)(iii)(A) of the proposed regulations. These requirements would restrict access to the facility to persons working at the facility or to persons specifically granted access by the APHIS veterinarian to perform veterinary

BEST COPY AVAILABLE

functions, and would require that a log be kept of all persons entering and leaving the facility. Such a log would not be required at temporary facilities, which historically have been small enough that APHIS personnel can exercise complete control over persons entering the facility. When APHIS personnel leave the facility, they seal it, making further access to the facility impossible until APHIS personnel return to break the seal. Because they already operate under high security, additional security provisions for temporary facilities appear unnecessary.

The regulations would also require that all individuals change into clean clothing and footwear when entering and leaving the horse-holding compound within the facility, and when moving from one lot of horses to another lot of horses within the horse-holding compound. The regulations would require that enough clothing and footwear be available at the facility to allow these individuals to change clothing and footwear when required. The regulations would also require that those individuals shower when entering and leaving the horse-holding compound, when moving from one lot of horses to another lot of horses in the horse holding compound, and when leaving the necropsy area after conducting a necropsy. At the end of each workday, the operator of the facility would be required to collect work clothing worn into the horse-holding areas and keep it in a bag until the clothing is washed. Used footwear would be required to be left in the clothes change area or cleaned with hot water (148 °F. minimum) and detergent, and disinfected with either a quaternary ammonia-based disinfectant or a phenolic-based disinfectant, applied in accordance with the label approved by the Environmental Protection Agency. Any vehicle entering the quarantine facility building would have to be cleaned and disinfected in the presence of an inspector before entering and leaving the facility. These requirements are all necessary to preclude transmission of any equine disease agent into or out of the facility.

Handling of Horses at Permanent Facilities

Along with location and construction of facilities and personnel within the facility, the proposed regulations would govern the handling of horses at the facility. These requirements are contained in § 92.11(e)(2)(iii)(B) of the proposed regulations. These requirements would provide that horses be handled by lot (which could include any number of animals), and that each lot of horses be quarantined on an "all-in, all-out" basis. Removing animals from the lot, except for diagnostic purposes, after the start of the quarantine period, and adding animals to the lot after the start of the quarantine period would be prohibited. The proposed provisions would also require that the portion of the facilities where a lot of horses has been quarantined must be cleaned and disinfected after the animals are released from quarantine, so that newly arriving horses are not exposed to any diseases carried by the previous lot of horses. This cleaning and disinfection would have to take place in the presence of an APHIS veterinarian. These requirements would ensure that animals are released into the United States only if quarantine requirements have been complied with. These requirements would also simplify management of horses in the facility and would minimize possible disease spread.

Recordkeeping at Permanent Facilities

Proposed § 92.11(e)(2)(iii)(C) would require that the supervisory APHIS veterinarian maintain a daily log. Basically, the log would record the health of each horse each day of the quarantine. Maintaining this log would act as a control, ensuring that all horses were accounted for, properly quarantined, and incompliance with all regulatory requirements before release from the quarantine facility. The log would also provide information needed to trace animal diseases to their country of origin. Information required for the daily log for each lot of horses would include: Individual identification of the horses, source of origin of the horses in the lot, total number of horses in the lot when imported, number of dead or injured horses when the lot arrived, the date the lot was placed into the facility, the number of deaths each day in the lot of horses during the quarantine period, necropsy results, laboratory findings on horses that died during the quarantine period, and date of prescribed tests and results. Other information required would be Department import permit numbers for each lot, the date the lot was removed from the facility, and any other observations concerning the general health of the horses in the lot. The supervisory APHIS veterinarian of the facility would also be required to make, at the time each horse is identified, an identification record containing the identification number or markings of each horse. These records would be required to be maintained at the facility for 12 months from the date the horses were released from quarantine, and would have to be made available to APHIS personnel on request. The records would be required to be kept for 12 months to facilitate any APHIS investigation into possible alleged violations of import requirements or disease traceback. It has been our experience that virtually all investigations and disease tracebacks are conducted in the 12 months following importation. Similar information and recordkeeping requirements do not exist for temporary facilities. Temporary facilities operate only for a short period of time and then close. Frequently, there is no facility remaining where records can be maintained or inspected. In many cases, the operators of the facilities are not citizens of the United States, and return to their homeland after the temporary facilities close. However, all horses that will be quarantined at a privately operated quarantine facility must enter the United States under a permit. That permit provides identification and other information on the health, source, and owner of each animal. Permits are issued by APHIS, and APHIS maintains records of all permits issued.

Compliance With Environment Regulations

We are also proposing to require that each permanent, privately operated quarantine facility for horses be certified as complying with all applicable environmental regulations by a Federal or State government official responsible for ensuring compliance with those regulations. This requirement, which would appear at proposed § 92.11(e)(2)(iv), is necessary to provide us with documentation that all environmental requirements are met.

Additional Requirements

To allow adjustments for unanticipated circumstances, the regulations would provide, at § 92.11(e)(2)(v), that additional requirements could be imposed by the Administrator in specific cases in order to assure that the quarantine of horses in permanent, privately operated quarantine facilities is adequate "to enable determination of their health status, prevent spread of disease among horses in quarantine, and prevent escape of equine disease agents from the facility."

Approval of Permanent Facilities

The proposed regulations include procedures to request approval of permanent, privately operated quarantine facilities for horses. One of the proposed requirements is that

applications for approval be submitted to the Administrator no less than 90 days prior to the proposed date of entry of the first lot of horses in the facility. This is in contrast to the 15 days required for applications for approval of temporary facilities. This time is needed to inspect and approve the facility, then to arrange for personnel to provide services at the facility. The amount of time needed to make personnel arrangements so that services can be provided at the different kinds of facilities differs. Temporary facilities operate only for a short period of time. Therefore, all personnel arrangements that have to be made to provide services at such facilities can be made on a temporary basis, and they are relatively easy and quick to arrange, even if personnel must be detailed from other jobs. However, permanent facilities operate on a long-term basis. Long-term personnel plans and arrangements must be made, including the possible hiring of personnel or the permanent transfer of existing personnel. The time needed to make these arrangements is much longer than the time needed to make arrangements to provide services at temporary facilities.

The proposed regulations also include procedures for denying or withdrawing approval of permanent, privately operated quarantine facilities for horses if any provision of the proposed regulations is not met. The regulations would also establish due process procedures regarding a denial or withdrawal of approval and an opportunity for a hearing when there is a dispute of material fact regarding the denial or withdrawal. In addition to denial or withdrawal of approval when the requirements for approval are not complied with, approval would automatically be withdrawn by the Administrator when the operator notifies the Area Veterinarian in Charge for the state in which the facility is located, in writing, that the facility is no longer in operation.

Temporary, Privately Operated Quarantine Facilities

This document also proposes to make several amendments to the regulations concerning approval of temporary, privately operated quarantine facilities for horses. Certain of the provisions are also required for the approval of permanent, privately operated quarantine facilities, and would make requirements for both types of privately operated facilities more consistent.

The regulations would be amended to add a definition of "Temporary, privately operated quarantine facility." The definition would state that a temporary, privately operated quarantine facility is a facility that offers quarantine services for one lot of horses at a time, and that is owned and operated by any entity other than the Federal government.

In current § 92.11(d), various functions at temporary, privately operated quarantine facilities are referred to as being carried out by the importer of the horses, rather than by the operator of the facility. In actual practice, however, it is the operator of the facility who carries out these functions, and the operator is not necessarily the importer. For this reason, we are proposing to change references to "importer" in § 92.11(d) to "operator."

We are proposing to amend the regulations to add, at § 92.11(d)(2), a requirement that no facility operate as a temporary, privately operated quarantine facility for horses unless it is operated in accordance with a cooperative agreement executed by the operator or other designated representative of the facility and by the Administrator, and unless the terms of the cooperative agreement require compliance with § 92.11(d) (2) and (3) (requirements for approval of temporary, private facilities). This provision is necessary to ensure that temporary, privately operated quarantine facilities for horses operate only in accordance with the regulations.

Physical Plant Requirements—Temporary Facilities

The proposed amendments would include specific construction requirements for temporary facilities, at § 92.11(d)(3)(ii)(B). To ensure against absorption and retention of disease agents, all walls, floors, and ceilings would be required to be constructed so that the floors and surfaces of that part of the walls with which the horses, their excrement, or discharges have contact are impervious to moisture and can undergo cleaning and disinfection between shipments without deterioration. The cleaning and disinfection of all these surfaces would help ensure that disease agents would not be spread to animals that might be quarantined at the temporary facility at some future date. The surfaces nearest the horses would be most likely to be contaminated by disease agents, with the risk of surface contamination decreasing with distance from the animals. For this reason, the floors and lower part of the walls, with which the horses, their excrement, or their discharges would have contact, would need more frequent or more intensive cleaning and disinfection. The ceilings and the upper part of the walls would require considerably less maintenance to keep them clean and disinfected and would not need to be impervious to moisture. They would, however, be required to be able to undergo cleaning and disinfection between shipments without deterioration.

The quarantine facility would have to be constructed with each entryway equipped with a series of two doors that are either solid or equipped with double screening of 16-gauge of finer mesh, and with other openings covered with double screening of 16-gauge or finer mesh, unless the Administration specifically approves other types of doors and openings as adequate to prevent the entry of insects that are vectors of diseases of horses.

We are also proposing to amend the regulations to require that surface drainage into and out of temporary facilities be controlled in a manner adequate to prevent any agent of livestock diseases from being spread into or from the facility. This requirement would appear in § 92.11(d)(3)(ii)(B)(*3*).

We are also proposing to amend § 92.11(d)(3)(ii)(B) to add a new paragraph (*4*) to require that temporary, privately operated quarantine facilities for horses provide a shower and clothes storage and change area. Unlike the proposed regulations for permanent, privately operated quarantine facilities, we are not proposing to require that the shower and clothes storage and change area for a temporary facility be in any specific location. Temporary facilites have historically been small facilities, and the APHIS personnel supervising activities there have been able to monitor the entire facility at one time. Therefore, it appears that APHIS personnel can ensure personally that the clothes changing and showering requirements proposed in this document are met.

Section 92.11(d)(3)(iii)(C)(*7*) would require that arrangements be made for carcasses to be disposed of by incineration or burial, or by grinding and then heating the carcass for at least 1 hour at a temperature of not less than 265° F. (also known as rendering).

Proposed new paragraph § 92.11(d)(3)(iii)(F) would require that temporary, privately operated quarantine facilities for horses have equipment and supplies available for clearing, disinfecting, and maintaining the facility, and for controlled pests. Although the current regulations address cleaning, disinfecting, and pest control, the proposed new paragraph would clarify that such basic equipment and supplies must be available.

It is proposed to amend the regulations to add, at § 92.11(d)(3)(iii), a new paragraph (G) to require that temporary, privately operated facilities for horses have a vermin-proof feed storage area. This would ensure that feed for horses in quarantine at such facilities is not contaminated by vermin, which could carry disease.

Sanitation Procedures at Temporary Facilities

The regulations would also be amended to add requirements, at new § 92.11(d)(3)(iii)((H), (I), and (J), that the operator of the facility provide enough clean clothing and footwear to ensure that workers at the facility have clean clothing and footwear at the start of each workday. At the end of each workday, the operator would be required to collect all work clothing worn into the horse-holding area and keep it in a bag until the clothing is washed. The facility would be required to have a receptacle for soiled and contaminated clothing in the clothes storage and change area. The regulations would require that used footwear either be left in the clothes change area or be cleaned with hot water (148° F. minimum) and detergent and disinfected with either a quaternary ammonia-based disinfectant or a phenolic-based disinfectant, applied in accordance with the label approved by the Environmental Protection Agency. All persons granted access to the facility would be required to wear clean protective clothing and footwear upon entering the horse-holding area, and to shower and change their clothing and footwear when entering and leaving the facility. (See proposed § 92.11(d)(3)(iv)(A)(*4*) and (*5*)). These proposed amendments are all necessary to ensure that the facility is operated in a manner that will not spread disease into or out of the facility. No amendments are proposed to require personnel to shower or change while in the facility. Such provisions, though proposed for permanent facilities, as explained above, are not necessary at temporary facilities. The horses in a temporary facility are considered to be one lot, and in the event that an infectious disease is discovered, all the animals are considered to have been exposed to the disease. Showering and changing requirements for personnel already in the facility would therefore not be effective in preventing further spread of the disease in the facility, since all the horses would already have been exposed.

It is also proposed to amend the regulations at § 92.11(d)(3)(iv) to add a new paragraph (C) to require that the facility be throughly cleaned and disinfected with a disinfectant authorized in § 71.10(a)((5) of title 9, CFR, after the horses are released from quarantine and before the facility is used for any other purpose. The disinfectants authorized in § 71.10(a)(5) have proven to be effective, and appropriate for use in an animal facility. This proposed requirement is to ensure that there is no risk of disease contamination or spread.

APHIS Services

We are also proposing to amend the provisions of § 92.12(a), regarding APHIS's services and costs at privately operated quarantine facilities for horses and other types of animals, to make the operators of the facilities responsible for requesting and paying for services provided by APHIS. Because, under the proposed regulations, the operator of the facility would be responsible for ensuring that it is operated and maintained according to the regulations, we believe that it is appropriate for the operator to deal directly with APHIS in requesting necessary services. Additionally, while APHIS personnel have no direct or continuing contact at private facilities with individual importers or their agents, private quarantine facilities do have direct contract with importers or their agents, and are equipped and experienced in billing and collecting for services provided to those importers. Under these circumstances, it appears it would be more efficient and practical for APHIS to collect payments for Federal government-provided services from the private facility involved, rather than from individual importers.

Miscellaneous

We are also proposing to amend the regulations to clarify that quarantine facilities provided by other than the Federal government are "privately operated" quarantine facilities.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this proposed rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule would have an effect on the economy of less than $100 million; would not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and would not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Under the proposed regulations, fees for Federal-government provided services would not be increased. At this time, there is one permanant, privately operated quarantine facility used for horses in the United States, and it is a small entity. Over the period of a year, approximately 10–25 temporary privately operated quarantine facilities, all of which are small entities, are used by importers of horses. The amendments to the regulations proposed by this document would not require significant construction changes to either the one permanent, privately operated facility for horses currently in use, or to the design of temporary privately operated facilities for horses.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V).

Paperwork Reduction Act

Information collection requirements contained in this document have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and have been assigned OMB control number 0579–0040.

List of Subjects in 9 CFR Part 92

Animal diseases, Canada, Imports, Livestock and livestock products, Mexico, Poultry and poultry products, Quarantine, Reporting and recordkeeping requirements, Transportation, Wildlife.

Accordingly, it is proposed to amend 9 CFR part 92 as follows:

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

1. The authority citation for part 92 would continue to read as set forth below:

Authority: 7 U.S.C. 1622; 19 U.S.C. 1306; 21 U.S.C. 102–105, 111, 134a, 134b, 134c, 134d, 134f, and 135; 31 U.S.C. 9701; 7 CFR 2.17, 2.51, and 371.2(d).

2. Section 92.1 would be amended by adding, in alphabetical order, the following new definitions:

§ 92.1 Definitions.

* * * * *

Horse-holding area. That area in a privately operated quarantine facility in which a single lot of horses is held at one time.

Horse-holding compound. That area in a permanent, privately operated quarantine facility that is comprised of all of the horse-holding areas in the facility.

* * * * *

Permanent, privately operated quarantine facility. A facility that offers quarantine services for horses to the general public on a continuing basis and that is owned and operated by an entity other than the Federal Government.

* * * * *

Temporary, privately operated quarantine facility. A facility that offers quarantine services for one lot of horses at a time, and that is owned and operated by an entity other than the Federal government.

* * * * *

§ 92.3 [Amended]

3. In § 92.3, the heading to paragraph (g) would be revised to read as follows:

(g) *Ports and privately operated quarantine facilities for horses.* * * *

4. In § 92.3, paragraph (g) would be amended by removing the words "U.S. Customs Service and quarantined at quarantine facilities provided by the importer" and adding in their place the works "U.S. Customs Service and quarantined at privately operated quarantine facilities", and by removing the phrase "§§ 92.2(i), 92.4(a), 92.8(a), 92.11(d), and 92.17 are met." and adding in its place the phrase "§§ 92.2(i), 92.4(a), 92.8(a), 92.17, and either §§ 92.11(d) or 92.11(e) as appropriate, are met."

§ 92.11 [Amended]

5. In § 92.11, paragraph (d)(2), the first sentence would be revised to read as follows: "Horses presented for entry into the United States as provided in § 92.3(g) of this part for quarantine in temporary facilities provided by the importer shall be quarantined in facilities approved by the Administrator."

6. In § 92.11, the last word in the last sentence in paragraph (d)(2) would be changed from "importer" to "operator".

7. In § 92.11(d), the following sentence would be added to the end of paragraph (d)(2): * * * "No facility shall operate as a temporary, privately operated quarantine facility for horses unless it is operated in accordance with a cooperative agreement executed by the operator or other designated representative of the facility and by the Administrator, and unless such cooperative agreement includes all the applicable requirements of this section and includes a requirement that the cost of the facility and all costs associated with the maintenance and operation of the facility shall be borne by the operator in accordance with the provisions of § 92.12 of this part."

8. In § 92.11, paragraph (d)(3), the heading and introductory text would be revised to read as follows:

(d) * * *

(3) *Standards and handling procedures for approval of temporary, privately operated quarantine facilities.* To qualify for designation as a temporary privately operated quarantine facility for horses, the facility shall be maintained and operated in accordance with the following standards:

* * * * *

9. In § 92.11, paragraph (d)(3)(i), the words "by the importer of his agent" would be removed and the words "by the operator of the facility" would be added in their place.

10. In § 92.11, paragraph (d)(3)(ii)(B) would be revised to read as follows:

§ 92.11 Quarantine requirements.

* * * * *

(d) * * *

(3) * * *

(ii) * * *

(B) *Construction.* (*1*) The quarantine facility shall be constructed so that the surfaces of the floors and the surfaces of that part of the walls with which the horses, their excrement, or discharges have contact are constructed of materials that are impervious to moisture and that can undergo cleaning and disinfection between shipments without deterioration. The ceiling and that part of the walls with which the horses, their excrement, or discharges do not have contact shall be constructed so that they can undergo cleaning and disinfection between shipments without deterioration.

(*2*) The quarantine facility shall be constructed with each entryway equipped with a series of two doors that are either solid or covered with double screening of 16-guage or finer mesh, and with other openings covered with double screening of 16-gauge or finer mesh, unless the Administrator specifically approves other types of doors and openings as adequate to prevent the entry of insects that are vectors of diseases of horses.

(*3*) Surface drainage into or from the facility shall be controlled in a manner adequate to prevent any agent of livestock diseases from being spread into or from the facility;

(*4*) There shall be a shower and a clothes storage and change area in the facility.

* * * * *

11. In § 92.11, paragraph (d)(3)(iii)(C), the first sentence would be revised to read as follows: "Upon the death or destruction of any horse, the operator must arrange for disposal of the carcass, in conformance with all applicable environmental quality control standards, by incineration or burial, or by grinding and then heating any carcasses for at least one hour at a temperature of not less than 265 °F." * * *

12. In § 92.11, paragraphs (d)(3)(iii)(A), (d)(3)(iii)(C), and (d)(3)(iv)(A)(*2*) would be amended by removing the words "the importer", the one time they appear in each of those paragraphs, and adding in their place the words "the operator".

13. In § 92.11, new paragraphs (d)(3)(iii) (F), (G), (H), (I), and (J); and (d)(3)(iv)(A) (*4*) and (*5*) would be added, to read as follows:

§ 92.11 Quarantine requirements.

* * * * *

(d) * * *

(3) * * *

(iii) * * *

(F) The facility shall have available equipment and supplies to maintain the facility in clean and sanitary condition, including insect and pest control equipment and supplies.

(G) The facility shall have a vermin-proof feed storage area.

(H) The operator of the facility shall provide enough clean clothing and footwear to ensure that workers at the facility have clean clothing and footwear at the start of each workday.

(*i*) The facility shall have a receptacle for soiled and contaminated clothing in the clothes storage and change area.

(*j*) At the end of each workday, the operator shall collect all work clothing worn into the horse-holding area and keep it in a bag until the clothing is washed. Used footwear shall either be left in the clothes change area or cleaned with hot water (148°F minimum) and detergent and disinfected with either a quaternary ammonia-based disinfectant or a phenolic-based disinfectant, applied in accordance with the label approved by the Environmental Protection Agency.

(iv) * * *

(A) * * *

(*4*) Persons granted access to the quarantine facility shall wear clean protective clothing and footwear upon entering the horse-holding area.

(*5*) Persons granted access to the quarantine facility shall shower when entering and leaving the horse-holding area.

* * * * *

14. In § 92.11, paragraph (d)(3)(iv)(B) would be amended by removing the words "in an approved quarantine facility provided by the importer" and adding, in their place, the words "in an approved temporary, privately operated quarantine facility".

15. In § 92.11, a new paragraph (d)(3)(iv)(C) would be added to read as follows:

§ 92.11 Quarantine requirements.

* * * * *

(d) * * *

(3) * * *

(iv) * * *

(c) *Facility.* The facility shall be thoroughly cleaned and disinfected in the presence of an APHIS veterinarian with a disinfectant authorized in § 71.10(a)(5) of this chapter, after the horses are released from quarantine and before the facility is used for any other purpose.

* * * * *

16. In § 92.11, paragraphs (e) (f), and (g) would be redesignated paragraphs (f), (g), and (h) and footnotes 3, 4, and 5 would be redesignated as footnotes 5, 6, and 7.

17. In § 92.11, redesignated paragraph (f) would be amended by changing the reference to "paragraph (f)", wherever it appears, to read "paragraph (g)", and by changing the reference to "paragraph (f)(7)" to read "paragraph (g)(7)".

18. In § 92.11, redesignated paragraph (g), the introductory text would be amended by changing the reference to "paragraph (f) (1) through (6)" to read "paragraphs (g) (1) through (6), and by changing the reference to "§ 92.11(g)" to read "§ 92.11(h).

19. In § 92.11, redesignated paragraph (g)(3)(ii)(A) would be amended by changing the reference to "paragraph (e)" to read "paragraph (f)".

20. In § 92.11, redesignated paragraph (g)(5)(vi) would be amended by changing the reference to "paragraphs (f)(6)(ii)(B) or (f)(6)(ii)(C)" to read "paragraphs (g)(6)(ii)(B) or (g)(6)(ii)(C)".

21. In § 92.11, redesignated paragraph (g)(6)(i) would be amended by changing the reference to "paragraph (f)(6)(ii)" to read "paragraph (g)(6)(ii)".

22. In § 92.11, redesignated paragraph (g)(6)(ii) would be amended by changing the reference to "paragraph (f)(6)(iv)" to read "paragraph (g)(6)(iv)".

23. In § 92.11, redesignated paragraph (g)(7)(i) would be amended by changing the reference to "paragraph (e)" to read "paragraph (f)", and by changing the reference to "paragraph (f)(7)(iii)" to read "paragraph (g)(7)(iii)".

24. In § 92.11, redesignated paragraph (g)(7)(ii) would be amended by changing the reference to "paragraph (f)(7)(iii)" to read "paragraph (g)(7)(iii)".

25. In § 92.11, redesignated paragraph (g)(7)(iii), paragraph (A)(5) "Cooperative and Trust Fund Agreement" would be amended by changing the reference to "§ 92.11 (f)" to read "§ 92.11(g)".

26. In § 92.11, redesignated paragraph (g)(7)(iii), paragraph (A)(13) of the "Cooperative and Trust Fund Agreement" would be amended by changing the reference to "§ 92.11(f)(3)(ii)(C)" to read "§ 92.11(g)(3)(ii)(C)".

27. In § 92.11, redesignated paragraph (g)(7)(iii), paragraph (C)(2) of the "Cooperative and Trust Fund Agreement" would be amended by changing the reference to "paragraph (f)(7)(iii)(A)(16)" to read "paragraph (g)(7)(iii)(A)(16)".

28. In § 92.11, redesignated paragraph (h) would be amended by changing the reference to "paragraph (f)" to read "paragraph (g)".

29. In § 92.11, a new paragraph (e) would be added to read as follows:

§ 92.11 *Quarantine requirements.*

* * * * *

(e) *Standards for approval of permanent, privately operated quarantine facilities for horses, and handling procedures for importation of horses.*—(1) *Cooperative agreement.* No facility shall operate as a permanent, privately operated quarantine facility for horses unless it is operated in accordance with a cooperative agreement executed by the operator or other designated representative of the facility and by the Administrator, and unless such cooperative agreement includes all the requirements of paragraph (e) of this section and includes a requirement that the cost of the facility and all costs associated with the maintenance and operation of the facility shall be borne by the operator in accordance with the provisions of § 92.12.

(2) *Approval of facilities.* To quality for designation as a permanent, privately operated quarantine facility for horses,[3] and to retain such approval, the facility and its maintenance and operation must meet the minimum requirements of paragraph (e) of this section. Approval of any quarantine facility shall be contingent upon a determination made by the Administrator that sufficient personnel are available to provide services required by the facility if approved. In the event that more than one facility requests approval, the facilities shall have APHIS personnel assigned to them in the order that they meet all other criteria for approval. The operator of the facility shall make its services available to the general public on an equitable basis. The cost of the facility and all costs associated with the maintenance and operation of the facility shall be borne by the operator in accordance with the provisions of § 92.12 of this part.

(i) *Supervision of the facility.* The facility shall be operated in the presence of an APHIS veterinarian.

(ii) *Physical plant requirements.* The facility shall comply with the following requirements:

(A) *Location.* The quarantine facility shall be located close enough to one of the ports listed in § 92.3(a) of this part, or at any other port designated as an international port or airport by the U.S. Customs Service, to minimize the possibility of introduction and dissemination of diseases by the imported horses while in transit from the point of entry to the quarantine facility, and shall be located at least one-half mile from any livestock.

(B) *Construction.* The quarantine facility building shall:

(*1*) Be surrounded by a chain link security fence that is at least 8 feet high and that is made of a minimum of 11½ guage wire;

---

[3] Information as to the location of such facilities may be obtained from the Administrator, c/o Import Export Animals Staff, VS, APHIS, USDA, Room 765, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

(*2*) Be constructed so that the surfaces of the floors and the surfaces of that part of the walls with which the horses, their excrement, or discharges have contact that constructed of materials that are impervious to moisture and that can undergo contained cleaning and disinfection between shipments without deterioration;

(*3*) Be constructed so that the ceiling and that part of the walls with which the horses, their excrement, or discharges do not have contact can undergo cleaning and disinfection between shipments without deterioration;

(*4*) Be constructed so that each entryway is equipped with a series of two doors that are either solid or covered with double screening of 16-gauge or finer mesh, and so that other openings are covered with double screening of 16-gauge or finer mesh, unless the Administrator specifically approves other types of doors and openings as adequate to prevent the entry of insects that are vectors of diseases of horses;

(*5*) Be constructed so that different lots of horses in the facility at the same time are separated by physical barriers in such a manner that horses in a given lot do not have physical contact with horses in another lot, or with their excrement, or discharge (for the purposes of this section a "lot" shall mean a group of horses that, while being held on a premises or conveyance, have had opportunity for commingling (physical contact with other horses in the group or with their excrement or discharges) at any time during shipment to the United States);

(*6*) Have a ventilation capacity sufficient to control moisture and odor and maintain them at levels that are not injurious to the health of the horses in quarantine;

(*7*) Have a separate, controlled, forced air ventilation system for each lot of horses that is housed in the facility, to prevent exposure to airborne diseases of other lots of horses in the facility, if the facility is approved to handle more than one lot of horses at a time;

(*8*) Have a separate, vermin-proof, feed storage area, if feed is stored in the facility;

(*9*) Have office space for recordkeeping that is of sufficient size to contain a chair, a desk, and a filing cabinet;

(*10*) Have a necropsy area that is at least 15′×15′, that is illuminated with at least 70 footcandles of light, and that is equipped with running water, a drain, a cabinet for storing instruments, and a refrigerator-freezer for storing specimens for laboratory examination;

(*11*) Have an area for washing clothes and equipment used in the facility;

(*12*)(*i*) In facilities where it is possible to move from each horse-holding area to a shower without passing through any other horse-holding area, have a shower at the entrance to the horse-holding compound; or

(*ii*) In facilities were it is not possible to move from each horse-holding area to a shower without passing through any other horse-holding area, have a shower at the entrance to each horse-holding area;

(*13*) Have a shower at the entance to the necropsy area;

(*14*) Have a clothes storage and change area at each end of each shower area; and

(*15*) Have a storage area for hoses, brooms, shovels, soaps, and disinfectants.

(*16*) Have a separate storage area for equipment and supplies for each lot of horses.

(C) *Sanitation and security.* Arrangements shall exist for:

(*1*) Equipment and supplies necessary to maintain the facility in clean and sanitary condition, including insect and pest control equipment and supplies;

(*2*) A supply or portable water adequate to meet all watering and cleaning needs.

(*3*) Power cleaning and disinfecting equipment with adequate capacity to disinfect the facility and equipment;

(*4*) Stocks of a disinfectant authorized in § 71.10(a)(5) of this chapter sufficient to disinfect the entire facility;

(*5*) Disposal of wastes, other than dead horses, by burial or incineration, or in a public sewer system in compliance with all applicable environmental quality control standards;

(*6*) Upon the death or destruction of any horse, disposal of the carcass, in conformance with all applicable environmental quality control standards, by incineration or burial, or by grinding and then heating any carcasses for at least one hour at a temperature of not less than 265 °F.

(*7*) Control of surface drainage into or from the facility in a manner adequate to prevent any agent of equine diseases from being spread into or from the facility;

(*8*) Enough clothing and footwear to ensure that workers at the facility have clean clothing and footwear at the start of each workday and when they move from one lot of horses to another lot of horses;

(*9*) A receptacle or receptacles situated so that clothing that has been worn into a horse holding area can be deposited in the receptacle after workers leave the horse holding area and before they enter the shower;

(*10*) Feed and bedding for horses in quarantine that originates in an area not under quarantine because of cattle fever ticks (see part 72 of this chapter) and that is stored in a manner that protects these supplies from being spoiled or infested by vermin.

(iii) *Operational procedures.* To retain designation as an approved quarantine facility, the following procedures shall be observed at the facility at all times:

(A) *Personnel.* Access to the facility shall be granted only to persons working at the facility or to persons specifically granted such access by the APHIS veterinarian in order to conduct veterinary functions. A daily log shall be maintained to record the entry and exit of all persons entering the facility.

(*1*) All personnel granted access to the horse-holding compound shall:

(*i*) Change into clean clothing and footwear when entering and leaving the horse-holding compound, and when moving from one lot of horses to another lot of horses in the horse-holding compound;

(*ii*) Shower when entering and leaving the horse-holding compound, and when moving from one lot of horses to another lot of horses within the horse-holding compound; and

(*iii*) Shower when leaving the necropsy area after conducting a necropsy;

(*2*) At the end of each workday, the operator of the facility shall collect work clothing worn into each horse-holding area and keep it in a bag until the clothing is washed. Used footwear shall be either left in the clothes change area or cleaned with hot water (148 °F. minimum) and detergent and disinfected with either a quaternary ammonia-based disinfectant or a phenolic-based disinfectant, applied in accordance with the label approved by the Environmental Protection Agency.

(*3*) Any vehicle entering the quarantine facility building shall be cleaned and disinfected in the presence of an inspector with a disinfectant authorized in § 71.10 of the regulations immediately before entering and before leaving the facility.

(B) *Handling of the horses in quarantine.* The horses in the quarantine facility shall be handled in compliance with the following requirements:

(*1*) Each lot of horses to be quarantined shall be placed in the facility on an "all-in, all-out" basis. No horse shall be taken out of the lot while it is in quarantine except for diagnostic purposes and no horse shall be added to a lot while the lot is in quarantine.

(*2*) The portion of the quarantine facility from which a lot of horses has been released shall be thoroughly cleaned and disinfected, in the presence of an inspector, with a disinfectant authorized in § 71.10(a)(5) of this chapter, before a new lot is placed in that portion of the facility.

(C) *Records.* It shall be the responsibility of the supervisory APHIS veterinarian to maintain a current daily log for each lot of horses. The supervisory APHIS veterinarian shall make an identification record containing the identification number or markings of each horse, and shall record such information as the general condition of the horses each day, source or origin of the horses in the lot, total number of horses in the lot when imported, number of dead or injured horses when the lot arrived, the date the lot was placed into the facility, the general condition of the horses each day, every medication administered to the horses, number of deaths in the lot each day during the quarantine period, necropsy results, laboratory findings on horses that died during the quarantine period, date of prescribed tests and results, Department import permit numbers of each lot, the date the lot was removed from the facility, and any other observations pertinent to the general health of the horses in the lot. The operator of the facility shall hold the log for 12 months following the date or release of the horse from quarantine and shall make it available to APHIS personnel upon request.

(iv) *Environmental requirements.* It shall be the responsibility of the operator of the facility to provide a certification that the facility complies with all applicable environmental regulations. The certification must be executed by a State or Federal government official responsible for ensuring compliance with those regulations.

(v) *Additional requirements.* Additional requirements as to location, security, physical plant and facilities, sanitation, and other items may be imposed by the Administrator in each specific case in order to assure that the quarantine of the horses in such facility will be adequate to enable determination of their health status, prevent spread of disease among horses in quarantine, and prevent escape of animal disease agents from the facility.

(3) *Request for approval.* Requests for approval may be made by writing to the Administrator, c/o Import-Export Animals Staff, VS, APHIS, USDA, Room 765, 6505 Belcrest Road, Hyattsville, MD 20782. The application should include the full name and mailing address of the applicant and the location and street address of the facility for which approval is sought. Requests for approval and plans for permanent proposed facilities shall be submitted no less than 90 days before the proposed date of entry of the first lot of horses into the quarantine facility.

(4) *Withdrawal or denial of approval.* Approval of any facility may be refused or withdrawn at any time by the Administrator, if any of the provisions of paragraph (*e*) of this section are not met. Before such action is taken, the operator of the facility will be informed of the reasons for the proposed action. If there is a conflict as to any material fact, the operator shall be afforded an opportunity for a hearing to resolve such conflict, in accordance with rules of practice, which shall be adopted for the proceeding by the Administrator. However, such withdrawal shall become effective pending final determination in the proceeding when the Administrator determines that such action is necessary to protect the public health, interest, or safety. Such withdrawal shall be effective upon oral or written notification, whichever is earlier, to the operator of the facility. In the event of oral notification, written confirmation shall be given to the operator of the facility as promptly as circumstances allow. This withdrawal shall continue in effect pending the completion of the proceeding and any judicial review, unless otherwise ordered by the Administrator. In addition to withdrawal or denial of approval when the requirements for approval are not complied with, approval will be automatically withdrawn by the Administrator when the operator of any approved facility notifies the Area Veterinarian in Charge for the state in which the facility is located in writing, that the facility is no longer in operation.[4]

§ 92.12 [Amended]

30. In § 92.12, paragraph (a), the seventh sentence would be revised to read as follows: "The operator of the privately operated quarantine facility shall request in writing such inspection and other services as may be required, and the importer, or his agent, shall waive all claim against the United States and Veterinary Services or any employee of Veterinary Services for damages that may arise from such services."

31. In § 92.12, paragraph (a), the ninth sentence would be amended by removing the words "the importer, or his agent," and by adding in their place the words "the operator of the privately operated quarantine facility".

Done in Washington, DC, this 30th day of August 1989.

James W. Glosser,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 89-20736 Filed 9-5-89; 8:45 am]

BILLING CODE 3410-34-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 89-ACE-22]

Proposed Alteration of VOR Federal Airways; Missouri

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the descriptions of Federal Airways V-14 and V-88 located in the vicinity of St. Louis, MO. The proposed realignment would provide published airways in areas where aircraft are usually radar vectored. This action would reduce controller workload.

DATES: Comments must be received on or before October 16, 1989.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Air Traffic Division, ACE-500, Docket No. 89-ACE-22, Federal Aviation Administration, 601 East 12th Street, Federal Building, Kansas City, MO 64106.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267-9250.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on their notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89-ACE-22." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The prosposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemkaing will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA-230, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267-3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to alter the descriptions of VOR Federal Airways V-14 and V-88 located in the vicinity of St. Louis, MO. The realignments would provide published airways in an area where aircraft are normally radar vectored. This action would reduce controller workload. Section 71.123 of part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6E dated January 3, 1989.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore (1) is not a "major rule" under Executive Order 12291d; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evalaution as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the critiera of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, VOR federal airways.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation administration proposes to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority. 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.123 [Amended]

2. § 71.123 is amended as follows:

V-14 [Amended]

By removing the words "Foristell, MO; St. Louis, MO;" and substituting the words "INT Vichy 067°T(061°M) and St. Louis, MO, 225°T(220°M) radials;"

V-88 [Amended]

By removing the words "INT Vichy 091° and St. Louis, MO, 171° radials." and substituting the words "to Troy, IL."

Issued in Washington, DC, on August 24, 1989.

Harold W. Becker,

Manager, Airspace—Rules and Aeronautical Information Division.

[Airspace Docket No. 89-ASW-19]

Proposed Alteration of VOR Federal Airways; Texas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the descriptions of several VOR Federal Airways located in the Austin and San Antonio, TX, areas. These airway changes would improve the flow of traffic in the Austin and San Antonio terminal areas. The Houston Air Route Traffic Control Center (ARTCC) is presently undergoing a resectorization plan and these airway changes are necessary to support that plan. This action would aid flight planning and reduce controller workload.

DATES: Comments must be received on or before October 16, 1989.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Air Traffic Division, ASW-500, Docket No. 89-ASW-19, Federal Aviation Administration, Fort Worth, TX 76193-0530.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-9250.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89–ASW–19." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–230, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267–3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to realign VOR Federal Airways V–68, V–558, V–565, V–574, and V–583 located in the vicinity of Austin and San Antonio, TX. These airway changes would improve traffic flow in the Austin and San Antonio terminal areas. The Houston, TX, Air Route Traffic Control Center (ARTCC) is presently undergoing a resectorization plan and these airway changes are necessary to support that plan. This action would aid flight planning and reduce controller workload. Section 71.123 of part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6E dated January 3, 1989.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, VOR Federal airways.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.123 [Amended]

2. Section 71.123 is amended as follows:

V–68 [Amended]

By removing the words "Junction, TX; San Antonio, TX;" and substituting the words "Junction, TX; Center Point, TX; San Antonio, TX;"

V–558 [Amended]

By removing the words "INT Austin 090°M(097°T) and Industry, TX, 310°M(316°T) radials; Industry;" and substituting the words "Industry, TX;"

V–565 [Amended]

By removing the words "to Austin" and substituting the words "Austin; College Station, TX; to Lufkin, TX"

V–575 [Amended]

By removing the words "From Navasota, TX, via" and by substituting the words "From Austin, TX; INT Austin 102°M(109°T) and Navasota, TX, 251°M(259°T) radials; Navasota;"

V–583 [Revised]

From Austin, TX; INT Austin 055°M(062°T) and College Station, TX, 262°M(270°T) radials; College Station; Leona, TX; Frankston, TX; to Quitman, TX.

Issued in Washington, DC, on August 23, 1989.

Harold W. Becker,

Manager, Airspace—Rules and Aeronautical Information Division.

[Airspace Docket No. 89–AEA–12]

Proposed Alteration and Revocation of Jet Routes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the descriptions of Jet Route J–6 and eliminate Jet Route J–228. Jet Route J–6 would be extended from Lancaster, PA, to Plattsburg, NY, along the present route of J–228. Concurrent with the extension of J–6, Jet Route J–228 would be eliminated. The route along J–6 and J–228 is a heavily traveled route which requires the filing and issuance of more than one airway. This proposed action would reduce controller and pilot workload and improve flight planning.

DATES: Comments must be received on or before October 16, 1989.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Air Traffic Division, AEA–500, Docket No. 89–AEA–12, Federal Aviation Administration, JFK International Airport, The Fitzgerald Federal Building, Jamaica, NY 11430.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Jesse B. Bogan, Jr., Airspace Branch (ATO–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–9253.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89–AEA–12." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–20, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267–3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to Part 75 of the Federal Aviation Regulations (14 CFR part 75) to alter the description of J–6 and to eliminate J–228. Jet Route J–6 would be extended from Lancaster, PA, to Plattsburg, NY, along the present route of J–228. Concurrent with the extension of J–6, Jet Route J–228 would be eliminated. The route along J–6 and J–228 is a heavily traveled route which requires the filing and issuance of more than one airway. This action would reduce controller and pilot workload by facilitating air to ground communications as well as improve flight planning. Section 75.100 of part 75 of the Federal Aviation Regulations was republished in Handbook 7400.6E dated January 3, 1989.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore; (1) is not a "major rule" under Executive Order 12201; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 75

Aviation safety, Jet routes.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend part 75 of the Federal Aviation Regulations (14 CFR Part 75) as follows:

PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES

1. The authority citation for part 75 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 75.100 [Amended]

2. § 75.100 is amended as follows:

J–6 [Amended]

By removing the words "to Lancaster, PA." and substituting the words "Lancaster, PA; Broadway, NJ; Sparta, NJ; Albany, NY; to Plattsburg, NY."

J–228 [Removed]

Issued in Washington, DC, on August 24, 1989.

Richard Huff,

Acting Manager, Airspace-Rules and Aeronautical Information Division.

14 CFR Part 91

[Docket No. 26001; Notice No. 89–22; Special Federal Aviation Regulation No. 47–3]

Special Flight Authorization for Noise Restricted Aircraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This Notice of Proposed Rulemaking (NPRM) proposes to extend the Special Federal Aviation Regulation (SFAR) which provides for limited issuance of special flight authorizations to conduct certain nonrevenue operations that are otherwise prohibited by the noise restrictions found in the general operating rules of the Federal Aviation Regulations (FAR). The current rule terminates on December 31, 1989. This proposal, if adopted, would extend SFAR 47 through December 31, 1991, to provide the time to install Stage 2 or Stage 3 hushkits on non-compliant Stage 1 aircraft.

DATES: Comments must be received on or before September 25, 1989.

ADDRESSES: Comments on the proposal are to be marked "Docket No. 26001" and mailed in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC–204), Docket No. 26001, 800 Independence Ave., SW., Washington, DC 20591; or delivered in duplicate to Room 916, 800 Independence Ave., SW., Washington, DC. Comments may be inspected in Room 916 on weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Mrs. Laurette Fisher, Policy and Regulatory Division (AEE–300), Office of Environment, Federal Aviation Administration, 800 Independence Ave., SW., Washington, DC 20591, telephone: (202) 267–3561.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in this rulemaking by submitting written data, views, or arguments and by commenting on the possible environmental, energy, or economic impacts of this proposal. Comments should contain the regulatory docket or notice number and be submitted in duplicate to the address above. All comments received as well as a report summarizing any substantive public contact with FAA personnel on this rulemaking will be filed in the docket. The docket is available for public inspection both before and after the closing date for comments. Before taking any final action on the proposal, the Administrator will consider the comments made on or before the closing date, and the proposal may be changed in light of the comments received. The FAA will acknowledge receipt of a comment if the commenter submits a self-addressed, stamped postcard with the comment and on the postcard the following statement is made: "Comments to Docket No. 26001." When the comment is received by the FAA, the postcard will be dated, time stamped, and returned to the customer.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-230, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267-3484. Requests should be identified by the docket number of this proposed rule. Persons interested in being placed on a mailing list for future notices of proposed rulemaking should also request a copy of Advisory Circular No. 11-2, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Synopsis of the Proposal

Under Part 91 of the Federal Aviation Regulations (FAR), on or after January 1, 1985, no person may operate a civil subsonic turbojet airplane with maximum weight of more than 75,000 pounds to or from an airport in the United States unless that airplane has been shown to comply with Stage 2 or Stage 3 noise levels under part 36. This restriction applies to U.S. registered aircraft that have standard airworthiness certificates and foreign registered aircraft that would be required to have a U.S. standard airworthiness certificate in order to conduct the operations intended for the airplane were it registered in the United States. SFAR 47 was adopted February 26, 1985 (50 FR 7751, February 26, 1985), to permit certain operations of noise restricted aircraft without a formal grant of exemption under FAR part 11. These operations included (a) flying the airplane to an airport where alterations are to be performed to achieve compliance with Stage 2 or Stage 3 noise levels under part 36; (b) exporting the airplane, including flights through U.S. airport(s) necessary for the aircraft to leave this country; (c) operations deemed necessary by the FAA for the sale, lease, or other disposition of the airplane; and (d) flight to a storage facility. SFAT 47 has been extended twice since December 31, 1986 (51 FR 47219, 12/31/86 and 52 FR 35052, 9/16/87). The SFAR extensions limited operations to hushkitting, scrapping, or exporting of Stage 1 aircraft. SFAR 47 expires on December 31, 1989.

When SFAR 47 was originally adopted, the FAA believed that most non-compliant Stage 1 aircraft would either be modified to meet Stage 2 noise standards or be removed from service. During the period of January 1, 1985, through July 20, 1989, the FAA issued 591 Special Flight Authorizations for purposes of hushkitting, exporting, scrapping, or storing Stage 1 aircraft. Over 80% of the special flight authorizations were issued between 1985 and 1987, with the remaining 20% issued from January 1, 1988, to July 20, 1989. Since 1987, SFAR extensions have limited operations to hushkitting, exporting, or scrapping Stage 1 aircraft. From January 1, 1989, to July 20, 1989, 32 requests were received for special flight authorizations and all were for hushkitting purposes only. There were no applications for exporting or scrapping aircraft. Therefore, the FAA originally questioned the need to extend the SFAR 47 date, since there has been a significant decline in the number of requests to hushkit Stage 1 aircraft.

However, information now available to the FAA through applications for Supplemental Type Certificates indicates that manufacturers are developing Stage 3 hushkits for non-complying Stage 1 aircraft. Airport operators and the public are demanding more Stage 3 aircraft operations at their airports, as shown by the number of new orders of Stage 3 aircraft to replace existing Stage 2 aircraft. With the continuing demand for quieter aircraft, the SFAR extension would allow operators to convert their non-complying aircraft from Stage 1 to Stage 2 or Stage 3 at their discretion. The demand for quieter aircraft is also spreading to other countries, as evidenced by the increasing number of special flight authorizations requested for foreign aircraft. This NPRM proposes to extend the FAA's authority to issue a special flight authorization for a Stage 1 airplane to operate in the United States in order to be modified to Stage 2 or Stage 3. Therefore, the FAA is soliciting information to determine whether the demand by interested operators for these Stage 2 or Stage 3 hushkits for Stage 1 airplanes warrants extending SFAR 47 again to allow transport of such aircraft to be hushkitted. Without such an extension, operators of aircraft that do not comply with FAR Part 91, for which hushkitting is desired after January 1, 1990, would have to use the FAR Part 11 exemption process.

If there is sufficient support for the extension of SFAR 47 to 1991, special flight authorizations would be limited to hushkitting efforts only, based on the requests for special flight authorizations received in 1989, as noted above. Consequently, the FAA proposes to amend SFAR 47 by deleting paragraphs 2 (b) and (c) which respectively allow exporting and scrapping the airplane.

Economic/Regulatory Impact Evaluation

This proposed rule would have negligible economic impact. Adoption of the proposal would allow an alternative from the exemption process for certain operations, reducing the administrative costs of both operators and the FAA. While the operations are not without some noise costs, these costs can be characterized as trivial, since the number of operations at any one local airport will be extremely low in number.

For the same reasons, the FAA certifies that the SFAR extension, if adopted, is not likely to have significant economic impact upon a substantial number of small entities. The basis for this is the very low number of requests which FAA foresees as a result of the adoption of this proposal. The FAA does not expect this number to exceed fifty over the life of the regulation. Accordingly, preparation of a full regulatory evaluation is not required.

Environmental Analysis

Pursuant to Department of Transportation "Policies and Procedures for Considering Environmental Impacts" (FAA Order 1050.1D), a draft Finding of No Significant Impact has been prepared and is available to the public. The changes proposed in this rule would not significantly affect the quality of the human environment.

Federalism Implications

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of Government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 was enacted to ensure that small entities are not unnecessarily or disproportionately burdened by Government regulations. The Act requires a Regulatory Flexibility Analysis if a rule has a significant economic impact, either detrimental or beneficial, on a large number of small business entities. As noted above, the extension of SFAR 47 for hushkitting purposes will not have any economic impact on the affected operators. Consequently, the FAA determines that, under the criteria of the Regulatory Flexibility Act of 1980, a regulatory flexibility analysis is not required.

Conclusion

Accordingly, for reasons stated above, the FAA has determined that: (1) The amendment does not involve a major rule under Executive Order 12291; (2) the amendment is not significant nor does it require a Regulatory Evaluation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) it is certified that under the criteria of the Regulatory Flexibility Act that the amendment would not have significant economic impact on a substantial number of small entities. In addition, this proposal, if adopted would have little or no impact on trade opportunities for U.S. firms doing business overseas, or for foreign firms doing business in the United States.

Air carriers, Aviation safety, Safety, Aircraft, Air traffic control, Airspace, Air transportation, Airworthiness directives and standards.

The Proposed Amendment

Accordingly, the FAA proposes to amend part 91 of the Federal Aviation Regulations (14 CFR part 91) by amending Special Federal Aviation Regulation 47 as follows:

PART 91—GENERAL OPERATING AND FLIGHT RULES

1. The authority citation for Part 91 continues to read as follows:

Authority: 49 U.S.C. 1301(7), 1303, 1344, 1348, 1352 through 1355, 1401, 1421 through 1431, 1471, 1472, 1502, 1510, 1522, 2121 through 2125; Articles 12, 29, 31, and 32(a) of the Convention on International Civil Aviation (61 State 1180); 42 U.S.C. 106(g) [Revised Pub. L. 97-449, January 12, 1983.]

Special Federal Aviation Regulation 47—[Amended]

2. By deleting from paragraph 2 subparagraphs (b) and (c).

3. By deleting from paragraph 5 the year "1989" and substituting the year "1991."

Issued at Washington, DC on August 29, 1989.

J.E. Densmore,

Director, Office of Environment.

BILLING CODE 4910-13-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 1

Service on Self-Regulatory Organization Governing Boards or Committees by Persons With Disciplinary Histories

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rule.

SUMMARY: The Commodity Futures Trading Commission ("Commission") is proposing a new Regulation 1.63 which would prohibit persons with certain disciplinary histories from serving on any self-regulatory organization's ("SRO") disciplinary committees, arbitration panels or governing board, and which would require each SRO to implement rules in this regard. Regulation 1.63 also would require each SRO to provide both notice to the public of what SRO rule violations would result in such a prohibition and certification to the Commission of compliance with Regulation 1.63.

DATE: Comments on the proposed rule must be received by November 6, 1989.

ADDRESS: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Telephone: (202) 254-6314.

FOR FURTHER INFORMATION CONTACT: David P. Van Wagner, Special Counsel, Division of Trading and Markets, Commodity Futures Trading Commission, 2933 K Street, NW., Washington, DC 20581. Telephone: (202) 254-8955.

SUPPLEMENTARY INFORMATION:

I. Introduction

Currently, the Commission's regulations do not restrict persons with disciplinary histories from sitting on SRO disciplinary committees, arbitration panels or governing boards. In general, those SROs which have rules in this regard indirectly prohibit committee participation by persons with disciplinary histories by prohibiting expelled or suspended SRO members from committee service.[1]

The Commission believes that the probity of the self-regulatory process requires that SRO bodies which establish and enforce an SRO's rules be impartial and free from the potential for and even the appearance of impropriety. The Commission further believes that the actual and perceived integrity with which an SRO operates is largely determined by the character and experience of the persons who serve on the SRO's rule-making and rule-enforcing bodies. The Commission is concerned, for instance, that a person found to have acted in contravention of an SRO's rules or to have acted dishonestly in other areas may be or may be perceived as being unwilling to formulate or enforce an SRO's rules in a fully principled manner. The Commission also believes that the persence of such a person on an SRO disciplinary committee, arbitration panel or governing board could diminish public confidence in that SRO as a self-regulator of its respective marketplace.

The Commission's proposed Regulation, therefore, would address these concerns and perceptions by establishing a minimum qualification standard for persons serving on certain SRO bodies charged with the responsibility of either disciplining SRO members or making the rules of the SRO. The Commission has designed proposed Regulation 1.63 to enhance the self-regulatory process without unduly hindering the ability of the SROs to conduct their business through a committee system.[2] The goal of its present proposal is to establish an industry-wide standard for eligibility for certain SRO committee service.

II. Proposed Regulation 1.63

As previously stated, the Commission believes that the integrity of the self-regulatory process requires that SRO bodies which make and enforce an SRO's rules be impartial and free from the potential for an even the appearance of impropriety. Proposed Regulation 1.63 is structured so that a person who has been found to have committed certain acts which would call into question his personal integrity or willingness to comply with an SRO's rules would be barred from assuming a position in which he would either help formulate an SRO's rules or judge others accused of violating an SRO's rules. Accordingly, proposed Regulation 1.63 would prohibit persons with disciplinary histories, as identified in the Regulation, from serving on any SRO's disciplinary committees, arbitration panels or governing board, and would require each SRO to adopt rules in this regard.[3]

---

[1] See, e.g., Chicago Board of Trade Rule 561.00 and Chicago Mercantile Exchange Rule 435.

[2] For instance, "governing boards" would be the only class of SRO bodies affected by Regulation 1.63 whose functions would include the formulation and establishment of SRO rules. There are, of course, other permanent and temporary SRO bodies which have responsibilities and duties similar to those of governing boards. The Commission believes, however, that since final decisions by an SRO governing board are usually the decisions which, excepting Commission approval, alter the rules of the SRO, the application of Regulation 1.63 to governing boards alone would have a beneficial impact on the SRO rule-making process.

A. Proposed Regulations 1.63(b)(1) Through (4)

Under SRO rules required to be implemented pursuant to Commission Regulations 1.63(b) (1) and (3), a person [4] who was found by an SRO [5] to have committed a disciplinary offense [6] would be barred from serving [7] on any SRO's disciplinary committee,[8] arbitration panel [9] or governing board for a period of three years after final adjudication by the SRO or the length of any resultant expulsion, suspension, or failure to pay a disciplinary fine, whichever was longer.[10] Similarly, under proposed Commission Regulations 1.63(b) (2) and (4) any person who either was at that time subject to sanctions consented to in a settlement agreement with an SRO or had entered into such a settlement agreement in the previous three years, would be required to be prohibited by SRO rules from serving on any SRO's disciplinary committees, arbitration panels or governing board.[11] With these provisions, the Commission's proposed Regulation should ensure that a person violating SRO rules, with certain limited exceptions described above, would be ineligible to serve on the indicated SRO bodies for a substantial minimum period irrespective of the actual severity of the underlying disciplinary sanction.

Notably, the bar upon serving on an SRO rule-making or rule-enforcing body would be contingent upon the disciplinary action of or a settlement agreement with any SRO. Therefore, there would be no difference in the length of the bar dependent on whether the disciplinary sanction or settlement agreement arose at the SRO where the relevant body was located or at some other SRO. In this regard, the Commission believes that since the purpose of the proposal is that SROs should avoid the appearance of allowing rule violators to make rules or sit in judgment of other rule violators, there is no reason to distinguish between rule violators based upon which SRO disciplined them.

B. Proposed Regulations 1.63(b) (5) and (6)

Commission Regulations 1.63(b) (5) and (6) would require that SROs also impose restrictions on committee service for sanctions imposed as a result of Commission enforcement actions. Regulation 1.63(b)(5) would require SROs to impose a three-year committee service ban on those persons found to have violated the Commodity Exchange Act ("Act") or the Commission's regulations by administrative law judges, the Commission, or the courts where such findings has not been overturned or stayed. It also would imose such a ban where an individual has entered into a settlement agreement with the Commission in which any of the charges indentified include a violation of the Act or the Commission's regulations. Additionally, proposed Regulation 1.63(b)(6) would require each SRO to similarly bar SRO committee service for as long as a person was subject to an agreement with the Commission not to apply for registration or membership with any SRO.

Proposed Regulation 1.63(b)(6) also would require SROs to implement rules making persons ineligible to serve on any SRO disciplinary committee, arbitration panel or governing board whenever they are subject to an agreement with any contract market, clearing organization or registered futures association not to apply to that respective SRO for membership. This provision would not overlap with Regulation 1.63(b)(4) and its prohibition

---

[3] Under proposed Regulation 1.63, an implementing SRO rule would make ineligible those committee members sitting at the time of the rule's implementation who had disciplinary histories in violation of the implementing SRO rule. While the Commission does not believe that this circumstance should cause any undue disruption to the SROs' committee systems, it specifically requests comment as to whether this proposed implementation schedule would cause undue disruption.

[4] Although the term "person" could encompass member firms, the Commission's understanding is that service on SRO boards and committees is limited to natural persons serving in an individual capacity. That is, member firms are not elected to seats which they can fill with a representative of their choosing. The Commission invites comment on whether there are any circumstances under which sanctions imposed on a firm should bar individuals associated with that firm from serving on a board or committee.

[5] For the purposes of this proposed Regulation, "SRO" would be defined to include designated contract markets, registered futures associations and futures clearing organizations (Proposed Commission Regulation 1.63(a)(1)).

[6] Proposed Commission Regulation 1.63(a)(4) would define "disciplinary offense" to mean committing or having supervisory responsibility for any act which violated an SRO's rules with exclusions for minor recordkeeping and trade timing violations as well as decorum and attire violations. In defining what constitutes a minor recordkeeping and trade timing violations, the Commission believes that such a violation usually receives a fine of $750 or less. Any such violation receiving either a fine larger than this or some period of suspension indicates a more grievous offense. Consequently, the Commission proposal excludes from the definition of "disciplinary offense" those recodkeeping or trade timing violations which incur fines less than $750 and no period of suspension. The Commission intends the decorum and attire exclusion to encompass fighting, cursing, spitting, dress code and other similar violations.

Under Regulation 1.63(a)(4), "disciplinary offense" is defined in terms of types of acts which violate an SRO's rules and is intended to include offenses identified in settlement agreements as well as findings following a final adjudication. Thus, a disciplinary offense could become the basis for committee disqualification under proposed Regulation 1.63 in two types of circumstances: (1) when it had "been found by the final adjudication of [an SRO's] disciplinary committee" (Regulation 1.63(b)(1) and (3)); or, (2) when it had been "identified in [a] settlement agreement" (Regulation 1.63(b)(2) and (4)).

[7] Proposed Regulation 1.63(b) also would prohibit persons with disciplinary histories from "seek[ing] election to" any SRO disciplinary committee, arbitration panel or governing board. The Commission believes that since persons with disciplinary histories would, under this proposal, be ineligible to serve on these SRO bodies, such persons should not be permitted to seek election to those SRO bodies when popular election is required.

[8] Proposed Commission Regulation 1.63(a)(2)'s definition for "disciplinary committee" would include bodies which commence disciplinary proceedings, impose sanctions, or hear appeals thereof. Therefore, the definition would cover probable cause committees, floor committees, disciplinary committees and boards of directors (who sit in appellate review of disciplinary actions). This definition thus should ensure that persons found to have acted in contravention of an SRO's rules or to have acted dishonestly in other areas would not be in a position to serve on any disciplinary committee in judgment of others accused of violating an SRO's rules.

[9] Proposed Commission Regulation 1.63(a)(3) would define "arbitration panel" to mean "any person or panel empowered by [an SRO] to arbitrate disputes involving either customers or the [SRO's] members." The proposed definition would make clear that such panels would include any body empowered to arbitrate any type of dispute under the SRO's rules.

[10] Under the Commission's proposal, a final SRO disciplinary decision which was no longer subject to any appeal under the SRO's appeal and review process would constitute an SRO finding of a disciplinary offense (Proposed Regulation 1.63(a)(5) and (b)). Therefore for the purposes of this proposal, any bar period would run from the point in time of the SRO's final decision even if the respondent decided to appeal the SRO decision to the Commission. Of course, if the Commission or a court overturned or stayed the SRO decision, the bar would be lifted.

[11] Warning letters would not qualify as either a settlement agreement (Regulation 1.63(a)(6)) or as an SRO finding of a disciplinary offense (Regulation 1.63(a)(5)).

on committee service for persons subject to SRO suspension or expulsion pursuant to a settlement agreement. Instead, Regulation 1.63(b)(6) is intended to cover the circumstance where a person with SRO membership commits some rule violation, ceases to be a member, is subsequently charged with the rule violation by the SRO and, as a sanction, agrees with the SRO not to reapply for SRO membership for some length of time.

C. Proposed Regulation 1.63(b) (7) and (8)

Under SRO rules adopted pursuant to the Commission's proposed Regulation 1.63(b) (7) and (8), a person whose trading privileges have been revoked or suspended or whose Commission registration in any capacity was revoked or suspended for any reason would be barred from serving on any SRO's rule-making or rule-enforcing body for a period of three years or the length of the revocation or suspension, whichever was longer. The Commission believes that it is appropriate that the bases for the restrictions of proposed Regulation 1.63 include trading prohibitions and registration revocations and suspensions in view of the serious nature of the acts on which such revocations and suspensions are predicated. For example, registration revocations and suspensions due to statutory disqualification under sections 8a(2) and (3) of the Act are based upon a list of activities which indicate that a person is not fit to handle customer funds.[12]

D. Proposed Regulation 1.63(c)

Proposed Regulation 1.63(c) would make it a direct violation of the Regulation for any person to seek election to or serve on any SRO's disciplinary committees, arbitration panels or governing board if his disciplinary history included any of the conditions set forth in Regulation 1.63(c).[13] Regulation 1.63(c) thus would enable the Commission to enforce the requirements of this provision directly, if necessary. The Commission believes that this reservation of enforcement power for itself is appropriate given the import of Regulation 1.63 and its purpose of upholding the integrity of the self-regulatory process. Of course, each SRO would continue to have a responsibility under section 5a(8) of the Act and Commission Regulation 1.51 to enforce any of its own rules implemented pursuant to Regulation 1.63(b).

E. Proposed Regulation 1.63(d)

Under proposed Regulation 1.63(b), each SRO would be required to implement and maintain in effect rules which were consistent with the Regulation and which had been submitted to the Commission pursuant to section 5a(12) of the Act and Commission Regulation 1.41 or, in the case of a registered futures association, pursuant to section 17(j) of the Act. In addition, each SRO would be responsible under section 5a(8) of the Act and Commission Regulation 1.51 for taking whatever steps may be necessary to ensure that persons selected to the SRO's disciplinary committees, arbitration panels or governing board were in compliance with those SRO rules.

In order to facilitate each SRO's ability to enforce effectively any rules implemented pursuant to proposed Commission Regulation 1.63, Regulation 1.63(d) would require each SRO to establish, maintain and make available to the general public a notice of all those rules of the SRO which if violated would constitute a "disciplinary offense" under Regulation 1.63. This procedure would enable any person who had been found to have committed a rule violation by an SRO to determine whether that violation was in fact a "disciplinary offense" for the purposes of Regulation 1.63 and whether he would be disqualified from future SRO committee service. Also, an SRO upon ascertaining that a potential committee selectee had violated some rule at another SRO, could review that other SRO's listing of "disciplinary offenses" to determine whether the potential selectee should be disqualified from committee service.

F. Proposed Regulation 1.63(e)

Under proposed Regulation 1.63(e), each SRO would be required to certify to the Commission on an annual basis that the SRO had complied with the requirements of Regulation 1.63. Additionally, Regulation 1.63(e) would require each SRO to submit to the Commission annually a list of any persons who had been removed from the SRO's committees during the previous year in accordance with the requirements of Regulation 1.63. The Commission believes that its receipt of this information would facilitate its ability to monitor each SRO's compliance with Regulation 1.63.

III. Related Matters

A. Regulatory Flexibility Act

The Regulatory Flexibility Act ("RFA"), 5 U.S.C. 604 *et seq.*, requires that agencies, in proposing rules, consider the impact of those rules on small businesses. The Commission has previously determined that contract markets are not "small entities" for purposes of the RFA. 47 FR 18618 (April 30, 1982). Furthermore, the Chairman of the Commission previously has certified on behalf of the Commission that comparable rule proposals effecting clearing organizations and registered futures associations, if adopted, would not have had a significant economic impact on a substantial number of small entities. 51 FR 44866 (December 12, 1986). Therefore, the Chairman, on behalf of the Commission, hereby certifies, pursuant to 5 U.S.C. 605(b), that the action taken herein will not have a significant economic impact on a substantial number of small entities.

B. Paperwork Reduction Act

The Paperwork Reduction Act of 1980 ("PRA"), 44 U.S.C. 3501 et. seq., imposes certain requirements on Federal agencies (including the Commission) in connection with their conducting or sponsoring any collection of information as defined by the PRA. In reviewing this proposed rule the Commission has determined that it does not impose any information collection requirements as defined by the PRA.

Persons wishing to comment on this determination of no information collection burden should contact Joseph G. Salazar, CFTC Clearance Officer, 2033 K Street, NW., Washington, DC 20581; and The Office of Management and Budget, Paperwork Reduction Project (3038–XXXX), Washington, DC 20503.

---

[12] These proscribed activities include: (1) having been enjoined by a Commission order or settlement from acting as a futures commission merchant, introducing broker, associated person, commodity trading advisor, commodity pool operator, etc. (section 8a(2)(C)); (2) having been convicted of a felony involving commodity transactions, embezzlement, fraud, theft, misappropriation, etc. (section 8a(2)(D)); (3) having been found by a competent tribunal to have been involved in various securities law violations (section 8a(2)(E)); (4) willfully filing false information with the Commission (section 8a(3)(G)); (5) being subject to an order denying or suspending membership from some contract market, registered futures association, or SRO (e.g., national securities exchange, registered securities association or clearing agency, or the Municipal Securities Rulemaking Board) (section 8a(3)(J) and appendix A to part 3 of the Commission's Regulations—Interpretative Statement With Respect to section 8a(2) (C) and (E) and section 8a(3) (J) and (M) ("Interpretative Statement")); and, (6) being subject to an order revoking a state real estate or insurance license (section 8a(3)(M) and Interpretative Statement).

[13] Regulation 1.63(c) incorporates by reference the conditions listed in Regulations 1.63(b) (1) through (8). See infra section II. A through C for a description of those relevant conditions.

List of Subjects in 17 CFR Part 1

Contract markets, Clearing organizations, Registered futures associations, Members of contract markets.

In consideration of the foregoing, and based on the authority contained in the Commodity Exchange Act and, in particular, sections 3, 4b, 5, 5a, 6, 6b, 8, 8a, 9, 17, and 23(b) thereof, 7 U.S.C. 5, 6b, 7, 7a, 8, 13a, 12, 12a, 13, 21 and 26(b) the Commission is proposing to amend title 17, chapter I, part 1 of the Code of Federal Regulations as follows:

PART 1—GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

1. The authority citation for part 1 continues to read as follows:

Authority: 7 USC 2, 2a, 4, 4a, 6, 6a, 6b, 6c, 6d, 6e, 6f, 6g, 6h, 6i, 6j, 6k, 6l, 6m, 6n, 6o, 7, 7a, 8, 9, 12, 12a, 12c, 13a, 13a–1, 16, 19, 21, 23, and 24, unless otherwise stated.

2. Section 1.63 is proposed to be added to read as follows:

§ 1.63 Service on self-regulatory organization governing boards or committees by persons with disciplinary histories.

(a) *Definitions.* For the purposes of this section:

(1) *Self-regulatory organization* means "self-regulatory organization" as defined in § 1.3(ee), and includes the term "clearing organization" as defined in § 1.3(d).

(2) *Disciplinary committee* means any person or panel empowered by a self-regulatory organization to commence disciplinary proceedings, to impose disciplinary sanctions or to hear appeals thereof.

(3) *Arbitration panel* means any person or panel empowered by a self-regulatory organization to arbitrate disputes involving either customers or members of the self-regulatory organization.

(4) *Disciplinary offense* means

(i) Any act which violates a self-regulatory organization's rules, excluding those acts which violate rules regarding recordkeeping or trade timing for which a fine of less than $750 and no suspension or expulsion was imposed, or decorum or attire;

(ii) Any failure to exercise supervisory responsibility diligently which failure results in any of the acts described in paragraph (a)(4)(i) of this section.

(5) *Final adjudication* means an adjudication which is no longer subject to appeal under the self-regulatory organization's appeal and review process, is not subject to a Commission stay, and has not been reversed by the Commission or any court of competent jurisdiction.

(6) *Settlement agreement* means any agreement that either a self-regulatory organization or the Commission enters into with a person wherein such person consents to the imposition of sanctions by the self-regulatory organization or the Commission.

(b) Each self-regulatory organization must maintain in effect rules which have been submitted to the Commission pursuant to section 5a(12) of the Act and § 1.41 or, in the case of a registered futures association, pursuant to section 17(j) of the Act, that make a person ineligible to seek election to or to serve on the self-regulatory organization's disciplinary committees, arbitration panels or governing board if he:

(1) Has been found by the final adjudication of any self-regulatory organization's disciplinary committee within the prior three years to have committed a disciplinary offense under that self-regulatory organization's rules;

(2) Has entered into a settlement agreement with any self-regulatory organization within the prior three years in which any of the charges identified in the settlement agreement include a disciplinary offense under that self-regulatory organization's rules;

(3) Is currently subject to a trading or membership suspension or expulsion or owes any portion of a fine imposed for having committed a disciplinary offense under any self-regulatory organization's rules based upon the final adjudication of that self-regulatory organization's disciplinary committee;

(4) Is currently subject to a trading or membership suspension or expulsion or owes any portion of a fine imposed pursuant to a settlement agreement with any self-regulatory organization in which any of the charges identified in the settlement agreement include a disciplinary offense under that self-regulatory organization's rules;

(5) Was found to have violated any provision of the Act or the Commission's regulations by an administrative law judge, the Commission or a court in a Commission enforcement proceeding within the prior three years, and such finding has not been overturned or stayed, or has entered into a settlement agreement with the Commission within the prior three years in which any of the charges identified include a violation of the Act or the Commission's regulations;

(6) Is currently subject to an agreement with the Commission, or any self-regulatory organization not to apply for either registration or membership in any self-regulatory organization;

(7) Was subject to a Commission trading prohibition, registration revocation or suspension in any capacity for any reason within the prior three years; or,

(8) Is currently subject to a Commission trading prohibition, registration revocation or suspension in any capacity for any reason.

(c) No person may seek election to or serve on any self-regulatory organization's disciplinary committees, arbitration panels or governing board if he is subject to any of the conditions in paragraphs (b)(1) through (b)(8) of this section.

(d) Each self-regulatory organization shall establish, maintain and make available to the general public a notice of all those rules of the self-regulatory organization which if violated would constitute a disciplinary offense under this regulation.

(e) Each self-regulatory organization shall submit to the Commission within thirty days of the end of each calendar year:

(1) A certification that the self-regulatory organization has complied with the requirements of this regulation during the prior year; and

(2) A certified listing of all those persons who have been removed from the self-regulatory organization's disciplinary committees, arbitration panels or governing board pursuant to the requirements of this regulation during the prior year.

Issued in Washington, DC on August 29, 1989, by the Commission.

Lynn K. Gilbert,

Deputy Secretary of the Commission.

17 CFR Part 1

Trading Errors, Unmatched Trades, and Outtrades

AGENCY: Commodity Futures Trading Commission.

ACTION: Statement of agency interpretation.

SUMMARY: The Commodity Futures Trading Commission ("Commission") is issuing this interpretation to reemphasize the need for maintaining complete information on trading errors, unmatched trades, and outtrades and conducting thorough surveillance of such activities.

FOR FURTHER INFORMATION CONTACT: Shauna L. Turnbull, Staff Attorney, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581, telephone: (202) 254–8955.

SUPPLEMENTARY INFORMATION: The Commodity Futures Trading Commission ("Commission") is issuing this interpretation to reemphasize that the obligation of exchange members, exchanges, and their clearing organizations to maintain adequate audit trail records includes the requirement that they maintain complete records for trading errors, unmatched trades, and outtrades. The Commission also reemphasizes that the surveillance of this information for the detection of trading abuses must be a regular, integral part of the affirmative compliance programs of exchanges and clearing organizations.

In past oversight reports and as part of its enforcement activities, Commission staff has noted that trading errors, unmatched trades, and outtrades are susceptible to abuse.[1] The recent indictments and Commission administrative actions against futures brokers and traders in Chicago for alleged trading abuses further illustrate the possibility that trading errors can provide opportunities for, mask, or involve violations.

The Commission, therefore, is issuing this interpretation of sections 4(a), 4g, and 5a of the Commodity Exchange Act ("Act") and Commission Regulations 1.31, 1.35, and 1.51. Commission Regulation 1.35(a) requires every member of a contract market to "keep full, complete, and systematic records * * * of all transactions relating to its business of dealing in commodity futures, commodity options, and cash commodities." Under Commission Regulation 1.31, these records must be retained for five years. Commission Regulation 1.35(e) requires that exchanges must maintain a trade register of transaction data. In addition, Commission Regulation 1.51 requires that exchanges must conduct effective surveillance of trading practices, including the examination of members' books and records. Pursuant to these regulations and the Act, information on the chronology of trading errors, unmatched trades, and outtrades must be kept and reviewed for possible violations. By maintaining complete data on the correction of trading errors, unmatched trades, and outtrades as part of the audit trail[2] and by closely monitoring these audit trail data, the exchanges should be able to reduce the susceptibility of such activity to abuse.

I. Interpretation

Although certain exchanges currently are capable of reconstructing an audit trail for trading errors, unmatched trades, and outtrades, in order to comply with audit trail and other recordkeeping requirements as set forth in Commission Regulations 1.31 and 1.35 the Commission believes that it is essential that all exchanges have methods for identifying outtrades, unmatched trades, and errors that may occur throughout the data submission and clearing process. This audit trail should be complete and enable the exchanges to reconstruct the chronology of the resolution of errors, unmatched trades, and outtrades. Also, clearing firms and members must keep all records related to errors, unmatched trades, or outtrades for a minimum of five years, pursuant to Commission Regulations 1.31 and 1.35. The Division has delegated authority, under Commission Regulation 1.35(i), to request special reports concerning trade data accuracy.

Exchanges have taken steps in the past to expedite the resolution of outtrades. The Commission believes that exchanges should continue to explore and implement ways to process outtrades in the most efficient manner possible. By reducing the time taken to resolve outtrades, the exchanges can reduce the opportunity for "floating" trades or engaging in other abuses.

Exchanges should monitor the available data related to trading errors, unmatched trades, and outtrades, in conjunction with other transaction data, where appropriate, for the types of abuses described below, as well as other violations. The Commission recognizes that exchanges already conduct reviews of outtrade data; however, the Commission emphasizes that, in order to satisfy the requirements regarding the maintenance of their affirmative compliance programs under section 5a(8) and Commission Regulation 1.51, exchanges must integrate regular reviews of errors during the trading session, unmatched trades, and outtrades into these programs. Exchange personnel also may be employed to conduct floor surveillance or supervise activities related to the resolution of trading errors, unmatched trades, and outtrades. Exchanges should consider requiring additional supervisory procedures for the correction of such trades.

All exchanges first need to ensure that they have access to complete information about errors, unmatched trades, and outtrades and then need to integrate such data into their surveillance systems. Those exchanges that use computerized surveillance systems should design programs or software to identify readily such trades for further investigation. The remaining exchanges should develop routine capabilities for reviewing a sampling of documents used to resolve trading errors, unmatched trades, and outtrades.

II. Background

A. Trading Errors, Unmatched Trades, and Outtrades and Procedures for Their Resolution

Trading errors, unmatched trades, and outtrades can arise in a number of ways. A floor broker may err in filling a customer's order by failing to purchase or sell the specified quantity or commodity; failing to execute the order at a specified price, during a specified time, or in a specified manner; buying when he should be selling or selling when he should be buying; failing to record correct trade information; or in other ways.[3] Similarly, a floor trader or "local" who executes trades primarily for his own account may record incorrect information or fail to record information about completed trades. An error also can occur when a broker or local claims to have executed a transaction that is disavowed by an opposite trader.

Some errors may be detected soon after the trades are executed; these may not become part of the matching and clearing processes. Other errors will be discovered in the matching and clearing processes. Errors that can cause unmatched trades may be resolved before the matching and clearing process concludes for that trading day.

---

[1] As evidence of the concern about trading errors, unmatched trades, and outtrades, Commission staff, for example, reviewed actions taken by the Commodity Exchange, Inc. in 1987 and the Chicago Mercantile Exchange in 1986 and 1987 to resolve outtrade problems. In addition, the Division of Trading and Markets ("Division") has made numerous recommendations to several exchanges on outtrade and error resolution procedures in rule enforcement reviews. Most recently, the Division recommended that the Coffee, Sugar & Cocoa Exchange, Inc. should broaden its review of outtrades that have been resolved after the date of execution ("as ofs"), that the New York Cotton Exchange should discontinue use of toleration factors for errors that result in late and missing offset tickets, and that the New York Mercantile Exchange should improve its system for accepting late trade data. *See also In the Matter of Wilkens and Pesek*, CFTC Docket No. 87–13, slip op. (initial decision Jan. 20, 1989) (involving, among other charges, allegations that trades had been prearranged to cover losses sustained through outtrades).

[2] As used herein, the term "audit trail" refers to the chronology of documents generated by traders and brokers and submissions made to exchanges or their clearing organizations for the purpose of correcting trading errors, unmatched trades, and outtrades. Such data, depending on the exchange system currently in place, may be maintained in hard copy, electronically, or both.

[3] Other sources for errors are clearing members, which process trade data, and data entry personnel, who enter such data.

If they are not so resolved, they become outtrades.

Once a member discovers that he has committed an error, including one that has resulted in an unmatched trade,[4] futures exchanges provide various methods for resolving the error, which may vary depending upon the type of error or the state in the matching and clearing process in which it is discovered. Generally, if a member discovers the error prior to the end of the trading session, exchanges require the member to notify the opposite party of the error and attempt to resolve it. When resolving an error, a member cannot change data that relate to a trade except to correct an actual error. As a general practice, in cases where members are unable to resolve the error, they "bust" the trade, that is declare it null and void. As necessary, members re-enter the market promptly to establish the correct position.

When a broker or clearing firm makes an error in connection with a customer's order, the position reflecting the error may be placed in an error account. Any loss as a result of the error generally must be made up to the customer through a cash payment from the broker or clearing firm.[5] In addition, a broker or clearing firm must provide certain profits made from the corrected trade to the customer, unless the customer agrees to other arrangements. Exchange floor committees or designated officials may be used to resolve disputes over the correction of trading errors. At certain exchanges, trade dispute resolutions are recorded on forms provided by the futures exchange.[6] Subsequently, exchanges generally provide that the matter can be brought before an arbitration committee.

If a member discovers the error after the trades from the relevant session have been cleared, the trade may become an outtrade.[7] For purposes of this interpretation, an outtrade is defined as a transaction for which a floor member(s) or clearing member(s) submits insufficient, erroneous, or unmatched data or fails to submit data to the clearing member, exchange, or clearing organization for the purpose of reporting, matching, or clearing a trade. All exchanges have procedures for the correction or late submission of data submitted for reporting or clearing purposes.[8] Futures exchanges generally require that members use their best efforts to resolve outtrades promptly. A member resolves an outtrade by discussing the error with the opposite party and agreeing to corrections of data submitted to clearing. Futures exchanges and the Commission prohibit members from executing a noncompetitive trade as a means of resolving an error.[9]

When members cannot resolve an outtrade, the trade is broken. In that case, members reenter the market, as necessary, to cover their positions. When such an outtrade involves a customer's order, the broker or clearing firm generally must enter the market as soon as possible to establish the customer's correct position. As with errors made during the trading session, the broker or clearing member generally must reimburse any loss to a customer that results from an outtrade. Further, the broker or clearing member must offer certain profits made from the resolution of a customer's outtrade to that customer, unless the customer agrees to other arrangements. Under these circumstances, the profit owed to a customer generally is that profit earned when a trader executes a corrected trade at a better price for the customer. When members resolve outtrades, the corrected outtrades are made "as of" the original trading day and then included on the exchange's trade register. For this reason, outtrades that are resolved after the date of execution usually are called "as ofs."

B. Potential Abuses Related to Outtrades, Unmatched Trades, and Errors

Although the occurrence of outtrades, unmatched trades, and errors need not be illegal and the process of resolving them is necessary, they are susceptible to abuse. Losses incurred through the correction of errors can provide an incentive for attempting to recoup those losses through later violations.

Various types of violations can be associated with errors, unmatched trades, and outtrades. For example, a member may execute an error-free transaction but intentionally create an outtrade to escape or avoid payment of margin for the trade. When a member intentionally creates an outtrade to delay payment of margin he is said to "float" the trade. A member also may commit a legitimate error but resolve his mistake in an illegal manner. For example, the member may attempt to execute a noncompetitive trade during or after trading hours to correct his error. Additionally, he may arrange to have another member take the loss on an error, unmatched trade, or outtrade through a noncompetitive trade(s), with the understanding that that member would be reimbursed with cash or through later illegal trades. Such illegal trades may be to the detriment of customers other than the one(s) involved in the error, unmatched trade, or outtrade. In addition, the member may resolve an error, unmatched trade, or outtrade in a legitimate manner but, thereafter, arrange illegal, noncompetitive trades that are intended to reimburse both himself and any other members for losses attributable to the error, unmatched trade, or outtrade.

C. Exchange Systems for Maintaining Information Regarding Outtrades, Unmatched Trades, and Errors

Deterrence, detection, and prosecution of abuses related to errors, unmatched trades, and outtrades can be improved by enhanced recordkeeping and surveillance techniques. Such improved recordkeeping should include an audit trail for the resolution of errors, unmatched trades, or outtrades. This audit trail should be a complete record of data reflecting such activities. From this audit trail, an exchange should be able to reconstruct the steps taken to address the errors, unmatched trades, and outtrades. At a minimum, exchanges currently should be able to identify all pertinent aspects of the error, unmatched trade, or outtrade (*e.g.*, parties, price, quantity, clearing firms, and customer type indicators); all changes in trade data originally and subsequently made; the time of the original transaction; and the results (*e.g.*, whether the trade was broken or corrected and, if corrected, the way in which it was changed).

---

[4] Errors that involve critical matching data such as contract, price, or opposite firms, if undetected, will result in an unmatched trade, which must be corrected before the trade can clear. Other errors which involve only edit criteria, such as execution time/bracket, card/order number, or account number, will not cause an unmatched trade, and such trades may be cleared even if such data are erroneous.

[5] *See, e.g.*, Chicago Board of Trade Rule 350.04A; New York Mercantile Exchange Rule 6.17; New York Futures Exchange Rule 430; and New York Cotton Exchange Rule 1.09–B.

[6] *See, e.g.*, Commodity Exchange, Inc. Rule 4.28.

[7] In cases where a member discovers an error after the trading session and the transaction has matched or cleared, the error generally still may be resolved through exchange procedures for the correction of matched or cleared data. *See, e.g.*, Chicago Board of Trade Rules 350.04 (Errors and Mishandling of Orders) and 350.04A (Errors and Mishandling of Orders); Chicago Mercantile Exchange Rule 526 (Errors Discovered During Trading Session and Errors Discovered After a Trading Session); and New York Mercantile Exchange Rule 6.17 (Errors and Omissions in Handling Orders). Usually, however, when members commit errors involving critical matching data and do not correct the errors prior to the clearing of trade data, the trade does not clear.

[8] *See, e.g.*, Chicago Board of Trade Rules 350.04 (Errors and Mishandling of Orders) and 350.04A (Errors and Mishandling of Orders); Chicago Mercantile Exchange Rule 526 (Errors Discovered During Trading Session and Errors Discovered After a Trading Session); Commodity Exchange, Inc. Rules 4.28 (Disputes Discovered During Trading Session), 4.29 (Errors Discovered After Trading Session), and 4.30 (Unacknowledged Transactions); and New York Mercantile Exchange Rule 6.17 (Errors and Omissions in Handling Orders).

[9] *See, e.g.*, 17 CFR 1.38; Commodity Exchange, Inc. Rule 4.29.

Futures exchanges use various methods for tracking the resolution of errors, unmatched trades, and outtrades. For errors discovered prior to the end of the trading session, most exchanges require the members to resolve the dispute between themselves, with the assistance of a floor committee, if necessary. The resolution of errors such as these may be indicated on pit cards, order tickets, trading cards, floor committee minutes, or exchange forms.[10] It is important that futures exchanges ensure that they have an audit trail of such errors. As noted above, errors may be corrected in an illegal manner, and losses associated with errors can provide a motive for subsequent noncompetitive trades. To detect such violations, exchanges need to have access to all information about the parties involved in an error; the trade information, including the price, quantity, commodity, clearing firms, and customer type indicators; the approximate amount of the profit or loss at the time of the rectification of the error; the time of the original transaction; and steps taken to correct or break a trade.

For errors discovered after the trading session, the various systems used by exchanges to process trades result in different data sources for the review of unmatched trades and outtrades. Certain exchanges use on-line, computerized systems for the submission of all or some trade data and for the matching and clearing of trades.[11] Trade data are given to clearing members or the exchange, and the clearing member of exchange enters the data for processing by the computer. The computer generally assigns unique trade identification numbers to each trade submission.

Trades are matched at designated times during the trading day and afterwards. Among exchanges with on-line data submission systems, unmatched trade runs are provided to members. At these exchanges, members generally have access to trade matching information through computer terminals and printers located on the exchange floor. After each trade matching run, referred to as "reconciliations" by some exchanges, members have an opportunity to correct errors or break trades during the trading session or afterwards. Any re-submission of data on a trade generally would receive the same trade identification number. Thus, a trade could be tracked throughout the resolution process. In addition, the exchange may require that traders submit forms that contain information about corrections or deletions of trade data.

Other exchanges use trade clearing or matching systems that do not include the on-line submission of trade data to the exchange or a clearing house for some or all trades. With these systems, trade data are given to the exchange or clearing firms on written forms. The exchange or clearing firm then either enters data into a computer system and sends incomplete forms back to the traders for additional trade information or completes new forms and sends these to the exchange or clearing house for matching or clearing.

For the New York Mercantile Exchange, which uses a pit-card and Transfer Form system, any errors in trade data are corrected on Trade Data Correction Forms during the trading day and Transfer Forms after 5:00 p.m. that day. Once completed, these forms are submitted to the clearing house where information is entered into the computer. Although this system does not generate unmatched trades, errors could occur when incorrect information is reflected on the Transfer Form. In addition, outtrades could occur when the selling member fails to submit trade data to the exchange on the day of execution and the buying member fails to verify his transaction.[12] In cases where the selling member fails to submit trade data and the trade is not verified, the exchange requires that the members submit forms the following day with pertinent trade information.

For exchanges that use a matching process and do not use an on-line data entry system, unmatched trade runs are provided to members for the purpose of resolving errors in data submission. Any re-submission of trade data may or may not be recorded as being related to the original trade. In addition, certain exchanges require that a member or clearing firm record information on corrections and deletions on slips provided by the exchange.

In sum, the exchanges provide a variety of methods for tracking and reviewing errors, unmatched trades, and outtrades. As a result of the regular surveillance of activities related to errors, unmatched trades, and outtrades, trading abuses should be diminished.

Issued in Washington, DC, on this 29th day of August, 1989.

Lynn K. Gilbert,

Deputy Secretary to the Commission.

BILLING CODE 6351-01-M

---

[10] For example, Commodity Exchange, Inc. Rule 4.28 provides that disputes during the trading day over the price or quantity of any transaction, among other items, must be resolved by decision of a majority of the members of the Exchange Floor Committee then present in the ring in which the transaction occurred. Any such resolution must be recorded on forms provided by the Exchange for that purpose.

[11] These include the Chicago Board of Trade, Chicago Mercantile Exchange, Commodity Exchange, Inc., Kansas City Board of Trade, and New York Futures Exchange.

[12] At the New York Mercantile Exchange, this situation is called an "as of."

RAILROAD RETIREMENT BOARD

20 CFR Part 332

RIN 3220-AA76

Mileage or Work Restrictions and Stand-By or Lay-Over Rules

AGENCY: Railroad Retirement Board.

ACTION: Proposed rule.

SUMMARY: The Railroad Retirement Board (Board) hereby proposes to amend part 332 of its regulations to redefine what is meant by the phrase "equivalent of full-time work" for railroad train and engine service employees who do not have regular assignments. The non-work days of an employee who has the equivalent of full-time work are not considered to be "days of unemployment" for which benefits otherwise might be payable under the provisions of section 2(a) of the Railroad Unemployment Insurance Act.

DATES: Comments must be received on or before October 6, 1989.

ADDRESSES: Office of Secretary to the Board, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611.

FOR FURTHER INFORMATION CONTACT: Thomas W. Sadler, General Attorney, Bureau of Law, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611; (312) 751–4513, (FTS) 386–4513.

SUPPLEMENTARY INFORMATION: Part 332 of the Board's regulations relates to the eligibility for unemployment benefits of railroad employees in train and engine service and other similar types of service who work under collective bargaining agreements that impose work restrictions and stand-by or lay-over rules. Part 332 is based upon the third proviso of section 1(k) of the Railroad Unemployment Insurance Act. Section 1(k) defines what is meant by the phrase "day of unemployment" and provides, in part, that a day of unemployment means a calendar day with respect to which no remuneration, as defined in section 1(j) of the Act, is payable or accrues to the employee. However, under the third proviso of section 1(k), if no remuneration is payable or accrues to an employee for any calendar day solely because of the application to the employee of mileage or work restrictions agreed upon in schedule agreements between employers and employees or solely because the employee is standing by for or laying over between regularly assigned trips or tours of duty, such calendar day shall not be considered as a day of unemployment for such employee.

Under current regulations, if, under his or her applicable agreement, an employee is getting 14 basic work days in a registration period, the employee is, in effect, employed full-time and not eligible for unemployment benefits for his or her non-work days. The Board considers that the employee's non-work days result from the operation of the extra board and the work restrictions relating thereto. Under this proposed rule, the Board would consider an employee to be fully employed if he or she gets 10 basic work days in a registration period.

The 14-day test for full-time work set forth in the present § 332.5 has become obsolete in light of modern day rail industry practices recognized by rail labor and management in their agreements. In recent years, collectively-bargained rules regarding train and engine crew changes have been relaxed to permit a train crew to travel substantially more miles on a given assignment. Such assignments are referred to as being in "interdivisional pool service." An employee who is a crew member on such an assignment may now travel in one day the same number of miles that previously required two or more work days, with the result that the employee has more than the usual number of non-work days between such assignments.

Whereas an employee in pool service formerly might work as many as 10 days out of 14 in order to be credited with a certain number of miles, he or she may now be able to work the same number of miles in only 8 days with the result that he or she has 6 rest days, rather than 4, in a two-week period and no loss of income. However, under present regulations, as long as such employee does not earn at least 14 basic days, as defined in the applicable agreement, he or she may receive unemployment benefits for two of the six rest days, since the RUIA provides for the payment of such benefits for all days of unemployment in excess of four in a 14-day registration period.

Indeed, the above example has become quite common since under current industry practices most employees in pool service will not earn 14 basic days in a two-week period, yet, as may be seen from the above example, such employees from an economic standpoint have suffered no loss of income and have the additional advantage of having more rest days than employees who may have regular hours and assignments.

The proposed rule recognizes this change in rail industry practices by decreasing what is regarded as the equivalent of full-time work from 14 basic work days to 10. Thus, in the example above, if the employee had earned 10 basic days through service on just 8 days, as may often be the case, he or she will not be held eligible for unemployment benefits for his or her six non-work days. In addition, to prevent avoidance of this rule, the proposed regulation provides that in determining whether an employee has earned 10 basic days, an employee who misses his or her turn to work will be credited with the number of miles or hours he or she would have been credited with had he or she not missed the turn.

The Board has determined that this is not a major rule for purposes of Executive Order 12291. Therefore, no regulatory analysis is required. The information collection required by part 332 has been approved by the Office of Management and Budget under control number 3220–0022.

List of Subjects in 20 CFR Part 332

Railroad employees, Railroad unemployment benefits.

For the reasons set out in the preamble, title 20, chapter II, part 332 of the Code of Federal Regulations is proposed to be amended as follows:

PART 332—MILEAGE OR WORK RESTRICTIONS AND STAND-BY OR LAY-OVER RULES

1. The authority citation for Part 332 is revised to read as follows:

Authority: 45 U.S.C. 362(1).

2. Section 332.5 is revised to read as follows:

§ 332.5 Equivalent of full-time work.

An employee who has the equivalent of full-time work with respect to service on days within a registration period is not eligible for unemployment benefits for any non-work days within such registration period. In determining whether an employee has the equivalent of full-time work, the Board will consider the provisions of labor-management agreements that prescribe the number of miles or hours of credit constituting a basic work day, week, or month in the employee's occupation or service. The Board will consider that an employee had the equivalent of full-time work if the number of miles or hours credited to the employee for service in the registration period is at least 10 times the number of miles or hours constituting a basic day in the employee's occupation or service. For this purpose, any miles or hours of credit not earned because the employee missed his or her turn and any penalty miles assessed to the employee shall be added to the miles or hours of credit actually earned on the basis of service on days within the registration period.

Dated: August 28, 1989.

By Authority of the Board.

Beatrice Ezerski,
Secretary to the Board.

RIN 1545–AJ74

Untimely Filing of Income Tax Returns by Nonresident Alien Individuals and Foreign Corporations; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to notice of proposed rulemaking.

SUMMARY: This document contains corrections to the **Federal Register** publication for Monday, July 31, 1989, at 54 FR 31545 of the notice of proposed rulemaking. The proposed rules relate to denial of deductions and credits to nonresident alien individuals and foreign corporations that did not file true and accurate income tax returns by the time limits set forth in the proposed regulations.

FOR FURTHER INFORMATION CONTACT: Richard Chewning of the Office of Associate Chief Counsel (International), within the Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC, telephone (202) 566–6384, (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

The notice of proposed rulemaking that is the subject of this correction contains amendments to the Income Tax Regulations (26 CFR part 1) under sections 874 and 882 of the Internal Revenue Code.

Need for Correction

As published, the notice of proposed rulemaking contains a typographical error which may prove to be misleading and is in need of clarification.

Correction of Publication

Accordingly, the publication of the proposed rules which was the subject of FR Doc. 89–17725, is corrected as follows:

§ 1.874–1 [Corrected]

In § 1.874–1(c)(2), on page 31546, column 3, line 8, the language "§ 301.7605–2(a)" is corrected to read, "§ 301.7605–1(a)".

Dale D. Goode,
Chief, Regulations Unit, Assistant Chief Counsel (Corporate)

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 85

[AMS-FRL-3640-9]

Performance Warranty Regulations and the Voluntary Aftermarket Part Certification Program: Proposed Alternative Short Test Procedure

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; notice of public hearing and extension of comment period.

SUMMARY: This notice announces a public hearing regarding the notice of proposed rulemaking (NPRM) for a proposed alternative short test procedure in the voluntary aftermarket part certification program (54 FR 32598, August 8, 1989). The public comment period is being extended to a date 30 days after the comment period.

DATES: The public hearing will be held Tuesday, October 10, 1989, beginning at 9:00 a.m. The public comment period is being extended to November 10, 1989.

ADDRESSES: The public hearing will be held in the conference room of the EPA Motor Vehicle Emission Laboratory, 2565 Plymouth Road, Ann Arbor, Michigan 48105. Parties wishing to present oral testimony at the public hearing should notify in writing, prior to the hearing, Mr. Michael Sabourin, Certification Division, U.S. EPA, Motor Vehicle Emission Laboratory, 2565 Plymouth Road, Ann Arbor, Michigan 48105.

Any party may also submit written comments regarding the NPRM to the EPA, Air Docket, Room M–1500 (LE-131), Waterside Mall, 401 M Street SW., Washington, DC 20460, ATTENTION: Docket No. A–88–31. Copies of material relevant to the NPRM in this docket will be available for public inspection from 8:00 a.m. to 12:00 noon and from 1:30 p.m. to 3:30 p.m. on weekdays. A reasonable fee may be charged for photocopying.

FOR FURTHER INFORMATION CONTACT: Michael Sabourin, Certification Division, U.S. EPA, 2565 Plymouth Road, Ann Arbor, Michigan 48105, (313) 668–4316.

SUPPLEMENTARY INFORMATION: On August 8, 1989, EPA promulgated a final rule revising the voluntary aftermarket part certification program regulations (54 FR 32566). Under these revised regulations, whenever a manufacturer is required to perform emissions testing as part of its demonstration requirement for certification of an emission-related part, it must use the Federal Test Procedure (FTP).

In the same **Federal Register**, EPA published a notice of proposed rulemaking (NPRM) proposing an alternative test procedure for the certification of aftermarket parts (54 FR 32598). The alternative test is comprised of the first 505 seconds of the FTP and is known as the cold 505 test procedure.

In the NPRM, EPA specifically requested comments in two areas. First, EPA requested comments on the appropriate level of the cold 505 standards. Second, EPA requested comments on whether it is inappropriate to certify certain aftermarket parts using the cold 505 procedure. Interested parties should address these topics as well as any other issues raised in the NPRM.

Persons wishing to present their views at the public hearing are requested to notify the EPA contact identified above by no later than October 2, 1989, of their intention to make a statement. On the day of the hearing presenters are requested to bring sufficient copies of their oral presentation to distribute to EPA panel members, and to industry attendees. Persons who have not given notice of their intent to speak will be heard as time permits following the scheduled statements.

Dated: August 30, 1989.

William G. Rosenberg,
Assistant Administrator for Air and Radiation.

40 CFR Part 180

[PP 8E3682 and 9E3715/P488; FRL-3641-3]

Pesticide Tolerance for Glyphosate

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that tolerances be established for the combined residues of the herbicide glyphosate and its metabolite in or on the raw agricultural commodity crop group *Brassica* (cole) leafy vegetables and in or on the raw agricultural commodities longan, mamey sapote, lychee, sapodilla, and passion fruit. The proposed regulation to establish maximum permissible levels for residues of the herbicide in or on the crop group and raw agricultural commodities was requested in petitions submitted by the Interregional Research Project No. 4 (IR-4).

DATE: Comments, identified by the document control number [PP 8E3682 and 9E3715/P488], must be received on or before October 6, 1989.

ADDRESSES: By mail, submit written comments to: Public Information Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 246, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 246 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

BEST COPY AVAILABLE

FOR FURTHER INFORMATION CONTACT: By mail: Hoyt Jamerson, Emergency Response and Minor Use Section (H7505C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 716C, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–2310.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petitions (PP) 8E3682 and 9E3715 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project, and the named Agricultural Experiment Stations. The petitions requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of tolerances for the combined residues of the herbicide glyphosate (*N*-(phosphonomethyl)glycine), and its metabolite aminomethylphosphnonic acid (AMPA) in or on certain raw agricultural commodities.

1. *PP 8E3682.* Petition submitted on behalf of the Agricultural Experiment Stations of California, Florida, Michigan, and New York in or on the raw agricultural commodity crop group *Brassica* (cole) leafy vegetables at 0.2 part per million (ppm). The proposed tolerance for the *Brassica* (cole) leafy vegetables crop group replaces, in part, the existing glyphosate tolerance for leafy vegetables at 0.2 ppm. The *Brassica* (cole) leafy vegetable group consists of the raw agricultural commodities broccoli, Chinese broccoli, broccoli raab, Brussels, sprouts, cabbage, Chinese cabbage, Chinese mustard cabbage, cauliflower, collards, kale, kohlrabi, mustard greens, and rape greens.

The term "leafy vegetables" is a crop group designation that was used prior to the revision of 40 CFR 180.34(f), the Crop Group Regulations, which was published in the **Federal Register** of June 29, 1983 (48 FR 29855). Establishment of the proposed tolerance for *Brassica* (cole) leafy vegetables partially replaces, but does not allow the deletion of, the already established crop grouping "leafy vegetables"; the *Brassica* (cole) leafy vegetable crop group does not include all members of the leafy vegetable crop group.

2. *PP 9E3715.* Petition submitted on behalf of the Agricultural Experiment Station of Florida in or on the raw agricultural commodities longan, mamey sapote, lychee, sapodilla, and passion fruit at 0.2 ppm.

The data submitted in the petitions and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerances are sought. The toxicological data considered in support of the proposed tolerances include:

1. A three-generation rat reproduction study with a no-observed-effect level (NOEL) of 10 milligrams (mg) per kilogram (kg) per day.

2. A chronic feeding-oncogenicity study in rats with a systemic NOEL of 31 mg/kg/day, which was negative for oncogenic potential under the conditions of the study at all feeding levels tested (0, 3, 10, and 31 mg/kg/day). Although the rat study meets the requirement for a chronic feeding study, it does not satisfy guideline requirements for an oncogenicity study. There is no evidence that the highest dose tested (31 mg/kg/day) was a toxic or maximum tolerated dose (MTD).

3. A 1-year dog feeding study with a systemic NOEL of 500 mg/kg/day (highest dose tested).

4. A rat teratology study, negative for teratogenic effects at 3,500 mg/kg/day (highest dose tested), with maternal and developmental toxicity NOELs of 1,000 mg/kg/day.

5. A rabbit teratology study, negative for teratogenic effects at 350 mg/kg/day (highest dose tested), with a maternal NOEL of 175 mg/kg/day and a developmental toxicity NOEL of 350 mg/kg/day.

6. Mutagenicity studies as follows: chromosomal aberration *in vitro* (no aberrations in Chinese hamster ovary cells were caused with or without S–9 activation); DNA repair in rat hepatocytes (negative); *in vivo* bone marrow cytogenic in rats (negative); rec-assay with *B. subtilis* (negative up to 2,000 micrograms of test material per disk); reverse mutation with *S. typhimurium* (negative); Ames test with *S. typhimurium* (negative); and a dominant lethal test in mice (negative).

Additionally, a 2-year oncogenicity study in CD–1 mice has been completed and reviewed by the Agency. Feeding levels in this study were 1,000, 5,000 and 30,000 ppm (equivalent to 150, 750 and 4,500 mg/kg/day, respectively). The NOEL for nonneoplastic chronic effects was established at 5,000 ppm. In this study, glyphosate produced an equivocal oncogenic response, possibly causing a slight increase in the incidence of renal tubular adenomas (a benign tumor of the kidney) in male mice at the highest dose tested (30,000 ppm). Because of the equivocal nature of the oncogenic response in mice and the lack of an acceptable oncogenicity study in rats, the Agency referred the issue to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Science Advisory Panel (SAP) for a "Weight-of-Evidence" recommendation. After reviewing all available evidence, the SAP concluded that the oncogenic potential of glyphosate could not be determined from the available information and recommended that the mouse and/or rat studies be repeated to clarify unresolved questions. Subsequently, the Agency classified glyphosate as a "Category D Oncogen" (inadequate evidence of oncogenicity) and requested repeat oncogenicity studies in both mice and rats. The rat oncogenicity study is due in 1990, and a repeat study in male mice is due in 1992.

Current Agency policy is to establish tolerances for significant new uses of glyphosate on a case-by-case basis. Tolerances which change the theoretical maximum residue contribution (TMRC) by more than 1 percent are generally considered significant.

The acceptable daily intake (ADI), based on the NOEL of 10 mg/kg/day from the rat reproduction study and using a 100-fold safety factor, is calculated to be 0.1 mg/kg of body weight (bw)/day. The TMRC from existing tolerances for a 1.5-kg daily diet is calculated to be 0.005096 mg/kg/day. The tolerance for *Brassica* (cole) leafy vegetables will not result in an increase in the TMRC because of the already established tolerance on the leafy vegetable crop group. The tolerances for longan, lychee, mamey sapote, sapodilla, and passion fruit will result in an increase in the TMRC of less than 0.000001 mg/kg/day, an inconsequential increase in the ADI.

The established tolerances for meat, milk, poultry, or eggs are adequate to cover any secondary residues from feed use of the *Brassica* (cole) leafy vegetable crop group commodities and longan, lychee, mamey sapote, sapodilla, and passion fruit are not considered livestock feed commodities. The nature of the residues is adequately understood, and an adequate analytical method (gas chromatography using a flame photometric detector) is available for enforcement purposes. An analytical enforcement method is currently available in the *Pesticide Analytical Manual* (PAM), Volume II. There are currently no actions pending against the continued registration of this chemical.

Based on the data and information considered, the Agency concludes that the tolerances proposed would protect the public health. Therefore, it is

proposed that the tolerances be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 8E3682 and 9E3715/P488]. All written comments filed in response to this petition will be available in the Public Information Section, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Recording and recordkeeping requirements.

Dated: August 28, 1989.

Anne E. Lindsay,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR 180 be amended as follows:

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. Section 180.364(a) is amended by adding and alphabetically inserting the commodity crop group *Brassica* (cole) leafy vegetables and the raw agricultural commodities longan, lychee, mamey sapote, passion fruit, and sapodilla, to read as follows:

§ 180.364 Glyphosate; tolerances for residues.

(a) * * *

Commodities	Parts per million
* * * *	*
Longan	0.2
Lychee	0.2
Mamey sapote	0.2
* * * *	*
Passion fruit	0.2
* * * *	*
Sapodilla	0.2
* * * *	*
Vegetables, leafy, *Brassica* (cole)	0.2
* * * *	*

DEPARTMENT OF AGRICULTURE

Office of the Secretary

State of Ohio Multiflora Rose Control Program; Determination of Primary Purpose of Program Payments for Consideration as Excludable From Income Under Section 126 of the Internal Revenue Code of 1954

AGENCY: Office of the Secretary, USDA.

ACTION: Notice of determination.

SUMMARY: The Secretary of Agriculture has determined that all State cost-share payments made under the Ohio Multiflora Rose Control Program are primarily for the purposes of soil and water conservation and protecting or restoring the environment. This determination is in accordance with section 126 of the Internal Revenue Code of 1954, as amended by section 543 of the Revenue Act of 1978 and the Technical Corrections Act of 1979. The determination permits recipients to exclude these payments from gross income to the extent allowed by the Internal Revenue Service (IRS).

FOR FURTHER INFORMATION CONTACT: Lawrence G. Vance, Chief, Division of Soil and Water Conservation, Ohio Department of Natural Resources, Fountain Square, Columbus, Ohio 43224; or Director, Land Treatment Program Division, Soil Conservation Service, USDA, P.O. Box 2890, Washington, DC 20013, (202) 382–1870.

SUPPLEMENTARY INFORMATION: Section 126 of the Internal Revenue Code of 1954, as amended, 26 U.S.C. 126, provides that certain payments made to persons under State conservation programs may be excluded from the recipient's gross income for Federal income tax purposes if the Secretary of Agriculture determines that payments are made "primarily for the purpose of soil and water conservation, protecting or restoring the environment, improving forest, or providing a habitat for wildlife * * *." The Secretary of Agriculture evaluates these conservation programs on the basis of criteria set forth in 7 CFR part 14 and makes a "primary purpose" determination for the payments made under each program. Before there may be an exclusion, the Secretary of the Treasury must determine that the payments made to a person under these conservation programs do not substantially increase the annual income derived from the property benefited by the payments.

One of the State conservation programs is the Ohio Multiflora Rose Control Programs authorized by Ohio Revised Code chapters 1511 and 1515. It is funded by annual State appropriations providing financial assistance to private land owners to help them maintain various conservation practices on their land. Cost-share payments minimize the loss of crop and pasture land to brush infestation.

Procedural matters: The Department of Agriculture has classified this determination as "not major" in accordance with Executive Order 12291 and Secretary's Memorandum No. 1512–1. The Secretary has determined that these program provisions will not result in an annual effect on the economy of $100 million or more; will not cause a major increase in cost to consumers, individuals, industries, government agencies, or geographic regions; and will not cause significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. An Ohio Multiflora Rose Control Program, "Primary Purpose Determination for Federal Tax Purposes," Record of Decision, has been prepared and is available upon request from Chief, Division of Soil and Water Conservation, Ohio Department of Natural Resources, Fountain Square, Columbus, Ohio 43224; or the Director, Land Treatment Program Division, Soil Conservation Service, P.O. Box 2890, Washington, DC 20013.

Determination: As required by section 126 of the Internal Revenue Code of 1954, as amended, I have examined the authorizing legislation, regulations, and operating procedures of the Ohio Multiflora Rose Control Program. In accordance with the criteria set out in 7 CFR part 14, I have determined that all cost-share payments made under this program are primarily for the purposes of soil and water conservation and protecting or restoring the environment. Subject to further determination by the Secretary of the Treasury, this determination permits payment recipients to exclude from gross income, for Federal income tax purposes, all or part of such payments made under the Ohio Multiflora Rose Control Program.

Signed at Washington, DC, on August 30, 1989.

Clayton Yeutter,
Secretary.

Ohio Multiflora Rose Control Program

Record of Decision

Primary Purpose Determination for Federal Tax Purposes

Introduction

The Secretary of Agriculture is authorized by section 126 of the Internal Revenue Code of 1954, as amended (26 U.S.C. 126), to determine whether payments under certain Federal and State cost-sharing programs are made for the primary purpose of soil and water conservation, protecting or restoring the environment, improving forests, or providing a habitat for wildlife. This determination identifies payments that are eligible for exclusion from the recipient's gross income for Federal tax purposes to the extent allowed by the Internal Revenue Service.

Basis for Determination

The U.S. Department or Agriculture (USDA) determination is made in accordance with 7 CFR part 14 by reviewing authorizing legislation, regulations, and operating policy and procedures to identify the purposes for which cost-share payments are made. Final determinations are made on the basis of program, category of practices, or individual practices and are published in the **Federal Register**.

Statement of Findings

The Ohio Multiflora Rose Control Program is authorized under the Ohio Revised Code, sections 1511 and 1515. Ohio law states the Chief of the Division of Soil and Water Conservation of the Ohio Department of Natural Resources shall specify the multiflora rose control practices eligible for State cost sharing and determine the conditions for eligibility, standards and specifications, the maintenance requirements, and the limits of cost sharing for such practices.

The main objective of the program is to control multiflora rose, therefore, retaining the land's productivity.

The landowner must enter into an agreement with the local Soil and Water Conservation District which provides for cost-share assistance and requires the landowner to continue the control two years after the initial treatment.

Summary

The purpose of the program is to preserve and protect Ohio's land. Cost sharing is limited by law or policy and is consistent with other similar programs. Priority for assistance is given to those projects providing the greatest public benefit.

Determination

It is determined that all cost-share payments for multiflora rose control made by landowners, occupiers, and operators under the Ohio Multiflora Rose Control Program are for the purpose of soil and water conservation and protecting or restoring the environment.

BILLING CODE 3510-07-M

International Trade Administration

[C-559-804]

Initiation of Countervailing Duty Investigation: Certain Computer Aided Software Engineering Products From Singapore

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in proper form with the U.S. Department of Commerce, we are initiating a countervailing duty investigation to determine whether manufacturers, producers, or exporters in Singapore of certain computer aided software engineering products (CASE software), as described in the "Scope of Investigation" section of this notice, receive benefits which constitute bounties or grants within the meaning of the countervailing duty law. If this investigation proceeds normally, we will make our preliminary determination on or before November 2, 1989.

EFFECTIVE DATE: September 6, 1989.

FOR FURTHER INFORMATION CONTACT: Ross Cotjanle or Carole Showers, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–3534 and (202) 377–3217.

SUPPLEMENTARY INFORMATION:

The Petition

On August 9, 1989, we received a petition in proper form from Visible Systems Corporation, of Waltham, Massachusetts on behalf of the U.S. industry producing CASE software. In compliance with the filing requirements of § 355.12 of the Commerce Department Regulations published in the Federal Register on December 27, 1988 (53 FR 52306) (to be codified at 19 CFR 355.12), the petition alleges that manufacturers, producers, or exporters of CASE software in Singapore receive, directly or indirectly, benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act).

Singapore is not a "country under the Agreement" within the meaning of section 701(b) of the Act and the merchandise being investigated is dutiable. Therefore, section 303(b) of the Act applies to this investiation. Accordingly, petitioner is not required to allege that, and the U.S. International Trade Commission is not required to determine whether, imports of the subject merchandise from Singapore materially injure, or threaten material injury to, a U.S. industry.

Petitioner has alleged that it has standing to file the petition. Specifically, petitioner has alleged that it is an interested party as defined under section 771(9)(C) of the Act and that it has filed the petition on behalf of the U.S. industry producing the products that are subject to this investigation. If any interested party as described under paragraphs (C), (D), (E), or (F) of section 771(9) of the Act wishes to register support of or opposition to this petition, please file written notification with the Commerce officials cited in the "**FOR FURTHER INFORMATION CONTACT**" section of this notice.

Initiation of Investigation

The Department is limited by section 303 of the Act to the imposition of a countervailing duty upon a class or kind of article or merchandise that is imported into the United States. In its consideration of the petition submitted by Visible Systems Corporation, the Department has had to examine the complex issue of whether the software product described in the petition constitutes merchandise subject to the Act, *i.e.*, whether the software in question is a "good" or a "service." The countervailing duty law provides no direct guidance on this question. However, since the filing of the petition, the Department has conducted considerable research into this issue. We have found that in other contexts software has been classified as either a good or a service because it has both tangible and intangible characteristics and manifestations. The different classifications of software appear to depend on the circumstances under which it is analyzed.

Although no single universally accepted definition of software exists, software is generally defined as a set of statements or instructions to be used directly or indirectly in a computer to perform a desired task or set of tasks. Software does not generally include procedures which are external to computer operations.

CASE software is sold pre-packaged and is not created pursuant to a service contract between a software producer and an end-user. Rather, it is pre-written and copyrighted with no one particular end-user in mind, can be purchased "off-the-shelf," and is usable, without further intervention by the seller of the software, by a broad range of customers. Moreover, pre-packaged software is marketed in commerce as merchandise;

vendors maintain inventories of it just as with any other similar merchandise; and manufacturers generally provide product warranties enabling customer returns for refunds.

Several state courts have held that software on carrier media constitutes a good because the carrier media cannot be severed from the software, *i.e.*, the carrier media is essential for customer usage. These courts have also held that software is subject to sales tax. Furthermore, section 2-105 of the Uniform Commercial Code (UCC) defines goods as "all things (including specially manufactured goods) which are movable at the time of identification to the contract * * *." Software contained on a carrier media is movable. Additionally, software has been classified by some states as a good under their commercial codes.

The General Agreement on Tariffs and Trade (GATT) has determined that there are two accepted methods for the assessment of duties on software. Under GATT, duties on software can either be assessed on the basis of the recording area on the carrier media or on an *ad valorem* basis by reference to the value of the software contained on the carrier media (*see*, GATT, Committee on Customs Valuation; Decision on the Valuation of Carrier Media Bearing Software for Data Processing Equipment Adopted By the Committee on Customs Valuation on September 24, 1984 (VAL/8), 31 *Supp. GATT Basic Instruments and Documents*, 274 (1985)). U.S. Customs has chosen to assess duties solely on the basis of the recording area of the carrier media (*see, U.S. Valuation of Imported Carrier Media Bearing Data or Instructions for Use in Data Processing Equipment*, T.D. 85-124, 50 FR 30558 (July 28, 1985)). However, U.S. Customs does distinguish between recorded and non-recorded carrier media in the calculation of duties, imposing a slightly higher rate of duty on recorded carrier media. The higher duty for recorded media implies that the data recorded on the media is both of value and is dutiable. The different treatment of recorded and non-recorded media by the Customs Service and the GATT's declaration of accepted methods of duty assessment on software is consistent with the classification of software as dutiable merchanise.

Base on information available to the Department and presented in the petition, we have determined that CASE software is (1) a pre-packaged software product which can be purchased off-the-shelf, (2) typically contained on a carrier media, (3) a pre-written product with broad application, which does not need additional servicing by the seller of the software prior to use by the end-user, (4) marketed similarly to other types of merchandise, (5) maintained in inventory by vendors, and (6) treated differently than non-recorded carrier media by the U.S. Customs Service. Therefore, for purposes of determining whether to initiate this investigation, we have focused on the tangible aspects of software products and have determined that CASE software is a good, and thus, merchandise subject to the countervailing duty law.

Under section 702(c) of the Act, we must make the determination on whether to initiate a countervailing duty proceeding within 20 days after a petition is filed. Section 702(b) of the Act requires the Department to initiate a countervailing duty proceeding whenever an interested party files a petition, on behalf of an industry, that (1) alleges the elements necessary for the imposition of a duty under section 701(a), and (2) is accompanied by information reasonably available to the petitioner supporting the allegations. We have examined the petition on CASE software from Singapore and have found that it meets these requirements.

Therefore, since (1) CASE software is merchandise subject to the Act, and (2) the petition meets the statutory requirements regarding the alleged bounties or grants, we are initiating an investigation pursuant to section 702(c) of the Act.

If our investigation proceeds normally, we will make our preliminary determination on or before November 2, 1989.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted to the *Harmonized Tariff Schedule* (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered or withdrawn from warehouse for consumption on or after this date will be classified solely according to the appropriate HTS item number(s). The HTS item number(s) are provided for convenience and Customs purposes. The written description remains dispositive as to the scope of the product coverage.

The products covered by this investigation are "front-end" Computer Aided Software Engineering (CASE) tools, including all updated versions, which have been imported from Singapore, whether labelled or unlabelled. These software products are personal computer-based tools which run in the Disk Operating System (DOS) environment and are designed to automate the various stages of the software development tasks of defining user requirements, conducting system analysis activities, and creating a detailed design specification for the software system under development. There are a number of standardized engineering techniques which front-end CASE tools are designed to automate. These include techniques of "structured analysis", "structured design", and "data modeling", among others. All front-end CASE tools are designed to produce logically validated and documented systems specifications, which in turn are used as detailed "blueprints" for the actual writing of application codes. These front-end stages of the software development life cycle are contrasted with the "back-end" lifecycle stages of coding, testing, and maintenance. Back-end CASE tools are not covered by this investigation.

Although front-end CASE tools generally are imported on recorded floppy disks, they may also be imported on other carrier media. All such dutiable imports are covered by the scope of this investigation. Petitioner has indicated that CASE software may be imported packaged ready for sale; as a master disk for duplication purposes within the United States; or via electronic transmission. The subject merchandise is currently classifiable under HTS item numbers 8524.21.30.80, 8524.22.20.00, 8524.23.20.00, and 8524.90.40.80. Merchanise which is imported duty-free is not included in the scope of this investigation.

Allegations of Subsidies

Petitioner lists a number of practices by the Government of Singapore which allegedly confer bounties or grants on manufacturers, producers, or exporters of CASE software. We are initiating an investigation of the following programs:

- *Double Deduction of Research and Development Expenses*
- *Expansion of Established Enterprises*
- *Investment Allowance*
- *Initiatives in New Technologies*
- *Software Development Assistance Scheme*
- *Product Development Assistance Scheme*
- *Capital Assistance Scheme*
- *Research and Development Assistance Scheme*
- *Skills Development Fund*
- *Information Technology Institute Development of CASE Products*

- *OHQ Operational Headquarters Program*
- *Double Deduction for Export Promotion Expenses*
- *Production for Export*
- *Warehousing and Servicing Incentives*
- *Operational Subsidy*
- *Small Industries Assistance Scheme*
- *Small Industries Finance Scheme*
- *Accelerated Depreciation*

This notice is published pursuant to section 702(c)(2) of the Act.

Dated: August 29, 1989.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Export Trade Certificate of Review

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of issuance of an amended export trade certificate of review.

SUMMARY: The Department of Commerce has issued an amendment to the Export Trade Certificate of Review granted to the California Cherry Export Association of San Joaquin County. Notice of issuance of the Certificate was published in the **Federal Register** on September 3, 1987 (52 FR 33465).

FOR FURTHER INFORMATION CONTACT: Douglas J. Aller, Director, Office of Export Trading Company Affairs, International Trade Administration, (202) 377-5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. 4001-21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. The regulations implementing title III are found at 15 CFR part 325 (50 FR 1804, January 11, 1985).

The Office of Export Trading Company Affairs is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Department of Commerce to publish a summary of a Certificate in the **Federal Register**. Under Section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

Description of Amended Certificate

Export Trade Certificate of Review No. 87-00009 was issued to the California Cherry Export Association of San Joaquin County (CCEA) on August 27, 1987. Notice of issuance of the Certificate was published in the **Federal Register** on September 3, 1987 (52 FR 33465).

The California Cherry Export Association of San Joaquin County (CCEA) has amended its Certificate to:

1. Revise the name of the Certificate holder from the "California Cherry Export Association of San Joaquin County" to the "California Cherry Export Association" to reflect its statutory name change of September 19, 1988.
2. Add the following additional companies as "Members" within the meaning of § 325.2(1) of the Regulations (15 CFR 325.2(1)): Churchill Nut Company, Hollister, California; Dole Bakersfield, Inc., Victor, California; and Blue Anchor, Inc., Sacramento, California.

EFFECTIVE DATE: May 31, 1989.

A copy of the amended Certificate will be kept in the International Trade Administration's Freedom of Information Records Inspection Facility, Room 4102, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

Dated: August 30, 1989.

Douglas J. Aller,

Director, Office of Export Trading Company Affairs.

[FR Doc. 89-20905 Filed 9-5-89; 8:45 am]

BILLING CODE 3510-DR-M

National Technical Information Service

Prospective Grant of Exclusive Patent License

This is notice accordance with 15 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i) that the National Technical Information Service (NTIS), U.S. Department of Commerce, is contemplating the grant of an exclusive license in the United States and certain foreign countries to practice the invention embodied in U.S. Patent Application Serial Number 7-189,037, "Cockroach Growth Regulating Composition and Method" to University of Florida, having a place of business at 223 Grinter Hall, Gainesville, Florida 32611. The patent rights in this invention have been assigned to the United States of America as represented by the Secretary of Agriculture and the Secretary of the Army, and to the University of Florida.

The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within sixty days from the date of this published Notice, NTIS receives written evidence and argument which establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

A copy of the instant patent application may be purchased from the NTIS Sales Desk by telephoning 703/487-4650 or by writing to Order Department, NTIS, 5285 Port Royal Road, Springfield, VA 22161.

Inquiries, comments and other materials relating to the contemplated license must be submitted to Charles A. Bevelacqua, Office of Federal Patent Licensing, NTIS, Box 1423, Springfield, VA 22151.

Douglas J. Campion,

Associate Director, Office of Federal Patent Licensing, National Technical Information Service, U.S. Department of Commerce.

BILLING CODE 3510-04-M

CONSUMER PRODUCT SAFETY COMMISSION

Notification of Request for Extension of Approval of Information Collection Requirements—Requirements for Full-Size Cribs

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35), the Consumer Product Safety Commission has submitted to the Office of Management and Budget a request for extension of approval through August 31, 1992, of information collection requirements in the safety regulations applicable to full-size cribs codified at 16 CFR 1500.18(a)(13) and part 1508. These regulations were issued to reduce hazards of strangulation, suffocation, pinching, bruising, laceration and other injuries associated with full-size cribs. (A full-size crib is a crib having an interior length dimension ranging from 51¾ inches to 53 inches; and an interior width ranging from 27⅜ inches to 28⅝ inches.) The regulations prescribe performance, design, and labeling requirements for non-full-size cribs. They also require manufacturers and importers of those products to maintain

sales records for a period of three years after the manufacture or importation of non-full-size cribs. If any full-size cribs subject to the provisions of 16 CFR 1500.18(a)(13) and Part 1508 fail to comply in a manner severe enough to warrant a recall, the required records can be used by the manufacturer or importer and by the Commission to identify those persons and firms who should be notified of the recall.

Additional Details About the Request for Extension of Approval of Information Collection Requirements

Agency address: Consumer Product Safety Commission, Washington, DC 20207

Title of information collection: Recordkeeping Requirements for Full-Size Baby Cribs—16 CFR 1508.12.

Type of request: Extension of approval.

Frequency of collection: Varies depending upon volume of products manufactured, imported, or sold.

General description of respondents: Manufacturers and importers of non-full-size cribs.

Estimated number of respondents: 55.

Estimated average number of hours per respondent: 5 per year.

Estimated number of hours for all respondents: 275 per year.

Comments: Comments on this request for extension of approval of information collection requirements should be addressed to Pamela Barr, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503; telephone: (202) 395–7340. Copies of the request for extension of information collection requirements are available from Francine Shacter, Office of Planning and Evaluation, Consumer Product Safety Commission, Washington, DC 20207; telephone: (301) 492–6416.

This is not a proposal to which 44 U.S.C. 3504(h) is applicable

Dated: August 31, 1989.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-M

Notification of Request for Extension of Approval of Information Collection Requirements—Procedures for Export of Noncomplying Products

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35), the Consumer Product Safety Commission has submitted to the Office of Management and Budget a request for extension of approval through August 31, 1992, of information collection requirements in regulations codified at 16 CFR part 1019, which establish procedures for export of noncomplying products. These regulations implement provisions of the Consumer Product Safety Act, the Federal Hazardous Substances Act, and the Flammable Fabrics Act which require persons and firms to notify the Commission before exporting any product which fails to comply with an applicable standard or regulation enforced under provisions of those laws. The Commission is required by law to transmit the information relating to the proposed exportation of noncomplying products to the government of the country of intended destination.

Additional Details About the Request for Extension of Approval of Information Collection Requirements

Agency address: Consumer Product Safety Commission, Washington, DC 20207

Title of information collection: Procedures for Export of Noncomplying Products.

Type of request: Extension of approval.

Frequency of collection: Varies depending upon volume of noncomplying products exported.

General description of respondents: Exporters of products which fail to comply with standards or regulations enforced under provisions of the Consumer Product Safety Act, the Federal Hazardous Substances Act, or the Flammable Fabrics Act.

Estimated number of respondents: 100.

Estimated average number of hours per respondent: 1.5 per year.

Estimated number of hours for all respondents: 150 per year.

Comments: Comments on this request for extension of approval of information collection requirements should be addressed to Pamela Barr, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503; telephone: (202) 395–7340. BILLING CODE 6355-01-M

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF Scientific Advisory Board Meeting

August 29, 1989.

The USAF Scientific Advisory Board Strategic Cross-Matrix Panel will meet on 20–21 Sep 89, from 8:00 a.m. to 5:00 p.m., at ASD, Wright-Patterson AFB OH.

The purpose of this meeting will be to gather information on space technologies related to the National Aero-Space Plane as requested by CINCSAC. The meeting at ASD will involve discussions of classified defense matters listed in section 552b(c) of title 5, United States Code, specifically subparagraph (1) thereof, and accordingly will be closed to the public.

For further information, contact the Scientific Advisory Board Secretariat at (202) 697–8845.

Patsy J. Conner,

Air Force Federal Register Liasion Officer.

[FR Doc. 89–20843 Filed 9–5–89; 8:45 am]

BILLING CODE 3910-01-M

Department of the Army

Record of Decision Chemical Stockpile Disposal Program; Tooele Army Depot

AGENCY: Department of the Army, DOD.

ACTION: Availability of record of decision (ROD).

SUMMARY: This announces the availability of the Record of Decision regarding the destruction of the stockpile of lethal unitary chemical agents and munitions stored at Tooele Army Depot (TEAD), Utah. The Army has decided to construct and operate a full-scale disposal facility at TEAD using the Johnston Atoll Chemical Agent Disposal System (JACADS) reverse assembly and incineration technology.

SUPPLEMENTARY INFORMATION: Title 14, part B, section 1412 of Public Law 99–145 and subsequent legislation requires destruction of the U.S. stockpile of lethal unitary chemical agents and munitions by April 1997, in conjunction with the acquisition of the new binary chemical weapons. To implement the Congressional directive, the Department of Army conducted a programmatic environmental review consistent with the National Environmental Policy Act and governing Council on Environmental Quality Regulations (40 CFR Parts 1500–1508). A Final Programmatic Environmental Impact Statement (FPEIS) was issued in January 1988.

The FPEIS addressed five alternatives: (1) Continued storage of the stocks at their present locations; (2) on-site disposal of the stocks at their present storage locations; (3) relocation of the stocks to regional disposal centers at Anniston Army Depot, Alabama, and TEAD for destruction; (4) relocation of the stocks to a national disposal center at TEAD for destruction; and (5) relocation of the inventories at some specific sites to alternative sites, with the remainder destroyed at their present storage locations. The FPEIS identified the on-site disposal option as the environmentally preferred alternative and concluded that the stockpile of chemical agents and munitions stored in the continental U.S. can be destroyed in a safe, environmentally acceptable manner.

In its programmatic Record of Decision (53 FR 5816, February 26, 1988), the Department of Army selected on-site incineration as its preferred alternative. In making that decision, the Army noted that environmental impacts, including the hazards and risk analyses presented in the FPEIS, were a contributing but not determining factor in the decision. Other factors considered included the feasibility and effectiveness of emergency response measures, vulnerability to terrorism and sabotage, and logistical complexity. In addition, incineration was endorsed by the National Research Council as the best and safest means of destroying these lethal chemical agents.

Subsequent to issuance of the FPEIS and the attendant Record of Decision, the validity of the programmatic decision for on-site disposal of the TEAD stockpile was given further consideration in a Phase I Environmental Report, issued in September 1988. The report used recently collected site-specific data to examine the suitability of on-site disposal of agents and munitions stored at TEAD. The report also examined resource data for the TEAD vicinity to determine whether significant resources are present that could affect implementation of on-site disposal at TEAD. No new or unique site-specific information was found that would change or contradict the conclusion of the FPEIS for TEAD.

On February 8, 1989, the findings and conclusions of the Phase I Environmental Report and an independent review (which concurred with the findings of the report) were certified to Congress by then Assistant Secretary of the Army (Installations and Logistics) John W. Shannon. This certification initiated the preparation of the Final Environmental Impact Statement, July 1989. As presented in the Final EIS, the Department of Army's proposed action is to implement the programmatic decision of on-site destruction of the lethal unitary chemical agents and munitions stockpiled at the Tooele Army Depot. This action entails construction and operation of a destruction facility based on the JACADS incineration technology and experience. The alternatives considered in the site-specific EIS, based on the information and conclusions presented in the Programmatic EIS and the Phase I reports, included on-site locations for the destruction facility and the "no action" alternative of indefinite storage of the TEAD stockpile. Because of the Congressional directive to destroy the stockpile and hazards associated with continued storage, the "no action" alternative is not a viable long-term option.

The ROD selected the site located near the center of the TEAD-South area adjacent to the southeast corner of the existing chemical munitions storage area for the construction of the chemical disposal facility at TEAD. This site was both the Army preferred site and also the environmentally preferred alternative because it best meets the criteria of safety to the off-post communities, minimizes the transportation distance from the storage area, minimizes exposure to potential earthquakes, and minimizes interferences with other activities at the Depot. Construction of the disposal facility is expected to begin in September 1989 and will take about 30 months to complete.

The Army will adopt all practicable means to avoid or minimize environmental harm from the alternative selection. Measures to mitigate both the likelihood and consequence of severe accidents will be incorporated in the facility design and operating procedures as delineated in the Final EIS for Tooele. A major program is also under way to enhance emergency preparedness at TEAD and contiguous areas. The program is intended to mitigate the human health impacts of catastrophic accidents from both storage and disposal operations.

Before operations begin, a four-month design and procurement verification period will be included in the program to incorporate changes resulting from the JACADS program. Prior to toxic operations, there will be a period of preoperational checkout, training, and integrated systems operation under mock conditions with simulant munitions (without agent). All state and federal regulations will be complied with before and during disposal operations. Once toxic agent operations are initiated, destruction of the stockpile is expected to take approximately four years based on a 24-hour day, five-day per week schedule. CONCLUSION: The Department of Army has weighed the costs, benefits, schedule, and environmental impacts in its decision to destroy the stockpile of lethal unitary chemical agents and munitions stored at TEAD. Through this analysis, the Department of Army has selected construction and operation of a JACADS-type reverse assembly and incineration facility at TEAD. This alternative is the best choice from a public health and environmental perspective.

Interested individuals may obtain copies of the Record of Decision by contacting the Program Manager for Chemical Demilitarization, ATTN: SAIL–PMI (Ms. Marilyn Tischbin), Aberdeen Proving Ground, Maryland 21010–5401.

Lewis D. Walker,

Deputy Assistant Secretary of the Army, (Environment, Safety and Occupational Health) OASA (I&L).

BILLING CODE 3710-08-M

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Office of Information Resources Management, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATES: Interested persons are invited to submit comments on or before October 6, 1989.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Jim Houser, Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place NW., Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue SW., Room 5624, Regional Office Building 3, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster, (202) 732–3915.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

The Director, Office of Information Resources Management, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following:

(1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Frequency of collection; (4) The affected public; (5) Reporting burden; and/or (6) Recordkeeping burden; and (7) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Margaret Webster at the address specified above.

Dated: August 30, 1989.

George Sotos,

Acting Director for Office of Information Resources Management.

Office of Planning, Budget, and Evaluation

Type of Review: New

Title: A Descriptive Study of the Chapter 1 Migrant Education Program

Frequency: One time only

Affected Public: Individuals or households; State or local governments

Reporting Burden: Responses: 3,517

Burden Hours: 2,644

Recordkeeping Burden: Recordkeepers: 0

Burden Hours: 0

Abstract: This study will collect, analyze and report on a nationally-representative sample of the program operations, administration, and staffing for the Chapter 1 Migrant Education Program—the Department will use this information for program management and refinement of policy.

[FR Doc. 89–20818 Filed 9–5–89; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Financial Assistance Award; Intent To Award Grant to Texas A&M University

AGENCY: U.S. Department of Energy.

ACTION: Notice of unsolicited financial assistance award.

SUMMARY: The Department of Energy announces that pursuant to 10 CFR 600.14, it is making a financial assistance award under Grant Number DE–FG01–89CE21038 to Texas A&M University.

Scope: The funding for this grant will allow the grantee to perform the first step in measuring the energy impact of infiltration on test cells and building components.

The purpose of this project is to conduct a set of experiments which will quantify the heat transfer/heat exchange processes in test cells and a set of building components present in a test cell. This will be accomplished through steady-state measurements made on components, combinations of components and complete test cells as well as through dynamic measurement of complete test cells. These measurements will determine the extent of the heat exchange which occurs in key building components and assemblies and will test measurement techniques which can be used to measure the infiltration load in houses and other buildings.

Eligibility: Based on receipt of an unsolicited application, eligibility of this award is being limited to Texas A&M University. This project represents a unique idea for which a competitive solicitation would be inappropriate. This project is meritorious in that it will increase the knowledge base available to private sector building designers and provide tehcnical information on the accurate determination of the energy requirement associated with infiltration.

The proposal submitted by Texas A&M outlines a well conceived and systematic approach, beginning with simple test cell measurements and evolving into a detailed experimentation and analysis leading to the development of an "infiltration/heat exchange" model.

The combination of Texas A&M's well-suited research facilities, the expertise of the project director, and the preliminary work, which has already been done by Texas A&M, is indicative of a high probability of achieving the objectives stated in the grantee's proposal.

The term of this grant shall be six (6) months from the effective date of award.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Office of Procurement Operations, Attn: Kristin Wright, MA–453.2, 1000 Independence Avenue SW., Washington, DC 20585.

Thomas S. Keefe,

Director, Contract Operations Division "B", Office of Procurement Operations.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Project No. 10113–000]

Perpetual Storage, Inc.; Availability of the Environmental Assessment

August 29, 1989.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing reviewed the application for exemption from licensing for the proposed Whitmore Hydropower Project, located on Little Cottonwood Creek in Salt Lake County, Utah, and prepared an Environmental Assessment (EA) for the project. In the EA, the Commission's staff analyzes the potential environmental impacts of the proposed project and concludes that, with appropriate mitigation measures, approval of the proposed project would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, Room 1000, of the Commission's offices at 825 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

EXECUTIVE OFFICE OF THE PRESIDENT

Office of Administration

Puerto Rican Referendum Legislative Activities—Availability of Funds

AGENCY: Executive Office of the President, Office of Administration.

ACTION: Notice of funds availability.

SUMMARY: In the matter of funds made available to political parties in Puerto Rico, as described in Pub. L. 101–45: availability of funds.

The Office of Administration, Executive Office of the President, announces its policies and application procedures for funds available under Public Law 101–45, to the Popular Democratic, New Progressive, and Puerto Rico Independence political parties of the Commonwealth of Puerto Rico for participation in the legislative process involving the future political status of Puerto Rico. The purpose of this announcement is to communicate to the potential grantees the policies and procedures that will be used in administering this program.

Eligible Applicants

The following organizations are eligible to apply for funds under this notice: the Popular Democratic Party of Puerto Rico; the New Progressive Party of Puerto Rico; and the Puerto Rican Independence Party of the Commonwealth of Puerto Rico.

Program Objective

The primary objective of this program is to implement the statutory mandate of Pub. L. 101–45 appropriating $1.5 million to the Office of Administration of the Executive Office of the President for three equal grants to the above-mentioned political parties to enhance their participation in the legislative process involving the future political status of Puerto Rico. Funds may be used for travel and transportation of persons; services as authorized by section 3109 of title 5, United States Code; communications, utilities; printing and reproduction; supplies and materials; administrative costs; and other related services. No funds may be used for any expenses for declared candidates for political office or any employees of campaigns for political office. No funds may be used for entertainment expenses. Other prohibited or restricted uses of funds will be listed in the grant agreement.

Available Funds

$1.5 million is available for grants of $500,000 to the three eligible applicants. Funds may be used to cover necessary expenses incurred after March 1, 1989, and will remain available until the sine die adjournment of the 101st Congress, which shall be no later than the end of calendar year 1990.

Application Procedures

Prior to receipt of any funds, each eligible applicant must submit an application for funding. This application must identify the name and address of the official in the party responsible for and authorized to enter into a grant agreement between the party and the U.S. Government. The application will also contain a proposed budget outlining, by month, how these funds will be spent, what internal controls will be used to ensure that the funds are spent for the purposes stated, and the name of a person who will serve as administrative officer for the grant. The applications shall be sent to Mr. Hector F. Irastorza, Jr., Special Assistant to the President and Deputy Director of the Office of Administration, Old Executive Office Building, Washington, DC 20500 (202) 456–6226, who shall serve as the grant officer. Applications are due sixty days from the date of publication of this notice. The applicant may be required to submit any other information deemed necessary prior to approval of the grant.

Funding Mechanism and Restrictions

Upon receipt and approval of the application, the grantee and the government will execute grant agreements specifying the mechanism for receipt of funds and the conditions attendant to initial and continued receipt of these funds. The applicant will be expected to comply with the following conditions before any funds can be spent: all travel funded must be in accordance with published U.S. Government travel regulations; any consultant contract over $50,000 funded under this contract must be approved as to funding eligibility by the government's grant officer prior to being entered into by the grantee; all pertinent information regarding the grant must be made available to the public; applicable civil rights and anti-discrimination statues must be adhered to; accounting systems and records shall be such that the Comptroller General of the United States shall be able to audit the uses of the grant funds. Other conditions regarding expenditure of grant funds and grantee performance shall be specified in the terms and conditions of the grant that must be executed before any funds may be received.

After execution of the grant agreement, award payments shall be made by the letter-of-credit method. In accordance with appropriate regulations and relevant OMB and Department of Treasury guidelines, the recipient shall: (1) Maintain procedures for fund control to ensure that any drawdowns on the letter-of-credit are requested only when actually needed for its immediate disbursement needs; (2) comply with timely reporting of cash disbursements and balances as required. If the recipient does not adhere to these provisions, the Government may revoke the letter-of-credit and institute reimbursement of costs incurred by treasury check.

For any expenditures incurred after March 1, 1989 but prior to execution of the grant agreement, detailed transaction records must be submitted along with evidence supporting that the expenditures were for the purposes stated in the legislation. The grant officer will have to approve reimbursement for these expenditures before they can be considered eligible grants costs.

Further information may be received by contacting the grant officer.

Dated: August 23, 1989.

Paul W. Bateman,

Deputy Assistant to the President for Management and Director of the Office of Administration.

[FR Doc. 89-20823 Filed 9-5-89; 8:45 am]

BILLING CODE 3115-01-M

FEDERAL ELECTION COMMISSION

[Notice 1989-15]

Filing Dates for Mississippi Special Election

AGENCY: Federal Election Commission.

ACTION: Notice of filing dates for Mississippi special election.

SUMMARY: Mississippi has scheduled a special election in the 5th Congressional District of Mississippi to fill the seat that was held by Larkin Smith. There are two possible elections, but only one may be necessary.

- Special Election: October 3, 1989. If no candidate wins a majority of votes in the Special Election, the two top vote-geters, regardless of party affiliation will participate in a Special Runoff.
- Special Runoff Election: October 17, 1989.

FOR FURTHER INFORMATION CONTACT: Ms. Bobby Werfel, Public Information Office, 999 E St., NW., Washington, DC 20463, Telephone: (202) 376-3120; Toll Free (800) 424-9530.

SUPPLEMENTARY INFORMATION: Principal campaign committees of candidates who participate in the Mississippi Special Election must file reports according to the schedules given in Charts 1 through 3. The committee treasurer should consult the chart that corresponds to the candidate's situation. Party committees and PACs that make contributions or expenditures in connection with the Special Elections during the coverage dates listed in the charts must file the appropriate reports. Monthly filers, however, do not file special Pre- and Post-Election reports.

Calendar of Reports for Mississippi Special Election

Chart 1: If only one election is held; Special (10/3/89)

Report	Period covered[1]	Reg./cert mailing date[2]	Filing date
Pre-Special	07/01/89-09/13/89	09/18/89	09/21/89
Post-Special	09/14/89-10/23/89	11/02/89	11/02/89
Year-End	10/24/89-12/31/89	01/31/90	01/31/90

Chart 2: If two elections are held, and the committee is involved in both; Special (10/3/89) and Runoff (10/17/89):

Report	Period covered[1]	Reg./Cert. mailing date[2]	Filing date
Pre-Special	07/01/89-09/13/89	09/18/89	09/21/89
Pre-Runoff	09/14/89-09/27/89	[3]10/05/89	10/05/89
Post-Runoff	09/28/89-11/06/89	11/16/89	11/16/89
Year-End	11/07/89-12/31/89	01/31/90	01/31/90

Chart 3: If two elections are held, but a committee is involved in only the first; Special (10/3/89):

Report	Period covered[1]	Reg./Cert. mailing date[2]	Filing date
Pre-Special	07/01/89-09/13/89	09/18/89	09/21/89
Year-End	09/14/89-12/31/89	01/31/90	01/31/90

[1] The period begins with the close of the last report filed by the committee. If the committee has filed no previous reports, the period begins with the date of the committee's first activity.

[2] Reports sent by registered or certified mail must be postmarked by the mailing date. Otherwise, they must be received by the filing date.

[3] Committees involved in the Runoff Election may use the October 5 filing date as the mailing date for the Pre-Runoff Report.

Note: If no candidate achieves a majority of the vote in the Special Election, the two top vote-getters, regardless of party, go to a Runoff Election.

Dated: August 30, 1989.

John Warren McGarry,

Commissioner.

BILLING CODE 6715-01-M

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

August 28, 1989.

Background

Notice is hereby given of the submission of proposed information collection(s) to the Office of Management and Budget (OMB) for its review and approval under the Paperwork Reduction Act (title 44 U.S.C. chapter 35) and under OMB regulations on Controlling Paperwork Burdens on the Public (5 CFR part 1320). A copy on the proposed information collection and supporting documents is available from the agency clearance officer listed in the notice. Any comments on the proposal should be sent to the OMB desk officer listed in the notice. OMB's usual practice is not to take any action on a proposed information collection until at least ten working days after notice in the **Federal Register**, but occasionally the public interest requires more rapid action.

For Further Information Contact

Federal Reserve Board Clearance Officer—Frederick Schroeder—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202-452-3822).

OMB Desk Officer—Gary Waxman—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, DC 20503 (202-395-7340).

Request for OMB Approval to Extend Without Revision

Report title: Report on Indebtedness of Executive Officers and Principal Shareholders and their Related Interests to Correspondent Banks
Agency form number: FFIEC 004
OMB Docket number: 7100-0034
Frequency: Annually (for the report), quarterly and on occasion (for recordkeeping and disclosure requirements)
Reporters: Executive officers and principal shareholders of member banks
Annual reporting hours: 6,922
Estimated average hours per response: 1.27 hours (1 hour of reporting burden, 2.35 hours of recordkeeping burden)
Estimated number of respondents: 5,450 (4,360 executive officers and principal shareholders filing the report, 1,090 state member banks fulfilling the recordkeeping burden)
Small businesses are affected.

General description of report:

This information collection is mandatory (12 U.S.C. 1972(2)(G)) and is given confidential treatment (12 CFR 215.22(2)).

Executive officers and principal shareholders of member banks who are indebted to correspondent banks must file the FFIEC 004 report on such indebtedness to them or their related interests. State member banks are required to retain these reports for a period of three years.

Board of Governors of the Federal Reserve System, August 28, 1989.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

Change in Bank Control Notice; Acquisition of Shares of Banks or Bank Holding Companies

The notificant listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than September 15, 1989.

A. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Otis Guy Bacon,* Ardmore, Oklahoma; to acquire an additional 10.3 percent of the voting shares of Amcorp Financial Corporation, Inc., Ardmore, Oklahoma, and thereby indirectly acquire American National Bank, Ardmore, Oklahoma.

Board of Governors of the Federal Reserve System, August 30, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

National Bancorp, Inc.; Notice of Application To Engage de Novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than September 21, 1989.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *National Bancorp, Inc.*, Melrose Park, Illinois; to engage *de novo* in acquiring and servicing loans or other extensions of credit of the type set forth in § 225.25(b)(1) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, August 30, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

[FR Doc. 89-20837 Filed 9-5-89; 8:45 am]

BILLING CODE 6210-01-M

Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank

Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than September 27, 1989.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Earl K. Nau*, Springfield, Missouri; to acquire an additional 5.36 percent of the voting shares of First City Bancshares, Inc., Springfield, Missouri, for a total of 15.26 percent, and thereby indirectly acquire First City National Bank, Springfield, Missouri.

B. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *David A. Erickson*, Linton, North Dakota; to acquire an additional 1.14 percent of the voting shares of Linton Bancshares, Inc., Linton, North Dakota, and thereby indirectly acquire The First National Bank, Linton, North Dakota.

C. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *John F. Piercey*, Salt Lake City, Utah, to acquire 50 percent; Lynne B. Haldemann, Chinook, Montana, to acquire 12.5 percent; Scott M. Browning, San Diego, California, to acquire 12.5 percent; Gay Browning, Salt Lake City, Utah, to acquire 12.5 percent; and Diane Browning, River Heights, Utah, to acquire 12.5 percent of the voting shares of Cottonwood Bancorporation, Salt Lake City, Utah, and thereby indirectly acquire Cottonwood Security Bank, Salt Lake City, Utah.

Board of Governors of the Federal Reserve System, August 30, 1989.

BILLING CODE 6210-01-M

Plainview Bankshares, Inc.; Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than September 22, 1989.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Plainview Bankshares, Inc.*, Plainview, Minnesota; to become a bank holding company by acquiring 80 percent of the voting shares of First National Bank, Plainview, Minnesota.

In connection with this application, Applicant also proposes to continue to engage in its existing lending and loan participation activities, which include obtaining lending capital from a Federal Intermediate Credit Bank, making loans and other extensions of credit for primary agricultural production, purchasing participations in loans from its subsidiary bank, and making loans and extensions of credit to certain officers, directors and share holders of Applicant. These activities will be conducted in Wabasha, Olmstead, and Winona Counties.

Board of Governors of the Federal Reserve System, August 30, 1989.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

Public Information Collection Requirements Submitted to the Office of Management and Budget for Clearance

AGENCY: Health Care Financing Administration, HHS. The Department of Health and Human Services (HHS) previously published a list of information collection packages it submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (Public Law 96-511). The Health Care Financing Administration (HCFA), a component of HHS, now publishes its own notices as the information collection requirements are submitted to OMB. The HCFA has submitted the following requirements to OMB since the last HCFA list was published.

1. *Type of Request:* Extension; *Title of Information Collection:* Information Collection Requirements for Sole Community Home Health Agencies; *Form Number:* HCFA-R-85; *Frequency:* On occasion case-by-case; *Respondents:* Individuals/households; *Estimated Number of Responses:* 20; *Average Hours per Response:* 5; *Total Estimated Burden Hours:* 100.

2. *Type of Request:* Reinstatement; *Title of Information Collection:* Long Term Care Request for Certification; *Form Number:* HCFA-1516; *Frequency:* Annually; *Respondents:* State/local governments, businesses/other for

profit, and small businesses/organizations; *Estimated Number of Responses:* 19,100; *Average Hours per Response:* .25; *Total Estimated Burden Hours:* 4,775.

3. *Type of Request:* Revision; *Title of Information Collection:* Medicaid Management Information System; *Form Number:* HCFA–R–4; *Frequency:* On occasion; *Respondents:* State/local governments; *Estimated Number of Responses:* 47; *Average Hours per Response:* 47,177; *Total Estimated Burden Hours:* 2,217,300.

4. *Type of Request:* Extension; *Title of Information Collection:* Integrated Review Schedule; *Form Number:* HCFA–301; *Frequency:* Monthly; *Respondents:* State/local governments; *Estimated Number of Responses:* 102,192 (Reporting) and 370,436 (Recordkeeping); *Average Hours per Response:* .2991 (Reporting); *Total Estimated Burden Hours:* 30,569 (Reporting) and 20,374 (Recordkeeping); total 50,943.

Additional Information or Comments: Call the Reports Clearance Officer on 301–966–2088 for copies of the clearance request packages. Written comments and recommendations for the proposed information collections should be sent directly to the following address: OMB Reports Management Branch, Attention: Allison Herron, New Executive Office Building, Room 3208, Washington, DC 20503.

Dated: August 30, 1989.

Louis B. Hays,

Acting Administrator, Health Care Financing Administration.

BILLING CODE 4120–03–M

Social Security Administration

Statement of Organization, Functions and Delegations of Authority; Deputy Commissioner, Management

Part S of the Statement of Organization, Functions and Delegations of Authority for the Department of Health and Human Services (HHS) covers the Social Security Administration (SSA). Notice is given that Chapter S1 of the Deputy Commissioner, Management, is being amended to reflect some internal realignments of subordinate offices in that Office. Chapter S1, Section S1E is amended to add division- and staff-level subcomponents and functions within the Office of Human Resources, Training and Management Analysis in the Office of the Deputy Commissioner, Management. The new material and changes are as follows:

Section S1E.200 *The Office of Human Resources, Training and Management Analysis*—(Functions):

Add:

C. 1. The Executive Recruitment and Services Staff (S1EA5).

a. Develops and implements all SSA policies and activities relating to the Agency's executive personnel management program.

b. Develops and implements policies and guidelines for SSA administration of the Senior Executive Service.

2. The Division of Labor and Employee Relations (S1EA4).

a. Plans and directs the development and evaluation of the SSA labor-management and employee relations (disciplinary/adverse and unacceptable performance) programs; formulates SSA-wide labor-management and employee relations policy; serves as the SSA reference point for inquiries, guidance and interpretations on labor-management and employee relations matters and provides SSA liaison with the Office of Personnel Management (OPM), HHS and other non-SSA entities and organizations concerning labor-management and employee relations in SAA.

b. Implements labor-management relations programs and policies throughout SSA's headquarters and field organizations; participates in negotiation and implementation of such procedures with labor organizations; resolves or recommends resolution in labor relations disputes and advises management during bargaining sessions.

c. Represents SSA management in all labor-management relations matters and proceedings which are adjudicated outside the Agency.

d. Provides the full range of labor-management relations advisory services to all SSA components to ensure proper application of negotiated agreement provisions and directs monitoring of union-management consultations as required by negotiated agreements or executive orders.

e. Implements an SSA program for disciplinary/adverse and unacceptable performance actions, in accordance with applicable regulations and procedures. Provides technical assistance, guidance, representation and letter-writing services for misconduct and performance action cases to management in SSA headquarters. Also provides these services to the field in complex cases.

f. In coordination with HHS' Office of the General Counsel, researches law, executive orders, court, Merit Systems Protection Board and Comptroller General decisions, regulations, policies, precedents and procedures on disciplinary/adverse actions, employee appeals and grievances.

3. The Division of Personnel Operations (S1EA1).

a. Implements policies and regulations pertaining to SSA recruitment and placement. Initiates and processes personnel actions for SSA headquarters employees and participates with office managers and staffs in assessing placement actions; directs the administration of all Merit Promotion Plans applicable within Baltimore/Washington headquarters components. Processes necessary administrative actions required for new employees entering on duty.

b. Provides professional counseling and referral services for emotionally disturbed employees and employees with alcohol or drug problems. Provides technical advice and guidance to SSA management officials on matters related to these functions.

c. Implements policies, regulations and affirmative action programs pertaining to special recruitment and staffing activities for SSA headquarters and field organizations; develops and implements special needs placement programs, including handicapped and veterans readjustment programs.

d. Develops, implements and evaluates SSA's employees health services programs in conformance with appropriate laws, policies and regulations.

e. Directs the development and operation of SSA's employee services such as: Workers' Compensation, health benefits, preretirement counseling and employee thrift plans. Provides assistance to employees regarding claims for loss of wages, settlement awards, notices of injury and required medical reports.

4. The Division of Classificiation and Organization Management (S1EA2).

a. Develops and implements SSA-wide programs of position classification and position management within SSA headquarters. Directs position classification and position management activities having SSA-wide significance.

b. Provides advice and assistance to all SSA components on activities and issues that involve position classification and position management; serves as the central SSA referral point on these programs and acts as SSA liaison with OPM, HHS and other non-SSA entities and organizations with respect to assigned areas of responsibility.

c. Formulates and oversees the implementation of policies, procedures, standards, directives and objectives which assure that position structure and management promote cost-effective operations and the efficient use of employee skills.

d. Provides leadership and coordination in the formulation of SSA policies, directives and programs relating to the Fair Labor Standards Act and to salary and wage surveys; and conducts a continuing review of the applicability of classification standards and, as appropriate, negotiates with OPM for the revision of such standards or the development of single agency standards.

e. Directs an SSA-wide program for inspection and evaluation of SSA's personnel management program including employment and staffing, position management and classification, employee relations, equal employment opportunity and labor relations. Conducts administrative surveys and special studies to provide managers with information and assistance to assure conformance with OPM regulations and HHS/SSA policies and directives.

f. Authorizes the establishment of positions and organizations, providing advice and guidance to managers on organizational structure and preparing **Federal Register** and Organizational Manual material.

5. The Division of Personnel Policy, Data and Research (S1EA3).

a. Directs the formulation and issuance of SSA personnel management policies and directives. Reviews all proposals submitted by other components pertaining to such areas as staffing, compensation, appraisals and performance standards, personnel information disclosure, employee relations, labor-management relations and management communications and ensures that such proposals are consistent with pertinent laws, regulations and policies. Oversees the dissemination and implementation of SSA-wide policies and directives pertaining to personnel management areas. Directs the development and maintenance of the SSA personnel manual system, reviewing all issuances under this system.

b. Provides overall coordination and direction to work environment improvement efforts within SSA. Coordinates a variety of studies throughout SSA designed to improve the work environment.

c. Designs, analyzes and implements a variety of research projects in the areas of personnel management. Plans, designs and implements human resources planning policy and procedures consistent with SSA-wide strategic planning initiatives.

d. Directs the development and operation of SSA employee awards programs. Develops and implements SSA employee suggestion, incentive and honor awards programs.

e. Plans and directs ongoing development, analysis and evaluation of SSA's personnel recordkeeping systems; develops general objectives and performance standards for automated systems and detailed specifications for development or modification of computer programs used in automated systems and proposes changes in these systems to meet SSA's human resources data, statistics and information needs. Coordinates, with SSA's Office of the Deputy Commissioner, Operations, the planning, development, modification and evaluation of automated systems. Reviews and processes all personnel and payroll actions in conformance with OPM and HHS regulations.

f. Plans, designs and evaluates personal computers and office automation support for human resources systems. Operates selected data processing/office automation systems in the Office of Human Resources.

Subsection D. The Office of Training (S1EB).

Delete:

D. The Office of Training (S1EB) in its entirety.

Add:

D. The Office of Training (S1EB) is responsible for the management and administration of a national training program to enhance SSA's capability of providing effective and efficient service to the public. It develops and issues Agencywide policies, procedures and operational guidelines for the design, development, implementation, maintenance and evaluation of all SSA training activities. Reviews training conducted by component technical training staffs in both Headquarters and the field, the SSA instructor cadre, other Government agencies and outside contractors to ensure that the results of all training are consistent with Agency needs. It directs the financial management of training monies to ensure accountability of money spent to train and develop the Agency's employees—from new hires to senior-level executives—located throughout the nation. Maintains the Headquarters Training Center, the Individualized Learning Center and the Training Information Center.

1. The Division of Management and Employee Development (S1EB1).

a. Directs, designs, develops, implements, conducts and evaluates all SSA supervisory, managerial and executive-level training development activities.

b. Has Agencywide responsibility for common needs and general skills training, including related developmental activities for nonsupervisory personnel.

c. Initiates independent studies and analyses to anticipate and identify new or changing training and development needs in a dynamic organizational environment.

d. Engages in applied research and development efforts associated with training and development programs administered by the division. Provides ongoing consultative assistance and support to SSA components, including training needs identification and program design; monitors and evaluates Agency training and developmental activities to ensure desired results and effects of nontechnical training provided to the Agency's employees. Fosters and maintains effective communications with appropriate internal and external organizations to ensure positive results relative to Agency objectives, policy directives, new initiatives, inservice training needs, etc.

e. Plans, directs, coordinates and administers the activities relative to developing and executing budget activities; evaluates SSA training in terms of cost-effectiveness, quality and value to the Agency; plans, formulates and implements SSA training policies and provides overall support and coordination to the training function. Coordinates attendance for Government-sponsored and nongovernment-sponsored conferences.

2. The Division of Technical Training (S1EB2).

a. Directs the design, development, implementation and evaluation of SSA program/technical training, including entry-level and advanced program, systems-user and computer technology training and other technical training to meet the needs of SSA components Agencywide.

b. Conducts ongoing research to identify automated technologies and instructional methodologies for application to training throughout SSA.

c. Develops guidelines and procedures to determine technical training needs, and reviews and evaluates technical training Agencywide.

Subsection E. The Office of Management Analysis (S1EC).

Add:

1. The Division of Workforce Utilization (S1EC2).

a. Develops and implements comprehensive workforce utilization and planning programs to improve productivity and the use of the SSA workforce.

b. Conducts studies and analyses of work processes and procedures, workflows and workload processing positions; applies a variety of disciplines and techniques, including management analysis and model building to assure best workforce utilization and recommends action to top SSA executives for improving the effectiveness of the SSA workforce.

c. Develops SSA-wide workforce management policies, procedures and guidelines; develops, analyzes and interprets workforce forecasting data and projects future workforce needs, including the types of skills and positions required.

d. Develops and implements a program to evaluate Agency operations in light of OMB Instruction A–76 and establishes policies to ensure overall compliance with A–76 provisions.

2. The Division of Management Studies and Analysis (S1EC1).

a. Directs, develops and implements a comprehensive program of management studies, research and analysis to evaluate and determine the feasibility of implementing major changes affecting the SSA organization, its administrative practices and its methods of operation. Studies and analyses are Agencywide, frequently deal with issues of a sensitive nature and may involve other Government agencies.

b. Undertakes feasibility, predictive benefit and cost/risk analyses to identify alternatives and to develop administrative strategies for consideration by the SSA Executive Staff in responding to Agencywide problems and issues.

c. Directs, develops and conducts Agencywide reviews and studies using industrial engineering, model building and other scientific approaches and methodologies.

d. Reviews and analyzes existing and proposed formal delegations of program and administrative decisionmaking authorities within SSA.

e. Has responsibility for SSA mobilization procedures for assuring continuity of all necessary SSA operations during a national emergency.

Dated: August 11, 1989.

John R. Dyer,

Deputy Commissioner for Management.

BILLING CODE 4190-11-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N-89-2043]

Notice of Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESS: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 755–6050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: This Notice informs the public that the Department of Housing and Urban Development has submitted to OMB for emergency processing, an information collection package with respect to the Public Housing Drug Elimination Program.

This Notice is intended to inform the public that the Department is seeking emergency processing by September 6, 1989, of the paperwork requirements contained in a Notice of Fund Availability (NOFA) for the Public Housing Drug Elimination program. The NOFA announces the availability of $8.2 million in grant funds for public housing agencies and Indian housing authorities to eliminate drug-related crime in public housing projects. The public is invited to submit comments by September 6, 1989, on any paperwork requirements contained in the NOFA to: OMB Desk Officer for HUD, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503. Copies of the NOFA may be obtained from the Department of Housing and Urban Development, Rules Docket Clerk, 451 Seventh Street, SW., Room 10276, Washington, DC 20410. Upon approval of the paperwork requirements by OMB, a 90-day control number will be issued and displayed in the NOFA.

The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information collection proposal; (3) the description of the need for the information and its propose use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total numbers of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: August 30, 1989.

John T. Murphy,

Director, Information Policy and Management Division.

Notice of Submission of Proposed Information Collection to OMB

Proposal: Public Housing Drug Elimination Program—Notice of Fund Availability (NOFA).

Office: Public and Indian Housing.

Description of the Need for the Information and its Proposed Use: This information collection announces the availability of $8.2 million in grant funds for the purpose of eliminating drug-related crime in public housing projects.

Form Number: None.

Respondents: State or Local Governments and Non-Profit Institutions.

Frequency of Submission: One-Time and Semi-Annually.

Reporting Burden:

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Ivory Export Quotas Issued by the Secretariat of the Convention on International Trade in Endangered Species of Wild Fauna and Flora's Ivory Control System

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: On June 9, 1989, under the provisions of the African Elephant Conservation Act, the United States prohibited the import of all African elephant ivory except for sport-hunted trophies. Trophies may be imported from an ivory producing country if it has an ivory export quota accepted by the Secretariat of the Convention on International Trade in Endangered Species of Wild Fauna and Flora. As ivory export notifications are received from the Secretariat by the Fish and Wildlife Service, they will be published in the **Federal Register**. The first such notice was published on March 20, 1989. This notice adds 1989 quotas for Burkina Faso, Chad, Kenya, Nigeria, Senegal, Somalia and Tanzania.

EFFECTIVE DATE: September 6, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Frank McGilvrey, Office of Management Authority, telephone (703) 358–2095.

SUPPLEMENTARY INFORMATION: On June 9, 1989, the Fish and Wildlife Service published a notice of a moratorium on importation of raw and worked ivory (54 FR 24758). This is a total ban except for import of sport-hunted trophy ivory. Section 2202(e) of the African Elephant Conservation Act of 1988 states that "Individuals may import sport-hunted elephant tropies that they have legally taken in an ivory producing country that has submitted an ivory quota."

Through the **Federal Register**, notices will be published of such quotas as notifications are received from the CITES Secretariat. Sport-hunted trophies may be imported into the United States only from nations which have ivory quotas for the year in which the import will take place. The first such notice was published on March 20, 1989 (54 FR 11449). Since then, quotas have been established for Burkina Faso, Chad, Kenya, Nigeria, Senegal, Somalia and Tanzania. This allows sport-hunted trophies with proper export permits to be imported from these countries into the United States during 1989. As of this date, import of trophies will be allowed for 1989 only from the following nations:

Country	1989 quota for total export of African elephant tusks
Botswana	1,000
Burkina Faso	46
Cameroon	296
Central African Republic	600
Chad	269
Congo	1,042
Ethiopia	670
Kenya	2,000
Malawi	238
Mozambique	17,961
Nigeria	50
Senegal	28
Somalia	1,653
South Africa	2,236
Tanzania	12,000
Zambia	3,772
Zimbabwe	5,000

This notice was prepared by Frank McGilvrey, U.S. Fish and Wildlife Service, Office of Management Authority.

Dated: August 30, 1989.

Richard M. Smith,

Director.

BILLING CODE 4310-55-M

Bureau of Land Management

[UT-940-09-4212-11; U-54156]

Termination of Recreation and Public Purpose Classification; Utah

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This notice terminates Recreation and Public Purpose Classification affecting 9.242 acres in Box Elder County, Utah.

EFFECTIVE DATE: September 30, 1989.

FOR FURTHER INFORMATION CONTACT: Mike Barnes, BLM Utah State Office, 324 South State Street, Suite 301, Salt Lake City, Utah 84111–2303, (801) 539–4119.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by the Recreation and Public Purpose Act of June 14, 1926, as amended; 43 U.S.C. 869; 869–4, it is ordered as follows:

Pursuant to 43 CFR 2091.7–1(b)(1) and the authority delegated to me by BLM Manual section 1203 (48 FR 85), classification decision U–54156 dated April 8, 1985, which classified 9.242 acres of public land as suitable for recreation and public purposes is hereby revoked insofar as it affects the following described lands:

Salt Lake Meridian

T. 13 N., R. 13 W.,

Sec. 3, Beginning at a point located 3,909.20 feet North and 50 feet East of the SW corner of section 31, thence East 660 feet, thence North 610 feet, thence West 660 feet, thence South 610 feet to the point of beginning.

The area described contains 9.242 acres located in Box Elder County.

The classification provided for segregation of the lands against all forms of appropriation under the public land laws, including location under the mining laws, but not the Recreation and Public Purposes Act and the mineral leasing laws. A 30 year lease was subsequently issued to Box Elder County for a sanitary landfill.

The County would now like to acquire unrestricted title to the land pursuant to section 203 of the Federal Land Policy and Management Act, (43 U.S.C. 1713). At 9:00 a.m., on September 30, 1989, the Recreation and Public Purpose classification will be terminated and the lands described above will be open only to disposal pursuant to section 203 of the Federal Land Policy and Management Act, to Box Elder County at fair market value, subject to any valid existing rights, and the requirements of applicable laws, rules and regulations.

Ted D. Stephenson,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-DQ-M

[UT-943-09-4212-13; U-56998]

Notice of Issuance of Land Exchange Conveyance Document; Utah

AGENCY: Bureau of Land Management, Interior.

ACTION: Exchange of public and private lands.

SUMMARY: The United States has issued an exchange conveyance document to The Nature Conservancy for the following described lands under section 206 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2756, 43 U.S.C. 1716:

Salt Lake Meridian

T. 41 S., R. 13 W.,
  Sec. 29, E½SE¼NE¼SW¼, SW¼NE¼SW¼, NE¼NE¼SE¼SW¼, NW¼SE¼SW¼, W½SW¼SE¼SW¼, SW¼NW¼NW¼SE¼, S½SE¼SE¼SW¼, W½SE¼NW¼SW¼, W½NE¼SW¼SW¼, SE¼SW¼SW¼, SW¼NW¼NE¼SE¼, W½SW¼NE¼SE¼, SE¼SW¼NE¼SE¼, SE¼SE¼NE¼SE¼, NW¼NE¼NW¼SE¼, S½NE¼NW¼SE¼, N½NW¼NW¼SE¼, W½SW¼NW¼SE¼, SE¼NW¼SE¼, NE¼SW¼SE¼, W½NW¼SW¼NE¼, SE¼NW¼SW¼SE¼, E½SW¼SW¼SE¼, SE¼SE¼SW¼SE¼, E½NE¼SE¼SE¼, S½NW¼SE¼SE¼, S½S½SE¼SE¼, NE¼SE¼SE¼SE¼.
  Containing 147.50 acres.

In exchange for these lands, the United States acquired the surface estate only (except as noted) of the following described lands

Salt Lake Meridian

T. 11 S., R. 18 W.,
  Sec. 3 S½;
  Sec. 4, S½;
  Sec. 5, all (surface and mineral estate);
  Sec. 6, SE¼SE¼;
  Sec. 7, NE¼SE¼;
  Sec. 8, all;
  Sec. 9 all;
  Sec. 17, W½SW¼;
  Sec. 18, W½NE¼S½NW¼S½.
  Containing 3,210.20 acres.

The purpose of the exchange was to acquire non-Federal land that will allow blocking the land into better management units. The public interest was best served through the completion of the exchange.

The values of the Federal public land and the non-Federal land in the exchange were both appraised at $413,000, and $321,020 respectively. The Nature Conservancy paid $91,980 difference in value.

Dated: August 22, 1989.

Ted D. Stephenson,

Chief, Branch of Lands and Minerals Operations.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31477 [1]]

Consolidated Rail Corp.—Acquisition Exemption—Canadian National Railway Co.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission, under 49 U.S.C. 10505, exempts from the requirements of 49 U.S.C. 11343–11345: (1) The purchase by Consolidated Rail Corporation (Conrail) of approximately 22.2 miles of Canadian National Railway Company's (CN) rail line and real property between Massena, NY (CN's milepose 0.0 and Conrail's milepost 160.8) and the U.S.-Canadian border (CN's milepost 22.2); and (2) the termination of Conrail's present overhead trackage rights agreement under which Conrail presently operates over this line. Both exemptions are subject to standard labor protective conditions. The exemption of Contrail's line purchase is also subject to an Historic Preservation Act condition.

DATES: This exemption is effective on October 6, 1989. Petitions for stay must be filed by September 21, 1989. Petitions for reconsideration must be filed by October 2, 1989.

ADDRESSES: Send pleadings referring to Finance Docket No. 31477 to:

Office of the Secretary, Case Control Branch, Att'n: Finance Docket No. 31477, Interstate Commerce Commission, Washington, DC 20423

Jonathan M. Broder (Conrail), 1138 Six Penn Center Plaza, Philadelphia, PA 19103–2959

Robert P. vom Eigen (CN), Hopkins, Sutter, Hamel & Park, 888 16th Street NW., Washington, DC 20006

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 275–7245. (TDD for hearing impaired: (202) 275–1721)

SUPPLEMENTAL INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289–4357/4359. (Assistance for the hearing impaired is available through TDD service (202) 275–1721.)

Decided: August 28, 1989.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners André, Lamboley, and Phillips.

Noreta R. McGee,

Secretary.

[1] Embraces Finance Docket No. 31477 (Sub-No. 1), *Consolidated Rail Corporation—Cancellation of Trackage Rights Exemption—Canadian National Railway Company.* We have consolidated these proceedings because they are integral parts of the same transaction, embracing the same issues and affecting the same parties.

[Finance Docket No. 31520]

Norfolk and Western Railway Co.—Trackage Rights Exemption—Illinois Central Railroad Co.

Illinois Central Railroad Company has agreed to grant overhead trackage rights to Norfolk and Western Railway Company between milepost 12 at Chicago, IL, and milepost 110 at Gibson City, IL. The trackage rights were to have become effective on August 17, 1989.

This notice is filed under 49 CFR 1180.2(d)(7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pledings must be filed with the Commission and served on: Robert J. Cooney, Three Commercial Place, Norfolk, VA 23510–2191.

As a condition to the use of this exemption, any employees affected by the trackage rights will be protected pursuant to *Norfolk and Western Ry. Co.—Trackage Rights—BN, 354 I.C.C. 605 (1978), as modified in Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Dated: August 29, 1989.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

[Docket No. AB-290 (Sub-No. 72X)]

Norfolk and Western Railway Co. and Wabash Railroad Company—Abandonment Exemption—In Lucas County, OH

Applicant has filed a notice of exemption under 49 CFR 1152 Subpart F—*Exempt Abandonments* to abandon its 6.5-mile line of railroad between milepost TN–10.8, at Delmont Junction, and mileport TN–17.3, at Whitehouse, in Lucas County, OH.

Applicant has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) any overhead traffic on the line can be rerouted over other lines; and (3) no formal complaint filed by a user of rail service on the line (or a State or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or with any U.S. District Court or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected under *Oregon Short Line & Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on October 6, 1989 (unless stayed pending reconsideration). Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(c)(2),[2] and trail use/rail banking statements under 49 CFR 1152.29 must be filed by September 18, 1989.[3] Petitions for reconsideration and requests for public use conditions under 49 CFR 1152.28 must be filed by September 26, 1989, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Virginia K. Young, Norfolk Southern Corporation, Three Commercial Place, Norfolk, VA 23510.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

Applicant has filed an environmental report which addresses environmental or energy impacts, if any, from this abandonment.

The Section of Energy and Environmental (SEE) will prepare an environmental assessment (EA). SEE will issue the EA by September 11, 1989. Interested persons may obtain a copy of the EA from SEE by writing to it (Room 3219, Interstate Commission, Washington, DC 20423) or by calling Elaine Kaiser, Chief, SEE at (202) 275–7684. Comments on environmental and energy concerns must be filed within 15 days after the EA becomes available to the public.

Environmental, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Decided: August 29, 1989.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

DEPARTMENT OF LABOR

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under title II, chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 18, 1989.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 18, 1989.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213.

Signed at Washington, DC, this 28th day of August 1989.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance; Correction

This notice corrects the **Federal Register** for the date received in column 3 of the appendix of FR Document 89–19503 on page 34263. which was published on August 18, 1989.

In column 3 of the Appendix, the date received is corrected to read "7/31/89" instead of 8/7/89 for Petition No. 23,226 General Motors BOC Body Assembly, Lansing, Michigan and Petition No. 23,247 General Motors/BOC Chassis Assembly, Lansing, MI.

Signed at Washington, DC, this 29th day of August 1989.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 89–20882 Filed 9–5–89; 8:45 am]

BILLING CODE 4510-30-M

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period of August 1989.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-22,896; Lamontre Case Co., Inc., Long Island City, NY

TA-W-22,994; Control Data Corp., Arden Hills, MN

TA-W-22,995; Control Data Corp., Minneapolis, MN

TA-W-23,053; The Atlantic Foundry Co., Akron, OH

TA-W-23,024; Bison Drilling Inc., Wakeeney, KS

TA-W-23,038; Henkel Corp., Harrison, NJ

TA-W-23,092; Stacy Industries, Inc., Woodridge, NJ

TA-W-23,093; Weymouth Art Leather Co., South Braintree, MA

TA-W-23,071; Wallace-Crossley Corp., Miami, FL

TA-W-22,976; C.E.F. Co—Raytron, West New York, NJ

TA-W-23,011; L & S Sales, Inc., Caribou, ME

TA-W-23,028; Champion Spark Plug Co., Toledo, OH

TA-W-23,029; Champion Spark Plug Co., Detroit, MI

TA-W-23,030; Champion Spark Plug Co., Cambridge, OH

TA-W-23,031; Champion Spark Plug Co., Iowa Industries Div., Burlington, IA

TA-W-23,044; Parkway Fabricators, South Amboy, NJ

TA-W-23,075; Cadic, Inc., Beaverton, OR

TA-W-23,051; Aneco Trousers Corp., Hanover, PA

TA-W-23,052; Aneco Trousers Corp., Taneytown, MD

TA-W-23,068; Schreiber Foods, Inc., Curwensville, PA

TA-W-23,063; Pendleton Land & Exploration, Inc., Englewood, CO

TA-W-23,083; Malina, Inc., Providence, RI

TA-W-23,079; Inman Molding & Manufacturing Co., Inc., Rahway, NJ

TA-W-22,843; American Trim Products, Inc., Rochester, NY

TA-W-23,128; W & W Steel Co., Electric Transformer Div., Norman, OK

In the following cases, the investigation revealed that criterion (3) has not been met for the reasons specified.

TA-W-23,049; W.C.I. Major Appliance Group, Newark, OH

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-23,036; Ellithrope Well Control, Inc., Odessa, TX

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-23,065; Plessey Electronic Systems Corp., Wayne, NY

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for cetification.

TA-W-23,039; L & M Oil Co., Dallas, TX

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA-W-23,035; Delsea Parker Corp., Millville, NJ

U.S. imports of fabricated structural steel declined in 1986 compared to 1987 and in the first four months of 1989 compared to the same period in 1988.

TA-W-22,986; Amoco Production Co., Houston, TX Region

And Operating at Various Locations in The Following States

TA-W-22,986A; New Mexico
TA-W-22,986C; Michigan
TA-W-22,986B; Texas

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for cetification.

TA-W-22,996; Crescent Foods, Inc., Seattle, WA

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,089; Quickie Manufacturing Corp., Cinnaminson, NJ

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,004; H & H Atlas, Bronx, NY

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,047; Tapley Rutter, Moonachie, NJ

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,034; Cravat Coal Co., Holloway-Freeport Mine, Cadiz, OH

U.S. imports of bituminous steam coal, lignite and anthracite were negligible in 1987 and 1988.

TA-W-23,026; C & H Transportation Co., Inc., Dallas, TX

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-23,094; Wyoming Casing Service, Inc., Dickinson, ND

The investigation revealed that criterion (1) has not been met. Employment did not decline during the relevant period as required for certification.

TA-W-23,095; Wyoming Casing Service, Inc., Gillette, WY

The investigation revealed that criterion (1) has not been met. Employment did not decline during the relevant period as required for certification.

TA-W-23,080; J.L. Prescott Co., Passic, NJ

U.S. imports of plastic bottle soap detergents are negligible.

TA-W-23,080A; J.L. Prescott Co., Lincoln Park, NJ

U.S. imports of plastic bottle soap detergents are negligible.

Affirmative Determination

TA-W-23,174; Boyd Exploration Co., Casper, Wy

A certification was issued covering all workers separated on or after July 13, 1988.

TA-W-23,084; N.H.R., Inc., Nicholls, GA

A certification was issued covering all workers separated on or after May 31, 1988.

TA-W-23,179; Jackson Drilling Co., Conroe, TX

A certification was issued covering all workers separated on or after June 29, 1988 and before February 28, 1989.

TA-W-23,110; Klinger Industries, Morton, MS

A certification was issued covering all workers separated on or after June 22, 1988.

TA-W-23,958; Babcock & Wilcox Co., Beaver Falls Works, Beaver Falls, PA

A certification was issued covering all workers separated on or after May 8, 1988 and before June 1, 1989.

TA-W-23,958A; Babcock & Wilcox Co., Koppel, PA

A certification was issued covering all workers separated on or after May 8, 1988 and before June 1, 1989.

TA-W-23,958B; Babcock & Wilcox Co., Ambridge, PA

A certification was issued covering all workers separated on or after May 8, 1988 and before June 1, 1989.

TA-W-22,840; Aeronca, Inc., Middletown, OH

A certification was issued covering all workers separated on or after April 12, 1988.

TA-W-22,980; Therma Tru, Van Buren, AR

A certification was issued covering all workers separated on or after November 1, 1988 and before August 1, 1989.

TA-W-23,033; Copperweld Steel Co., Inc., Warren, OH

A certification was issued covering all workers separated on or after May 27, 1988.

TA-W-23,078; Heci Exploration Co., Dallas, TX

A certification was issued covering all workers separated on or after May 31, 1988.

TA-W-23,000; GTE Halls Station, GTE Products Corp., Muncy, PA

A certification was issued covering all workers separated on or after May 11, 1988.

TA-W-23,061; Montgomery Drilling Co., Roosevelt, UT

A certification was issued covering all workers separated on or after January 1, 1989 and before March 19, 1989.

TA-W-22,991; Bayonne Fashions, Inc., Bayonne, NJ

A certification was issued covering all workers separated on or after May 15, 1988.

TA-W-23,046; Signetics Co., Orem, UT

A certification was issued covering all workers separated on or after May 20, 1988.

TA-W-23,090; Renaissance Eyewear, Perth Amboy, NJ

A certification was issued covering all workers separated on or after May 25, 1988.

TA-W-23,016; Stackpole Carbon Co., St. Marys, PA

A certification was issued covering all workers engaged in the production of carbon and graphite brushes separated on or after July 6, 1989.

TA-W-23,040; L.S. Thorsen Corp., Ellsworth, ME

A certification was issued covering all workers separated on or after May 23, 1988.

TA-W-23,057; Goldstar of America, Inc., Huntsville, AL

A certification was issued covering all workers separated on or after June 1, 1988.

TA-W-23,041; Meriden-Steinhour Press, Inc., Meriden, CT

A certification was issued covering all workers separated on or after January 1, 1989 and before July 1, 1989.

TA-W-23,087; Parchman Oilfield Service, Inc., Edinburg, TX

A certification was issued covering all workers separated on or after June 5, 1988.

TA-W-22,961; Continental Plastics and Chemicals, Inc., Avenel, NJ

A certification was issued covering all workers separated on or after May 12, 1988 and before April 30, 1989.

TA-W-23,058; Keystone Lamp Mfg. Corp., Slatington, PA

A certification was issued covering all workers separated on or after May 31, 1988.

TA-W-23,050; A.O. Smith Electrical Products Co., Tipp City, OH

A certification was issued covering all workers engaged in the production of the hand machining operation for the production electric motor kits separated on or after June 6, 1988.

TA-W-23,072; Whirlpool Corp., Evansville Div., Evansville, IN

A certification was issued covering all workers engaged in the production of control boxes, roller coasters and water and tubing valves separated on or after January 1, 1989.

TA-W-23,054; Cardinal Surveys Co., Odessa, TX

A certification was issued covering all workers separated on or after January 1, 1989.

TA-W-23,054A; Cardinal Surveys Co., Midland, TX

A certification was issued covering all workers separated on or after January 1, 1989.

TA-W-23,055; Cardinal Surveys Co., Hobbs, NM

A certification was issued covering all workers separated on or after January 1, 1989.

TA-W-23,163; Westinghouse Electric Corp., El Paso, TX

A certification was issued covering all workers separated on or after June 28, 1988.

TA-W-23,160; Terra Tec Core Services, Midland, TX

A certification was issued covering all workers separated on or after June 26, 1988 and before May 30, 1989.

I hereby certify that the aforementioned determinations were issued during the month of August 1989. Copies of these determinations are available for inspection in Room 6434, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213 during normal business hours or will be mailed to persons to write to the above address.

Dated: August 29, 1989.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Dated: August 29, 1989.

BILLING CODE 4510-30-M

Research, Evaluation, Pilot and Demonstration Plans for Program Year 1989

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: The Employment and Training Administration (ETA) of the Department of Labor (Department or DOL) announces its research, evaluation, pilot and demonstration (R,E,P&D) procurement plan for Program Year 1989 (July 1, 1989 through June 30, 1990). The current plans are to implement projects that will address specific issues related to enhancing the quality of work, the productivity of workers, and labor market efficiency throughout the 1990's.

FOR FURTHER INFORMATION: Firms wishing to be included on a bidders' list may write to: Office of Acquisitions and Assistance, Department of Labor, Employment and Training

Administration, Room C–4305, Frances Perkins Building, 200 Constitution Avenue, NW., Washington, DC 20210 Attention: Bidders' List.

SUPPLEMENTARY INFORMATION: The Employment and Training Administration (ETA) of the Department of Labor (Department or DOL) announces its research, evaluation, pilot and demonstration (R,E,P&D) procurement plan for Program Year 1989 (July 1, 1989 through June 30, 1990). The current plans are to implement projects that will address specific issues related to enhancing the quality of work, the productivity of workers, and labor market efficiency throughout the 1990's.

This notice serves to alert interested parties to ETA's plan. It does not solicit applications or proposals. Solicitations for grant award (SGAs) will be announced throughout the Program Year in the **Federal Register**, and requests for proposals (RFPs) will be announced in the Commerce Business Daily. Some projects will be implemented through agreements with other DOL agencies and with other Federal departments. In some cases, these agencies will offer competitions for the projects. Some future competitions may be limited (for example, among States, Service Delivery Areas, or Private Industry Councils under the Job Training Partnership Act (JTPA) program) and, therefore, will be announced only through ETA's administrative communications system. Still other procurements may be set aside for small business or 8(a) firms. These procurement plans are subject to change; projects may not be initiated under all topics, or topics may be added or expanded. This announcement is for general information purposes to indicate the direction of the R,E,P&D agenda.

These projects are now planned to fall within five subject areas. They are:

(1) Workplace 2000,

(2) Youth Opportunities,

(3) Workplace Literacy,

(4) Worker Adjustment and Adult Programs, and

(5) Homeless Job Training.

This announcement consists of three parts. Part I provides general background information concerning the R,E,P&D program. Part II describes the five subject areas and provides a brief discussion of key issues. Part III announces the intention to initiate a field generated procurement competition later in the year.

Part I—Background

A. Mission of the Employment and Training Administration and its Research, Evaluation, Pilot and Demonstration Program

ETA is the Federal agency with the lead responsibility for the Federal Government's training and employment programs. Both U.S. workers and employers, and ultimately the economy, benefit from the comprehensive system of training and employment programs ETA administers. Its major programs include:

—JTPA, which consists of a wide range of activities targeted to individual groups who need job-related assistance, with emphasis on economically disadvantaged youth and adults and others who face severe problems in the job market;
—The Employment Service System, which operates as a labor exchange, matching workers with available jobs, as well as carrying out other functions;
—The Unemployment Insurance Program, which provides limited compensation to workers who lose their jobs through no fault of their own;
—Trade Adjustment Assistance, which is available to workers who lose their jobs as a result of increased imports; and
—Economic Dislocation and Worker Adjustment Assistance (EDWAA) program, under JTPA, which assists dislocated workers.

ETA's R,E,P&D program is operated to measure the impact and effectiveness of the agency's various activities, explore new program concepts, techniques and designs, and to assist the Nation in expanding current and future work opportunities and assuring access to those opportunities for all who desire them. ETA carries out its R,E,P&D program through State and local public agencies, private-for-profit and nonprofit organizations, colleges and universities, community-based and labor groups, and other Federal agencies.

B. Workforce 2000

R,E,P&D projects for Program Year 1989, which began on July 1, 1989, will continue to focus on workplace issues confronting the Nation through the year 2000. These issues, initiated in Program Year 1987, were first articulated in a 17-month study titled "Workforce 2000: Work and Workers for the Twenty-first Century". The report crystallized key issues and questions the Nation must deal with if it is to prosper in the intensely competitive and technologically sophisticated global market of the 21st Century. For example, the U.S. must:

—Fully integrate women, blacks, Hispanics, immigrants, and handicapped workers into the economy. The labor force will grow more slowly over the next 16 years than at any time in U.S. history, except during the decade of the Great Depression. The net growth in workers will be predominantly women, blacks and immigrants, sources of labor that have long been underutilized. Because there will be fewer young people beginning their careers overall, this could provide opportunities to bring groups historically underutilized into full participation in the economy.
—Provide the work force with the education and skills that new jobs in the expanding service-oriented economy will demand. Most new jobs in fast growing service industries will require higher levels of reading, math and reasoning skills than traditional jobs in manufacturing industries. Individuals with less than a high school education will face increasing difficulty in finding work and fewer opportunities for good pay and advancement. Yet 700,000 students drop out of school each year, and inadequate literacy skills have become a major problem among young adults.
—Ensure that the increasingly middle-aged work force is adaptable and retains its willingness to learn. The rapidly changing economy will demand workers who are flexible and willing to respond to new opportunities and conditions. Workers with years of experience often lack the flexibility and specialized skills they need to move into expanding industries.
—Reconcile the conflicting demands of work and family responsibilities, especially for women. The increase in the labor force participation of mothers, including women with young children, has been striking. As of March 1987, 66.7 percent of women with children under 18 and 52 percent of mothers with children under 2 years were in the labor force. Welfare mothers and displaced homemakers are among groups needing special consideration.

A basic step in meeting these challenges is strengthening ETA's information base. The R,E,P&D procurement plan announced in this notice is designed to provide more complete information to enable the

agency to better understand and deal with specific issues.

Part II—Subject Areas

A. Workplace 2000

The U.S. economy is expected to continue to grow at least at its current rate through the year 2000. Nonetheless, the efficiency of our labor markets will be severely tested. More sophisticated jobs will demand greater skills. Fewer young people will be entering the labor market, and a growing fraction will be minorities who traditionally are educationally disadvantaged as a group. Greater flexibility will be demanded of all workers, but particularly the middle-aged worker. In the anticipated tight labor market of the year 2000, employers will be forced to either seek out and invest in workers heretofore underutilized, or to bid up wages or export jobs overseas.

Employer-based training is one such method of investing in workers. Recent study findings indicate that it is a primary source of productivity improvement. However, there are gaps in the research needed to fully understand learning in the workplace. More information is needed on how to make learning on the job more effective and efficient for both workers and employers.

A critical part of any planning for the future is a sound information base. The work effort sought through Workplace 2000 projects is intended to supplement and expand on information bases for National, local, and occupation-specific improvements. It is intended to provide information to develop a cohesive national policy on workforce preparedness, improve labor market information, and seek out ways for solving labor shortage situations.

In some labor shortages situations, foreign workers have been permitted to fill the gaps, for example, in nursing. However, the issue of immigration is much broader, including responses to new and proposed immigration legislation.

Activities planned within this category of projects include initiating a number of inter-agency demonstration efforts aimed at preparing at-risk groups, such as teen-aged parents and welfare recipients, for the work force, and evaluating new Federal programs with the same aim.

DOL plans to share in a survey of business attitudes and activities about workplace training, and to assess the impact of past unemployment insurance program extensions during periods of recession.

Also planned, is a comprehensive program of immediate and longer-term research on workplace trends and projections. Demographic changes, changes in employment status, e.g., contingent and part-time workers, trends in benefits and employer-based training would be key areas of exploration.

B. Youth Opportunities

Improving the educational preparedness of workers is a challenge we must meet to be competitive into the 21st century. This is most important for our young people. Today's youth at risk of dropping out are our entry level workers of the next two decades. They face jobs demanding higher skills in math, reading and communications. Yet recent studies have shown that many of these youth are reading, writting, and computing at levels below present day expectations. Further, many of these youth are disenfranchised from and disillusioned with schools, and fail to see education's connection with good paying jobs. In some inner cities, as many as 50 percent of youth drop out of school. Further efforts must also be focused on young people who do not go to college. Businesses report that their levels of job preparedness are frequently inadequate.

ETA intends to closely examine programs and linkages that appear successful in helping our youth make the connnection between education and work. A number of programs linking school and employment and training programs with apprenticeship are successfully operating. In an effort to inform and encourage expansion of these school/training-to-work bridges, programs and the factors that make them successful need to be identified.

Project activities planned to prepare youth, particularly youth at-risk of dropping out, include the documentation and analysis of the outcomes experienced by a multi-year series of interagency demonstrations. A comprehensive research and development effort will also be undertaken to explore the employment and education patterns of youth and evaluate promising models for successful youth achievements such as dropout prevention/recovery and school-to-work transition.

Major youth demonstrations are planned for large cities and rural areas that will focus on integrating and linking the provision of services by the many local agencies concerned with the well-being of dropout and dropout prone youth.

DOL also plans to join forces with foundations to share in longer term research and evaluation studies related to at-risk youth; other plans include the evaluation of recently funded demonstrations to provide alternative education to at-risk youth.

C. Workplace Literacy

As the remainder of this century unfolds, it is expected that jobs requiring higher levels of literacy and analytic skills will increase, and those requiring only strength and manual ability will shrink. Further, the population groups presently in jobs with lesser skill requirements can expect a more difficult time in the job markets ahead unless their literacy skills are increased. In addition to increased skills, increased flexibility to new working conditions, new technology and new environments will be required. In the rapidly increasing service sector, the jobs will spring up in places to accommmodate customers. Job mobility will be required. Effective mobility rests on the premise that skills learned and tested in one area will be rated and recognized in another.

In the past several years, ETA has undertaken a wide variety of programs to explore, test and demonstrate new learning techniques and programs for groups in particular need of enhancing their workplace literacy skills, and efforts to assess literacy skill levels.

D. Worker Adjustment Assistance and Adult Programs

Trade Adjustment Assistance (TAA) and Economic Dislocation and Worker Adjustment Assistance (EDWAA) (Title III of JTPA) programs are available to assist dislocated workers train for and find new employment. Major new legislation was enacted last year substantially revising and expanding these important programs.

Women, work and family issues are subsumed under this topic, as well. Since the mid-1940's the labor force participation rate for women has grown dramatically from about 33 percent to more than 70 percent. In 1987, 66.7 percent of women with children participated in the labor force. The rate for mothers with young toddlers was 55.2 percent, more than double the rate of only 20 years ago. Contrary to popular belief, most working women (78 percent) work full time, and only 17 percent work part time voluntarily. Estimates for the remainder of the century indicate that women will increase their labor force participation, but at a slower rate. By the year 2000, the labor force participation rate for women is expected to reach 81 percent, while that of men will be nearly 93 percent.

Clearly, the conflicts between work and family needs will increase. Among these conflicts are the adequacy of arrangements for the care of children and elderly family members. As women continue to work more hours per week and more weeks per year, solutions to this problem will become increasingly critical.

Solutions will have to include flexible hours to care for sick children and dependents, and the overall time and financial resources to raise children. Better paying, full-time, skilled jobs will be needed by many women to adequately care for their families and their own occupational aspirations.

Improvements in the training and employment system including research and assessments of such programs as Unemployment Insurance, JTPA and joint efforts with other Federal agencies fall primarily within the purview of this category.

DOL plans to demonstrate the joint administration and delivery of worker adjustment programs by State agencies. Evaluations are planned for other worker adjustment programs or their components including The Targeted Jobs Tax Credit and Trade Adjustment Assistance programs.

Improvements in the training and employment delivery system will be studied through such research efforts as identifying the kinds of jobs obtained by those who complete JTPA training, and assessing the success of systems to identify mass layoffs. Technical writing and logistical assistance may also be sought to support conferences and required reports.

Part III—Field-Initiated Procurement Competition

A. Background

In the past several Programs Years, ETA has received hundreds of unsolicited proposals from offerors who requested funding support from R,E,P&D resources. A very small proportion of these have been funded. There are a number of reasons for this beyond funding limitations:

—Many have been inappropriate appeals to establish businesses, buy buildings, purchase major equipment, or receive loans, etc.

—Some have duplicated announced competitive projects, and

—Many have been requests to simply replicate established operations.

In order to reduce the number of inappropriate proposals and to increase the fairness and probability of funding proposals that are more responsive to the ETA R,E,P&D initiatives, ETA proposes to announce an annual review and selection process for proposals initiated from the field.

B. Proposed Competitive Process

Beginning in Program Year 1990, ETA will announce an annual competition for grant solicitations initiated from the field in support of R,E,P&D initiatives. The broad topic areas that will be considered for Program Year 1989 are those announced in this notice under Part II. Specific rating criteria that will be applied against each proposal along with funding limitations will be listed in the notice. The notice announcing the initiative of this process will be published shortly.

Signed at Washington, DC, this 29th day of August, 1989.

Roberts T. Jones,

Assistant Secretary for Employment and Training.

[FR Doc. 89-20861 Filed 9-5-89; 8:45 am]

BILLING CODE 4510-30-M

Mine Safety and Health Administration

[Docket No. M-89-111-C]

Hansford Smokeless Collieries, Inc.; Petition for Modification of Application of Mandatory Safety Standard

Hansford Smokeless Collieries, Inc., 41 Eagles Road, Beckley, West Virginia 25801 has filed a petition to modify the application of 30 CFR 75.326 (aircourses and belt haulage entires) to its No. 4 Mine (I.D. No. 46-04388) located in Raleigh County, West Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. On September 13, 1982, petitioner was granted a modification of 30 CFR 75.326 to use belt and track haulage entries for ventilating active working places, to install an early warning fire detection system, and to monitor the air with a carbon monoxide detection system (docket no. M-82-37-C).

2. This petition concerns paragraph 5 of MSHA's Decision and Order which requires that the velocity of the air current in the belt entry not exceed 300 feet per minute (fpm).

3. Petitioner proposes that paragraph 5 of the Decision and Order be deleted, thus allowing velocities in excess of 300 fpm in the belt entry.

4. In support of this request, petitioner states that mining is taking place in the Beckley Seam, which is renowned for its unpredictable geology. Faults, rolls, and washouts make it impossible to plan and develop the airways necessary to maintain adequate ventilation. The mine is liberating in excess of 3.5 million cubic feet of methane per 24-hour period. Evaluations have shown that 12,000 cubic feet per minute of air must be delivered behind the line curtain on particular sections in order to dilute and render harmless the methane being liberated by the faces.

5. In further support of this request, petitioner states that the working sections are currently developing toward "virgin" areas of the reserve. They are also being developed beneath Paint Mountain, which rises over 2200 feet above the Beckley Seam, making a shaft impractical at this time.

6. For these reasons, petitioner requests an amendment to the Decision and Order granting the petition modifying the application of 30 CFR 75.326.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before October 6, 1989. Copies of the petition are available for inspection at that address.

Dated: August 28, 1989.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 89-20870 Filed 9-5-89; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-89-135-C]

Hickory Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Hickory Coal Company, R.D. No. 1, Box 479, Pine Grove, Pennsylvania 17963 has filed a petition to modify the application of 30 CFR 75.301 (air quality, quantity, and velocity) to its Slope No. 1 (I.D. No. 36-07783) located in Schuylkill County, Pennsylvania. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that the minimum quantity of air reaching the last open crosscut in any pair or set of developing entries and the last open crosscut in any pair of set

of rooms be 9,000 cubic feet a minute, and the minimum quantity of air reaching the intake end of a pillar line be 9,000 cubic feet a minute. The minimum quantity of air reaching each working face is required to be 3,000 cubic feet a minute.

2. Air sample analysis history reveals that harmful quantities of methane are nonexistent in the mine. Ignition, explosion, and mine fire history are nonexistent for the mine. There is no history of harmful quantities of carbon monoxide and other noxious or poisonous gases.

3. Mine dust sampling programs have revealed extremely low concentrations of respirable dust.

4. Requiring extremely high velocities in small cross-sectional airways and manways in friable anthracite veins for control purposes, particularly in steeply pitching mines, present a very dangerous flying object hazard to the miners and cause extremely uncomfortable damp and cold conditions in the mine.

5. As an alternate method, petitioner proposes that:

(a) The minimum quantity of air reaching each working face be 1,500 cubic feet per minute;

(b) The minimun quantity of air reaching the last open crosscut in any pair or set of developing entries be 5,000 cubic feet per minute; and

(c) The minimum quantity of air reaching the intake end of a pillar line be 5,000 cubic feet per minute, or whatever additional quantity of air that may be required in any of these areas to maintain a safe and healthful mine atmosphere.

6. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before October 6, 1989. Copies of the petition are available for inspection at that address.

Dated: August 28, 1989.

BILLING CODE 4510-43-M

[Docket No. M-89-126-C]

Mid-Continent Resources, Inc.; Petition for Modification of Application of Mandatory Safety Standard

Mid-Continent Resources, Inc., 1058 Road 100, P.O. Box 500, Carbondale, Colorado 81623 has filed a petition to modify the application of 30 CFR 75.302-4(e) (auxiliary fans and tubing) to its Dutch Creek Mine (I.D. No. 05-00301) located in Pitkin County, Colorado. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that when air passing through an auxiliary fan or tubing contains 1.0 volume per centum or more of methane, the provisions of 30 CFR 75.308 must be applied. Should the requirements of 30 CFR 75.308 necessitate deenergizing the auxiliary fan, the auxiliary fan must not be restarted until the methane content in the affected area is less than 1.0 volume per centum.

2. As an alternate method, petitioner proposes that whenever a bifurcated type auxiliary fan is used, the fan motor would not be required to be deenergized if one (1.0) volume per centum or more of methane is passing through the fan tubing or fan blades, provided:

(a) The environment in which the fan motor is operating is less than one and one-half (1.5) volume per centum of methane;

(b) The air passing by the fan motor is monitored for methane while the auxiliary fan is operating, and the fan motor is automatically deenergized when one and one-half (1.5) volume per centum or more of methane is detected at the fan motor;

(c) A methane monitor is installed inside the fan and is set to automatically deenergize the entire section, including the auxiliary fan unit, when the volume of methane being conducted through the fan reaches two (2.0) per centum or more. This type of installation affects not only the equipment set in the working place (all electrical equipment traditionally in by the last open crosscut) but also any equipment connected to the section's powercenter; and

(d) The fan blades are constructed of non-sparking material.

3. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before October 6, 1989. Copies of the petition are available for inspection at that address.

Dated: August 28, 1989.

BILLING CODE 4510-43-M

[Docket No. M-89-113-C]

Westmoreland Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Westmoreland Coal Company, P.O. Drawer A & B, Big Stone Gap, Virginia 24219 has filed a petition to modify the application of 30 CFR 75.326 (aircourses and belt haulage entries to its Holton Mine (I.D. No. 44-04197) located in Lee County, Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. On August 2, 1986, petitioner was granted a modification of 30 CFR 75.326 to use air from the belt haulage and track entries to ventilate active working places, to install an early warning fire detection system, and to monitor the air with a carbon monoxide detection system (docket no. M-84-220-C).

2. This petition concerns paragraph 1(d) of MSHA's Decision and Order which requires that the velocity of air in the belt conveyor entry be 50 feet a minute or greater and have a definite and distinct movement in the designated direction. The velocity of the air current in the belt conveyor entry cannot exceed 300 feet per minute.

3. Paragraph 1(d) should be modified to require that the velocity of air in the belt conveyor entry be 50 feet a minute or greater and have a definite and distinct movement in the designated direction.

4. In support of this request, petitioner states that limiting velocities to 300 feet per minute seriously impairs the ability to maintain the minimum velocity of 50 feet per minute required for a definite and distinct air movement in the designated direction in section belt

entries. Furthermore, restricting the air current in the belt conveyor entries to 300 feet per minute would reduce the volume of air coursed to longwall mining sections necessary to dilute, render harmless and to carry away flammable, explosive, noxious, and harmful gases and dust and to ensure adequate ventilation of gob areas.

5. For these reasons, petitioner requests an amendment to the Decision and Order granting the petition modifying the application of 30 CFR 75.326.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before October 6, 1989. Copies of the petition are available for inspection at that address.

Dated August 28, 1989.

BILLING CODE 4510-43-M

[Docket No. M-89-115-C]

Westmoreland Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Westmoreland Coal Company, P.O. Drawer A & B, Big Stone Gap, Virginia 24219 has filed a petition to modify the application of 30 CFR 75.1105 (housing of underground transformer stations, battery-charging stations, substations, compressor stations, shops, and permanent pumps) to its Holton Mine (I.D. No. 44-04197) located in Lee County, Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. On August 2, 1986, petitioner was granted a modification of 30 CFR 75.1105 to use air currents which are used to ventilate transformers, permanent pumps, and rectifiers be used to ventilate active working places in lieu of being coursed directly into the return and to install an early warning fire detection system and to monitor the air with a carbon monoxide detection system in all belt entries utilized as intake aircourses (Docket No. M-84-222-C).

2. This petition concerns paragraph 1(d) of MSHA's Decision and Order which requires that the velocity of air in the belt conveyor entry be 50 feet a minute or greater and have a definite and distinct movement in the designated direction. The velocity of the air current in the belt conveyor entry cannot exceed 300 feet per minute.

3. Paragraph 1(d) should be modified to require that the velocity of air in the belt conveyor entry be 50 feet a minute or greater and have a definite and distinct movement in the designated direction.

4. In support of this request, petitioner states that limiting velocities to 300 feet per minute seriously impairs the ability to maintain the minimum velocity of 50 feet per minute required for a definite and distinct air movement in the designated direction in section belt entries. Furthermore, restricting the air current in the belt conveyor entries to 300 feet per minute would reduce the volume of air coursed to longwall mining sections necessary to dilute, render harmless and to carry away flammable, explosive, noxious, and harmful gases and dust and to ensure adequate ventilation of gob areas.

5. For these reasons, petitioner requests an amendment to the Decision and Order granting the petition modifying the application of 30 CFR 75.1105.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before October 6, 1989. Copies of the petition are available for inspection at that address.

Dated: August 28, 1989.

BILLING CODE 4510-43-M

[Docket No. M-89-114-C]

Westmoreland Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Westmoreland Coal Company, P.O. Drawer A & B, Big Stone Gap, Virginia 24217 has filed a petition to modify the application of 30 CFR 75.1103-4(a) (automatic fire sensor and warning device systems; installation; minimum requirements) to its Holton Mine (I.D. No. 44-04197) located in Lee County, Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statement follows:

1. On August 2, 1986, petitioner was granted a modification of 75.1103-4(a) to use a fire sensor and warning device system capable of identification of fire by activated sensors rather than identification of fire within each belt flight and to install an early warning fire detection system and to monitor the air with a carbon monoxide detection system in all belt entries utilized as intake aircourses (docket no. M-84-221-C).

2. This petition concerns paragraph 1(d) of MSHA's Decision and Order which requires that the velocity of air in the belt conveyor entry be 50 feet a minute or greater and have a definite and distinct movement in the designated direction. The velocity of the air current in the belt conveyor entry cannot exceed 300 feet per minute.

3. Paragraph 1(d) should be modified to require that the velocity of air in the belt conveyor entry be 50 feet a minute or greater and have a definite and distinct movement in the designated direction.

4. In support of this request, petitioner states that limiting velocities to 300 feet per minute seriously impairs the ability to maintain the minimum velocity of 50 feet per minute required for a definite and distinct air movement in the designated direction in section belt entries. Furthermore, restricting the air current in the belt conveyor entries to 300 feet per minute would reduce the volume of air coursed to longwall mining sections necessary to dilute, render harmless and to carry away flammable, explosive, noxious, and harmful gases and dust and to ensure adequate ventilation of gob areas.

5. For these reasons, petitioner requests an amendment to the Decision and Order granting the petition modifying the application of 30 CFR 75.1103-4(a).

NATIONAL COMMISSION ON MIGRANT EDUCATION

Meeting

AGENCY: National Commission on Migrant Education.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 100-297, the National Commission on Migrant Education announces a forthcoming meeting of the Commission.

DATE: September 27, 1989, 9:00 a.m. to 3:00 p.m.

ADDRESS:

9:00 a.m.—noon, Capitol Building, Room S-128, Washington, DC 20510

1:30 p.m.—3:00 p.m., Ramada Inn, 8400 Wisconsin Avenue, Bethesda, Maryland 20814.

FOR FURTHER INFORMATION CONTACT: Nancy Watson, Administrative Officer, National Commission on Migrant Education, 8120 Woodmont Avenue, Bethesda, Maryland 20814, (301) 843-1387.

TYPE OF MEETING: Open.

AGENDA:

9:00 a.m.—9:15 a.m. Welcoming Remarks from Chairman

9:15 a.m.—10:00 a.m. Swearing in the Commissioners

10:00 a.m.—Noon General Discussion on the personnel, study, scope and schedule

1:30 p.m.—3:00 p.m. Briefing by Department of Education officials on migrant education.

Linda Chavez,

Chairman.

BILLING CODE 6820-DE-M

NATIONAL COMMISSION ON ACQUIRED IMMUNE DEFICIENCY SYNDROME

Meeting

AGENCY: The National Commission on Acquired Immune Deficiency Syndrome.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92-463 as amended, the National Commission on Acquired Immune Deficiency Syndrome announces a forthcoming meeting of the Commission.

DATE: September 18, 1989—9:00 a.m. to 5:00 p.m.; September 19, 1989—12:00 a.m. to 5:00 p.m.

ADDRESS: September 18, Cannon House Office Building, Caucus Room, Independence Avenue SW., Washington, DC 20515 September 19, the General Service Administration Auditorium, 18th and F Streets NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Carlton Lee, Chief Liaison Officer, The National Commission on Acquired Immune Deficiency Syndrome, Washington, DC 20407, (202/472-9058).

Type of Meeting: Open.

Agenda: On September 18, 1989, the meeting will be called to order at 9:00 a.m. The Commission will hear from a variety of experts, including a panel of people with AIDS, regarding their experiences with HIV AND AIDS. The Commission will review the recommendations of the Presidential Commission on the Human Immunodeficiency Virus Epidemic and discuss the National Commission's plans for performing the functions outlined in Public Law 100-607. The Commission may also review any pending legislation or policy recommendations affecting HIV and AIDS. On the morning of September 19, 1989, the Commission will visit the Whitman Walker Clinic and reconvene the public meeting at 12:00 a.m. to resume consideration of the issues raised on the previous day.

Maureen Byrnes,

Executive Director.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Agency Information Collection Activities Under Office of Management and Budget Review

AGENCY: Institute of Museum Services.

ACTION: Notice.

SUMMARY: The Institute of Museum Services has sent to the Office of Management and Budget (OMB) the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

ADDRESSES: Send comments to Mr. Jim Houser, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., Room 3002, Washington, DC 20503 (202-395-7316f). In addition, copies of such comments may be sent to Ms. Mamie Bittner, Institute of Museum Services, Room 510, 1100 Pennsylvania Avenue, NW., Washington, DC 20506; (202-786-0536).

FOR FURTHER INFORMATION CONTACT: Ms. Mamie Bittner, Institute of Museum Services, Room 510, 1100 Pennsylvania Avenue, NW., Washington, DC 20506; (202-786-0536) from whom copies of the documents are available.

SUPPLEMENTARY INFORMATION: The Institute requests review of a new collection of information as follows.

Title: Conservation Assessment Program Application and Guidelines.

Frequency of Collection: Annual.

Respondents: Non-profit institutions.

Use: Application for funding.

Estimated Number of Respondents: 1000.

Average Burden Hours per Response: 1.

Total Estimated Burden: 100.

Mamie Bittner,

Institute of Museum Services.

BILLING CODE 7036-01-M

NATIONAL LABOR RELATIONS BOARD

Rescheduling of Unfair Labor Practice Hearings: Experimental Modification of Procedures

AGENCY: National Labor Relations Board.

ACTION: Notice of extension of comment period.

SUMMARY: The National Labor Relations Board gives notice that it will extend until October 2, 1989 the deadline for filing comments on its experimental modification of the procedures governing the rescheduling of unfair labor practice hearings.

FOR FURTHER INFORMATION CONTACT: John C. Truesdale, Executive Secretary, 1717 Pennsylvania Avenue, NW., Room 701, Washington, DC 20570, Telephone: (202) 254-9430.

SUPPLEMENTARY INFORMATION: On August 1, 1988, the National Labor Relations Board implemented a one-year experiment in all of its Regional Offices whereby the authority to reschedule unfair labor practice hearings was transferred, subject to certain exceptions, from the Regional Directors to the administrative law judges. The Board's original notice of this experiment invited parties to submit comments on the experiment on or before August 30, 1989. (See 53 FR 26348). A subsequent notice by the Board regarding the experiment also restated this deadline for submitting comments. (See 54 FR 31392).

However, having received requests for an extension, the Board has decided to extend the comment period until the close of business on October 2, 1989.

As indicated in the previous notices, comments should be sent to: Office of the Executive Secretary, 1717 Pennsylvania Avenue, NW., Room 701, Washington, DC 20570, Telephone: (202) 254-9430.

Dated, Washington, DC, August 30, 1989.

By direction of the Board.

John C. Truesdale,

Executive Secretary, National Labor Relations Board.

[FR Doc. 89-20621 Filed 9-5-89; 8:45 am]

BILLING CODE 7545-01-M

NUCLEAR REGULATORY COMMISSION

Biweekly Notice Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law (P.L.) 97-415, the Nuclear Regulatory Commission (the Commission) is publishing this regular biweekly notice. P.L. 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from August 14, 1989 through August 24, 1989. The last biweekly notice was published on August 23, 1989 (54 FR 35099).

NOTICE OF CONSIDERATION OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room P-223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By October 6, 1989, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to (*Project Director*): petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

Arkansas Power & Light Company, Docket Nos. 50-313 and 50-368, Arkansas Nuclear One, Units 1 and 2 (ANO-1&2), Pope County, Arkansas

Date of amendment requests: July 1, 1988 as supplemented August 15, 1989

Description of amendment requests: The proposed amendments would revise Facility Operating License Nos. DPR-51 and NPF-6 for Arkansas Nuclear One, Units 1 and 2 (ANO-1&2) to authorize Entergy Operations, Incorporated (EOI) to act on behalf of Arkansas Power and Light (AP&L), with responsibility for the control over the physical construction, operation and maintenance of the facilities. This action is proposed in conjunction with EOI becoming the operator of Waterford Steam Electric Station, Unit 3 and Grand Gulf Units, 1 and 2. The proposed amendments were originally noticed on August 10, 1988 (53 FR 30126) with System Energy Resources, Inc. as the proposed operator.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety. AP&L has evaluated the proposed changes to Facility Operating License Nos. DPR-51 and NPF-6 and has determined the following.

EOI will be a wholly owned subsidiary of Entergy. The employees of AP&L presently engaged in the operation of ANO-1&2 will become employees of EOI. The organizational structure of EOI will provide for clear management control and effective lines of authority and communication among the organizational units involved in the management, operation, and technical support of the facility.

As a result of the proposed amendments, there will not be physical changes to the facilities, and all Limiting Conditions for Operation, Limiting Safety System Settings, and Safety Limits specified in the Technical Specifications will remain unchanged. With the exception of administrative changes to reflect the role of EOI, the quality assurance program, security plan, and training program are unaffected. With regard to emergency plans, certain physical and personnel resources, limited to support in administrative areas but not inclusive of decision making authority, will continue to be provided by AP&L in support of these activities. The licensee states that decisional responsibilities related to accident recognition and classification, mitigation and corrective actions, radiological assessment and protective action recommendations and coordination with state and local authorities will rest with EOI personnel. AP&L corporate management will provide direction to other non-nuclear AP&L facilities for support to ANO-1&2. Operating agreements will ensure continued compliance with among others, General Design Criterion 17 of Appendix A to 10 CFR Part 50 on Electrical Power Systems. Therefore, the proposed changes will not increase the probability or consequences of any accidents previously evaluated.

The design and design bases of ANO-1&2 remain the same. Therefore, the current plant safety analyses remain complete and accurate in addressing the licensing basis events and analyzing plant response and consequences. The Limiting Conditions for Operation, Limiting Safety System Settings, and Safety Limits are not affected by the proposed amendments. With the exception of administrative changes to reflect the role of EOI, plant procedures are unaffected. As such, the plant conditions for which the design basis accident analyses have been performed are still valid. Therefore, the proposed amendments cannot create the possibility of a new or different kind of accident than previously evaluated.

Plant safety margins are established for and reflected in Limiting Conditions for Operation, Limiting Safety System Settings, and Safety Limits specified in the Technical Specifications. Since there will be no change to the physical design or operation of the plant, there will be no change to any of these or any other margins. The proposed amendments therefore will not involve a reduction in a margin of safety.

The staff has reviewed the licensee's evaluation and agrees with the conclusions. Therefore, based on the above, the staff proposed to determine that the proposed license amendments do not involve a significant hazards consideration.

Local Public Document Room location: Tomlinson Library, Arkansas Tech University, Russellville, Arkansas 72801

Attorney for licensee: Nicholas S. Reynolds, Esq., Bishop, Cook, Purcell, & Reynolds, 1400 L Street, NW., Washington, DC 20005-3502

NRC Project Director: Frederick J. Hebdon

Carolina Power & Light Company, et al., Docket No. 50-400, Shearon Harris Nuclear Power Plant, Unit 1, Wake and Chatham Counties, North Carolina

Date of amendment request: December 17, 1987

Description of amendment request: The proposed amendment would make corrections or clarifications in various sections of the Shearon Harris Nuclear Power Plant, Unit 1 (Harris) Technical Specifications (TS). Specifically, the following eight corrections or clarifications would be made: (1) establish consistency of nomenclature when a table or figure is deleted from the TS index; (2) insert omitted brackets to equation in Note 1 of Table 2.2-1 used to calculate the overtemperature trip setpoints; (3) clarify report submission timing for consistency between TS 3.3.3.6 Action c, 6.9.2, 3.3.3.4a and 3.3.3.9.a; (4) correct spelling of radioactivity in Item 1, Table 4.3-8; (5) improve consistency in nomenclature by deleting brackets enclosing train identifiers for residual heat removal loops in TS 3.4.1.3.d and 3.4.1.3.e; (6) delete references to deleted Table 3.6-1 from TS 4.6.3.2 and 4.6.3.3; (7) revise references for special reporting in Surveillance Requirement 4.4.5.5.c, Bases for Section 3/4.2.4 and TS 6.9.1, 6.9.1.6 and 6.9.2 to refer to TS 6.9.2 or 10 CFR 50.4, as appropriate, for consistency; and (8) add additional information to TS sections where the specifications were relocated to plant procedure PLP-106.

In the case of the eighth category of clarifications, the TS were reissued with the full power license, relocating certain surveillances and technical data related to valves, snubbers, materials and containment penetration conductor overcurrent protective devices to plant procedure, PLP-106, Technical Specification Equipment List Program. These clarifications describe more thoroughly where the relocated material may be found.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards in 10 CFR 50.92(c) for determining whether a significant hazards consideration exists. A proposed amendment to an Operating License for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability of consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

As required by 10 CFR 50.91(a), the licensee has provided the following no significant hazards consideration determination:

1. The proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated because the changes are administrative in nature. The changes correct typographical errors and inconsistencies and are intended to clarify the Technical Specifications. The proposed amendment does not result in a change in any Limiting Condition for Operation or their bases nor does it result in any physical change to the plant.

2. The proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated. As stated above, the proposed changes are purely administrative in nature. No new operating environment, conditions, or procedures are introduced by this change. As such, the proposed amendment cannot create any new or different kind of accident.

3. The proposed amendment does not involve a significant decrease in a margin of safety. The proposed changes are administrative in nature and enhance the clarity and/or consistency of the Technical Specifications. This will result in less chance of operator confusion and, therefore, increase the margin of safety.

The licensee has concluded that the proposed amendment meets the three standards in 10 CFR 50.92 and, therefore, involves no significant hazards consideration.

The Commission has published guidance in the **Federal Register** (48 FR 14864) concerning examples of amendments that are not likely to involve a significant hazards consideration. These changes are consistent with one of the examples: "(i) A purely administrative change to technical speciifications: for example, a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature."

The NRC staff has made a preliminary review of the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Based on the guidance example and the licensee's analysis, the Commission proposes to determine that the requested amendment does not involve a significant hazards consideration.

Local Public Document Room location: Cameron Village Regional Library, 1930 Clark Avenue, Raleigh, North Carolina 27605.

Attorney for licensee: R. E. Jones, General Counsel, Carolina Power & Light Company, P. O. Box 1551, Raleigh, North Carolina 27602

NRC Project Director: Elinor G. Adensam

Commonwealth Edison Company, Docket Nos. 50-254 and 50-265, Quad Cities Nuclear Power Station, Units 1 and 2, Rock Island County, Illinois

Date of application for amendments: July 11, 1989 as supplemented by August 14, 1989.

Description of amendments request: Currently, the Quad Cities Nuclear Power Station (QCNPS), Units 1 and 2, Technical Specifications (TS) do include cycle-specific and fuel bundle type specific power distribution operating limits. Typically, in the past, changes to these limits would be submitted for NRC approval prior to each refueling outage to reflect upcoming cycle-specific characteristics. Since these limits were determined using a methodology previously approved by the NRC, license amendments were an unnecessary burden on utility and NRC resources. In order to facilitate the elimination of these unnecessary amendments, the NRC issued Generic Letter 88-16, "Removal of Cycle-Specific Parameter Limits from Technical Specifications". This Generic Letter provides guidance in removing the cycle-specific and fuel bundle-specific operating limits from TS and recording them in a Core Operating Limits Report (COLR). Commonwealth Edison Company (CECo) proposed a TS amendment for QCNPS in accordance with Generic Letter 88-16 and the previously approved lead Boiling Water Reactor (BWR) plant - Brunswick.

CECo's proposed TS amendment removes the following cycle-specific and fuel bundle type specific operating limits: Average Planar Linear Heat Generation Rate (APLHGR), Minimum Critical Power Ratio (MCPR), Linear Heat Generation Rate (HLGR), and Rod Block Monitor (RBM) Upscale Setpoints. In place of these limits, the applicable TS sections will reference the COLR. The COLR is an unit specific document containing the power distribution operating limits that apply for a specific cycle.

COLRs for future operating cycles will be submitted to the NRC for information prior to startup following each refueling outage, as required by Generic Letter 88-16. The implementation and revision of the COLRs will be controlled QCNPS Administrative Procedures. It should be noted that COLR revisions will receive the same level of detailed review and required approvals by the CECo Nuclear Fuel Services (NFS) Department, and On-Site and Off-Site Review Committees as Technical Specification changes do. In addition, the Definitions Section of the Technical Specifications shall have an entry entitled "Core Operating Limits Report" and there will be a new administrative reporting requirement added to the existing reporting requirements in Section 6.6.A of the Technical Specifications.

Basis for proposed no significant hazards consideration determination: The Commission provided standards for determining whether a no significant hazards consideration exists as stated in 10 CFR 50.92(C). A proposed amendment to an operating license involves no significant hazards consideration if operaiton of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability of consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

CECo reviewed the proposed changes to TS and determined that the requested amendment does not involve a significant hazards consideration. More specifically, operation of QCNPS in accordance with the proposed amendment:

(1) Does not involve a significant increase in the probability or consequences, of any accident previously evaluated because plant protective functions and modes of operation are not altered. This amendment removes cycle-specific and fuel bundle type specific power distribution limits from the Technical Specifications and places them in a separate, controlled document (i.e. COLR). These changes are essentially administrative in nature, as the parameters in the COLR are the same as those currently specified in the Technical Specifications. NRC approved methods will still be used to analyze reloads of NRC approved fuel types for determining the results reported in the COLR. The surveillance requirements for these operating limits remain unchanged. Furthermore, functional requirements of safety-related equipment remain uneffected.

(2) Does not create the possibility of a new or different kind of accident from any accident previously evaluated because as stated above no safety-related equipment, safety function, plant protective feature, or mode of operation will be altered as a result of this amendment. The proposed changes do not create any new type of accident. The proposed amendment is in accordance with the guidance provided in Generic Letter 88-16 for licensees requesting removal of the values of cycle-specific parameters from TS. These operating limits will be developed in accordance with NRC-approved methodology, and the incorporation of these limits to the COLR ensure they will be properly controlled. Furthermore, the TS requirement for submitting the COLR to the Commission will allow the staff to continue to trend the value of these limits without the need for prior staff approval and without introduction of an unreviewed safety question. The current spectrum of analyzed reactor transients and accidents remains unchanged.

(3) Does not involve a significant reduction in the margin of safety. No plant functions are changed by this amendment. The change only removes cycle-specific and fuel bundle type specific power distribution limits from the Technical Specifications and incorporates these limits in the COLR. The plant will still continue to be operated within the boundaries established by these same power distribution limits, as calculated using NRC approved methods.

The Commission conducted a preliminary review of CECo's proposed amendment and analysis of no significant hazards. Currently, the Commission concurs with CECo's determination, and proposes that the aforementioned amendment does not constitute a significant hazards consideration.

Local Public Document Room location: Dixon Public Library, 221 Hennepin Avenue, Dixon, Illinois 61021.

Attorney for licensee: Michael I. Miller, Esquire; Sidley and Austin, One First National Plaza, Chicago, Illinois 60603.

NRC Acting Project Director: Paul C. Shemanski

Commonwealth Edison Company, Docket Nos. 50-254 and 50-265, Quad Cities Nuclear Power Station, Units 1 and 2, Rock Island County, Illinois

Date of application for amendments: August 3, 1989

Description of amendments request: Commonwealth Edison Company (CECo) submitted an application to amend Appendix A, Technical Specifications (TS), of Operating Licenses DPR-29 and DPR-30 for the Quad Cities Nuclear Power Station (QCNPS). This application would reduce (from sixteen channels to four) the number of operable temperature switches, required by TS, which could initiate primary containment isolation of the High Pressure Coolant Injection (HPCI) and Reactor Core Isolation Cooling (RCIC) Systems. Furthermore, the high temperature trip setpoint for primary containment isolation of HPCI and RCIC would be lowered from 200F to 170F.

High area temperature will isolate the main steam (MS) supply from containment to either HPCI or RCIC in the event of a steamline break in their respective rooms. In the past, spurious HPCI and/or RCIC system isolations have occurred from minor steam leaks at the HPCI/RCIC turbine gland seals and the proximal placement of primary containment isolation temperature switches. CECo plans to modify the location and number of temperature switch groups in the HPCI and RCIC rooms to maximize system reliability (i.e., minimize probability of spurious isolations) and yet still be capable of adequately sensing bulk room temperature during an actual MS line break. The temperature trip setpoint for primary containment isolation will also be lowered to compensate for the reduced number of temperature switches by improving system isolation response time.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated;

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

CECo evaluated the proposed amendment in accordance with 10 CFR 50.92(c) and determined that it does not involve a significant hazards consideration for the following reasons:

(1) Operation of QCNPS according to the proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

HPCI and RCIC high temperature switches are installed to detect a smaller break in the MS supply piping than that which would result in 300% MS line flow (i.e. high steamline flow would initiate primary containment isolation). Tripping of the high area temperature switches results in actuation of the RCIC or HPCI isolation valves. The trip logic for this isolation actuation is one-out-of-two taken twice and, as such all channels are required to be operable or in a tripped condition to meet single failure criteria. The trip settings of high area temperature and high flow, as well as valve closure times, assure that core uncovery is prevented and fission product releases are maintained within 10 CFR Part 100 limits.

The proposed modification to the HPCI and RCIC high temperature switches does not significantly increase the probability or consequence of an accident previously evaluated since the isolation function of the HPCI or RCIC temperature monitoring system is not directly affected. Relocation and reduction in the number of temperature switches is accompanied by a decrease in the trip level setting to assure acceptable response time and thereby minimize radiation releases to the room. The proposed change does not affect the one-out-of-two taken twice trip logic or the requirement that all installed sensors are operable (or in the tripped position). It is the intent of this proposed plant modification, and concurrent TS change, to maximize HPCI and RCIC system availability (i.e. reduce spurious isolations) without adversely effecting primary containment isolation response times during actual MS line break conditions.

(2) Operation of QCNPS according to the proposed change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed Technical Specification is submitted to support a proposed modification to the HPCI and RCIC temperature monitoring system which relocates and reduces the number of temperature switches. The system isolation logic design and the need for all instruments to be operable (or in the tripped condition) have not been changed. The trip level setting will be lowered (i.e., more conservative) to ensure adequate system response times and to maintain radiation levels within the limits of 10 CFR Part 100. As such, isolation of the HPCI and RCIC systems will occur when the bulk room temperature reaches the new trip setpoint (170° F) which would be indicative of a steamline break of the system. Calculations have been performed to demonstrate that the new temperature setpoint provides adequate assurance of system actuation in the event of a steamline break. The reduction of the number of switches prevents spurious isolations due to small localized steam leaks and removes the system sensitivity to area "hot spots", primarily at the turbine gland seals. HPCI and RCIC systems reliability is thereby increased by decreasing the number of unwanted system challenges.

Since the isolation function remains and the setpoint has been revised to accommodate for the system reconfiguration, no new or different kind of accident from any accident previously evaluated has been created.

(3) Operation of QCNPS according to the proposed changes does not involve a significant reduction in the margin of safety.

The purpose of the RCIC and HPCI system isolation is to assure system isolation in the event of a steamline break to prevent reactor inventory loss and maintain radiation doses to less than 10 CFR Part 100 limits. The modified temperature monitoring system will maintain separation criteria for electric power supplies. The one-out-of-two taken twice trip logic will be retained so that the isolation capability is maintained in the event of single switch failure. A large steam leak resulting from the rupture of the RCIC or HPCI steam supply line would cause the high flow instrumentation to provide a trip of the isolation logic. For smaller leaks, the bulk room temperature of the HPCI and RCIC rooms would increase until actuation of primary containment isolation due to high temperature. Relocation and reduction in the number of temperature switches is compensated for by a lowering, in the conservative direction, of the temperature isolation setpoint which will assure adequate system response. The current high flow isolation, accompanied by the modified temperature isolation, assures that only a minimal inventory loss occurs, thus preventing core uncovery and ensuring that 10 CFR Part 100 requirements are not exceeded; as such, a significant reduction in the margin of safety does not occur.

Therefore, the NRC staff proposes to determine that this amendment request does not involve significant hazards consideration based upon a preliminary review of the application and the licensee's evaluation of no significant hazards considerations.

Local Public Document Room location: Dixon Public Library, 221 Hennepin Avenue, Dixon, Illinois 61021.

Attorney for licensee: Michael I. Miller, Esquire; Sidley and Austin, One First National Plaza, Chicago, Illinois 60603.

NRC Acting Project Director: Paul C. Shemanski

Consumers Power Company, Docket No. 50-255, Palisades Plant, Van Buren County, Michigan

Date of amendment request: July 31, 1989

Description of amendment request: The proposed amendment would revise License Condition 3.E, remove fire protection Technical Specifications (TSs) 3.22, 4.17, 6.2.2.e and 6.4.2 and revise TSs 4.2.2 and 6.5.2.4.1. Generic Letters 86-10, dated April 24, 1986, and 88-12, dated August 2, 1988, from the NRC provided guidance to licensees to request removal of the fire protection TSs. The licensee's proposed amendment is in response to these Generic Letters.

Basis for proposed no significant hazards consideration determination: The NRC staff has evaluated this proposed amendment and determined that it involves no significant hazards consideration. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated; or

2. Create the possibility of a new or different kind of accident from any accident previously evaluated; or

3. Involve a significant reduction in a margin of safety.

The proposed revision to the License Condition is in accordance with the guidance provided in Generic Letter 86-10 for licensees requesting removal of fire protection TSs. The incorporation of the NRC-approved Fire Protection Program and the former TS requirements, by reference to the procedures implementing these requirements, into the Final Safety Analysis Report (FSAR) and the use of the standard License Condition on fire protection will ensure that the Fire Protection Program, including the systems, the administrative and technical controls, the organization, and the other plant features associated with fire protection will be on a consistent status with other plant features described in the FSAR. Also, the provisions of 10 CFR 50.59 would then apply directly for changes the licensee desires to make in the Fire Protection Program. In this context, the determination of the involvement of an unreviewed safety question defined in 10 CFR 50.59(a)(2) would be made based on the "accident...previously evaluated" being the postulated fire in the fire hazards analysis for the fire area affected by the change. Hence, the proposed License Condition establishes an adequate basis for defining the scope of changes to the Fire Protection Program which can be made without prior Commission approval, i.e., without introduction of an unreviewed safety question. The revised License Condition and the removal of the existing TS requirements on fire protection do not create the possibility of a new or different kind of accident from those previously evaluated. They also don't involve a significant reduction in the margin of safety since the License Condition does not alter the requirement that an evaluation be performed for the identification of an unreviewed safety question for each proposed change to the Fire Protection Program. Consequently, the proposed License Condition and the removal of the fire protection requirements do not involve a significant increase in the probability or consequences of an accident previously evaluated.

Currently, Section 6 of the TSs requires that written procedures be established, implemented, and maintained covering Fire Protection Program implementation. Technical Specification 6.5, Review and Audit, is modified to include the review of the changes to the Fire Protection Program and implementing procedures by the Nuclear Safety Board. In this manner, the Fire Protection Program will be addressed by administrative control requirements that are consistent with other programs addressed by License Conditions. These changes are administrative in nature and do not impact the operation of the facility in a manner that involves significant hazards consideration.

The proposed amendment includes the removal of fire protection TSs in four areas: (1) fire detection systems, (2) fire suppression systems, (3) fire barriers, and (4) fire brigade staffing and training requirements. While it is recognized that a comprehensive Fire Protection Program is essential to plant safety, many details of this program that are currently addressed in TSs can be modified without affecting nuclear safety. With the removal of these requirements from the TSs, they have been incorporated into the Fire Protection Program implementing procedures. Hence, with the additions to the existing administrative control requirements that are applicable to the Fire Protection Program and the revised License Condition, there are suitable administrative controls to ensure that licensee initiated changes to these requirements, that have been removed from the TSs, will receive careful review by competent individuals. Again, these changes are administrative in nature and do not impact the operation of the facility in a manner that involves significant hazards consideration.

Based on the preceding assessment, the NRC staff believes this proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Van Zoeren Library, Hope College, Holland, Michigan 49423.

Attorney for licensee: Judd L. Bacon, Esq., Consumers Power Company, 212 West Michigan Avenue, Jackson, Michigan 49201.

NRC Project Director: John Thoma, Acting

Duke Power Company, Docket Nos. 50-269, 50-270 and 50-287, Oconee Nuclear Station, Units 1, 2 and 3, Oconee County, South Carolina

Date of amendment request: February 17, 1989

Description of amendment request: The proposed amendments would revise the Technical Specifications (TS) to include operability and surveillance requirements for a flow path from the Low Pressure Injection (LPI) system discharge to the High Pressure Injection (HPI) pump suction. This flow path is necessary to assure the availability of long term core cooling following a small break loss of coolant accident in which the borated storage tank is depleted and Reactor Coolant system pressure remains above the shutoff head of the LPI pumps. This flow path currently exists in Oconee Units 1, 2 and 3; however, the flow paths were not addressed in the TS.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards (10 CFR 50.92(c)) for determining whether a significant hazards consideration exists. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The probability or consequences of an accident previously evaluated are not significantly increased since these proposed amendments constitute additional restrictions not presently included within the TS to provide increased assurance of the operability of the Emergency Core Cooling System. (ECCS).

The changes included within these proposed amendments add operability and surveillance requirements to the TS for the flow path from the LPI system to the HPI pump suction. No changes to the system configuration or design result from this change. Therefore, the proposed amendments do not create the possibility of a new or different kind of accident from any accident previously evaluated.

The additional operability and surveillance requirements included within these proposed amendments provide increased assurance that the ECCS will be available during all design basis accident scenarios. As such, the proposed amendments do not involve a significant reduction in a margin of safety.

Based on the above considerations, the Commission proposes to determine that the proposed amendments involve no significant hazards consideration.

Local Public Document Room location: Oconee County Library, 501 West South Broad Street, Walhalla, South Carolina 29691

Attorney for licensee: J. Michael McGarry, III, Bishop, Cook, Purcell and Reynolds, 1400 L Street, NW., Washington, DC 20005

NRC Project Director: David B. Matthews

Florida Power Corporation, et al., Docket No. 50-302, Crystal River Unit No. 3 Nuclear Generating Plant, Citrus County, Florida

Date of amendment request: July 26, 1989

Description of amendment request: This amendment would add operability requirements, actions, and surveillance requirements for core exit thermocouples and a Reactor Coolant Inventory Tracking System to the Technical Specifications. Core exit thermocouples measure the temperature of reactor coolant as it leaves the reactor core. A Reactor Coolant Inventory Tracking System uses a differential pressure measurement to help operators determine the level of coolant within the reactor vessel. These instruments, when used in conjunction with other plant indicators, can help operators analyze accidents more quickly and accurately, thus allowing them to take prompt corrective action.

Basis for proposed no significant hazards consideration determination: The Commission has provided criteria for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The Commission has also provided guidance concerning the application of criteria in 10 CFR 50.92 by providing certain examples (51 FR 7750). One of the examples of actions involving no significant hazards considerations is example (ii), a change that constitutes an additional limitation, restriction, or control not presently included in the technical specifications, e.g., a more stringent surveillance requirement.

The staff has evaluated the licensee's proposed changes in light of the criteria provided in 10 CFR 50.92. In regard to the first criterion, the staff has found that the proposed changes will not involve a significant increase in the probability or consequences of an accident previously evaluated since the additional requirements placed on the inadequate core cooling instrumentation by the proposed amendment will serve to ensure their operability during and after an accident.

In regard to the second criterion, the staff has found that the proposed changes will not create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed changes introduce no new mode of plant operation, nor do they involve any physical modifications of the plant.

In regard to the third criterion, the staff has found that the proposed changes do not involve a significant reduction in a margin of safety. As the changes involve an additional restriction to ensure the operability of currently installed systems, no reduction in a margin of safety is involved.

The staff, after performing a preliminary review of the licensee's proposed changes, agrees that the criteria of 10 CFR 50.92 are met. Furthermore, the staff believes that the proposed amendment is in accordance with example (ii) in 51 FR 7750. Therefore, the staff proposes to determine that the proposed amendment involves no significant hazards considerations.

Local Public Document Room location: Crystal River Public Library, 668 N.W. First Avenue, Crystal River, Florida 32629

Attorney for licensee: A. H. Stephens, General Counsel, Florida Power Corporation, MAC - A5D, P. O. Box 14042, St. Petersburg, Florida 33733

NRC Project Director: Herbert N. Berkow

Florida Power Corporation, et al., Docket No. 50-302, Crystal River Unit No. 3 Nuclear Generating Plant, Citrus County, Florida

Date of amendment request: July 28, 1989

Description of amendment request: This amendment would remove organizational charts from the Technical Specifications (TS) and add to the TS general requirements that capture the essential aspects of the organizational structure in accordance with the guidance provided in Generic Letter 88-06. The amendment would also revise the composition of the Plant Review Committee by deleting references to specific job titles for its members.

The TS currently contain organizational charts that depict the reporting chain for some organizational functions. Although it is important to have TS on plant organization, and to ensure that reporting chains for certain organizational functions are such that scheduling and operational pressures are subordinate to safety concerns, it has been the staff's experience that the organizational charts themselves have been of little help. As part of the proposed amendment, the aspects of the organizational charts that are essential to plant safety would be captured elsewhere in the TS.

As the organizational charts are currently a part of the TS, any update of, or title change affected by, these charts can only be accomplished through a license amendment; this places an unnecessary burden on both the licensee and the Commission. Thus, this amendment should reduce the administrative load on all parties.

Basis for proposed no significant hazards consideration determination: The Commission has provided criteria for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has evaluated the proposed changes in light of these criteria. In regard to the first criterion, the licensee found that the proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated since the essence of the TS will remain in place in more general terms. Thus, the proposed changes are in accordance with Generic Letter 88-06. Furthermore, the removal of the specific titles of the members of the Plant Review Committee were found acceptable as the TS would be modified to require that the members be supervisors from various disciplines.

In regard to the second criterion, the licensee determined that the proposed amendment did not create the possibility of a new or different kind of accident from any accident previously evaluated. This determination was made since the proposed amendment introduces no new mode of plant operation, nor does it involve any physical modification to the plant.

In regard to the third criterion, the licensee determined that the proposed amendment does not involve a significant reduction in a margin of safety. Changes to the organization will still be controlled by the provisions of 10 CFR Part 50 Appendix B, and 10 CFR 50.54(a)(3). Thus, this amendment will reduce the administrative burden on both the licensee and the Commission without a significant decrease in a margin of safety.

The staff, after performing a preliminary review of the licensee's proposed changes, agrees that the criteria of 10 CFR 50.92 are met. Therefore, the staff proposes to determine that the proposed amendment involves no significant hazard considerations.

Local Public Document Room location: Crystal River Public Library, 668 N.W. First Avenue, Crystal River, Florida 32629

GPU Nuclear Corporation, et al., Docket No. 50-289, Three Mile Island Nuclear Station, Unit No. 1, Dauphin County, Pennsylvania

Date of amendment request: July 28, 1989

Description of amendment request: Revises and corrects various technical specification surveillance requirements including reactor protection system.

Basis for proposed no significant hazards consideration determination: GPU Nuclear Corporation has determined that this Technical Specification Change Request poses no significant hazards as defined by the NRC in 10 CFR 50.92. It does not involve significant hazards as evaluated below.

> 1. Operation of Three Mile Island Nuclear Station, Unit-1, in accordance with this change would not involve a significant increase in the probability or consequences of an accident previously evaluated because the proposed Technical Specification does not modify or create an accident initiating condition.
>
> 2. Operation of Three Mile Island Nuclear Station, Unit-1, in accordance with this change would not create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed Technical Specification does not modify or create an accident initiating condition.
>
> 3. Operation of Three Mile Island Nuclear Station, Unit-1, in accordance with this change would not involve a significant reduction in a margin of safety since all Updated Final Safety Analysis Report (UFSAR) assumptions remain unchanged.

The NRC staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Accordingly, the Commission proposes to determine that the proposed

amendment involves no significant hazards consideration.

Local Public Document Room location: Government Publications Section, State Library of Pennsylvania, Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, Pennsylvania 17105.

NRC Project Director: John F. Stolz

Louisiana Power and Light Company, Docket No. 50-382, Waterford Steam Electric Station, Unit 3, St. Charles Parish, Louisiana

Date of amendment request: July 1, 1988 as supplemented August 15, 1989

Description of amendment request: The proposed amendment would revise Facility Operating License No. NPF-38 for Waterford 3 to authorize Entergy Operations, Incorporated (EOI) to act on behalf of Louisiana Power and Light (LP&L), with responsibility for the control over the physical construction, operation and maintenance of the facility. This action is proposed in conjunction with EOI becoming the operator of Arkansas Nuclear One, Units 1 and 2 and Grand Gulf Units, 1 and 2. The proposed amendment was originally noticed on August 10, 1988 (53 FR 30136) with System Energy Resources, Inc. as the proposed operator.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety. LP&L has evaluated the proposed change to Facility Operating License No. NPF-38 and has determined the following.

EOI will be a wholly owned subsidiary of Entergy. The employees of LP&L presently engaged in the operation of Waterford 3 will become employees of EOI. The organizational structure of EOI will provide for clear management control and effective lines of authority and communication among the organizational units involved in the management, operation, and technical support of the facility.

As a result of the proposed amendment, there will not be physical changes to the facility, and all Limiting Conditions for Operation, Limiting Safety System Setting, and Safety Limits specified in the Technical Specifications will remain unchanged. With the exception of administrative changes to reflect the role of EOI, the quality assurance program, security plan, and training program are unaffected. With regard to emergency plans, certain physical and personnel resources, limited to support in administrative areas but not inclusive of decision making authority, will continue to be provided by LP&L in support of these activities. The licensee states that decisional responsibilities related to accident recognition and classification, mitigation and corrective actions, radiological assessment and protective action recommendations and coordination with state and local authorities will rest with EOI personnel. LP&L corporate management will provide direction to other non-nuclear LP&L facilities for support to Waterford 3. Operating agreements will ensure continued compliance with among others, General Design Criterion 17 of Appendix A to 10 CFR Part 50 on Electrical Power Systems. Therefore, the proposed changes will not increase the probability or consequences of an accident previously evaluated.

The design and design bases of Waterford 3 remain the same. Therefore, the current plant safety analyses remain complete and accurate in addressing the licensing basis events and analyzing plant response and consequences. The Limiting Conditions for Operation, Limiting Safety System Settings, and Safety Limits are not affected by the proposed amendment. With the exception of administrative changes to reflect the role of EOI, plant procedures are unaffected. As such, the plant conditions for which the design basis accident analyses have been performed are still valid. Therefore, the proposed amendment cannot create the possibility of a new or different kind of accident than previously evaluated.

Plant safety margins are established for and reflected in Limiting Conditions for Operation, Limiting Safety System Settings, and Safety Limits specified in the Technical Specifications. Since there will be no change to the physical design or operation of the plant, there will be no change to any of these or any other margins. The proposed amendment therefore will not involve a reduction in a margin of safety.

The staff has reviewed the licensee's evaluation and agrees with the conclusions. Therefore, based on the above, the staff proposed to determine that the proposed license amendment does not involve a significant hazards consideration.

Local Public Document Room Location: University of New Orleans Library, Louisiana Collection, Lakefront, New Orleans, Louisiana 70122

NRC Project Director: Frederick J. Hebdon

Louisiana Power and Light Company, Docket No. 50-382, Waterford Steam Electric Station, Unit 3, St. Charles Parish, Louisiana

Date of amendment request: August 14, 1989

Description of amendment request: The proposed amendment would change the Technical Specifications to allow the control element assembly drop time acceptance to be based on the average drop time rather than the slowest drop time of any control element assembly (CEA).

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety. The licensee has performed an analysis as follows.

> The proposed change to the CEA drop time requirements have been evaluated for impact on Waterford 3 analyses. Analyses show that assuming the negative reactivity insertion of CEAs falling in a reasonable distribution about the average is the same as the negative reactivity insertion due to all CEAs dropping into the core at the average rod drop time. Thus, the change is equivalent to the current acceptance criteria because the required negative reactivity insertion must be attained within the same 3.0 second limit. Since the negative reactivity insertion during reactor trip assumed in accident analyses is not adversely impacted by assuming all CEAs drop at the rate of the average CEA, the proposed change will not increase the probability or consequences of an accident previously evaluated.

The proposed change does not involve any new or modified structures, systems, or components. Rather, the proposed change affects only an acceptance criteria for confirming the required reactivity insertion performance of the existing CEA hardware. Since the new acceptance criteria preserves the safety analyses reactivity insertion assumptions, the proposed change does not create the possibility of a new or different kind of accident from any previously evaluated.

The margin of safety associated with CEA insertion (maximum reactor trip time) is assumed for each of the analyzed events in the Final Safety Analysis Report. Technical Specification 3.1.3.4 ensures actual plant performance stays bounded by the safety analyses assumptions on CEA drop time. As stated above, the proposed change in the CEA drop time requirement is equivalent to the current requirement and will not have any adverse impact upon safety analyses. Therefore, the margin of safety in the analyses is not reduced.

We have reviewed the licensee's analysis for hazards consideration and find it acceptable. Therefore on the basis of the above, the staff proposes to determine that the change does not involve a significant hazards consideration.

NRC Project Director: Frederick J. Hebdon

Northeast Nuclear Energy Company, Docket No. 50-245, Millstone Nuclear Power Station, Unit No. 1, New London County, Connecticut

Date of amendment request: July 25, 1989

Description of amendment request: The proposed change to the Technical Specifications would add the term "Source Check" to the surveillance requirement to administratively eliminate discrepancies between Sections 4.8.A.1, 4.8.B.1 and their referenced tables, Tables 4.8-1 and 4.8-2.

Basis for proposed no significant hazards consideration determination: The licensee has reviewed the proposed changes, in accordance with 10 CFR 50.92 and has concluded and the NRC agrees, that they do not involve a significant hazards consideration in that these changes would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed change involves adding the term "source check" to the surveillance requirement of Specifications 4.8.A.1 and 4.8.A.2 in order to make them consistent with Tables 4.8-1 and 4.8-2. The change does not impact the way the surveillance is currently performed and, therefore, does not impact the consequences or probability of occurrence of any accident.

2. Create the possibility of a new type of accident from those previously analyzed. The change represents only an administrative correction, and as such does not impact any related systems, components, or parameters. Therefore, no new type of accident could be created.

3. Involve a significant reduction in the margin of safety. The original intent of the technical specification remains unchanged by the administrative correction. Therefore, there is no reduction in the margin of safety.

Local Public Document Room location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Attorney for licensee: Gerald Garfield, Esquire, Day, Berry & Howard, Counselors at Law, City Place, Hartford, Connecticut 06103-3499.

NRC Project Director: John F. Stolz

Northeast Nuclear Energy Company, Docket No. 50-245, Millstone Nuclear Power Station, Unit No. 1, New London County, Connecticut

Date of amendment request: July 31, 1989

Description of amendment request: The proposed change to the Technical Specifications would add four valves to Table 3.7.1. The addition of these to the table of primary containment isolation valves adds the capability to use the existing drywell compressors to take suction from the torus, and discharge directly into the drywell atmosphere. This also minimizes the purging operations which would have been needed to maintain the required differential pressure between the drywell and torus.

Basis for proposed no significant hazards consideration determination: The licensee has reviewed the proposed changes, in accordance with 10 CFR 50.92 and has concluded and the NRC agrees, that they do not involve a significant hazards consideration in that these changes would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated. The addition of the four additional containment isolation valves to Table 3.7.1 of the Millstone Unit No. 1 Technical Specifications will have no impact on the initiation or consequences of any accident previously evaluated. This change will ensure that the additional valves are leak rate tested. Therefore, the aforementioned change does not increase the probability or consequences of a design basis accident nor does it affect the performance or failure probability of any safety system. The change described is administrative in nature and, as such, has no effect on the initiation, probability, or consequences of any previously evaluated accident scenario.

2. Create the possibility of a new or different kind of accident from any previously evaluated. The proposed change does not result in any physical modification to the plant, but only adds to an existing list of containment isolation valves. This administrative change does not result in any new failure mode and, therefore, no new or different kind of accident from any previously evaluated is created.

3. Involve a significant reduction in the margin of safety. Containment integrity will be maintained, and the addition of these valves to the list of Primary Containment Isolation Valves (Table 3.7.1) will have no adverse impact on protective boundaries; therefore no reduction in margin of safety will be created.

Local Public Document Room location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Attorney for licensee: Gerald Garfield, Esquire, Day, Berry & Howard, Counselors at Law, City Place, Hartford, Connecticut 06103-3499.

NRC Project Director: John F. Stolz

Northeast Nuclear Energy Company, Docket No. 50-245, Millstone Nuclear Power Station, Unit No. 1, New London County, Connecticut

Date of amendment request: July 31, 1989

Description of amendment request: The proposed change to the Technical Specifications would revise the distribution voltage listed from 27.6KV to 23KV for the primary side of the Emergency Station Services Transformer (ESST). This reflects a previous plant modification.

Basis for proposed no significant hazards consideration determination: The licensee has reviewed the proposed changes, in accordance with 10 CFR 50.92 and has concluded and the NRC agrees, that they do not involve a significant hazards consideration in that these changes would not:

1. Involve a significant increase in the probability or consequences of an accident previously analyzed. Since the capacity and low-side voltage ratings remain the same and only the high-side voltage has been reduced, the ESST still serves its intended function. The change is administrative in nature and corrects an oversight from the time when physical changes were made to the ESST supply line.

2. Create the possibility of a new or different kind of accident from those previously analyzed, in that the proposed change corrects the Technical Specifications to reflect the actual voltage of the ESST supply, and does not affect the ESST purpose of providing alternate off-site power to Millstone Unit No. 1. The change does not modify plant response nor does it have any new failure modes associated with it.

3. Involve a significant reduction in the margin of safety. The margin of safety is not affected by this proposed change in that the change is only in the wording of the Technical Specifications and has no effect on plant operation.

Local Public Document Room location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Attorney for licensee: Gerald Garfield, Esquire, Day, Berry & Howard, Counselors at Law, City Place, Hartford, Connecticut 06103-3499

NRC Project Director: John F. Stolz

Northeast Nuclear Energy Company, Docket No. 50-245, Millstone Nuclear Power Station, Unit No. 1, New London County, Connecticut

Date of amendment request: August 8, 1989

Description of amendment request: The proposed change to the Technical Specifications would add a new requirement to maintain an average water temperature of less than 75° F at the intake structure except when the reactor is in the cold shutdown or refueling condition. The design basis for the service water system as stated in the Updated Final Safety Analysis Report is a maximum water temperature of 75° F.

Basis for proposed no significant hazards consideration determination: The licensee has reviewed the proposed changes, in accordance with 10 CFR 50.92 and has concluded and the NRC agrees, that they do not involve a significant hazards consideration in that these changes would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated. The change reflects the assumption made for ultimate heat sink in the design basis analysis and is more stringent than the existing Technical Specifications. There are no design accidents adversely affected by the proposed change, and the change cannot result in the initiation of any event. The additional shutdown requirement will maintain the plant with the 75° F design basis service water temperature.

2. Create the possibility of a new or different kind of accident from those previously analyzed. The proposed change has no effect on plant operation within the design basis, no new failure modes are introduced, and no hardware modifications are included in this change.

3. Involve a significant reduction in the margin of safety. The change does not have any adverse impact on the protective boundaries. The change has no effect on the consequences of any accident and there is no reduction in the margin of safety.

Local Public Document Room location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Attorney for licensee: Gerald Garfield, Esquire, Day, Berry & Howard, Counselors at Law, City Place, Hartford, Connecticut 06103-3499.

NRC Project Director: John F. Stolz

Northern States Power Company, Docket No. 50-263, Monticello Nuclear Generating Plant, Wright County, Minnesota

Date of amendment request: August 2, 1989

Description of amendment request: The proposed amendment would eliminate Table 3.7.1, "Primary Containment Isolation," from the Technical Specifications (TSs). The Updated Safety Analysis Report (USAR), Table 5.2-3b, would replace TS Table 3.7.1 for identification of primary containment isolation valves and descriptive information such as valve closure time, normal position, and isolation group assignment.

The operability of containment isolation valves ensures that the containment atmosphere will be isolated from the outside environment in the event of a release of radioactive material to the containment atmosphere or pressurization of the containment. Although the proposed change involves the removal of the table in the TSs which identifies the valves which must be operable to ensure containment integrity, the basic requirements that ensure operability and periodic surveillance will remain in the TSs. The substitution of USAR Table 5.2-3b for TS Table 3.7.1 is an administrative action to allow future changes to the facility to be made under the authority of 10 CFR 50.59 when appropriate.

Basis for proposed no significant hazards consideration determination: The Commission's staff has evaluated the proposed amendment and determined that it involves no significant hazards consideration. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The substitution of TS Table 3.7.1 with USAR information would have no impact on plant operation or safety. The TSs would continue to require containment isolation valves to be operable, appropriate action to be taken in event of inoperable valves, and periodic surveillance testing of the valves. Changes to the USAR Table which would replace Table 3.7.1 would be controlled under the provisions of 10 CFR 50.59.

The Commission's staff finds that the proposed amendment would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated because the amendment would not eliminate operability or surveillance requirements for isolation valves needed to ensure containment integrity; or

2. Create the possibility of a new or different kind of accident from any accident previously evaluated because no facility modifications are involved which could create such a possibility; or

3. Involve a significant reduction in a margin of safety because operability and surveillance criteria for valves needed for containment integrity would not be relaxed.

Therefore, the Commission proposes to determine that the proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Minneapolis Public Library, Technology and Science Department, 300 Nicollet Mall, Minneapolis, Minnesota 55401.

Attorney for licensee: Gerald Charnoff, Esq., Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: John Thoma, Acting

Pacific Gas and Electric Company, Docket Nos. 50-275 and 50-323, Diablo Canyon Power Plant, Unit Nos. 1 and 2, San Luis Obispo County, California

Date of amendment request: August 15, 1989 (Reference LAR 89-09)

Description of amendment request: The proposed amendments would revise the combined Technical Specifications (TS) for the Diablo Canyon Power Plant (DCPP) Unit Nos. 1 and 2 to (1) allow the use of a temporary source range detector during refueling if one of the two permanently installed excore source range detectors fails, (2) clarify that certain activities, which do not significantly affect core reactivity, are not considered alterations, (3) require containment closure during movement of the reactor upper internals and head, and (4) allow latching the control rod mechanism shaft to the rod cluster control assemblies (RCCAs) and friction testing of individual control rods with one source range detector.

The specific TS changes proposed would include the following:

(1) TS Definition 1.10, "Core Alterations", would be revised to clarify that certain activities, which do not

BEST COPY AVAILABLE

significantly affect core reactivity, are not considered core alterations.

(2) TS 3.9.2, "Instrumentation", would be revised to allow latching the control rod drive shaft mechanism to the rod cluster control assemblies and friction testing of individual control rods with one source range detector.

(3) Bases for TS 3/4.9.2, "Instrumentation," would be revised to permit use of a temporary source range detector if the temporary detector is functionally equivalent to the permanently installed source range detectors.

(4) TS 3/4.9.4, "Containment Penetrations", would be revised to required containment integrity during movement of the reactor head and upper internals over fuel.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a no significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment will not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee, in its submittal of August 15, 1989, evaluated the proposed changes against the significant hazards criteria of 10 CFR 50.92 and against the Commission guidance concerning application of this standard. Based on the evaluation given below, the licensee has concluded that the proposed changes do not involve a significant hazards consideration. The licensee's evaluation is as follows:

a. Does the change involve a significant increase in the probability or consequences of an accident previously evaluated?

The possibility that the temporary source range detector may contact and damage a fuel element during refueling has been evaluated. Based on the bounding analysis of a dropped fuel assembly presented in FSAR Update Section 15.4.5.1.3, striking of the temporary detector assembly on the fuel element will result in no core damage. The active portion of the fuel is separated from the upper internals by 11 inches. Since material greater than 9 inches from the active core is neutronically decoupled, reinstallation of the reactor vessel upper internals and head will not affect core reactivity. The movement of control rods during latching and friction checks adds an amount of positive reactivity which is accounted for in the shutdown margin requirements of TS 3/4.9.1. Tools and equipment in the core region do not add positive reactivity to the core nor do they pose a fuel damage hazard from dropping into the vessel. The proposed requirement for maintaining containment integrity provides an additional safety measure.

The uncontrolled RCCA bank withdrawal from a subcritical condition and uncontrolled boron dilution accidents were evaluated for impact due to the proposed change. The probability or consequences of these accidents is not increased due to the proposed change to the definition of core alterations. Latching the control rods and performing the friction checks with only one operable excore source range detector would be acceptable because the technical specification shutdown margin requirements are not affected by the proposed change. Further, since the core is fully loaded during latching and friction checks, the core will be geometrically coupled to the operable detector and capable of monitoring reactivity changes.

Therefore, the proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

b. Does the change create the possibility of a new or different kind of accident from any accident previously evaluated?

The fission chamber does not affect core reactivity. The insertion of the temporary detector in the core increases the source strength slightly but does not affect the k_{eff} value.

The change in the definition of Core Alterations would allow movement of the reactor vessel upper internals and insertion of small components, such as tools, into the reactor core region when core alterations are suspended. A small probability exists for dropping a component into the reactor vessel. The only object of sufficient size that is handled over the reactor vessel that could cause fuel damage is the upper internals package. The proposed changes will still require containment closure when handling the reactor vessel upper internals or reactor vessel head over the fuel. Control rod latching and performing the required friction checks will still be done with the core fully loaded and coupled to at least one operable excore source range detector. Any reactivity changes will still be adequately monitored.

Therefore, the proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

c. Does the change involve a significant reduction in a margin of safety?

The operability of the source range neutron flux monitors ensures that redundant monitoring capability is available to detect changes in the reactivity condition of the core. Use of the temporary source range detector will provide this redundant capability in the event that an installed source range detector failed. The revision of TS 3/4.9.2 will continue to assure safe operations by continuing to monitor core alterations that may affect reactivity or damage the fuel by requiring that two source range detectors be operable, except for control rod latching and performance of friction checks. These evolutions can be adequately monitored by one operable excore source range detector. The proposed changes still result in the containment being required to be closed when moving the reactor vessel upper internals or reactor vessel head over the fuel.

Therefore, the proposed changes do not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the proposed changes and the licensee's no significant hazards consideration determination and finds them acceptable. Therefore, the staff proposes to determine that these changes do not involve significant hazards consideration.

Local Public Document Room location: California Polytechnic State University Library, Government Documents and Maps Department, San Luis Obispo, California 93407.

Attorneys for licensee: Richard R. Locke, Esq., Pacific Gas and Electric Company, P.O. Box 7442, San Francisco, California 94120 and Bruce Norton, Esq., c/o Pacific Gas and Electric Company, P.O. Box 7442, San Francisco, California 94120.

NRC Project Director: George W. Knighton

Pacific Gas and Electric Company, Docket Nos. 50-275 and 50-323, Diablo Canyon Power Plant, Unit Nos. 1 and 2, San Luis Obispo County, California

Date of amendment request: August 15, 1989 (Reference LAR 89-10)

Description of amendment request: The proposed amendments would revise the combined Technical Specifications (TS) for the Diablo Canyon Power Plant (DCPP) Unit Nos. 1 and 2 to implement a Core Operating Limits Report (COLR) for each unit in accordance with Generic Letter 88-16, "Removal of Cycle-Specific Parameter Limits from Technical Specifications". The licensee requests that the cycle-specific information for Shutdown Rod Insertion Limit, Control Rod Insertion Limits, and Axial Flux Difference (AFD) be relocated to the COLR. The specific TS changes proposed would include the following:

(1) Definition 1.43, "Core Operating Limits Report" would be added in accordance with Generic Letter 88-16.

(2) TS 3.1.3.1, "Movable Control Assemblies", would be revised to reference Specification 3.1.3.6 for rod insertion limits, rather than Figure 3.1-1 (actually 3.1-1a and 3.1-1b), which are being deleted in accordance with Generic Letter 88-16 (See item 4 below).

(3) TS 3.1.3.5, "Shutdown Rod Insertion Limit", and the related Surveillance Requirement, 4.1.3.5, would be revised to delete the insertion limit requirement and reference the COLR.

This change is consistent with Generic Letter 88-16.

(4) TS 3.1.3.6, "Control Rod Insertion Limits", would be revised to delete Figures 3.1-1a and 3.1-1b and reference the COLR. To support this change the reference to these figures in TS 3.1.3.1, "Moveable Control Assemblies", would be deleted and the COLR referenced. These changes are consistent with Generic Letter 88-16.

(5) TS 3.2.1, "Axial Flux Difference", would be revised to delete Figures 3.2-1a and 3.2-1b and reference the COLR. These changes are consistent with Generic Letter 88-16.

(6) Surveillance Requirements (SR) 4.2.2.1.2.c. and 4.2.2.2.2.e would be revised to reference the COLR instead of the Peaking Factor Limit Report. SR 4.2.2.1.2.f would be revised to reference Specification 3.2.1 instead of Figure 3.2-1a. The Bases would be revised to refer to the COLR, rather than the Peaking Factor Limit Report.

(7) TS 6.9.1.8, "Peaking Factor Limit Report" would be deleted. TS 6.9.1.8, "Core Operating Limits Report", would be added in accordance with Generic Letter 88-16. The COLR for each unit would contain the information that was provided in the Peaking Factor Limit Report. Since the COLR is required to be submitted to the NRC, it is no longer necessary to have a Peaking Factor Limit Report.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a no significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment will not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee, in its submittal of August 15, 1989, evaluated the proposed changes against the significant hazards criteria of 10 CFR 50.92 and against the Commission guidance concerning application of this standard. Based on the evaluation given below, the licensee has concluded that the proposed changes do not involve a significant hazards consideration. The licensee's evaluation is as follows:

a. Does the change involve a significant increase in the probability or consequences of an accident previously evaluated?

The shutdown rod insertion limit, the control rod insertion limits, and the AFD operational limits of the TS are cycle-specific parameters. This [proposed amendment] is administrative nature as it proposes to relocate these parameter limits to a unit-specific COLR. Eliminating the Peaking Factor Limit Report and placing the contents in the COLR is also an administrative change. The removal of the cycle-specific parameters from the TS has no influence or impact on the probability or consequences of a previously evaluated accident. The cycle-specific parameter limits, although not in the TS, will be maintained via the DCPP TS and the COLR. The proposed amendment still requires the same action to be taken when or if limits are exceeded as is required by the TS. Future reloads will be evaluated using NRC approved methodologies and will be examined per the requirements of 10 CFR 50.59.

Therefore, the proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

b. Does the change create the possibility of a new or different kind of accident from any accident previously evaluated?

There is no physical alteration to any plant system, nor is there a change in the method by which any safety related system performs its function. As stated above, the proposed change is administrative in nature.

Therefore, the proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

c. Does the change involve a significant reduction in a margin of safety?

The margin of safety is not affected by the removal of cycle-specific parameter limits from the TS. The proposed amendment still requires operation within the core limits as determined from the NRC-approved reload design methodologies. Appropriate actions will continue to be taken if limits are violated. The development of the limits for future reloads will continue to conform to those methods described in NRC approved documentation. In addition, each future reload will involve a 10 CFR 50.59 review.

Therefore, the proposed changes do not involve a significant reduction in a margin of safety.

The NRC Staff has reviewed the proposed changes and the licensee's no significant hazards consideration determination and finds them acceptable. Therefore, the Staff proposes to determine that these changes do not involve significant hazards consideration.

Local Public Document Room location: California Polytechnic State University Library, Government Documents and Maps Department, San Luis Obispo, California 93407.

Attorneys for licensee: Richard R. Locke, Esq., Pacific Gas and Electric Company, P.O. Box 7442, San Francisco, California 94120 and Bruce Norton, Esq., c/o Pacific Gas and Electric Company, P.O. Box 7442, San Francisco, California 94120.

NRC Project Director: George W. Knighton

The Portland General Electric Company, Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Dates of amendment request: December 2, 1986, as supplemented on December 19, 1986, and revised on January 15, 1988 and September 13, 1988.

Description of amendment request: In accordance with the requirements of 10 CFR 73.55, the licensee submitted a proposed amendment to the Physical Security Plan for the Trojan Nuclear Power Plant to reflect recent changes to that regulation. The proposed amendment would modify paragraph 2.D of Facility Operating License No. NPF-1 to require compliance with the revised Plan.

Basis for proposed no significant hazards consideration determination: On August 4, 1986 (51 FR 27817 and 27822), the Nuclear Regulatory Commission amended Part 73 of its regulations, "Physical Protection of Plants and Materials," to clarify plant security requirements to afford an increased assurance of plant safety. The amended regulations required that each nuclear power reactor licensee submit proposed amendments to its security plan to implement the revised provisions of 10 CFR 73.55. The licensee submitted its revised plan on January 15, 1988 and September 13, 1988 to satisfy the requirements of the amended regulations. The Commission proposes to amend the license to reference the revised plan.

In the Supplementary Materials accompanying the amended regulations, the Commission indicated that it was amending its regulations "to provide a more safety conscious safeguards system while maintaining the current levels of protection" and that the "Commission believes that the clarification and refinement of requirements as reflected in these amendments is appropriate because they afford an increased assurance of plant safety."

The Commission has provided guidance concerning the application of the criteria for determining whether a significant hazards consideration exists by providing certain examples of actions involving no significant hazards considerations (51 FR 7750). One of these examples of actions involving no significant hazards considerations is example (vii) "a change to conform a license to changes in the regulations, where the license change results in very minor changes to facility operations clearly in keeping with the regulations." The changes in this case fall within the scope of the example. For the foregoing reasons, the Commission proposes to determine that the proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Portland State University Library, 731 S.W. Harrison Street, Portland, Oregon 97207.

NRC Project Director: George W. Knighton

Public Service Electric & Gas Company, Docket No. 50-354, Hope Creek Generating Station, Salem County, New Jersey

Date of amendment request: August 21, 1989

Description of amendment request: Change the description of fuel and control rod assemblies.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety. In accordance with 10 CFR 50.92 the licensee has reviewed the proposed changes and has concluded as follows that they do not involve a significant hazards consideration:

No Significant Hazards Consideration Evaluation

The proposed changes to the Hope Creek Generating Station (HCGS) Technical Specifications:

1. Do not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed revision to section 5.3.1 will enable HCGS to change fuel assemblies without a license amendment. The core operating limits will still be based on the NRC approved methodology of GESTAR II. Since NRC approval of GESTAR II is predicated on review of specific fuel assembly designs, HCGS will still be using NRC approved fuel designs.

The proposed revision to Section 5.3.2 will allow HCGS to use ABB-ATOM hafnium tipped control blades as replacements for the existing General Electric control blades. These control blades have been previously approved by the NRC on a generic basis. The 10 CFR 50.59 evaluation that will be performed prior to control blade replacement will address any plant specific concerns and will assure that the probability or consequences of an accident will not be increased. The requirements of specification 3/4.1.3 will continue to assure that the control rods are OPERABLE, with acceptable scram times. The NRC approved methodology of ABB-ATOM will be applied specifically to HCGS.

Therefore, PSE&G has concluded that this amendment request does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Do not create the possibility of a new or different kind of accident from any accident previously evaluated.

NRC approved methodologies and fuel/control rod designs will be required for use in HCGS and plant specific evaluations pursuant to 10 CFR 50.50 will be performed for each fuel cycle. The fuel bundles, control rods assemblies and related operating limits used at HCGS will remain bounded by the current UFSAR accident analyses.

Therefore, PSE&G has concluded that this amendment request does not introduce any new or different kind of accident from those previously evaluated.

3. Do not involve a significant reduction in a margin of safety.

The core operating limits which are affected by the fuel and control rod assemblies will continue to be done using the methods of GESTAR II, which have been previously approved by the NRC. These methods will set the limiting parameters for core operation such that the Safety Limits as defined by the Technical Specifications and UFSAR safety analyses are not challenged. The removal of specific design information from sections 5.3.1 and 5.3.2 of the Technical Specifications does not result in a reduction in the margin of safety since NRC approved methodologies are still applied to reactor core design. Design changes are still subject to the provisions of 10 CFR 50.59.

Therefore, this amendment request does not involve a significant reduction in a margin of safety as defined in the basis for any Technical Specification.

The staff reviewed the licensee's determination that the proposed license amendment involves no significant hazards consideration and agrees with the licensee's analysis. Accordingly, the staff proposes to determine that the proposed license amendment does not involve a significant hazards consideration.

NRC Project Director: Walter R. Butler

Rochester Gas and Electric Corporation, Docket No. 50-244, R. E. Ginna Nuclear Power Plant, Wayne County, New York

Date of amendment request: May 9, 1989. The request includes References 1 and 2.

Description of amendment request: The purpose of this amendment is to incorporate additional Specifications and Action Statements regarding required operability of the Ginna Station motor-driven and turbine-driven auxiliary feedwater pumps. In particular, additional Action Statements have been added for the turbine-driven feedwater system and its relationship to 10 CFR 50.63, the Station Blackout Rule. Also, the format of the Specifications and Action Statements have been modified for clarification.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazard determination exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee's analyses contained in the May 9, 1989, letter states the following:

The Action Statements for the turbine-driven auxiliary feedwater system have been incorporated. In accordance with 10 CFR 50.63, the Station Blackout Rule, one AC-independent means of providing auxiliary feedwater is required. Thus, with one of the two steam supply or discharge flow paths inoperable, the requirements of 10 CFR 50.63 are met. Since service water is not AC-independent, it also need not be available to meet Station Blackout. Thus, startup or continued operation is considered acceptable under such circumstances; however, a Special Report to the NRC is considered prudent and has been incorporated into the proposed Technical Specifications. The Technical Specifications have been modified to specify testing requirements of the turbine-driven auxiliary feedwater pump if the pump has one operable discharge flow path. With both steam supply or discharge flow paths, or the pump itself inoperable, Rochester Gas and Electric Corporation has evaluated Station Blackout risk. Based on Reference (1), an allowable unavailability of 27 days/year is acceptable, with a diesel generator reliability of 0.95. RG&E's reliability is greater than 0.975, based on their response to the Station Blackout Rule. A prudent maximum out-of-service duration of 7 days has been chosen.

Following a reactor/turbine trip, the motor-driven auxiliary feedwater pumps are automatically started on a low steam generator level or a trip signal from both main feedwater pumps. The motor-driven auxiliary feedwater pump will also automatically start on a safety injection actuation. With one motor-driven auxiliary feedwater pump inoperable, the turbine-driven auxiliary feedwater can be started and deliver flow to one or both steam generators. In addition, the two standby auxiliary feedwater pumps can deliver flow to either steam generator. Because of the number and diverse means of acceptable backup to the auxiliary feedwater pumps, it is considered acceptable to require the submittal of a Special Report to the NRC as the Action Statement, when one motor-driven auxiliary feedwater flow path is declared inoperable, rather than requiring a shutdown Action Statement.

If two motor-driven auxiliary feedwater pumps are inoperable, the turbine-driven auxiliary feedwater pump can supply 100% of the required accident flow rate to both steam generators. In addition, each of the two standby auxiliary feedwater pumps can supply 100% of the required service water flow to its associated steam generator. A 72-hour duration has been selected to restore one of the two motor-driven auxiliary feedwater pumps to operable status.

Rochester Gas and Electric Corporation has also clarified the case where the turbine-driven and one motor-driven auxiliary feedwater pump associated with the same steam generator would be inoperable. This would result in no automatic actuation of auxiliary feedwater to that steam generator. Although the motor-driven and turbine-driven auxiliary feedwater pumps have provisions for delivering to either steam generator, and the standby auxiliary feedwater system has been shown to meet required delivery requirements under worst-case conditions, Reference (2), a 72-hour duration has been selected to restore one of the two automatic means to service.

As explained in the above discussions, the proposed amendment incorporates additional Action Statements regarding the turbine-driven auxiliary feedwater system, in accordance with Rochester Gas and Electric Corporation's compliance with 10 CFR 50.63, the Station Blackout Rule. These proposed changes do not increase the probability or consequences of a previously-evaluated accident, or create a new or different kind of accident. Furthermore, there is no significant reduction in the margin of safety for any particular Technical Specifications, and the addition of restrictions, such as for the turbine-driven auxiliary feedwater pump and flow paths, has increased the margins of safety.

Therefore, Rochester Gas and Electric submits that the issues associated with this amendment request are outside the criteria of 10 CFR 50.91 and a no significant hazards finding is warranted.

The Commission has provided guidance concerning the application of the standard in 10 CFR 50.92 for determining whether a significant hazards consideration exists by providing certain examples of amendments that will likely be found to involve no significant hazards considerations. The changes to the Technical Specifications proposed in this amendment request are similar to NRC example (ii). Example (ii) relates to changes that constitute additional limitation restrictions and controls not presently included in the Technical Specifications.

Based on this guidance and the reasons discussed above, the licensee has concluded that the proposed change does not involve a significant hazards consideration. The Commission agrees with this conclusion.

Southern California Edison Company, et al., Docket Nos. 50-206, 50-361 and 50-362, San Onofre Nuclear Generating Station, Unit Nos. 1, 2, and 3, San Diego County, California

Date of amendment request: April 28, 1989

Description of amendment request: Southern California Edison Company (SCE) requests changes to the operating licenses of the three San Onofre units to reflect changes in the ownership which would result from the merger of SCE and San Diego Gas and Electric Company.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis about the issue of no significant hazards consideration which is quoted below:

1. Will operation of the facility in accordance with this proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

The proposed change does not involve a significant increase in the probabilities or consequences of accidents previously evaluated because it only revises the operating licenses to reflect the merger of two entities which are currently licensees. This revision represents an administrative change and therefore has no impact on accidents previously evaluated.

2. Will operation of the facility in accordance with the proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

The proposed change does not modify the facility or the manner in which it operates. SCE will continue to act as operating agent for the co-owners with exclusive responsibility and control over the physical construction, operation, and maintenance of SONGS. Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Will operation of the facility in accordance with this proposed change involve a significant reduction in a margin of safety?

The proposed change is administrative in nature and as such will not impact any margin of safety.

The NRC staff has reviewed the analysis and, based on that review, it appears that the three criteria are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

NRC Project Director: George W. Knighton

System Energy Resources, Inc., et al., Docket No. 50-416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Date of amendment request: August 15, 1989, as revised August 22, 1989

Description of amendment request: The proposed amendment would revise Facility Operating License No. NPF-29 for Grand Gulf Nuclear Station, Unit 1 (GGNS-1 or the facility) to authorize Entergy Operations, Incorporated (EOI) to act on behalf of System Energy Resources, Inc. (SERI) and South Mississippi Electric Power Association with responsibility for and control over the physical construction, operation and maintenance of the facility. This action is proposed in conjunction with EOI becoming the operator of Arkansas Nuclear One, Units 1 and 2 and

Waterford Steam Electric Station, Unit 3.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a no significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. SERI has evaluated the proposed change to Facility Operating License No. NPF-29 and has determined the following.

EOI will be a wholly owned subsidiary of Entergy Corporation (Entergy), formerly known as Middle South Utilities, Inc. The employees of SERI presently engaged in the operation of GGNS-1 will become employees of EOI. The organizational structure of EOI will provide for clear management control and effective lines of authority and communication among the organizational units involved in the management, operation, and technical support of the facility.

As a result of the proposed amendment, there will be no physical changes to the facility, and all Limiting Conditions for Operation, Limiting Safety System Settings, and Safety Limits specified in the Technical Specifications will remain unchanged. With the exception of administrative changes to reflect the role of EOI, the quality assurance program, the emergency plan, security plan, and training program are unaffected. Operating agreements will ensure continued compliance with General Design Criterion 17 of Appendix A to 10 CFR Part 50 regarding Electric Power Systems and EOI control over all activities within the exclusion area. Therefore, the proposed changes will not increase the probability or consequences of an accident previously evaluated.

The design and design bases of GGNS-1 remain the same. Therefore, the current plant safety analyses remain complete and accurate in addressing the licensing basis events and analyzing plant response and consequences. The Limiting Conditions for Operation, Limiting Safety System Settings, and Safety Limits are not affected by the proposed amendment. With the exception of administrative changes to reflect the role of EOI, plant procedures are unaffected. As such, the plant conditions for which the design basis accident analyses have been performed are still valid. Therefore, the proposed amendment cannot create the possibility of a new or different kind of accident than previously evaluated.

Plant safety margins are established for and reflected in Limiting Conditions for Operation, Limiting Safety System Settings, and Safety Limits specified in the Technical Specifications. Since there will be no change to the physical design or operation of the plant, there will be no change to any of these or any other margins. The proposed amendment therefore will not involve a reduction in a margin of safety.

The staff has reviewed the licensee's evaluation and agrees with the conclusions. Therefore, based on the above, the staff proposes to determine that the proposed license amendment does not involve a significant hazards consideration.

Local Public Document Room location: Hinds Junior College, McLendon Library, Raymond, Mississippi 39154

Attorney for licensee: Nicholas S. Reynolds, Esquire, Bishop, Cook, Purcell, and Reynolds, 1200 17th Street, NW., Washington, DC 20036

NRC Project Director: Elinor G. Adensam

Toledo Edison Company and The Cleveland Electric Illuminating Company, Docket No. 50-346, Davis-Besse Nuclear Power Station, Unit No. 1, Ottawa County, Ohio

Date of amendment request: August 23, 1989

Description of amendment request: The amendment requests changing the Technical Specifications by deleting specification 4.0.2b which limits the combined surveillance intervals of three successive surveillance tests to 3.25 times the specified interval for individual surveillance tests. The limit of 25 percent extension for individual surveillance intervals would be retained.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards in 10 CFR 50.92(c) for determining whether a significant hazard exists. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has reviewed the proposed changes in accordance with the requirements of 10 CFR 50.92 and has determined that the request does not involve a significant hazard consideration.

The proposed changes do not involve a significant hazard because the operation of the Davis-Besse Nuclear Power Station, Unit Number 1, in accordance with these changes would:

1. Not involve a significant increase in the probability or consequences of an accident previously evaluated because surveillance intervals will still be limited by TS 4.0.2a. Additionally, the 3.25 surveillance interval extension criteria of TS 4.0.2b was not considered in the plant accident analysis.

2. Not create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed change does not add or modify any system design nor does it involve a change in operation of any plant system. The surveillance interval will continue to be constrained by the 25 percent interval extension criteria of TS 4.0.2a.

3. Not involve a significant reduction in a margin of safety because surveillance intervals will continue to be constrained by TS 4.0.2a which provides allowable tolerances for performing surveillance requirements beyond those specified in the normal surveillance interval.

The NRC staff has reviewed and agrees with the licensee's evaluation. Therefore, the NRC staff proposes to determine that the proposed amendment involves no significant hazard consideration.

Local Public Document Room location: University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio 43606.

Attorney for licensee: Gerald Charnoff, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: John N. Hannon

Union Electric Company, Docket No. 50-483, Callaway Plant, Unit 1, Callaway County, Missouri.

Date of amendment request: August 2, 1989.

Description of amendment request: The proposed amendment would revise Technical Specification Figures 5.1-1, 5.1-2, 5.1-3 and 5.1-4 (exclusion area, low population zone, site boundary for gaseous effluents, and site boundary for liquid effluents). The proposed figures have been clarified and updated to show the additional areas closed to public use by the Reform Wildlife Management Agreement dated April 10, 1989.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

The licensee has provided the following analysis of no significant hazards considerations using the Commission's standards.

The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated. This change does not affect any equipment important to safety. The proposed revision to the Technical Specification figures does not change the location of the Exclusion Area, Low Population Zone, or the site boundary for radioactive gaseous or liquid effluents as described in the Callaway Final Safety Analysis Report (FSAR) and Technical Specifications.

The proposed change does not create the possibility of a new or different kind of accident from any previously evaluated. There are no new failure modes or mechanism associated with the proposed change. This change does not involve any modification in operational limits or physical design of equipment important to safety.

The proposed change does not involve a significant reduction in a margin of safety. This change does not affect any Technical Specification margin of safety.

Based on the previous discussions, the licensee concluded that the proposed amendment request does not involve a significant increase in the probability or consequences of an accident previously evaluated; does not create the possibility of a new or different kind of accident from any accident previously evaluated; does not involve a reduction in the required margin of safety. The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. The staff, therefore, proposes to determine that the licensee's request does not involve a significant hazards consideration.

Local Public Document Room location: Callaway County Public Library, 710 Court Street, Fulton, Missouri 65251 and the John M. Olin Library, Washington University, Skinker and Lindell Boulevards, St. Louis, Missouri 63130.

Attorney for licensee: Gerald Charnoff, Esq., Shaw, Pittman, Potts & Trowbridge, 2300 N Street, NW., Washington, DC 20037

NRC Project Director: John N. Hannon

Virginia Electric and Power Company, Docket Nos. 50-338 and 50-339, North Anna Power Station, Units No. 1 and No. 2, Louisa County, Virginia

Date of amendment request: August 11, 1989

Description of amendment request: The proposed changes would amend the North Anna Power Station, Unit Nos. 1 and 2 (NA-1&2) Technical Specifications (TS) which govern the control rod insertion limits. The changes would allow greater operational flexibility with respect to control rod bank positioning in order to minimize localized Rod Control Cluster Assembly (RCCA) wear.

Based on control rod examinations (hot cell data), Westinghouse (W) has determined that the RCCA fretting wear may reach the W recommended maximum as early as 74,000 hours of critical operation time. Repositioning the RCCA banks is estimated to result in a gain of 37,000 additional hours of critical operation time. As both NA-1&2 have used the same fully withdrawn position for their entire operation to date, these units are approaching the recommended maximum W criteria. The licensee projects that this limit will occur at the end of cycle 8, which is late 1990 for NA-1 and late 1991 for NA-2. TS changes are therefore being requested to change the fully withdrawn position from 228 steps to a range varying from 225 to 229 steps. To minimize the wear and maximize the RCCA operating life, the NA-1&2 RCCA fully withdrawn positions would change routinely, with the fully withdrawn position being defined at the beginning of each operating cycle. The fully withdrawn position would be between 225 and 229 steps (inclusive). This change is similar to requests approved by the NRC for other operating facilities. The proposed changes would also add a definition of Fully Withdrawn to the TS, which allows positioning of the RCCAs between 225 and 229 steps withdrawn from the core. A modification to the TS on rod drop time is also proposed, which will require that measurements of actual drop times start from the maximum withdrawn position of 229 steps. TS Figure 3.1.1 for both NA-1&2 would also be modified to reflect the change in the fully withdrawn position. The actual insertion positions as a function of power will not change. The only changes from the current figures are the redefinition of the upper bound of the y-axis from 228 steps to "FULLY WITHDRAWN", and definition of the fraction of reacted thermal power for Bank C fully withdrawn positions between 225 and 229 steps, inclusive. Although the fully withdrawn position may change during the middle of the cycle in which the change is first implemented, the fully withdrawn position applicable to a given cycle would normally be defined prior to starting the nuclear design of that cycle, and would not change during the cycle. The fully withdrawn position to be used for a given cycle would be specified in the reload Safety Evaluation and the nuclear design report, and would be provided to the operators in the form of a cycle-specific rod insertion limit operator curve.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has evaluated the proposed changes in accordance with the criteria above and has made the following determination that the proposed changes do not involve a significant hazards consideration as defined in 10 CFR 50.92 because the changes would not:

1. Involve a significant increase in the probability or consequences of any accident previously evaluated. The extremely small impact on power distributions and core physics key analysis parameters resulting from the change in the fully withdrawn position can be accommodated within the existing [NA-1&2] core design limits. None of the parameter changes exceed the available margin to the key parameter safety analysis limits. The current control rod drop times and other tripped rod characteristics assumed in the safety analyses will not be changed as a result of the RCCA fully withdrawn position change. Therefore the current safety analyses will remain bounding.

2. Create the possibility of a new or different kind of accident than previously evaluated. The proposed change[s] [do] not involve any alterations to plant equipment or procedures which would introduce any new or unique operational modes or accident precursors.

3. Involve a significant reduction in the margin of safety. The parameter changes do not exceed the available margin to the key

parameter safety analysis limits. Thus, the current [Updated Final Safety Analysis Report] analyses remain bounding and there is no reduction in the margin of safety.

The staff has reviewed the licensee's no significant hazards consideration determination analysis and agrees with the above conclusion. Therefore, the staff proposes to determine that the proposed changes do not involve significant hazards considerations.

Local Public Document Room location: The Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

Attorney for licensee: Michael W. Maupin, Esq., Hunton and Williams, P.O. Box 1535, Richmond, Virginia 23212.

NRC Project Director: Herbert N. Berkow

Wolf Creek Nuclear Operating Corporation, Docket No. 50-482, Wolf Creek Generating Station, Coffey County, Kansas

Date of amendment request: July 25, 1989

Description of amendment request: The proposed technical specification change would revise Surveillance Requirement 4.9.6.1 to require the Refueling Machine to be demonstrated operable within 100 hours prior to the movement of fuel assemblies within the Reactor Vessel. The proposed change would also revise Surveillance Requirement 4.9.6.2 to require the Auxiliary Hoist to be demonstrated operable within 100 hours prior to the movement of drive rods within the Reactor Vessel. As Technical Specifications currently read, the Refueling Machine and the Auxiliary Hoist both must be proven operable 100 hours prior to lifting the Reactor Vessel Head.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The licensee has reviewed the proposed change and has determined the following:

Standard 1 - Involve a Significant Increase in the Probability or Consequences of an Accident Previously Evaluated.

This proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed change only involves whether the Refueling Machine has to be demonstrated operable prior to Reactor Vessel Head Lift, or prior to when it is required. The Refueling Machine and the Auxiliary Hoist do not perform any function until after the Head has been lifted and the Refueling Pool has been partially flooded.

Standard 2 - Create the Possibility of a New or Different Kind of Accident From Any Previously Evaluated.

This proposed change does not create the possibility of a new or different kind of accident previously evaluated. This change does not involve any setpoints or change when any equipment is operated. It only requires that the Surveillance Requirements for the Refueling Machine and the Auxiliary Hoist be performed prior to using the equipment.

Standard 3 - Involve a Significant Reduction in a Margin of Safety.

The proposed change does not involve a significant reduction in a margin of safety. This change only involves when a Surveillance Requirement is required, it makes no significant changes to any margin to safety.

Based on the previous discussion, the licensee concluded that the proposed amendment request does not involve a significant increase in the probability of a new or different kind of accident from any accident previously evaluated; nor involve a significant reduction in the required margin of safety. The NRC staff has reviewed the licensee's no significant hazards considerations determination and agrees with the licensee's analysis. The staff has, therefore, made a proposed determination that the licensee's request does not involve a significant hazards consideration.

PREVIOUSLY PUBLISHED NOTICES OF CONSIDERATION OF ISSUANCE OF AMENDMENTS TO OPERATING LICENSES AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The following notices were previously published as separate individual notices. The notice content was the same as above. They were published as individual notices either because time did not allow the Commission to wait for this biweekly notice or because the action involved exigent circumstances. They are repeated here because the biweekly notice lists all amendments issued or proposed to be issued involving no significant hazards consideration.

For details, see the individual notice in the **Federal Register** on the day and page cited. This notice does not extend the notice period of the original notice.

Duke Power Company, Docket Nos. 50-369 and 50-370, McGuire Nuclear Station, Units 1 and 2, Mecklenburg County, North Carolina

Date of amendment request: August 3, 1989

Brief description of amendment: The proposed amendments would revise the Technical Specifications (TS) to reduce from 75% to 50% the number of moveable incore detector thimbles in McGuire Unit 1 required to be available during the remainder of the present fuel cycle for the Moveable Incore Detection System to be deemed operable.

Date of publication of individual notice in **Federal Register**: August 21, 1989 (54 FR 34633)

Expiration date of individual notice: September 21, 1989

Local Public Document Room location: Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28223

Virginia Electric and Power Company, Docket Nos. 50-280 and 50-281, Surry Power Station, Unit Nos. 1 and 2, Surry County, Virginia

Date of amendment request: August 2, 1989

Description of amendment request: The proposed amendments would revise the Surry Units 1 and 2 Technical Specifications by allowing the removal of one service water suppy line from service at a time for a series of modifications which will upgrade the service water system.

Date of publication of individual notice in **Federal Register**: August 16, 1989 (54 FR 33788)

Expiration date of individual notice: September 15, 1989

Local Public Document Room location: Swem Library, College of William and Mary, Williamsburg, Virginia 23185.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE

During the period since publication of the last biweekly notice, the Commission has issued the following

amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with these actions was published in the **Federal Register** as indicated. No request for a hearing or petition for leave to intervene was filed following this notice.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendments, (2) the amendments, and (3) the Commission's related letters, Safety Evaluations and/or Environmental Assessments as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document rooms for the particular facilities involved. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects.

Carolina Power & Light Company, et al., Docket Nos. 50-325 and 50-324, Brunswick Steam Electric Plant, Units 1 and 2, Brunswick County, North Carolina

Date of application for amendments: May 1, 1989

Description of amendments: The amendments change Technical Specification Section 4.6.1.2, Containment Leakage, by deleting the requirement to use only the mass point method for Type A containment integrated leak rate testing. The amendments allow use of any containment leak rate determination method permitted by Appendix J.

Date of issuance: August 4, 1989

Effective date: August 4, 1989

Amendment Nos.: 136 and 166

Facility Operating License Nos. DPR-71 and DPR-62. Amendments revise the Technical Specifications.

Date of initial notice in **Federal Register**: June 14, 1989 (54 FR 25369). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated August 4, 1989.

No significant hazards consideration comments received: No.

Local Public Document Room location: University of North Carolina at Wilmington, William Madison Randall Library, 601 S. College Road, Wilmington, North Carolina 28403-3297.

Carolina Power & Light Company, et al., Docket Nos. 50-325 and 50-324, Brunswick Steam Electric Plant, Units 1 and 2, Brunswick County, North Carolina

Date of application for amendments: June 23, 1987, as supplemented May 19, 1989.

Description of amendments: The amendents change the Technical Specifications to delete the words "a storage capacity limited to" from Technical Specification 5.6.3.

Date of issuance: August 11, 1999

Effective date: August 11, 1989

Amendment Nos.: 137 and 167

Facility Operating License Nos. DPR-71 and DPR-62. Amendments revise the Technical Specifications.

Date of initial notice in **Federal Register**: June 28, 1989 (54 FR 27223). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated August 11, 1989.

No significant hazards consideration comments received: No.

Local Public Document Room location: University of North Carolina at Wilmington, William Madison Randall Library, 601 S. College Road, Wilmington, North Carolina 28403-3297.

Commonwealth Edison Company, Docket Nos. 50-454 and 50-455, Byron Station, Units 1 and 2, Ogle County, Illinois

Date of application for amendments: May 24, 1989, supplemented July 20, 1989 and August 1, 1989.

Brief description of amendments: These amendments modify Technical Specification 3.7.5 to utilize seismic qualification of the deep well pumps by allowing these pumps to be used in several instances instead of the essential service water make-up pumps to satisfy the design bases of the ultimate heat sink.

Date of issuance: August 15, 1989

Effective date: August 15, 1989

Amendment Nos.: 32, 32

Facility Operating License Nos. NPF-37 and NPF-66. The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: July 12, 1989 (54 FR 29402). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated August 15, 1989.

No significant hazards consideration comments received: No

Local Public Document Room location: Rockford Public Library, 215 N. Wyman Street, Rockford, Illinois 61101.

Commonwealth Edison Company, Docket Nos. 50-237 and 50-249, Dresden Nuclear Power Station, Units Nos. 2 and 3, Grundy County, Illinois

Date of application for amendments: December 21, 1988 and supplemented May 4, 1989.

Brief description of amendments: The amendments primarily revise the testing requirements for other systems or subsystems of the Emergency Core Cooling System (ECCS) or Standby Gas Treatment System (SGTS) when one system or subsystem is inoperable. In addition, operability requirements for several ECCS systems or subsystems were revised and some administrative changes were made.

Date of issuance: August 10, 1989

Effective date: August 10, 1989

Amendment Nos.: 107, 102

Provisional Operating License Nos. DPR-19 and DPR-25. The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: May 17, 1989 (54 FR 21300), June 14, 1989 (54 FR 25372). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated August 10, 1989.

No significant hazards consideration comments received: No

Local Public Document Room location: Morris Public Library, 604 Liberty Street, Morris, Illinois 60450.

Consumers Power Company, Docket No. 50-255, Palisades Plant, Van Buren County, Michigan

Date of application for amendment: September 23, 1988 supplemented by letter dated January 16, 1989

Brief description of amendment: This amendment revises the Technical Specification requirements relating to administrative controls. The proposed changes establish the Plant Manager as Chairman of the Plant Review Committee, eliminate the Plant

Engineering organization, and establish the Plant Safety and Licensing Department and the Nuclear Safety Services Department.

Date of issuance: August 16, 1989

Effective date: August 16, 1989

Amendment No.: 127

Provisional Operating License No. DPR-20. The amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** May 31, 1989 (54 FR 23311). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated August 16, 1989.

No significant hazards consideration comments received: No.

Local Public Document Room location: Van Zoeren Library, Hope College, Holland, Michigan 49423.

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of application for amendments: December 4, 1987, as supplemented December 7, 11, and 29, 1987, March 29, May 4 and 18, June 16, July 1, August 8 and 24, and December 15, 1988, and June 12 and 28, 1989.

Brief description of amendments: The amendments modified the Technical Specifications by adding requirements for the steam generator power operated relief valves.

Date of issuance: August 15, 1989

Effective date: August 15, 1989

Amendment Nos.: 68 and 62

Facility Operating License Nos. NPF-35 and NPF-52. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 12, 1989 (54 FR 29404). Because the June 28, 1989, submittal clarified and corrected certain aspects of the original request, the substance of the changes noticed in the **Federal Register** and the proposed no significant hazards consideration determination were not affected.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated August 15, 1989.

No significant hazards consideration comments received: No.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730

Houston Lighting & Power Company, City Public Service Board of San Antonio, Central Power and Light Company, City of Austin, Texas, Docket Nos. 50-498 and 50-499, South Texas Project, Units 1 and 2, Matagorda County, Texas

Date of amendment request: June 1, 1989

Brief description of amendment: The amendment revised Technical Specifications (TS) 3/4.1 and 3/4.2 of Appendix A by replacing the values of cycle-specific parameter limits with a reference to the Core Operating Limits Report (COLR), which contains the values of those limits. In addition, the COLR was included in the Definitions Section of the TS to note that it is the unit-specific document that provides these limits for the current operating reload cycle. Furthermore, the definition notes the values of those cycle-specific parameter limits are determined in accordance with Specification 6.9.1.6. The Specification requires the Core Operating Limits be determined for each reload cycle in accordance with the referenced NRC-approved methodology for these limits and consistent with applicable limits of the safety analysis. The Specification states that the report and any mid-cycle revisions will be provided to the NRC. Figure 3.1-3 was also deleted from the TS. Generic Letter 88-16, dated October 4, 1988, provided guidance to licensee on requests for removal of the values of cycle-specific parameter limits from TS. The licensee's amendment was in response to this Generic Letter.

Date of issuance: July 31, 1989

Effective date: July 31, 1989

Amendment Nos.: 9 and 1

Facility Operating License Nos. NPF-76 and NPF-80. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** June 28, 1989 (54 FR 27229). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated July 31, 1989.

No significant hazards consideration comments received: No.

Local Public Document Rooms Location: Wharton County Junior College, J. M. Hodges Learning Center, 911 Boling Highway, Wharton, Texas 77488 and Austin Public Library, 810 Guadalupe Street, Austin, Texas 78701

Illinois Power Company, Docket No. 50-461, Clinton Power Station, Unit 1, DeWitt County, Illinois

Date of application for amendment: February 5, 1988

Description of amendment request: The title of "Power Plant Manager" is changed to the more specific "Manager - Clinton Power Station."

Date of issuance: August 22, 1989

Effective date: August 22, 1989

Amendment No.: 26

Facility Operating License No. NPF-62. The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 13, 1988 (53 FR 26524). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated August 22, 1989.

No significant hazards consideration comments received: No

Local Public Document Room location: The Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727

Illinois Power Company, Docket No. 50-461, Clinton Power Station, Unit 1, DeWitt County, Illinois

Date of application for amendment: May 18, 1989

Description of amendment request: The change adds a note clarifying the channel configuration for the Main Steam Line Turbine Building Temperature - High trip channels.

Date of issuance: August 17, 1989

Effective date: August 17, 1989

Amendment No.: 25

Facility Operating License No. NPF-62. The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 18, 1988 (53 FR 50329). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated August 17, 1989.

No significant hazards consideration comments received: No

Local Public Document Room location: The Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727.

Iowa Electric Light and Power Company, Docket No. 50-331, Duane Arnold Energy, Center, Linn County, Iowa

Date of application for amendment: June 30, 1987

Brief description of amendment: This amendment revised Technical Specification 3.5.G.3 to clarify the Limiting Condition for Operation (LCO) which requires that certain emergency core cooling equipment be available when work is performed which has the potential for draining the reactor vessel. Additional restrictions (TS 3.5.G.4(d) and 3.5.G.5) would prohibit operations which have the potential for draining the reactor vessel when the suppression pool water supply is not adequate. Moreover, various administrative changes were made to the above Specifications and to the Bases.

Date of issuance: August 15, 1989

Effective date: August 15, 1989

Amendment No.: 162

Facility Operating License No. DPR-49. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** June 28, 1989 (54 FR 27230). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated August 15, 1989.

No significant hazards consideration comments received: No.

Local Public Document Room location: Cedar Rapids Public Library, 500 First Street, S. E., Cedar Rapids, Iowa 52401.

Pennsylvania Power and Light Company, Docket Nos. 50-387 and 50-388 Susquehanna Steam Electric Station, Units 1 and 2, Luzerne County, Pennsylvania

Date of application for amendments: April 14, 1989

Brief description of amendments: Technical Specification changes to support Emergency Service Water System modifications resulting from compliance with the requirements of 10 CFR Part 50, Appendix R.

Date of issuance: August 16, 1989

Effective date: Effective as of its date of issuance

Amendment Nos.: 92 and 56

Facility Operating License Nos. NPF-14 and NPF-22. These amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** May 17, 1989 (54 FR 21314). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated August 16, 1989.

No significant hazards consideration comments received: No

Local Public Document Room location: Osterhout Free Library, Reference Department, 71 South, Franklin Street, Wilkes-Barre, Pennsylvania 18701.

Public Service Company of Colorado, Docket No. 50-267, Fort St. Vrain Nuclear Generating Station, Platteville, Colorado

Date of amendment request: April 14, 1989

Brief description of amendment: The amendment revised the provisions in the Technical Specifications relating to radiological effluents. In particular, this amendment changed Environmental Limiting Condition of Operation (ELCO) 8.1.1, Environmental Surveillance Requirement (ESR) 8.1.1, and ESR 8.1.2.

Date of issuance: August 14, 1989

Effective date: August 14, 1989

Amendment No.: 71

Facility Operating License No. DPR-34. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** June 28, 1989 (54 FR 27239). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated August 14, 1989.

No significant hazards consideration comments received: No.

Local Public Document Room location: Greeley Public Library, City Complex Building, Greeley, Colorado

Public Service Electric & Gas Company, Docket No. 50-354, Hope Creek Generating Station, Salem County, New Jersey

Date of application for amendment: February 27, 1989 and supplemented on April 3, 1989.

Brief description of amendment: The amendment added clarification and consistency to the refueling specifications with respect to reference measurements, load setpoints and travel limits. An additional change conservatively raised the minimum allowable source range monitor (SRM) count rate in Sections 4.9.2 and 4.3.7.6 of the Technical Specifications to agree with SRM requirements imposed elsewhere in the Specifications. The supplemental information added an additional SRM change that did not alter the technical content of the original change request.

Date of issuance: August 21, 1989

Effective date: August 21, 1989, but implementable within sixty days to allow for any germane procedural revisions.

Amendment No.: 31

Facility Operating License No. NPF-57. This amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 12, 1989 (54 FR 29410). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated August 21, 1989.

No significant hazards consideration comments received: Yes. The comments received from the Bureau of Nuclear Engineering of the State of New Jersey were addressed in the Safety Evaluation issued with the amendment.

Local Public Document Room location: Pennsville Public Library, 190 S. Broadway, Pennsville, New Jersey 08070

Public Service Electric & Gas Company, Docket Nos. 50-272 and 50-311, Salem Generating Station, Unit Nos. 1 and 2, Salem County, New Jersey

Date of application for amendments: December 27, 1988

Brief description of amendments: Replaced Environmental Technical Specifications with an Environmental Protection Plan.

Date of issuance: August 21, 1989

Effective date: As of the date of issuance and shall be implemented within 45 days of the date of issuance.

Amendment Nos.: 100 and 77

Facility Operating License Nos. DPR-70 and DPR-75. These amendments replaced the Environmental Technical Specifications with an Environmental Protection Plan.

Date of initial notice in **Federal Register:** May 3, 1989 (54 FR 18957). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated August 21, 1989.

No significant hazards consideration comments received: No

Local Public Document Room location: Salem Free Public Library, 112 West Broadway, Salem, New Jersey 08079

Tennessee Valley Authority, Docket No. 50-260, Browns Ferry Nuclear Plant, Unit 2, Limestone County, Alabama

Date of application for amendment: February 17, and June 20, 1989 (TS 266)

Brief description of amendment: The amendments correct errors in the Browns Ferry Nuclear Plant (BFN), Unit 2, Technical Specifications (TS) as follows: (1) Table 3.2.F (Page 3.2/4.2-32), Instrument Number (RR-90-322A) - change the instrument number to read "RM-90-306 and RR-90-360," correct typographical error in the Type Indication and Range column (correct units from curies per cubic centimeter to microcuries per cubic centimeter), delete the Iodine and Patriculate indications and range, (2) Notes to Table 3.2.F (Pages 3.2/4.2-33) - correct typographical errors in footnote 7 (change TS 6.7.2 to 6.9.1.4 and 6.7.2 and 6.9.2) and add footnote 9 (clarifies the function of subject instrument to noble gas only); (3) Table 4.2.F, Item 23 (Page 3.2/4.2-55) - correct instrument number and type to read "Wide Range Gaseous Effluent Radiation Monitor and Recorder (RM-90-306 and RR-90-360);" (4) Page 6.0-29, Item 6.9.2.10 - correct the word "high-range" to "wide-range."

Date of issuance: August 22, 1989

Effective date: August 22, 1989, and shall be implemented within 60 days

Amendment No.: 171

Facility Operating License No. DPR-52: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 12, 1989 (54 FR 29412). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated August 22, 1989.

No significant hazards consideration comments received: No.

Local Public Document Room location: Athens Public Library, South Street, Athens, Alabama 35611.

Tennessee Valley Authority, Docket Nos. 50-327 and 50-328, Sequoyah Nuclear Plant, Units 1 and 2, Hamilton County, Tennessee

Date of application for amendments: December 2, 1988 (TS 88-14)

Brief description of amendments: The amendments modify the Sequoyah Nuclear Plant, Units 1 and 2, Technical Specifications. The changes revise Table 3.3-12, "Radioactive Liquid Effluent Monitoring Instrumentation," to require a minimum of one liquid effluent radiation monitor channel to be operable for each header for the effluent from the essential raw cooling water system.

Date of issuance: August 14, 1989

Effective date: August 14, 1989

Amendment Nos.: 125, 114

Facility Operating License Nos. DPR-77 and DPR-79. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 30, 1988 (53 FR 53098). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated August 14, 1989.

No significant hazards consideration comments received: No

Local Public Document Room location: Chattanooga-Hamilton County Library, 1001 Broad Street, Chattanooga, Tennessee 37402.

Toledo Edison Company and The Cleveland Electric Illuminating Company, Docket No. 50-346, Davis-Besse Nuclear Power Station, Unit No. 1, Ottawa County, Ohio

Date of application for amendment: May 26, 1989, revised July 10, 1989

Brief description of amendment: The amendment revises the restrictions on intervals between functional testing of snubbers by deleting the applicability of Specification 4.0.2b to this surveillance requirement for the present cycle of operation only. Specification 4.0.2b would limit the total maximum combined interval for any three consecutive tests to 3.25 times the 18-month individual intervals, or approximately 60 months.

Date of issuance: August 15, 1989

Effective date: August 15, 1989

Amendment No.: 136

Facility Operating License No. NPF-3. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** June 28, 1989 (54 FR 27242). At the NRC staff's request, the licensee made a submittal dated July 10, 1989, that would limit the proposed change to the present surveillance interval. Since this reduced the scope and safety significance of this request, the no significant hazards determination published in the original notice in the **Federal Register** was not affected.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated August 15, 1989.

No significant hazards consideration comments received: No

Local Public Document Room location: University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio 43606.

Wisconsin Electric Power Company, Docket Nos. 50-266 and 50-301, Point Beach Nuclear Plant, Unit Nos. 1 and 2, Town of Two Creeks, Manitowoc County, Wisconsin

Date of application for amendments: April 26, 1989

Brief description of amendments: The amendments clarified the reporting requirements for operation of the Overpressure Mitigating System (OMS) and deleted two schedular commitments which have been implemented.

Date of issuance: August 24, 1989

Effective date: August 24, 1989

Amendment Nos.: 124, 127

Facility Operating License Nos. DPR-24 and DPR-27. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 12, 1989 (54 FR 29415). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated August 24, 1989.

No significant hazards consideration comments received: No.

Local Public Document Room location: Joseph P. Mann Library, 1516 Sixteenth Street, Two Rivers, Wisconsin.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND FINAL DETERMINATION OF NO SIGNIFICANT HAZARDS CONSIDERATION AND OPPORTUNITY FOR HEARING (EXIGENT OR EMERGENCY CIRCUMSTANCES)

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Because of exigent or emergency circumstances associated with the date the amendment was needed, there was not time for the Commission to publish, for public comment before issuance, its usual 30-day Notice of Consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for a Hearing. For exigent circumstances, the Commission has either issued a **Federal Register** notice providing opportunity for public comment or has used local media to provide notice to the public in the area surrounding a licensee's facility of the licensee's application and of the Commission's proposed determination of no significant hazards consideration. The Commission has provided a reasonable opportunity for the public to comment, using its best efforts to make available to the public means of communication for the public to respond quickly, and in the case of telephone comments, the comments have been recorded or transcribed as appropriate and the licensee has been informed of the public comments.

In circumstances where failure to act in a timely way would have resulted, for example, in derating or shutdown of a nuclear power plant or in prevention of either resumption of operation or of increase in power output up to the plant's licensed power level, the Commission may not have had an opportunity to provide for public comment on its no significant hazards determination. In such case, the license amendment has been issued without opportunity for comment. If there has been some time for public comment but less than 30 days, the Commission may provide an opportunity for public comment. If comments have been requested, it is so stated. In either event, the State has been consulted by telephone whenever possible.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the documents related to this action. Accordingly, the amendments have been issued and made effective as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the application for amendment, (2) the amendment to Facility Operating License, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment, as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects.

The Commission is also offering an opportunity for a hearing with respect to the issuance of the amendments. By October 6, 1989, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

Since the Commission has made a final determination that the amendment involves no significant hazards consideration, if a hearing is requested, it will not stay the effectiveness of the amendment. Any hearing held would take place while the amendment is in effect.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to (*Project Director*): petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

Tennessee Valley Authority, Docket Nos. 50-327 and 50-328, Sequoyah Nuclear Plant, Units 1 and 2, Hamilton County, Tennessee

Date of application for amendments: August 2, 1989 (TS 89-38)

Brief description of amendments: These amendments temporarily revise Surveillance Requirement (SR) 4.4.11.a of Section 3/4.4.11, Reactor Coolant System Vents, of the Sequoyah Nuclear Plant, Units 1 and 2, Technical Specification (TS). The changes add a footnote to the requirement for both units that the manual isolation valves for the reactor vessel head vent system must be locked open. The footnote states that "the requirement to verify that the upstream manual isolation valves are locked in the open position is waived until the Cycle 4 refueling outage. This waiver is granted on a one-time basis. At the first Mode 5 outage following the issuance of the above waiver, a flow verification test will be performed to verify that the manual isolation valves are open." The changes apply for both Units 1 and 2 until the next refueling outage, which is the Cycle 4 refueling outage for both units. The Cycle 4 refueling outages are scheduled for Spring of 1990 for Unit 1 and Fall of 1990 for Unit 2.

The Commission (1) granted a Waiver of Compliance to the Tennessee Valley Authority (TVA) at 4:00 p.m. on July 31, 1989 to return power to the reactor vessel head vent system for both units until the staff could act on this application and (2) determined pursuant to 10 CFR 50.91 that these amendments should be implemented as soon as possible. The amendments permit the licensee to continue operating the units until the Cycle 4 refueling outage. The changes have no adverse effect on safety and would be beneficial to overall plant safety because the units would not be forced into an unnecessary shutdown. Because the manual isolation valves are not locked, the reactor vessel head vent system is considered inoperable and the TS require that power be removed from the system. The Waiver of Compliance, to return power to the reactor vessel head vent system, was temporary until this application for amendments was acted on but for not later than August 27, 1989. Consequently, the NRC staff determined that exigent circumstances existed which justify reducing the public notice period normally provided for licensing amendments. A Public Notice that the NRC staff proposed to amend the TS was published in the *Chattanooga New-Free Press* and the *Chattanooga Times* on Tuesday, April 8, 1989. The Public Notice stated that the NRC staff proposed to issue these amendments at the close of business on August 10, 1989. No comments on the Amendments and no requests for a hearing were received by the staff by the close of business on August 10, 1989.

Date of issuance: August 11, 1989

Effective date: August 11, 1989

Amendment Nos.: 123, 112

Facility Operating Licenses Nos. DPR-77 and DPR-79. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: No notice was published. The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated August 11, 1989.

No significant hazards consideration comments received: No

Local Public Document Room location: Chattanooga-Hamilton County Library, 1001 Broad Street, Chattanooga, Tennessee 37402.

Tennessee Valley Authority, Docket Nos. 50-327 and 50-328, Sequoyah Nuclear Plant, Units 1 and 2, Hamilton County, Tennessee

Date of application for amendments: August 7, 1989, as revised August 10, 1989 (TS 89-37)

Brief description of amendments: These amendments temporarily add two additional Action Statements for the Limiting Condition for Operation (LCO) 3.5.1.1, Cold Leg Injection Accumulators, of the Sequoyah Nuclear Plant, Units 1 and 2, Technical Specification (TS). The Action statements for an LCO state the actions to be taken by the licensee if the unit does not meet the LCO. These two additional Action statements state that (1) with one water level or pressure channel inoperable per accumulator, return the inoperable channel to operable status within 30 days or be in at least hot standby within the next six hours and in hot shutdown within the following six hours and (2) with more than one channel, water level or pressure, inoperable per accumulator, immediately declare the affected accumulator(s) inoperable and enter Action statement "a" to return the inoperable channels to operable status in one hour or shut down the unit. The Action statements for LCO 3.5.1.1 previous to these amendments did not specifically address the inoperability of instrumentation channels for the accumulators. These changes are temporary because they are only effective for each unit from the date of issuance of these amendments until the restart of Unit 2 from the Unit 2 Cycle 4 refueling outage.

These amendments were issued under the emergency provisions of 10 CFR 50.91 without the normal 30-day public comment period after the Notice of Consideration of Issuance of an amendment is issued in the **Federal Register**. As explained in the application dated August 7, 1989, one water level channel on an accumulator for each unit is inoperable and the TS did not specifically address inoperable instrumentation channels for the accumulators. The Action statement for an inoperable accumulator is to repair the cause of the inoperability within one hour or proceed to shut down the affected units. The licensee concluded that the inoperable water level channel did not warrant shutting down the two units because the accumulators were still meeting the LCO using the remaining operable instrumentation channels. The licensee requested emergency relief from the TS to prevent shutting down the two units.

As discussed in the Safety Evaluation issued with these amendments, the Commission (1) granted the licensee a Waiver of Compliance at 1:30 p.m. on August 7, 1989 for Sequoyah to not have to comply with Surveillance Requirement 4.5.1.1.2 until the staff could act on this application but no later than September 6, 1989 and (2) determined pursuant to 10 CFR 50.91 that emergency conditions existed and these amendments should be implemented as soon as possible to prevent shutdown of Units 1 and 2. We conclude that the licensee acted in good faith to promptly address the inoperability of the level channel for each unit but could not avoid the need for an emergency TS change.

Date of issuance: August 11, 1989

Effective date: August 11, 1989

Amendment Nos.: 124, 113

Facility Operating Licenses Nos. DPR-77 and DPR-79. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: No notice was published. The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated August 13, 1989.

No significant hazards consideration comments received: No

Local Public Document Room location: Chattanooga-Hamilton County Library, 1001 Broad Street, Chattanooga, Tennessee 37402.

Washington Public Power Supply System, et al., Docket No. 50-397, Nuclear Project, No. 2, Benton County, Washington

Date of application for amendment: August 13, 1989, as supplemented August 14, 1989.

Brief description of amendment: This amendment revised Technical Specification Table 3.8.4.2-1, "Primary Containment Penetration Conductor Protective Devices," by changing the backup protection device for the 480VAC fused disconnects from a 125 ampere circuit breaker to a fused disconnect.

Date of issuance: August 16, 1989

Effective date: This license amendment is effective as of the date of issuance.

Amendment No.: 72

Facility Operating License No. NPF-21: Amendment revised the Technical Specifications.

Public Comment requested as to proposed no significant hazards consideration: No. The Commission's related evaluation of the amendment, finding of emergency circumstances, consultation with the State of Washington, and final determination of no significant hazards consideration are contained in a Safety Evaluation dated August 16, 1989.

Attorneys for licensee: Nicholas S. Reynolds, Esq., Bishop, Cook, Purcell Reynolds, 1400 L Street, NW., Washington, DC 20005-3502 and G. E. Doupe, Esq., Washington Public Power Supply System, P.O. Box 968, 3000 George Washington Way, Richland, Washington 99352.

Materials Licensee Financial Assurance Guidance Related to Decommissioning: Availability

The Nuclear Regulatory Commission has published NUREG–1336, Rev. 1 entitled, "Standard Format and Content Guide for Financial Assurance Mechanisms Required for Decommissioning Under 10 CFR parts 30, 40, 70 and 72" and NUREG–1337, Rev. 1 entitled, "Standard Review Plan for the Review of Financial Assurance Mechanisms for Decommissioning Under 10 CFR parts 30, 40, 70 and 72."

NUREG–1336, Rev. 1, discusses the information to be provided in a materials license application and establishes a uniform format for presenting the information required to meet the decommissioning licensing requirements. NUREG–1337, Rev. 1, is prepared for the guidance of Nuclear Regulatory Commission staff reviewers in performing reviews of applications from materials licensees. The document identifies who performs the review, the matters that are reviewed, the basis for the review, how the review is performed, and the conclusions that are sought.

Copies of NUREG–1336, Rev. 1 and NUREG–1337, Rev. 1, may be purchased from the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 37082, Washington, DC 20013–7082. Copies are also available from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA. 22161. A copy is also available for inspection and/or copying for a fee in the NRC Public Document Room, 2120 L Street NW., Washington, DC.

Dated at Washington, DC, this 29th day of August, 1989.

For the Nuclear Regulatory Commission.

BILLING CODE 7590-01-M

[Docket Nos. 50–445 and 50–446]

Texas Utilities Electric Co., et al.[1] Issuance of Amendment to Construction Permits

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 11 to Construction Permit CPPR–126 and Amendment No. 10 to Construction Permit CPPR–127 for the Comanche Peak Steam Electric Station (CPSES), Units 1 and 2, respectively, to show a change in ownership interest.

By letter dated May 4, 1989, Texas Utilities Electric Company (TU Electric) requested amendment of Construction Permit Nos. CPPR–126 and CPPR–127 for the CPSES, Units 1 and 2, to reflect the transfer of a 2⅛% interest in CPSES ownership from Tex-La Electric Cooperative of Texas, Inc. to TU Electric. These amendments will become effective as of the date of completion of the transfer of the ownership interest.

The issuance of these amendments to Construction Permit Nos. CPPR–126 and CPPR–127 complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the regulations in 10 CFR chapter I, which are set forth in Amendments No. 11 and No. 10. Prior public notice of Amendments No. 11 and No. 10 was not required since the amendments do not involve a significant hazards consideration.

The staff has prepared an Environmental Assessment and Finding of No Significant Impact which was published in the **Federal Register** on August 29, 1989 (54 FR 35737). The staff has concluded that this action will not have a significant impact on the quality on the human environment.

For further details with respect to this action, see (1) the application for amendment dated May 4, 1989, (2) Amendments No. 11 and No. 10 to Construction Permit Nos. CPPR–126 and CPPR–127, respectively, and (3) the Commission's related safety evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555, and the local public document room at Somervell County Library on the Square, P.O. Box 1417, Glen Rose, Texas 76043.

In addition, copies of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Comanche Peak Project Division, Office of Nuclear Reactor Regulation.

Dated at Rockville, Maryland, this 29th day of August, 1989.

For the Nuclear Regulatory Commission.

Christopher I. Grimes,

Director, Comanche Peak Project Division, Office of Nuclear Reactor Regulation.

PEACE CORPS

Information Collection Request Under OMB Review

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) this notice announces that the information collection request abstracted below has been forwarded to the Office of Management and Budget for review and is available for public review and comment. A copy of the information collection may be obtained from Ms. Charlotte Storti, Office of Medical Services, Peace Corps, 1990 K

---

[1] The current construction permit holders for the Comanche Peak Steam Electric Station are: Texas Utilities Electric Company (TU Electric) and Texas Municipal Power Agency (TMPA). Transfer of ownership from TMPA to TU Electric was previously authorized by Amendments No. 9 and No. 6 to Construction Permits CPPR–126 and CPPR–127, respectively, on August 25, 1988 to take place in 10 installments as set forth in the agreement attached to the application for amendment dated March 4, 1988. At the completion thereof, TMPA is no longer an applicant or construction permit holder.

Street, NW., Washington, DC 20526. Ms. Storti may be called at 202–254–6914. Comments on this form should be addressed to Mr. Donald Arbuckle, Desk Officer, Office of Management and Budget, Washington, DC, 20503.

Information Collection Abstract:

(1) *Title:* Medical Exam Reimbursement Forms.

(2) *Need for and Use of the Information:* Peace Corps needs this information in order to reimburse Volunteer applicants for the cost of medical and dental examinations required prior to their entry into service.

(3) *Respondents:* Individuals who apply and are nominated for Peace Corps Volunteer service.

(4) *Burden on the public:*

a. Annual reporting burden: 342 hours.

b. Annual recordkeeping burden: 0 hours.

c. Estimated average burden hours per response: 5 minutes.

d. Frequency of response: on occasion.

e. Estimated number of likely respondents: 4,100.

This notice is issued in Washington, DC, on August 30, 1989.

Margaret H. Thome,

Associate Director for Management.

SECURITIES AND EXCHANGE COMMISSION

Forms Under Review by Office of Management and Budget

Agency Clearance Officer: Kenneth A. Fogash, (202) 272–2142

Upon Written Request, Copy Available From: Securities and Exchange Commission, Public Reference Branch, 450 Fifth Street, NW., Washington, DC 20549–1002.

Extension: File No. 270–303—Rule 6c–9 and Form N–6C9.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission has submitted for extension of OMB approval Rule 6c–9 and Form N–6C9 under the Investment Company Act of 1940 (the "Act"). The rule permits a foreign bank or the bank's finance subsidiary to sell its debt securities or non-voting preferred stock in the United States without registering as an investment company under the Act. Each of the estimated fifty respondents annually incurs an average estimated one burden hour to comply with this requirement.

The estimated average burden hours are made solely for the purposes of the Paperwork Reduction Act, and are not derived from a comprehensive or even representative survey or study of the cost of SEC rules and forms.

Direct general comments to Gary Waxman at the address below. Direct any comments concerning the accuracy of the estimated average burden hours for compliance with SEC rules and forms to Kenneth A. Fogash, Deputy Executive Director, 450 Fifth Street, NW., Washington, DC 20549–6004, and Gary Waxman, Clearance Officer, Office of Management and Budget, Paperwork Reduction Project (3235–0344), Room 3208 New Executive Office Building, Washington, DC 20543.

Dated: August 29, 1989.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34–27189; File Nos. SR–CBOE–89–16; SR–PSE–87–21, Amendment No. 5; SR–Phlx–89–46]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Pacific Stock Exchange, Inc.; Philadelphia Stock Exchange, Inc.; Notice and Order Granting Accelerated Approval to Proposed Rule Changes Relating to Extension of the Market Index Option Escrow Receipt Pilot Program

On July 21, 1989, the Chicago Board Options Exchange, Inc. ("CBOE"), and the Pacific Stock Exchange, Inc. ("PSE") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] proposed rule changes to extend the market index option escrow receipt ("MIOER") pilot program until January 1, 1990.[3]

In August 1985, the Commission approved a one-year pilot program to permit the use of cash, cash equivalents, one or more qualified securities, or a combination of the foregoing, as collateral for escrow receipts issued to cover short call positions in broad-based stock index options.[4] The proposed rule changes are designed to extend the pilot program until such time as the exchanges and the Options Clearing Corporation ("OCC") resolve certain matters concerning the format of the receipt and administration of the program. The proposed rule changes also are designed to provide the CBOE the opportunity to update its report concerning the effectiveness of the MIOER program [5] and provide the Commission the opportunity to review the updated information.

The Commission finds good cause both for approving the proposed rule changes and approving them prior to the thirtieth day after the date of publication of the proposal in the **Federal Register** for several reasons. First, an extension of the pilot, retroactive from April 30, 1989 through January 1, 1990, will allow for the uninterrupted continuation of a program designed to reduce operational difficulties of banks and trust companies while the options exchanges and the OCC continue their review of the receipt format. Second, the extension will allow the Commission to continue its evaluation of the program's effectiveness. Third, the pilot was previously approved by the Commission and no adverse comments have been received regarding its operation.

It is therefore ordered, pursuant to section 19(b)(2) of the Act [6] that the proposals to extend the operation of the pilot, retroactive from April 30, 1989 through January 1, 1990 (SR–CBOE–89–16; SR–PSE–87–21, Amendment No. 5; and SR–Phlx–89–46) be, and hereby are, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[7]

Dated: August 28, 1989.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34–27190; File SR–MCC–89–10]

Self-Regulatory Organizations; Proposed Rule Change by Midwest Clearing Corp. Relating to Technical Changes to MCC's Fund/Serv Service

Pursuant to section 19(b)(1) of the Securities and Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given

---

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] 17 CFR 240.19b–4 (1988).

[3] On August 7, 1989, the Philadelphia Stock Exchange, Inc. ("Phlx") submitted a substantially identical proposal for the extension of the MIOER pilot. *See* File No. SR–Phlx–89–46. Hereinafter, the terms "self-regulatory organizations" and "exchanges" refer to the CBOE, PSE, and Phlx.

[4] *See* Securities Exchange Act Release No. 22323 (August 13, 1985), 50 FR 33430 for a description of the pilot.

[5] *See* Chicago Board Options Exchange, Inc., *Market Index Option Escrow Receipt Pilot Report* (February 6, 1987).

[6] 15 U.S.C. 78s(b)(2) (1982).

[7] 17 CFR 200.30–3(a)(12) (1988).

that on August 17, 1989 the Midwest Clearing Corporation filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed change would make the technical changes described below to the Midwest Clearing Corporation's ("MCC") Fund/Serv Service.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to make certain technical changes to MCC's Fund/Serv rules to more accurately reflect the way that exchanges are handled and have been handled. Exchanges allow a mutual fund owner the ability to switch from one fund to a different mutual fund investment within the same family of funds without incurring additional charges and without having to exchange money.

Commencing August 25, 1989, MCC will no longer accept for processing through Fund/Serv exchanges where the mutual shares are held in physical form. Due to the short settlement period, there is not sufficient time to perform the operational arrangements necessary to complete the work involved in the cancellation of physical shares involved in an exchange. These transactions have not been able to be processed since initiation of Fund/Serv since the mutual funds themselves do not accept physical shares in these circumstances. Accordingly, this filing is correcting the language to the present Fund/Serv rule to conform to existing practice.

The proposed rule change is consistent with section 17A of the Securities Exchange Act of 1934 (the "Act") in that it promotes the prompt and accurate clearance and settlement of mutual fund transactions.

(B) Self-Regulatory Organization's Statement on Burden on Competition

MCC does not believe that the proposed rule change will have an impact on or impose a burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

MCC has not solicited or received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action.

The foregoing rule change has become effective pursuant to section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written date, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities & Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-referenced self-regulatory organization. All submissions should refer to file number SR–MCC–89–10 and should be submitted by September 27, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: August 28, 1989.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 89–20893 Filed 9–5–89; 8:45 am]

BILLING CODE 8010-01-M

[34–27193; File No. SR–PTC–89–02]

Self-Regulatory Organizations; The Participants Trust Co.; Order Approving a Proposed Rule Change Eliminating the Right of a Receiving Participant, Acting as an Agent, To Reverse a Transfer if It Determines in Good Faith That Its Principal May Be Unable To Fulfill Its Reciprocal Obligations

August 29, 1989.

On July 11, 1989, the Participants Trust Company ("PTC") filed a proposed rule change (SR–PTC–89–2) pursuant to section 19(b) of the Securities Exchange Act of 1934 ("Act").[1] Notice of the proposed rule change appeared in the **Federal Register** of July 26, 1989.[2] No comments were received. As discussed below, the Securities and Exchange Commission ("Commission") is approving the proposed rule change.

I. Description of the Proposal

The proposed rule filing amends Article II, Rule 13, section 6 of PTC's rules by deleting the provision that allows a receiving participant,[3] acting in an agency capacity, to reverse a transfer.[4] Currently, a PTC participant may reverse a transaction to either its agency account or pledgee account, if it determines, in good faith, that its principal may be unable to fulfill all of its obligations to the participant. In order to reverse a transaction, a participant must notify PTC of its intention to reverse a delivery before 3:30 p.m. (New York Time [NYT]) on the day settlement would have occurred (forty-five minutes before final payment is due, at 4:15 p.m. [NYT]).[5] The participant will be held liable for the account transfer if it fails to give notice within the time frame specified by PTC.

---

[1] 15 U.S.C. 78s(b)(1) (1981).

[2] Securities Exchange Act Release No. 27046 (July 10, 1989), 54 FR 31,134 (July 26, 1989).

[3] PTC's rules define a "Receiving Participant or Limited Purpose Participant" as the "intended recipient of an Account Transfer * * *." PTC Rules, Art. I, Rule 1.

[4] The term "transfer" within the context of the proposed amendment refers to an "Account Transfer," which is defined by PTC's rules as a "a requested book-entry transfer from one account on the books of * * * [PTC] to another Account * * *." *Id.*

Pursuant to PTC's current rules a transfer reversal must comply with the account transfer rules. According to these rules the reversal must be fully collateralized by the remaining equity in the corresponding transfer account.[6] PTC measures the level of collateralization at the time the receiving participant issues the reversal instructions. PTC will not process a reversal if a pledge or liquidation of the equity remaining in the transfer account would be insufficient to cover a potential participant's default on its net debit balance.

II. PTC's Rationale for the Proposed Rule Change

According to PTC, the proposed rule change will enhance the finality of the PTC settlement system. Settlement finality has been a constant concern of the industry, the Commission and the Board of Governors of the Federal Reserve System ("FRS"). PTC believes that the proposed rule change will eliminate the uncertainty, delay and confusion prompted by reversals, thus improving the finality of its settlement system and placating the regulatory and industry concerns over the lack of settlement finality.

In this regard, PTC also believes that the proposal complies with section 17A(b)(3)(F) of the Act,[7] because it provides for the prompt and accurate settlement of securities transactions at PTC.

III. Discussion

Sections 17A(b)(3) (A) and (F) of the Act require that a clearing agency have the capacity and the rules necessary to promote the prompt and accurate clearance and settlement of securities transactions for which it is responsible.[8] The Commission believes that PTC's proposal is consistent with these objectives. The proposal is one of several rule changes PTC undertook to implement when it applied for registration as a clearing agency [9] and membership in the FRS.[10] PTC's current rule limits transfer reversals to transactions involving participants acting in an agency capacity. This rule operates to allocate losses among financial intermediaries acting on behalf of one customer in the event of that customer's default.

Transfer reversals, however, affect the net position of a receiving participant who has incurred obligations with other participants in reliance on the temporary cash credit resulting from the transaction subsequently cancelled by the agent. This situation potentially could cause succeeding failures, if the reversal results in further defaults and reversals.[11] Moreover, since a participant can reverse a delivery at the end of the day (*i.e.*, forty-five minutes before final payment is due), the potential for a liquidity crisis can be particularly acute.

The Commission believes that the additional protection offered by settlement finality, as set forth in PTC's proposal, will enhance PTC's capacity to safeguard securities and funds while promoting the prompt and accurate settlement of securities as required by section 17A(b)(3)(A) of the Act.[12] Eliminating delivery reversals will require participants acting in an agency capacity to exercise greater control over their customer accounts. In particular, if a customer fails to deposit sufficient funds with a participant who can not reverse a delivery, the participant, acting in an agency capacity, will have greater incentive to obtain the necessary funds from their customers in time to meet its settlement obligations.

IV. Conclusion

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed filing (SR–PTC–89–02) be, and is hereby, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34–27170; File No. SR–Phlx–89–05]

Self-Regulatory Organization; Order Approving Proposed Rule Changes by Philadelphia Stock Exchange Relating to the Automated Submission of Customer and Proprietary Trading Data by Member Firms

I. Introduction

The Philadelphia Stock Exchange ("Phlx" or "Exchange") has submitted for Commission consideration, pursuant to Section 19(b) of the Securities Exchange Act of 1934 ("Act"),[1] proposed rule changes that would require member firms to submit certain customer and proprietary trading information in an automated format.[2] The information to be submitted is what the Exchange routinely requests in connection with its market surveillance inquiries (so-called "blue sheet information").

Under the proposal, where the Phlx requests information on proprietary transactions by a member or member firm, the member firm must submit specified information to the Exchange in the designated automated format.[3] Where an information request to a member firm from the Phlx involves transactions executed for a customer's account, the proposed rules require submission, in the automated format, of the information required for proprietary trades plus additional data identifying the customer.[4] The proposed rules also

[12] 15 U.S.C. 78q-1(b)(3)(A). As explained in PTC's Temporary Registration Order, the Commission believes that PTC has sufficient capabilities to safeguard funds and securities in a manner consistent with the Act, without having to rely on reversals. These safeguarding capabilities include: Membership applicant standards and continuing financial qualifications for participants, a participants funds, full collateralization of delivery obligations, net debit caps, specific procedures to manage participant defaults and insolvencies, including committed lines of credit to allow PTC to meet its immediate settlement obligations if a participant defaults and rules allocating losses in the event any occur. *See* Securities Exchange Release No. 28671, *supra* note 9, at 13,270.

[1] 15 U.S.C. 78s(b).

[2] The Phlx proposal was noticed in Securities Exchange Act Release No. 26536 (February 15, 1989), 54 FR 7117 (February 16, 1989). No comments were received on the proposal.

[3] The proposed rule specify that member organizations will submit in an automated format the following information for proprietary trades: Clearing house member for the organization submitting the data, and the member or member firm on the opposite side of the trade; symbol identifying the security; date of transaction; number of shares in each transaction and description of the type of transaction (*e.g.*: Purchase, sale, short sale); transaction price; account number; and the market center where the transaction was executed.

[4] The proposed rules provide that the additional information required for these non-proprietary

Continued

provide that the Exchange may require that additional types of information be submitted in an automated format,[5] and permit the Exchange to grant exceptions to member firms from the requirement that requested blue sheet information be submitted in an automated format.

In its filing, the Phlx states that a universal automated format for the transmission of member firms' proprietary and customer transaction data has been developed by the Intermarket Surveillance Group and the Securities Industry Association, working in conjunction with the self-regulatory organizations. The Exchange believes that its adoption of this automated blue sheet format will significantly enhance its regulatory and surveillance capabilities by enabling its surveillance staff to review and analyze blue sheet information more rapidly and more effectively. Receiving the data in a compatible automated format will permit the Exchange to enter the data directly into its computer systems for analysis. In addition, the Exchange believes that the new automated format will enable member firms complying with the proposed rule to respond to such information requests with greater speed and efficiency since complying firms will no longer have to manually assemble the requested blue sheet information.

The Commission has closely reviewed the provisions of the proposed Phlx rules, and believes that they are consistent with the requirements of the Act, particularly sections 6(b)(1) and 6(b)(5). The adoption of the universal automated format for blue sheet information under the proposed rules will significantly improve the ability of the Phlx's regulatory and surveillance staffs to conduct their market surveillance and monitoring responsibilities under sections 6(b)(1) and 6(b)(5) and other provisions of the Act. The Commission also believes that adoption of the automated format will make it easier for member firms complying with the proposed rules to gather and submit information in response to requests from the Exchange in a timely manner and will thus reduce the regulatory burden on those firms. Further, receipt of such market surveillance information in an automated format will permit the Exchange's surveillance staff to review and analyze the data more rapidly and effectively by enabling them to enter the data directly into the Exchange's own computer systems for analysis. In addition, in instances where the Exchange refer matter to the Commission for further action, availability of the pertinent blue sheet information in an automated format will also facilitate the Commission's ability to analyze and evaluate relevant trading and market surveillance data. Finally, the proposal is identical to proposals by other exchanges that the Commission has approved previously.[6]

It is therefore, ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule changes be, and hereby are, approved.

For the Commission, by the Division of Market Regulations, pursuant to delegated authority.

Dated: August 23, 1989.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34–27178; File No. S7–24–89]

Joint Industry Plan; Notice of Filing of a Proposed Reporting Plan for NASDAQ/NMS Securities Traded on an Exchange on an Unlisted or Listed Basis by the National Association of Securities Dealers, Inc., and the American, Boston, Midwest, and Philadelphia Stock Exchanges

On June 21, 1989, pursuant to Rules 11A3–2 and 11A3–1 under the Securities Exchange Act of 1934 ("Act"), the National Association of Securities Dealers, Inc. ("NASD"), together with the American ("Amex"), Boston ("BSE"), Midwest ("MSE"), and Philadelphia ("Phlx") Stock Exchanges filed with the Securities and Exchange Commission ("Commission") a proposed Joint Industry Plan ("Plan") governing the collection, consolidation and dissemination of quotation and transaction information for NASDAQ/National Market System ("NMS") Securities listed on an exchange or traded on an exchange pursuant to a grant of unlisted trading privileges ("UTP").

I. Background

On September 16, 1985, the Commission announced its willingness to grant UTP to national securities exchanges in NMS securities if certain terms and conditions were met.[1] The Commission determined to establish a one-year pilot program during which each exchange requesting UTP would be permitted to trade up to 25 OTC securities designated as NMS Securities pursuant to Rule 11A2–1 under the Act. The Commission's willingness to grant UTP was conditioned, in part, on its approving a plan submitted by certain exchanges and the NASD to consolidate and disseminate exchange and OTC quotation data and transaction data in OTC securities upon which UTP is granted ("Joint Industry Plan").[2] The exchanges and the NASD have been negotiating the terms of the transaction reporting plan since that time.

Because of the protracted negotiations, the MSE decided in 1986 to enter into an interim transaction reporting plan with the NASD that was significantly more limited than the plan now under consideration.[3] On April 29, 1987, the Commission approved the MSE's application for UTP in 25 OTC securities [4] and simultaneously

---

trades includes: customer name; address; branch office number; registered representative number; whether the order was solicited or unsolicited; date account was opened; employer name; tax identification number(s); and, if the customer was also a member broker-dealer, whether the firm executing the order was acting as a principal or agent on the transaction.

[5] Any proposed rule requiring submission of additional information in an automated format would have to be submitted to the Commission for approval pursuant to the requirements of section 19(b) of the Act and Rule 19b–4 thereunder.

[6] *See* Securities Exchange Act Release No. 26536 (February 10, 1989).

[1] *See* Securities Exchange Act Release No. 22412 (September 16, 1985), 50 FR 38235 ("OTC/UTP Release"). The grant of UTP in specific securities would be pursuant to section 12(f) of the Act, and only after the notice and comment period specified in that section. Furthermore, section 12(f)(2) requires that the Commission, prior to granting UTP for any security, must find that the grant is consistent with the maintenance of fair and orderly markets and the protection of investors. Before granting a UTP application in an OTC stock, the Commission must also consider, among other things, the public trading, the impact of such extension on the existing markets for such securities, and the desirability of removing impediments to and the progress that has been made toward the development of a national market system.

[2] OTC/UTP Release, *Supra* note 1, 50 FR 38235.

[3] For example, under the interim plan, the NASD and MSE use the existing NASDAQ System and the NASD's transaction reporting system to collect, consolidate and disseminate quotation and transacation information received from NASDAQ market makers and the MSE in eligibile securities. The NASD disseminates on NASDAQ Level I service (which provides the best bid and offer quotations in each NASDAQ security without identifying market makers) a consolidated best bid and offer quotation with size based upon quotation information for eligible securities received from the MSE and NASDAQ market makers. The best bid and offer quotation and transaction reports do not contain market identifiers. *See* Securities Exchange Act Release No. 24635 (June 23, 1987), 52 FR 24149.

[4] *See* Securities Exchange Act Release No. 24407 (April 29, 1987), 52 FR 17349.

approved the interim transaction reporting plan submitted by the MSE and the NASD ("MSE/NASD Plan").[5] If the Commission approves the Joint Plan, it is anticipated that the MSE/NASD Plan utltimately will be superceded by the Joint Industry Plan.

II. Description of the Plan

The proposed Joint Industry Plan provides for the collection from the Plan Participants, and the consolidation and dissemination to vendors, subscribers and others of quotation and transaction information in "eligible securities," *i.e.*, NMS Securities traded on an exchange on a listed or UTP basis.[6] The following is a summary of the major provisions of the Plan. The full text of the Plan, as well as a "Concept Paper" describing the requirements of the Plan, are contained in the original filing which is available for inspection and copying in the Commission's Public Conference Room.

A. Implementation of the Plan

In its submission, the NASD stated that it will implement the Plan when (a) the Commission approves the Plan, and (b) the Commission grants an Exchange Participant's application for UTP in NASDAQ/NMS securities pursuant to Section 12(f) of the Act.[7] When the Plan Processor, which under the terms of the Plan will be NASDAQ, Inc. for at least the first 5 years, reports that the necessary modifications to the NASDAQ System have been completed and that it is ready to initiate operations, Exchange Participants will transmit quotation information and transaction reports in eligible securities to the Processor via computer-to-computer interfaces ("CTCI"), except that Limited Participants, and any Exchange Participant that is not yet ready with its CTCI, will transmit information through the NASDAQ System, using the NASDAQ Workstation Service.

B. Manner of Collecting, Processing, Sequencing, Making Available, and Disseminating Last Sale Information

Section VI.B. of the Plan provides that the Processor shall be capable of receiving last sale information on transactions in eligible securities received from Exchange Participants using a CTCI, and from NASDAQ market makers using NASDAQ-approved devices. The Processor will use the NASDAQ System and the NASD's Transaction Reporting System, modified to include marketplace identifiers, to consolidate last sale information in eligible securities received from the Participants and disseminate it to authorized vendors, subscribers, and news services in a fair and nondiscriminatory manner, via the NASDAQ/NMS Last Sale Information Service, as specified in the Concept Paper. Limited Participants and Exchange Participants that have not yet implemented a CTCI will utilize the NASDAQ Workstation Service, and will not market identifiers on their trade reports. The Processor will accept transaction reports in eligible securities from Exchange Participants, Limited Participants, and NASDAQ market makers and include them in a consolidated last sale data stream on a first-in, first-out basis.

C. Reporting Requirements

Pursuant to Section XI of the Plan, Participants will be required to report transactions in eligible securities executed between 9:30 a.m. and 4:00 p.m. Eastern Time ("ET") to the Processor between the hours of 9:30 a.m. and 4:01:30 p.m. ET on all days the Processor is in operation. Transaction reports may be entered after 4:01:30 p.m. ET, but they shall be reported as "late," in accordance with the rules of the Participant in whose market the transaction occurred. At the expense of any requesting Participant(s), the Processor will disseminate last sale trade reports until 4:30 p.m. ET.

D. Standards and Methods Ensuring Promptness, Accuracy, and Completeness on Transaction Reports

Section XII of the Plan requires that each participant enforce compliance by its members with the Plan's provisions. The rules of each Participant, to the extent they are not inconsistent with the Plan, will apply to the actions of the Participant's members in reporting quotation and transaction data in eligible securities executed through the Participant's facilities.[8]

The NASD stated that it would monitor members' compliance with the requirement that transaction reports be promptly reported, accurate and complete, primarily through examinations of NASDAQ market makers' books and records. Should the NASD discover apparent rule violations, the NASD will ocnsider possible disciplinary action. The NASD stated that it believed the other Participants will use similar methods to ensure the promptness, accuracy, and completeness of transaction reports.

The Processor also will check the accuracy and completeness of transaction reports by using the automatic validation feature of the NASD's Transaction Reporting System. That system automatically will check data transmitted by a NASDAQ market maker or Exchange Participant to ensure that all required information has been reported and that the reported price is reasonable as measured against the current market price. If information is missing or improperly reported, or if the reported price exceeds established parameters, the Processor will reject the report and will notify the reporting party through its CTCI or terminal.

E. Terms and Conditions of Access

As required by the 1985 UTP Release, the Plan provides that NASDAQ market makers shall have access to the exchange markets to the same extent that NASDAQ market makers provide access to OTC trading facilities. Section IX.A of the Plan provides that each Exchange Participant and Limited Participant shall provide each NASDAQ market maker with direct telephone access to the specialist post in each Eligible Security in which the NASDAQ market maker is registered as a market maker. Similarly, pursuant to section IX.B., the NASD shall ensure that each Exchange Participant, Limited Participant, and their members have direct telephone access to the trading desk of each NASDAQ market maker in each eligible security in which it displays quotations.

---

[5] *See* Securities Exchange Act Release No. 24635 (June 23, 1987), 52 FR 24140.

[6] The signatories of the Plan, *i.e.*, the NASD, Amex, MSE, Phlx, and the BSE, are the "Participants." The BSE, however, has joined the Plan as a "Limited Participant," and only will report quotation information and transaction reports in NASDAQ/NMS securities listed on the BSE. (The BSE is not now interested in trading OTC securities on an unlisted basis but, because it has listed several NASDAQ/NMS securities that it wishes to continue trading, it is participating on a limited basis in the Plan.) The Plan provides that any other national securities association or exchange in whose market eligible securities are or become traded may become a Plan Participant by executing a copy of the Plan and paying its share of development costs. (Limited Participants, however, do not pay development costs.) "Participant" is used in this release to refer both to full and Limited Participants, unless otherwise indicated.

[7] The NASD also noted that the BSE's participation is contingent upon the Commission granting it an exemption from the requirement of paragraph (b)(2)(iii) of Rule 11Aa3–1 under the Act to provide market identifiers on transaction reports or last sale data. *See* letter from George W. Mann, Jr., Senior Vice President and General Counsel, BSE, to Christine Sakach, Branch Chief, Division of Market Regulation, SEC, data August 17, 1989, and discussion at pp. 11–12 *infra*.

[8] In its submission to the Commission, the NASD noted that the pertinent rules include Article III, sections 1, 5 (and accompanying interpretation), 6 (and accompanying Policy), and 18 of the NASD's Rules of Fair Practice, and applicable provisions of Schedule D of the NASD By-Laws.

F. Description of Operation of Facility Contemplated by the Plan

The Plan makes specific provision for administration of the UTP Service by the Participants through an Operating Committee.[9] As noted above, NASDAQ, Inc. will, at least initially, be the Plan Processor. In that capacity, NASDAQ, Inc. will modify the NASDAQ System to permit the Participants to report to NASDAQ quotation and trade data for eligible securities. The basic operations of the UTP Processor are described in the Concept Paper.

G. Method and Frequency of Processor Evaluation

Section V.A. of the Plan provides that the Processor's performance is subject to review by an Operating Committee during the fifth year of its initial five-year term, and periodically thereafter (at least every two years, or from time to time upon the request of any two Participants but not more frequently than once each year).

Section V.B. provides that, in evaluating the Processor's performance, the Operating Committee shall consider whether the Processor has performed its functions in a reasonably acceptable manner in accordance with the provisions of the Plan, and whether its reimbursable expenses are excessive and not justified on a cost basis. Among the factors the Operating Committee may consider in evaluating whether the Processor has performed its functions in a reasonably acceptable manner are the reasonableness of its response to requests from Exchange or Limited Participants for technological changes or enhancements pursuant to Section IV.C.2. of the Plan. Section V.B. also provides that if the Operating Committee determines that the Processor has failed to perform its functions in a reasonably acceptable manner in accordance with the provisions of the Plan or that its reimbursable expenses have become excessive and not justified on a cost basis, the Processor may be terminated by a majority vote of the Operating Committee; provided, however, that Limited Participants shall not vote. Pursuant to Section IV.C.1.b. of the Plan, replacement of the Processor for any reason other than termination for cause requires the Operating Committee's unanimous vote.

H. Dispute Resolution

The Plan does not include any provision for a specialized mechanism for the resolution of disputes arising under the Plan. Section IV.A. of the Plan authorizes the Operating Committee to make decisions and take action within specified areas of responsibility, and provides that such decisions or action are binding upon each Participant, without prejudice, however, to the rights of any Participant to seek redress from the Commission pursuant to Rule 11Aa3–2 or in any other appropriate forum.

I. Method of Determination and Imposition, and Amount of, Fees and Charges

With the exception of standard charges to Limited Participants and Exchange Participants using NASDAQ Workstation Service, the Plan does not provide for the imposition of any fees or charges in connection with the collection, consolidation, and dissemination of information regarding eligible securities. Section IX.A of the Plan prohibits an Exchange or Limited Participant from imposing or permitting the imposition of any access or execution fee, or any other fee or charge, with respect to transactions in eligible securities effected with NASDAQ market makers that are communicated to the exchange floor by telephone.

Section XIV of the Plan provides that the NASD shall recover from exchange participants a sum of money to be negotiated.[10] The Plan also provides for revenue sharing, but states that the method of revenue sharing shall not be included in the Plan at this time. The method of revenue sharing is to be resolved within one year of the commencement of the UTP Service. Net revenues will be distributed to Participants (but not Limited Participants) in a manner to be determined. Prior to any such distribution, however, all operating and administrative expenses of the Processor in connection with the Plan shall be offset against operating revenues.

J. Written Understandings of Agreements Relating to Interpretation of, or Participation in, the Plan

The Participants have entered into an agreement, memorialized in an Undertaking dated April 1, 1989, which provides that for the one-year period following the date on which the UTP Processor commences operations, each initial entry or update of quotation information in Eligible Securities shall be effected by an individual at a computer terminal and shall not be programmed or automated. A copy of the Undertaking is attached to the filing.

III. The Boston Stock Exchange's Request for Exemption

As described above, the Plan does not provide for market identifiers for transaction reports and the inclusion of Limited Participants in the consolidated best bid and offer quotation.[11] Subsection (b)(2)(viii) of Rule 11Aa3–1, however, requires that any transaction reporting plan submitted to the Commission must provide market identifiers for transaction reports or last sale data made available to vendors.[12] Thus, the BSE, as the only Limited Participant under the Plan, requested that the Commission exempt it from this requirement.[13] The BSE stated that it has signed the Plan only because it seeks to continue to provide trading facilities for 21 dually listed (*i.e.*, listed on the BSE and traded in NASDAQ) stocks that it listed on the BSE as of the date the Plan was filed with the Commission and does not wish to apply for OTC/UTP.[14] To accommodate the

---

[9] Unanimous votes would be required for certain matters, including amendments to the Plan, reduction of fees charged, and replacement of the Processor.

[10] Section XIV of the Plan states that "[i]t is expressly agreed and understood among the Participants that specific provisions governing the issues of cost allocation and revenue-sharing among the Participants will not be included in the Plan at the time of execution thereof, but will be resolved within one year from the commencement of the Plan's operation. The provisions agreed upon by the Participants will be applied on a retroactive basis by means of an amendment to the Plan. There shall be no retroactive application if the Participants are unable to agree upon a cost allocation and revenue-sharing provision or the amount of recapture. * * *"

[11] Limited participants will send transaction and quotation data to the processor through the NASDAQ system, specifically through Workstation Terminals, in the same manner of OTC market markes. The NASDAQ system has never disseminated market identifiers for transaction and quotation reports for NMS securities.

[12] Rules 11Ac1–1 and 11Ac1–2 also require market identifiers for transaction and quotation reports. The Commission previously provided NASDAQ and vendors exemptions, however, under those rules. *See* Securities Exchange Act Release No. 18585 (March 23, 1982), 47 FR 13265; letter from Richard G. Ketchum, Associate Director, Division of Market Regulation, SEC, to James M. Yates, Bridge Data Company, dated March 30, 1982. These exemptions will continue to apply to dissemination under the Plan.

[13] Letter from George W. Mann, Jr., Senior Vice President and General Counsel, BSE, to Christine Sakach, Branch Chief, Division of Market Regulation, SEC, dated August 17, 1989.

[14] Any exchange that trades securities covered by the Plan is required to sign the Plan or delist such securities. Therefore, the BSE was required to sign the Plan to continue trading the 21 dually listed stocks, or delist these 21 issues.

BEST COPY AVAILABLE

BSE, the Plan Participants created the category of "Limited Participants," which do not pay any of the development costs of modifying NASDAQ to accommodate OTC/UTP and have limited voting rights under the Plan.[15] Limited Participants will not be permitted to either expand the number of dually listed issues or to apply for OTC/UTP.[16]

IV. MSE Comment Letter

The Commission has received one comment letter from the MSE on the proposed Plan.[17] The MSE stated that two issues were not resolved to its satisfaction during the negotiations among the Participants under the Plan.

First, the MSE stated that the Plan provides that nothing therein will affect existing agreements between the NASD and the International Stock Exchange and the Singapore Stock Exchange. The MSE stated that it is troubled by this provision for two reasons. First, the NASD has not made these agreements available for inspection, despite requests to do so. The MSE maintains that the Plan Participants have been asked to accept this provision without the opportunity to assess the potential effect of these agreements on the Participants or the Plan. Second, the MSE is troubled by the fact that there are no restrictions on further amendments to the agreements. Thus, according to the MSE, there is nothing to prohibit further amendments that may affect the rights and obligations of the Participants.

The second issue that has not been resolved to the MSE's satisfaction concerns the best bid and offer ("BBO"). The Plan provides that, in calculating the BBO disseminated to vendors, if quotations of more than one Participant are identical, the earliest in time shall be the best.[18] The MSE believes, however, that the BBO should be determined by size, not time priority, and referred to the Commission's adoption of Rule 11Ac1–2 in 1979 and the accompanying release in support of its position.[19]

In addition to the two issues mentioned above, the MSE also opposes the separate formal agreement that the participants would not allow their members to use Autoquote systems for a period of one year for those securities subject to the Plan.[20] The MSE stated that the NASD declined to sign the Plan if the exchanges were permitted to use Autoquote for NASDAQ stocks, and that the NASD introduced this condition immediately prior to the scheduled sign-up date for the Plan, after 3 years of negotiations. The MSE noted that it agreed to refrain from using Autoquote for one year, along with the other Participants, despite its belief that the condition is inappropriate. The MSE asked that the Commission consider whether to approve the one year prohibition.

Finally, the MSE requested that the grant of OTC/UTP be expanded to allow each exchange to trade 100 OTC Securities on an unlisted basis.[21] Since May 1987, the MSE has traded 25 NASDAQ/NMS securities pursuant to its interim UTP Plan with the NASD. Based on its experience during this period, the MSE believes that the Commission should expand the program from 25 to 100 OTC stocks.[22] The MSE, in addition to requesting that the interim Plan be expanded to 100 OTC stocks, has requested that the proposed Joint Industry Plan also encompasses 100 stocks.

V. Request for Comment

Interested persons are invited to submit written data, views and arguments concerning: (1) The provisions of the Joint Industry Plan; (2) the BSE's request for an exemption from the Rule 11Aa3–1 requirement that transaction reporting plans provide that transaction reports include market identifiers; and (3) the MSE's request to expand the pilot program to 100 securities.[23] Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposal that are filed with the Commission, and all written communications relating to the proposal between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing also will be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by September 27, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Dated: August 24, 1989.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 89–20692 Filed 9–5–89; 8:45 am]

BILLING CODE 8010-01-M

---

[15] While Limited Participants are permitted to attend all meetings, they are permitted to vote only on those matters that directly effect them.

[16] Limited participants could, however, become full Participants, pay their share of the development costs and apply for OTC/UTP.

[17] Letter from J. Craig Long, Vice President, General Counsel and Secretary, MSE, to Jonathan G. Katz, Secretary, SEC, dated July 7, 1989.

[18] NASDAQ calculates the BBO based on price and time priority for all securities traded in the NASDAQ system.

[19] The MSE stated that the relevant parts of that Release provide that time receipt is a "less useful" factor as orders are not routed on the basis of quotation time, and, if anything, the "oldest" quotation is more likely to be stale. Size, alternatively, provides investors with the depth of the market displaying the best price. *See* Securities Exchange Act Release No. 16590 (February 19, 1980), 45 FR 12391.

[20] Autoquote systems allow specialists automatically and instantaneously to update their quotes when some predesignated condition occurs (for example, the primary market in a security changes its quote). The MSE stated that the regional exchanges developed Autoquote systems to permit specialists to eliminate stale quotations.

[21] As noted above, the Commission has indicated a willingness to approve a one-year pilot program during which each exchange will be permitted to trade up to 25 OTC stocks on an unlisted basis. *See* OTC/UTP Release, *supra* note 1, 50 FR 36235.

[22] The MSE stated in its comment letter that there had been no disruption of the OTC market during the pendency of the interim plan, that pricing efficiency generally had improved in all 25 securities, and that it has been very difficult to attract order flow with only 25 stocks.

[23] In the alternative, commenters also are requested to address whether OTC/UTP should be expanded to all NASDAQ/NMS securities included on NASDAQ on or after April 26, 1979, in order to parallel the Commission's Rule 19c–3 which removed all off-board trading restrictions on securities listed on an exchange after that date. *See* Rule 19c–3 under the Act, 17 CFR 240.19c–3 (1989). In this regard, commentators should estimate the number of securities as well as the percentage of transaction and dollar volume which would be covered by such a requirement.

Self-Regulatory Organizations; Order Approving Proposed Rule Changes by the National Securities Clearing Corp., Midwest Clearing Corp., and Stock Clearing Corp. of Philadelphia on a Temporary Basis

August 29, 1989.

The National Securities Clearing Corporation ("NSCC"), Midwest Clearing Corporation ("MCC"), and Stock Clearing Corporation of Philadelphia ("SCCP") have filed proposed rule changes permitting them to guarantee at an earlier time settlement of member trades in their respective Continuous Net Settlement ("CNS") systems. The proposals also would permit NSCC, MCC, and SCCP (collectively, "the Clearing Corporations") to revise the CNS portion of their respective clearing fund formulas to protect against increased risk posed by an earlier guarantee.[1] The Commission requested public comment on the proposals,[2] and no comments were received. This Order approves the proposals on a temporary basis until December 31, 1990.[3]

I. Description of the Proposals

The proposals permit the Clearing Corporations to guarantee settlement [4] of CNS trades [5] at an earlier time. Under the proposals, "locked-in" trades [6] are guaranteed as of midnight on the day after trade date (T+1), while other trades are guaranteed as of midnight on the day they are reported to members as compared (usually the second day after trade date (T+2)).[7] Prior to the proposals, the Clearing Corporations guaranteed settlement of CNS trades on the fourth day after trade date (T+4). The proposals reduce the time during which clearing members are exposed to the risk of *contra*-side default but increase the time during which the Clearing Corporations are exposed to such risk.

To protect against increased CNS system risk associated with an earlier guarantee, each Clearing Corporation proposes to revise the CNS portion of its clearing fund formula. NSCC's revised CNS clearing fund formula [8] includes the following components: (a) 2 percent of the member's projected total long CNS positions;[9] plus (b) the net of each day's difference between the contract price of pending, compared CNS trades and the current market price for all guaranteed pending CNS trades which have not yet reached settlement;[10] plus (c) .25 percent of the net of all guaranteed pending CNS trades and open CNS positions.[11]

NSCC calculates CNS clearing fund requirements daily and collects clearing fund deposits monthly, unless circumstances justify, as described below, additional deposits on a more frequent basis. NSCC may collect additional intra-month clearing fund deposits from a member if: (a) That member's current clearing fund requirement (based on the previous 20 business day's activity) for CNS activity is more than 25% higher than its present clearing fund deposit; or (b) the average of that member's last five days' clearing fund requirements (each day's requirement based on the previous 20 days' activity) for CNS activity is more than 15% higher than its present clearing fund deposit.[12] NSCC collects intra-month deposits on the day these parameter breaks occur. NSCC does not require an increased contribution if the deficiency is less than 10% of the member's clearing fund deposit or $10,000 and may grant exemptions from the additional deposit requirement in certain instances.[13]

MCC also has revised the NCS portion of its clearing fund formula.[14] Prior to implementation of its revised formula, MCC established, for a selected 20-day period,[15] each member's pre-settlement long and short positions for NCS trades. Each day during that period that a member had a net debit exposure,[16]

---

[1] NSCC filed its proposed rule change (SR–NSCC–87–04) on February 27, 1987, and amendments to that proposal on March 11, 1987, and October 1, 1987. In its March 11, 1987 amendment, NSCC proposed that when-issued trades not be subject to its earlier CNS guarantee. *See* Letter from Michael Simon, Associate General Counsel, NSCC, to Jonathan Kallman, Assistant Director, Division of Market Regulation, dated March 22, 1987. As described in detail *infra*, in its October 1, 1987 amendment, NSCC established standards for the imposition of intra-month clearing fund deposit requirements. MCC filed its proposed rule change (SR–MCC–87–03) on June 2, 1987. SCCP filed its proposed rule change (SR–SCCP–87–03) on October 28, 1987, and an amendment to that proposal on June 8, 1989. As noted *infra*, SCCP's amendment conformed its earlier guarantee time frames to those proposed by NSCC and MCC.

[2] *See* Securities Exchange Act Release Nos. 24301 (April 3, 1987), 52 FR 11892; 24705 (July 15, 1987), 52 FR 27480; and 26954 (June 22, 1989), 54 FR 27260.

[3] NSCC and MCC, following notification to the Division of Market Regulation ("Division"), implemented their earlier guarantee proposals prior to this Order, based on authority granted the Clearing Corporations in their rules prior to the proposed amendments. *See* Rule 18 of NSCC's Rules. *See* also, Article VII, Rules 2 and 3 and Article X, Rule 11 of MCC's Rules. SCCP has not implemented its earlier guarantee proposal. Since 1982, however, SCCP has guaranteed, as of trade date, all trades executed by a specialist with a SCCP participant recorded in a SCCP margin account. Such trades are guaranteed up to 1,000 shares.

[4] Until the Clearing Corporation guarantees settlement of a trade, each side to the trade bears the risk of the *contra*-side defaulting if the Clearing Corporation ceases to act for a defaulting member. Once the Clearing Corporation guarantees settlement, the original contractual obligations between the two parties are discharged and replaced by contracts between the Clearing Corporation and each of the original parties (*i.e.*, the Clearing Corporation becomes the buyer to every seller and the seller to every buyer).

[5] Two other accounting systems, the Balance Order and Trade-by-Trade systems, are used to process transactions not eligible for CNS. Under the Balance Order system, balance orders, in the form of receive and deliver tickets, are netted by the Clearing Corporation and guaranteed on settlement date. Under the Trade-by-Trade system, transactions are cleared through the Clearing Corporation but are settled by the individual parties to the transaction.

[6] Locked-in trades (*i.e.*, trades executed through automated order routing and trade execution systems) are reported to members as compared on T+1.

[7] Originally, SCCP proposed to guarantee locked-in trades as of midnight on T+2 and non-locked-in trades as of midnight on the day after the trades were reported to members as compared. SCCP's June 8, 1989 amendment conforms its proposal to the time frames described above.

[8] Under NSCC's prior CNS clearing fund formula, a member was required to deposit 2.5% of its average daily settlement debits and credits, other than the member's envelope settlement system debits and credits.

[9] NSCC believes this component of its revised formula protects against the risk that a member purchasing securities will be unable to pay for those securities upon delivery (*i.e.*, allocation risk).

[10] NSCC believes this component of its revised formula protects against the risk that the market price of compared trades will move away from their contract price before settlement (*i.e.*, mark-to-the-market risk). This component represents the absolute dollar value of mark-to-the-market risk. Credits are not factored into the mark-to-the-market calculation.

[11] When an NSCC member becomes insolvent, NSCC ceases to act for that member and liquidates the member's positions. Even if the member has made mark-to-the-market payments prior to becoming insolvent, the liquidation price may differ from the current price in the CNS system. NSCC believes this third component guards against current market price to liquidation price risk.

In addition to the three components described above, NSCC requires members to deposit 2.5% of the member's average daily envelope settlement system debits and credits or 5% of its average daily envelope settlement system debits, whichever is greater, subject to a $10,000 minimum contribution.

[12] For example, assume that on July 20, 1989, Broker A's clearing fund requirements is $782,386. Further assume Broker A's end of June clearing fund requirement was $617,966. Broker A could be assessed an intra-month clearing fund deposit under part (a) of the formula above, because its July 20, 1989 requirement would exceed its end of June clearing fund requirement by 27%. Alternatively, if on July 20, 1989, the average of Broker A's last five days' clearing fund requirements is $777,085, it could be assessed an intra-month clearing fund deposit under part (b), because that weekly requirement would exceed Broker A's end of June requirement by 26%.

[13] NSCC would grant an exemption from the additional deposit requirement if it determines that (1) a member does not pose additional risk that would require an additional deposit prior to the month-end review, or (2) the increase appears to be due to general market conditions unrelated to risk posed by the member (*e.g.*, a single trade inconsistent with a member's normal business causes a parameter break or a mispriced trade results in a parameter break).

[14] Under MCC's prior CNS clearing fund formula, a member was required to deposit 2% of its daily average short value positions (*i.e.*, a member's position when its net open commitments from sales and borrowings of a security exceed its net open commitments from purchases of the security) plus .5% of its daily average long value positions (*i.e.*, a member's position when its net open commitments from purchases of a security exceed its net open commitments from sales and borrowings of the security) and loan value positions (*i.e.*, position of a member with respect to a security loaned by the member under CNS), with a minimum deposit requirement of $5,000 in cash.

[15] That period was September 27, 1987 through October 19, 1987.

[16] Net debit exposure is the net amount payable by a member to MCC on account of securities movements, settling trades, changes in value positions ("marks-to-the-market"), and other amounts payable by the member as a result of services provided by MCC. Credits are not factored into the net debit exposure calculation.

MCC assessed that member at a rate of 102% of that exposure. The average dollar amount each member was assessed during the 20-day period became that member's initial clearing fund requirement.[17]

MCC calculates CNS clearing fund requirements daily. If a member's average net debit exposure for a particular day (each day's average based upon the member's previous 20 business days' activity) exceeds the member's current clearing fund requirement (as derived from adjustments to the initial clearing fund requirement described above) by more than 10%, it is assessed an additional clearing fund contribution that day. Additional clearing fund requirements not exceeding this parameter break are collected weekly.

SCCP also has revised the CNS portion of its clearing fund formula. Under that revised formula, members are required to deposit the larger of: (a) The member's monthly average trading activity based on the preceding quarter, $1,000 for every 25 trading units of 100 shares, with a $5,000 minimum and $50,000 maximum contribution (*i.e.*, SCCP's current CNS clearing fund formula) and (b) the aggregate dollar amount of the member's long trades at their execution price for each quarter divided by the number of days in such quarter, multiplied by 2%. The maximum amount collectable per participant under the revised formula is $100,000.

SCCP would calculate clearing fund requirements quarterly but would monitor member mark-to-the-market exposure daily. If a participant has mark-to-the-market exposure[18] exceeding $10,000 for a particular day, it would be assessed that amount that day as an additional clearing fund requirement.

During the temporary approval period ("Period"), the Division will collect data from the Clearing Corporations to assess the ability of their proposed CNS clearing fund formulas to guard against increased risk posed by an earlier CNS guarantee.[19] Specifically, the Clearing Corporation will select 30 members (including five members in each of six categories: retail, specialist, market-maker, clearing, institutional, and arbitrage members). The Clearing Corporations will provide, with respect to each sample member, (a) the dollar value of daily mark-to-the-market exposure for guaranteed trades that have not reached settlement, (b) the dollar value of the clearing fund deposit held by the Clearing Corporation, and (c) the daily clearing fund calculation produced under the revised formula, including identification of parameter breaks and intra-month deposits.

II. Rationale for the Proposals

The Clearing Corporations believe their proposed rule changes are consistent with the purposes and requirements of section 17A of the Act. Specifically, they believe their proposals, in guaranteeing at an earlier time the settlement of CNS system trades, provide increased stability and certainty in the securities markets. Moreover, they believe proposed revisions to the CNS portion of their respective clearing fund formulas adequately protect against increased risk posed by earlier guarantees.

III. Discussion

The Commission believes the proposals to expand the number of trades subject to Clearing Corporation guarantees are consistent with the Act, and Section 17A in particular. Specifically, the Commission believes the proposals are designed to increase trade settlement certainty without compromising the safety of clearing member funds and securities. The Commission is approving the proposals on a temporary basis, however, while it monitors the adequacy of Clearing Corporation safeguards applicable to earlier CNS guarantees.

The Commission believes the proposals are designed to increase the certainty of CNS trade settlement.[20] Prior to the proposals, clearing members were exposed to the risk of *contra*-side default from the date of comparison until T+4. Under the proposals, members are relieved of that potential financial exposure to the extent the Clearing Corporations assume responsibility to settle compared CNS trades on T+1 or T+2.

The Commission recognizes that earlier CNS guarantees, without appropriate safeguards, may pose increased risk to member funds and securities. A clearing agency's primary protection against member default is the defaulting member's clearing fund contribution. Upon default, the clearing agency liquidates the defaulting member's open commitments through purchases and sales in the open market. The clearing agency covers any loss from liquidation with the defaulting member's clearing fund deposit. The clearing agency is authorized to assess non-defaulting members, on a *pro-rata* basis, if the defaulting member's deposit is insufficient to cover that loss.[21] An earlier clearing agency guarantee increases exposure to market risk for guaranteed trades, thereby increasing exposure to clearing members that if a member defaults, the liquidation losses of the defaulting clearing member will be greater and so too will be *pro-rata* assessments.

During the Market Break, Clearing Corporation safeguards applicable to earlier CNS guarantees were tested. Although the Clearing Corporations maintained aggregate CNS clearing funds sufficient to cover aggregate mark-to-the-market exposure,[22] some clearing members had CNS clearing fund deposits insufficient to cover individual mark-to-the-market obligations.[23] To guard against mark-to-the-market exposure, the Division suggested that the Clearing Corporations consider collecting marks on all open obligations from the time of guarantee (generally T+1 or T+2 under the proposal) through the scheduled settlement date [the fifth day after trade date (T+5)], instead of collecting such marks on settlement date, which is current Clearing Corporation practice.[24] The Division believed this process would reduce Clearing Corporation risk to one-day price fluctuations (and liquidation risks) on guaranteed trades, compared with three or four-day price fluctuations (and liquidation risks) inherent in trade guarantees on T+1 or T+2.[25] As described above and discussed below, NSCC and MCC would calculate market exposure on guaranteed, pending trades, but would collect only a percentage of that exposure in the ordinary course.

Data provided by the Clearing Corporations during the temporary approval period should address whether their revised formulas adequately address increased risk posed by an earlier guarantee or whether additional safeguards, such as collection of marks from the date of trade guarantee through settlement, should be implemented. As indicated below, the Commission is concerned that daily clearing fund calculations based on a member's average mark-to-the-market exposure for a rolling 20-day period may not reflect that member's actual daily mark-to-the-market exposure. The data should permit the Commission to compare a member's daily mark-to-the-market exposure with that member's daily clearing fund requirement and determine whether the revised formulas adequately account for daily mark-to-the-market exposure. The data also should permit the Commission to monitor Clearing Corporation intra-month deposit requirements and determine whether those requirements are adequate safeguards.

In addition to their revised clearing fund formulas, the Clearing Corporations employ other safeguards designed to protect against member default and the possibility of *pro-rata* assessment. Specifically, the Clearing Corporations monitor extensively member financial condition, review member settlement activity in relation to prior activity, and monitor securities settled in its systems for volatility. The Clearing Corporations can collect additional marks or clearing fund deposits if a member's financial condition deteriorates or its settlement activity increases dramatically or becomes concentrated in volatile securities. The Clearing Corporations also routinely review clearing member CNS contractual obligations to identify delivery obligations that have not been affirmed by cash account customers through depository institutional delivery systems, thereby enabling the Clearing Corporations to identify CNS obligations members may not be able to settle on T+5 (*e.g.*, because their customers have not acknowledged the terms of the trade or have not authorized settlement with those clearing members) and take appropriate action (*e.g.*, require additional marks or clearing fund deposits) to protect against member default. The Clearing Corporations are enhancing their risk monitoring systems in response to Commission recommendations.[26]

IV. Conclusion

On the basis of the foregoing, the Commission finds that the proposed rule changes are consistent with the Act and, in particular, section 17A. The Commission believes the proposals are designed to increase CNS trade settlement certainty. The Commission also believes, pending review of data submitted by the Clearing Corporations during the temporary approval period, the revised clearing fund formulas are designed to protect against increased risk posed by an earlier guarantee.

It is therefore ordered, pursuant to section 19(b) of the Act, that the proposed rule changes (SR–NSCC–87–4, SR–MCC–87–3, and SR–SCCP–87–3) be, and hereby are, approved on a temporary basis until December 31, 1990.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority. 17 CFR 200.30–3.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 89–20891 Filed 9–5–89; 8:45 am]

BILLING CODE 8010-01-M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Privacy Act of 1974

The Department of Transportation (DOT) herewith publishes a proposal to amend a system of records.

Any person or agency may submit written comments on the proposed altered system to: Lieutenant Commander C.M. Rich, U.S. Coast Guard, Office of the Chief Counsel, U.S. Coast Guard Headquarters, 2100 2nd Street SW., Washington, DC 20593–0001. Comments must be received within 30 days to be considered.

If no comments are received, the proposed changes will become effective 30 days from the date of issuance. If comments are received, the comments will be considered and, where adopted, the document will be republished with the changes.

Issued in Washington, DC, August 25, 1989.

Melissa J. Allen,

Acting Assistant Secretary for Administration.

---

[17] Members with a 20-day average below MCC's $5,000 minimum clearing fund deposit requirement were not required to provide additional funds.

[18] Marking-to-the-market refers to the process by which the difference between securities' market value and the contract price is collected from parties to a transaction. Unlike NSCC and MCC, SCCP's daily calculation of member mark-to-the-market exposure would be based on that day's exposure rather than average exposure for a 20-day period.

[19] As discussed *infra*, the Commission is concerned that daily clearing fund calculations based on mark-to-the-market average exposure for a rolling 20-day period may not reflect actual mark-to-the-market exposure as well as, for example, daily collection of marks-to-the-market ("marks"). As discussed *infra*, data provided by the Clearing Corporations during the temporary approval period will be used to evaluate this concern.

[20] Prior to implementation of the proposals, earlier guarantees were discussed at the 1984 Securities Processing Roundtable ("Roundtable"). Roundtable participants urged clearing agencies "to investigate the feasibility of earlier trade guarantees, in conjunction with a marking system, to increase safety and service quality in the National [Clearance and Settlement] System and to provide an early warning about potential defaults by participants that are unable to meet their obligations." Roundtable participants believed earlier guarantees would increase trade settlement certainty and benefit trading strategies coupling stock trades with options or futures trades. *See* U.S. Securities and Exchange Commission, *Report of the Division of Market Regulation 1984 Securities Processing Roundtable* (May 31, 1984) at viii ("Roundtable Report").

[21] The risk of *Pro-rata* assessment was most evident during the October 1987 Market Break ("Market Break"). On October 21, 1987, NSCC, as well as other clearing agencies, ceased to act for Metropolitan Securities ("Metropolitan"), because Metropolitan failed to meet its settlement obligations on October 20, 1987. NSCC liquidated 188 Metropolitan positions from October 22, through November 3, with a total contract value of $58,438,000 and reversed CNS allocations from Metropolitan's account totaling approximately $5.6 million in value. NSCC's loss prior to applying Metropolitan's clearing fund contribution was approximately $570,000. After applying Metropolitan's $175,000 clearing fund contribution, NSCC sufferend a loss of approximately $395,000. That loss was covered by NSCC retained earnings and no *pro-rata* assessments occurred. *See The October 1987 Market Break, A Report by the Division of Market Regulation, U.S. Securities and Exchange Commission (February 1988)* ("Market Break Report") at 10–17.

NSCC and the Options Clearing Corporation ("OCC") ceased to act for H.B. Shaine & Co. Inc. ("Shaine") on October 20, 1987. In that liquidation, OCC suffered an $8.5 million loss and allocated that loss on a *pro-rata* basis among its clearing members, marking the first time a clearing agency's members have had their clearing fund deposit assessed in connection with the default of another member. NSCC did not suffer a loss in the Shaine liquidation. *See* Market Break Report at 10–19 and 10–44.

[22] For example, on October 20 and October 21, 1987, NSCC's CNS market risk exposure was approximately $90.7 million and $92.25 million respectively. NSCC's clearing fund, with approximately $437 million in deposits on October 31, 1987, was sufficient to cover that risk exposure. *See* Market Break Report, *supra* note 21, at 10–24.

[23] For example, in a sample of 30 NSCC members (including five members in each of six categories: retail, specialist, market-maker, clearing, institutional, and arbitrage members) four members on October 19, 1987, six members on October 20, 1987, and seven member on October 21, 1987, would have had daily marks in excess of their clearing fund deposits. *See* Market Break Report, *supra* note 21, at 10–24.

[24] *See* Market Break Report, *supra* note 21, at 10–24 and 10–25.

[25] *Id.* Roundtable participants also discussed an earlier mark-to-the-market system to guard against increased clearing corporation exposure resulting from an earlier guarantee. Many broker-dealers believed that for customer-related activity, they would be forced to fund earlier marks themselves, because institutional customers generally settle on a cash-on-deliver basis and would be unwilling to, or legally restrained from, paying marks prior to settlement. Those brokers, however, believed they could fund non-cash marks by depositing letters of credit or valued securities with the clearing corporation. It was suggested that smaller broker-dealers could have difficulty even with non-cash marks. *See* Roundtable Report, *supra* note 20, at viii.

[26] For example, in the Market Break Study, the Division recommended that NSCC enhance its current risk monitoring system. As discussed above, NSCC monitors its member's guaranteed positions that have not reached settlement to assess its liquidation exposure. NSCC marks the member's open but unsettled positions to the closing prices of the previous day to determine the potential cost of liquidation to NSCC if that firm defaults. Previously, NSCC's monitoring system could not provide real-time estimates of liquidation cost (*i.e.*, it marked positions to yesterday's close but did not take into account today's price movements or, perhaps more importantly, potential price movements tomorrow). Thus, if current prices varied significantly from yesterday's close, NSCC did not have an accurate, up-to-the-minute cost of liquidation. NSCC is in the process of developing, implementing, and testing systems to provide those estimates.

Narrative Statement—Department of Transportation, Office of the Secretary, on Behalf of the United States Coast Guard for Alteration of the Claims and Litigation Program Record System DOT/CG–508

The Office of the Secretary, on behalf of the Coast Guard, proposes to amend the Claims and Litigation Record System, DOT/CG–508, to permit the use of collection agencies and the International Revenue Service (IRS) tax refund offset for indebtedness to the United States.

The purpose of this notice is to revise the system to reflect the reorganization and centralization of the claims and litigation function at three units in the Coast Guard and to authorize the use of this system by collection agencies and as part of the IRS tax refund offset program. These changes should improve the effectiveness of the affirmative actions for civil penalty collection.

The changes include amendment to:

a. System location. This was changed to reflect the three locations where claims and litigation files are maintained.

b. Categories of individuals. This was changed to clarify which individuals could expect to find records located in this system.

c. Routine uses. This was changed to permit use of records within this system by collection agencies that are hired by the government to collect delinquent debts and to permit the records to be used as part of the IRS tax refund offset program.

d. Storage, retrievability, accessing, retaining, safeguards. This was changed to reflect the increased use of computers and magnetic disks for record storage.

Since this proposal is an amendment to an existing record system, the probable effects of this proposal on the privacy interests of the general public is minimal.

Authority for maintenance of the system is contained in 5 U.S.C. 3301.

Access to these records is controlled by the supervising attorneys for the respective commands. As a result, the probable or potential effects of this proposal on the privacy of the general public is minimal. Any interest that an individual had would have been waived by the filing of the claim or lawsuit.

A description of the steps taken by the Department of Transportation to safeguard these records is given under the appropriate heading of the attached Federal Register system of records notice.

The purpose of this report is to comply with Office of Management and Budget Circular A–130 Appendix I, dated December 12, 1985.

Amendment—DOT/CG–508

System Location: Amended to reflect the centralization of the Coast Guard claims and litigation function as a result of the reorganization of the Coast Guard. This more accurately reflects the location of the records for the various types of activities.

Categories of individuals covered by the system: Amended to clarify by explicitly stating the categories of individuals who could expect to find a record within this system.

Categories of records in the system: Amended to clarify the nature of the records maintained.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Amended to reflect the use of the records for offset against tax refund, and referral to the collection agencies.

Storage, retrievability, accessing, retaining, safeguards: Amended to include the use of computer and magnetic disks and to conform to amended record retention guidelines.

Record source categories: Revised to more accurately reflect sources of information that are used.

DOT/CG 508

SYSTEM NAME: Claims and Litigation. DOT/CG.

SYSTEM LOCATION: Department of Transportation (DOT). Litigation records are primarily located at Coast Guard Headquarters. Claims records are located at Coast Guard Headquarters and at the two Maintenance and Logistics Commands.

a. Litigation:

United States Coast Guard (CG), Commandant (G–LCL), 2100 2nd Street, SW., Washington, DC 20593–0001

b. Claims:

United States Coast Guard (CG), Commandant (G–LCL), 2100 2nd Street, SW., Washington, DC 20593–0001

Commander, Maintenance and Logistics Command Atlantic (ml), Governors Island, Building 400, New York, New York 10004–5098

Commander, Maintenance and Logistics Command Pacific (ml), Coast Guard Island, Alameda, California 94501–5100

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM: Persons who have filed a claim initiated litigation, or are the subject of an affirmative claim or litigation on behalf of the Coast Guard. Persons would include corporations, estates, insurance companies or other legal entities authorized by Federal law to file a claim or lawsuit against the United States or United States Coast Guard.

CATEGORIES OF RECORDS IN THE SYSTEM: Lawsuits and claims for and against the Coast Guard. Files may include all background information obtained in adjudicating or deciding the Coast Guard's position on the lawsuit or claim.

ROUTINE USES OF RECORDS IN THE SYSTEM including categories of users and the purposes of such uses:

a. Disclosures from this system may be made to Federal employees responsible for collecting debts owed the United States pursuant to 5 U.S.C. 5514, 31 U.S.C. 3716 and 37 U.S.C. 1007(c), including collection by means of referral to the IRS for deduction from tax refunds pursuant to 31 U.S.C. 3720a, or by means of withholding, revoking, suspending, or collecting by means of not renewing documents, licenses, loans or other privileges when authorized by law.

b. Disclosures from this system may be made to individuals, corporations, private counsel and other entities contracted by the United States to collect debts owed the United States pursuant to 31 U.S.C. 3718 and any other applicable statutes. The contracted collection agency, individual or counsel shall be subject to the Privacy Act.

c. Disclosures from this system may be made to other Federal, state and local agencies for assistance in resolving the claim or lawsuit.

d. See Prefatory Statement of General Routine Uses.

DISCLOSURE TO CONSUMER REPORTING AGENCY: Disclosures from this system may be made to consumer reporting agencies pursuant to 5 U.S.C. 552a(b)(12). The Coast Guard may disclose to a consumer reporting to be valid and overdue as follows: (1) The name, address, taxpayer identification number and other information necessary to establish the identity of the individual responsible for the claim; (2) the amount, status, and history of the claim; and the program under which the claim arose. The Coast Guard may disclose the information specified in this paragraph under 5 U.S.C. 552a(b)(12) and the procedures contained in subsection 31 U.S.C. 3711(f). A consumer reporting agency to which these disclosures may be made is defined at 31 U.S.C. 3701(a)(3).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE: Magnetic tape or disk, and file folders.

RETRIEVABILITY: Information is retrieved by individual name in alphabetical file or by taxpayer identification number.

SAFEGUARDS: Information available only to authorized personnel. Data processing access if by password. File folders retained in locked room when unattended.

RETENTION AND DISPOSAL: Record retained for one year at the responsible Coast Guard command and then forwarded to the Federal Records Center where they are destroyed 8 years after the final action on the lawsuit or claim. Card index files and magnetic tape and disk files retained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS: Chief Counsel.

Department of Transportation, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001

NOTIFICATION PROCEDURE: Written request must be signed by the individual and be mailed to:

Department of Transportation, United States Coast Guard Headquarters, Commandant (G–TIS), 2100 2nd Street, SW., Washington, DC 20593–0001

RECORD ACCESS PROCEDURE: Procedures may be obtained by writing Commandant (G–TIS) at the address in "Notification Procedure" above. Proof of identity may be required prior to affording access to records.

CONTESTING RECORD PROCEDURE: Same as "Record Access Procedure."

RECORD SOURCE CATEGORIES:

a. Information obtained from Coast Guard military and civilian personnel, Coast Guard investigating officers, other law enforcement investigating officers, and members of the public.

b. Records from CG Privacy Act System DOT/CG 507.

[FR Doc. 89–20805 Filed 9–5–89; 8:45 am]

BILLING CODE 4910–62–17

Federal Aviation Administration

Radio Technical Commission for Aeronautics (RTCA), Executive Committee Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92–463; 5 U.S.C. app. I), notice is hereby given for the Executive Committee meeting to be held September 29, 1989, in the RTCA Conference Room, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC 20005, commencing at 9:30 a.m.

The agenda for this meeting is as follows: (1) Chairman's remarks and introductions; (2) approval of the minutes of meeting held July 21, RTCA Paper No. 276–89/EC–1034; (3) Executive Director's report; (4) Special Committee Activities Report for July-August; (5) approval of RTCA Operations and Special Budgets for 1990 and Operations Planning Budget for 1991; (6) consideration of proposals to establish new special committees; (7) consideration of approval of Special Committee 160 report, "Minimum Operational Performance Standards for 406 MHz Emergency Locator Transmitters (ELT)"; (8) consideration of approval of Special Committee 147 change 6 to RTCA/DO–185, "Minimum Operational Performance Standards for TCAS II"; (9) other business; and (10) date and place of next meeting.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC 20005; (202) 682–0266. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on August 28, 1989.

Geoffrey R. McIntyre,

Designated Officer.

[FR Doc. 89–20654 Filed 9–5–89; 8:45 am]

BILLING CODE 4910–13–M

Airborne Area Navigation Equipment Using Multi-Sensor Inputs

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of availability of technical standard order (TSO) and request for comments.

SUMMARY: The proposed TSO–C115a prescribes the minimum performance standards that airborne area navigation equipment using mulit-sensor inputs must be identified with the marking "TSO–C115a."

DATE: Comments must identify the TSO file number and be received on or before December 15, 1989.

ADDRESS: Send all comments on the proposed technical standard order to: Technical Analysis Branch, AIR–120, Aircraft Engineering Division Aircraft Certification Service—File No. TSO–C115a. Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591.

OR DELIVER COMMENTS TO: Federal Aviation Administration, Room 335, 800 Independence Avenue, SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: Ms. Bobbie J. Smith, Technical Analysis Branch, AIR–120, Aircraft Engineering Division, Aircraft Certification Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591. Telephone (202) 267–9546.

Comments received on the proposed technical standard order may be examined, before and after the comment closing date, in Room 335, FAA Headquarters Building (FOB–10A), 800 Independence Avenue, SW., Washington, DC 20591, weekdays except Federal holidays, between 8:30 a.m. and 4:30 p.m.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to comment on the proposed TSO listed in this notice by submitting such written data views, or arguments as they desire to the above specified address. All communications received on or before the closing date for comments specified above will be considered by the Director of the Aircraft Certification Service before issuing the final TSO.

Background

Changes incorporated in proposed TSO–C115a are to establish consistence criteria with later navigation equipment standards. TSO–C115 was first in a series of navigation equipment TSO's issued. Changes include new paragraphs addressing Holding Pattern Maneuvering, Automatic Scanning of Sensor, and Sensor Ground Facilities.

How To Obtain Copies

A copy of the proposed TSO–C115a may be obtained by contacting the person under "**FOR FURTHER INFORMATION CONTACT**". TSO–C115a references Radio Technical Commission for Aeronautics Secretariat (RTCA) Document No. DO–187, dated November 13, 1987, for minimum performance standards, RTCA.CO–160B for the environmental standard, and TRCA/DO–178A for the computer software requirements; RTCA documents may be purchased from the Radio Technical Comission for Aeronautics Secretariat, One McPherson Square, Suite 500, 1425 K Street, NW., Washington, DC 20005.

DEPARTMENT OF THE TREASURY

Customs Service

[T.D. 89–84]

Approval of Unimar, Inc. as a Commercial Gauger

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of Approval of Unimar, Incorporated as a commercial gauger.

SUMMARY: Unimar Incorporated of Houston, Texas recently applied to Customs for approval to gauge imported petroleum, petroleum products, organic chemicals, and vegetable and animal oils under § 151.13 of the Customs Regulations (19 CFR 151.13). Customs has determined that Unimar meets all of the requirements for approval as a commercial gauger.

Therefore, in accordance with § 151.13(f) of the Customs Regulations, Unimar, Incorporated, 14511 Woodforest Boulevard, Houston, Texas 77015, is approved to gauge the products named above in all Customs districts.

EFFECTIVE DATE: September 1, 1989.

FOR FURTHER INFORMATION CONTACT: Donald A. Cousins, Office of Laboratories and Scientific Services, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229 (202–566–2446).

Dated: August 30, 1989.

NUCLEAR REGULATORY COMMISSION

DATE: Weeks of September 4, 11, 18, and 25, 1989.

PLACE: Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland.

STATUS: Open and Closed.

MATTERS TO BE CONSIDERED:

Week of September 4

There are no meetings scheduled for the Week of September 4.

Week of September 11—Tentative

Monday, September 11

10:00 a.m.
Affirmation/Discussion and Vote (Public Meeting) (if needed)

Thursday, September 14

10:00 a.m.
Briefing on Status of NRC Technical Training Programs (Public Meeting)

Friday, September 15

9:00 a.m.
Briefing on Status of Maintenance Initiatives and Schedule (Public Meeting)

Week of September 18—Tentative

Wednesday, September 20

10:00 a.m.
Briefing on EPRI Design Requirements Document for Advanced Light Water Reactors (Public Meeting)

Thursday, September 21

10:00 a.m.
Briefing on Study of Adequacy of Regulatory Oversight of Materials Under a General License (Public Meeting)
11:30 a.m.
Affirmation/Discussion and Vote (Public Meeting) (if needed)

Week of September 25—Tentative

There are no meetings scheduled for the Week of September 25.

ADDITIONAL INFORMATION: By a vote of 4–0 on August 25, the Commission determined pursuant to U.S.C. 552b(e) and § 9.107(a) of the Commission's rules that Commission business required that "Affirmation of Immediate Effectiveness Review for Full Power Licensing of Limerick, Unit 2" (Public Meeting) held on August 25, be held on less than one week's notice to public.

Note.—Affirmation sessions are initially scheduled and announced to the public on a time-reserved basis. Supplementary notice is provided in accordance with the Sunshine Act as specific items are identified and added to the meeting agenda. If there is no specific subject listed for affirmation, this means that no item has as yet been identified as requiring any Commission vote on this date.

TO VERIFY THE STATUS OF MEETINGS CALL (RECORDING): (301) 492–0292.

CONTACT PERSON FOR MORE INFORMATION: William Hill (301) 492–1661.

Dated: August 31, 1989.

William M. Hill, Jr.,
Office of the Secretary.

BILLING CODE 7590-01-M

UNITED STATES POSTAL SERVICE BOARD OF GOVERNORS

Notice of Vote to Close Meeting

By telephone and written vote, a majority of the members contracted and voting, the Board of Governors voted to add two items to the agenda for the meeting closed to public observation on September 11, 1989, in Washington, DC. The two items are: (1) Consideration of a proposed filing with the Postal Rate Commission for postal service changes and (2) a capital investment for new facilities at Dulles Airport in northern Virginia. [See 54 FR 36094, August 31, 1989, for prior Notice regarding time and place of this meeting.]

The meeting is expected to be attended by the following persons: Governors Alvarado, del Junco, Griesemer, Hall, Mackie, Nevin, Ryan and Setrakian; Postmaster General Frank; Deputy Postmaster General Coughlin; Secretary for the Board Harris; and General Counsel Cox.

As to the first item, the Board determined that, pursuant to section 552b(c)(3) and (10) of Title 5, United States Code, and section 7.3(c) and (j) of Title 39, Code of Federal Regulations, the discussion of this matter is exempt from the open meeting requirement of the Government in the Sunshine Act [5 U.S.C. 552b(b)], because it is likely to disclose information in connection with proceedings under chapter 36 of Title 39 [having to do with postal ratemaking, mail classification and changes in postal services], which is specifically exempted from disclosure by section 410(c) (4) of Title 39, United States Code.

As to the second item, the Board determined that, pursuant to section 552b(c)(9)(B), of title 5, United States Code, and section 7.3(i) of Title 39, Code of Federal Regulations, the discussion of this matter is exempt from the open meeting requirement of the Government in the Sunshine Act [5 U.S.C. 552b(b)], because it is likely to disclose information, the prematrure disclosure of which would likely significantly frustrate implementation of a proposed procurement action.

In accordance with section 552b(f)(1) of Title 5, United States Code, and section 7.6(a) of Title 39, Code of Federal Regulations, the General Counsel of the United States Postal Service has certified that in his opinion the meeting may properly be closed to public observation, pursuant to section 552b(c)(3), (9)(B) and (10) of Title 5 and section 410(c)(4) of Title 39, United States Code, and section 7.3(c), (i) and (j) of Title 39, Code of Federal Regulations.

Request for information about the meeting should be addressed to the Secretary for the Board, David F. Harris, at (202) 268–4800.

David F. Harris,
Secretary.

Paul J. Kemp,
Certifying officer.

Part II

Environmental Protection Agency

48 CFR Parts 1529 and 1552

Acquisition Regulation; Clarification of Cost-Reimbursable Type Contracts for Determining the Availability of State and Local Tax Exemptions; Proposed Rule

ENVIRONMENTAL PROTECTION AGENCY

48 CFR Parts 1529 and 1552

[FRL-3570-6]

Acquisition Regulation; Clarification of Cost-Reimbursable Type Contracts for Determining the Availability of State and Local Tax Exemptions

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: This action proposes to amend the Environmental Protection Agency (EPA) Acquisition Regulation (EPAAR) to clarify Contractor responsibility under cost-reimbursable type contracts for determining the availability of State and local tax exemptions and obtaining such exemptions, when available. The action is necessary to ensure Contractors do not unnecessarily pay State and local taxes for which an exemption is available. This action places the responsibility for determining the availability of an exemption on Contractors.

DATE: Written comments should be submitted not later than October 6, 1989.

ADDRESS: Comments should be addressed to Environmental Protection Agency, Procurement and Contracts Management Division (PM-214F), 401 M Street SW., Washington, DC 20460, attn: Joseph Nemargut, Jr.

FOR FURTHER INFORMATION CONTACT: Joseph Nemargut, Jr. at (202) 475-8176 (FTS 475-8176).

SUPPLEMENTARY INFORMATION:

A. Background

Under cost-reimbursable type contracts, the Environmental Protection Agency (EPA) may authorize a contractor to purchase equipment needed in performance of a contract. Generally in such cases, title to the equipment vests immediately in the EPA. State and local governments may offer contractors and subcontractors exemptions from the payment of State and local taxes, such as a State sales tax on such purchases. The availability of such exemptions depends upon the particular State or local law involved.

This rule places responsibility on contractors to determine the availability of State and local tax exemptions and obtain such exemptions, when available. Under the Federal Acquisition Regulation, the EPA may not reimburse Contractors and subcontractors for payment of State and local taxes for which exemptions were available.

B. Executive Order 12291

OMB Bulletin No. 85-7, dated December 14, 1984, establishes the requirements for Office of Management and Budget (OMB) review of agency procurement regulations. This regulation does not fall within any of the categories cited in the Bulletin requiring OMB review.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because this rule does not propose any information collection requirements, which would require the approval of OMB under 44 U.S.C. 3501, *et seq.*

D. Regulatory Flexibility Act

The EPA certifies this rule does not exert a significant economic impact on a substantial number of small entities. The rule merely clarifies contractor responsibility for determining the availability of State and local tax exemptions, and obtaining such exemptions, when available. Reimbursement for payment of State and local taxes for which exemptions are available is already prohibited under the Federal Acquisition Regulation, regardless of the size of the entity.

List of Subjects in 48 CFR Parts 1529 and 1552

Government procurement, Taxes, Solicitation provisions and Contract clauses.

For the reasons set out in the preamble, Chapter 15 of Title 48 Code of Federal Regulations is proposed to be amended as set forth below.

1. Part 1529 is added to 48 CFR Chapter 15 to read as follows:

PART 1529—TAXES

Subpart 1529.3—State and Local Taxes

1529.303 Application of State and local taxes to Government contractors and subcontractors.

Subpart 1529.4—Contract Clauses

1529.401 Domestic contracts.

1529.401-70 Cost-reimbursable type contracts.

Authority: Sec. 205(c), 63 Stat. 390, as amended, 40 U.S.C. 486(c).

Subpart 1529.3—State and Local Taxes

1529.303 Application of State and local taxes to Government contractors and subcontractors.

Contractors are responsible for determining the availability of State and local tax exemptions and obtaining such exemptions, if available, unless the Contracting Officer determines under FAR 31.205-41(b)(3) that the administrative burden outweighs the corresponding benefit. Contractors are responsible for ensuring that subcontractors also seek and obtain such exemptions, if available.

Subpart 1529.4—Contract Clauses

1529.401 Domestic contracts.

1529.401-70 Cost-reimbursable type contracts.

Contracting Officers shall insert the clause at 1552.229-70 in all solicitations and contracts when it is anticipated a cost-reimbursable type contract shall be used or a contractor or subcontractor shall be reimbursed for materials at cost.

PART 1552—[AMENDED]

2. The authority citation for Part 1552 continues to read as follows:

Authority: Sec. 205(c), 63 Stat. 390, as amended, 40 U.S.C. 486(c).

3. Part 1552 is amended by adding section 1552.229-70 to read as follows:

1552.229-70 State and local taxes.

As prescribed in 1529.401-70, insert the following clause:

State and Local Taxes (Sep 1989)

In accordance with FAR 29.303 and FAR 31.205-41, the Contractor or any subcontractor under this contract shall not be reimbursed for payment of any State and local taxes for which an exemption is available. The Contractor is responsible for determining the availability of State and local tax exemptions and obtaining such exemptions, if available. The Contractor shall include this clause, suitably modified to identify the parties, in all subcontracts at any tier. The Contractor shall notify the Contracting Officer if problems arise in obtaining State and local tax exemption. The contractor may seek a waiver by the Contracting Officer from this requirement if the administrative burden of seeking an exemption appears to outweigh the potential savings to the Government.

(End of Clause)

Dated: August 7, 1989.

John C. Chamberlin,

Director, Office of Administration.

BILLING CODE [illegible]

federal register

Wednesday
September 6, 1989

Part III

Department of Transportation

Coast Guard

33 CFR Part 151 and 46 CFR Part 25
Prevention of Pollution From Ships; Notice of Proposed Rulemaking

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 151

46 CFR Part 25

[CGD 88-002A]

RIN: 2115-AC89

Prevention of Pollution From Ships

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to require that all manned, oceangoing, U.S. ships 79 feet or more in length engaged in commerce keep records of garbage discharges. The Coast Guard is also proposing to require that all manned oceangoing U.S. ships 40 feet or more in length engaged in commerce, or equipped with galleys and berths, maintain waste management plans. Finally, the Coast Guard is proposing that all U.S. ships 26 feet or more in length prominently post informational placards for crew and passengers. The term "ship" includes fixed and floating platforms and recreational vessels. The proposed regulations would implement requirements of the "Act to Prevent Pollution from Ships," as amended. If these proposals are adopted it will facilitate compliance with the Act and reduce the amount of plastics, including synthetic fishing nets, and other ship generated garbage discharged into the marine environment.

DATES: Comments must be submitted on or before November 6, 1989.

ADDRESSES: 1. Written comments should be submitted to the Executive Secretary, Marine Safety Council (G-LRA-2/3600), U.S. Coast Guard Headquarters, Room 3600, 2100 Second Street, SW., Washington, DC, 20593-0001. Attention: CGD 88-002A. A draft Regulatory Evaluation and Environmental Assessment are available for inspection and copying at the same address. Normal office hours are between 8:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

2. Persons desiring to comment on the information collection requirements in the proposed rules should submit their comments to: Office of Management and Budget, 726 Jackson Place NW., Washington, DC 20503, Attention: Desk Officer, U.S. Coast Guard.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Carl A. Crampton, Project Manager, Office of Marine Safety, Security and Environmental Protection (G-MPS-3), (202) 267-0491, between 7:00 a.m. and 3:30 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: For the convenience of the reader, the supplementary information explaining this rulemaking is organized as indicated below:

I. Background
II. Regulatory Approach
III. Regulatory Evaluation and Environmental Impact.

Drafting Information

The principal persons involved in drafting this notice are: Lieutenant Commander Carl A. Crampton, Project Manager, Office of Marine Safety, Security and Environmental Protection and Mr. Stanley Colby, Project Counsel, Office of Chief Counsel.

I. Background

The Act to Prevent Pollution from Ships (33 U S.C. 1901 *et seq.*), hereafter referred to as the Act, requires the Secretary of the Department in which the Coast Guard is operating to administer and enforce the various Annexes of the International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 relating thereto (MARPOL 73/78), done at London on February 17, 1978. Annex V of MARPOL 73/78 is entitled "Regulations for the Prevention of Pollution by Garbage from Ships" and its purpose is to reduce the discharge of ship-generated garbage into the marine environment. A particular focus of Annex V is to prevent the discharge of plastics, including synthetic fishing nets, and other debris which persist in the marine environment. The President signed Pub. L. 100-220, including Title II, known as the the "Marine Plastic Pollution Research and Control Act of 1987" (MPPRCA) on December 29, 1987 which provides the authority to implement the requirements of Annex V of MARPOL 73/78. Annex V and the Act became effective December 31, 1988.

The Coast Guard published an interim rule in the **Federal Register** of April 28, 1989 (54 FR 18384) to implement the requirements of Annex V of MARPOL 73/78 and the Act which concern the actual disposal of plastics and other garbage. In that interim rule, 33 CFR 151.55, 151.57, and 151.59 were reserved for a subsequent rulemaking to implement the recordkeeping and informational requirements of section 2107(b) of title II by specifying which ships must develop waste management plans, maintain records of garbage discharges, or post informational placards for the crew and passengers. This notice proposes regulations to implement these requirements for U.S. ships. In developing the interim regulations published on April 28, 1989, the Coast Guard received comments from government, industry and private environmental organizations as to how the Coast Guard should implement these record keeping and informational requirements. Those comments, along with data extracted from the economic and environmental evaluations conducted for the interim rule were used to develop these proposed rules.

II. Regulatory Approach

The proposed regulations would provide the text to be inserted in the reserved sections in 33 CFR part 151, and revise 46 CFR part 25. The proposal uses terms that are currently defined in title 33, Code of Federal Regulations, § 151.05. Some of the more important definitions are repeated here as an aid to understanding this proposal.

Ship means a vessel of any type whatsoever, operating in the marine environment. This includes hydrofoils, air-cushion vehicles, submersibles, floating craft whether self-propelled or not, and fixed or floating drilling rigs and other platforms.

Oceangoing ship means a ship that—

(1) Is operated under the authority of the United States and engages in international voyages;

(2) Is operated under the authority of the United States and is certificated for ocean service;

(3) Is operated under the authority of the United States and is certificated for coastwise service beyond three miles from land;

(4) Is operated under the authority of the United States and operates at any time seaward of the outermost boundary of the territorial sea of the United States as defined in 33 CFR 2.05; or

(5) Is operated under the authority of a country other than the United States.

It should be noted that a Canadian or U.S. ship being operated exclusively on the Great Lakes of North America or their connecting and tributary waters, or exclusively on the internal waters of the United States and Canada is not an oceangoing ship.

Person means an individual, firm, public or private corporation, partnership, association, State, municipality, commission, political subdivision of a State, or any interstate body.

The proposed regulations would apply only to U.S. ships because the Act requires the Coast Guard to prescribe regulations implementing refuse record books, waste management plans and placards applicable to ships of U.S. registry, nationality, or operating under the authority of the United States. The proposed regulations apply primarily to oceangoing ships because garbage discharge within U.S. navigable waters has long been prohibited. In addition, vessels operating within 3 miles of the coast have frequent opportunity to discharge their garbage to facilities ashore. Oceangoing vessels also have greater chance for undetected illegal garbage discharge. Finally, regulating all ships would create a large and unnecessary burden on the public.

In drafting these proposed rules, the Coast Guard considered the sources and amounts of garbage produced by different categories of vessels. The consideration revealed that although a specific category of vessel can produce a great deal of garbage, the amount of garbage discharged by an individual vessel in that category may be low. These proposed rules establish a scaled approach providing lesser requirements for vessels creating smaller amounts of garbage per ship, while providing greater requirements for those vessels that produce greater amounts of garbage per ship, particularly those that may be operating in areas where indiscriminate discharge overboard could be a temptation. The Coast Guard selected categories of ships for the proposed requirements based on the estimated amount of garbage produced per ship, and the area in which the ship operates.

Section 151.55 proposes the use of a Refuse Record Book because the Coast Guard believes that manned U.S. oceangoing ships 79 feet or more in length engaged in commerce are likely to generate and discharge garbage in areas where there is little outside incentive to comply with the regulations concerning the disposal of garbage. These ships would be required to maintain the Record Book in conformance with the instructions contained in the book. Initially, the Record Books would be issued by local Coast Guard Marine Safety Offices. Following that initial issue the Record Books would be purchased from the Government Printing Office for a nominal fee. The proposed regulations would require that the Record Books be returned to the Coast Guard within 30 days of the first anniversary of the initial entry, when all space for entries has been used, when the ship changes owners, or when the ship is no longer required to keep a Record Book. The Coast Guard expects to use the books as an enforcement tool and as research material for evaluation of this regulatory program and its effect on the environment.

Proposed § 151.57 would require that all manned oceangoing U.S. ships 40 feet or more in length, engaged in commerce or equipped with galleys and berths, prepare waste management plans. The Coast Guard believes these vessels would create significant amounts of garbage per ship because they are large enough to operate in the marine environment for periods that might promote garbage discharge overboard and discourage retention aboard for land disposal. These vessels could also operate in areas where there is little outside incentive to comply with the regulations concerning the disposal of garbage. Written waste management plans would ensure that personnel responsible for the handling of ship generated garbage are aware of the garbage pollution regulations and ensure that a consistent procedure is identified for the handling of garbage aboard the ship. This is particularly desirable for commercial vessels that may have frequent crew changes.

Proposed § 151.57 would require that all U.S. vessels 26 feet in length or more post placards in a prominent location on the vessel as a reminder of the restrictions on garbage disposal and the penalties for non-compliance. Although the additional vessels covered by this section have the capacity to create large amounts of garbage as a group, without galleys and overnight accommodations there is less likelihood for extended voyages requiring the identification of procedures for the retention of garbage aboard. A simple reminder should be sufficient to prevent all but willful violations.

III. Regulatory Evaluation and Environmental Assessment

Regulatory Evaluation

The Coast Guard considers these regulations to be non-significant under DOT regulatory policies and procedures (44 FR 11034; February 26, 1979) and non-major under Executive Order 12291. A draft regulatory evaluation has been prepared and placed in the rulemaking docket. Copies of the evaluation may be inspected or copied at the address indicated in the first paragraph of ADDRESSES above.

The Coast Guard determined the implementation costs of these regulations by considering vessel types: passenger vessels, towing vessels, merchant vessels, fishing vessels, recreational vessels, vessels engaged in offshore oil and gas operations, research and other miscellaneous classes of vessels. The costs for each of the actions proposed by these regulations were calculated for each vessel type. The costs for each action were then multiplied by the estimated number of each vessel type that would be subject to the proposed regulations. The total annual projected costs are approximately $7.2 million. This burden is apportioned among the vessel types as follows: Merchant shipping, $0.16 million; passenger vessels, $3.4 million; towing vessels, $.027 million; fishing vessels, $1.08 million; recreational boating, $.87 million; vessels engaged in offshore oil and gas operations including manned fixed and floating platforms, $1.6 million; research and other miscellaneous classes of vessels, $.069 million. The primary difference in these costs is due to the population of vessels subject to the requirements.

Quantifiable and environmental benefits for the proposed regulations are similar to those benefits estimated for the interim rule. The Coast Guard believes that it is impossible to separate benefits deriving from this proposed rulemaking from benefits that were enumerated in the interim rule. Therefore, the potential net benefits of these proposed regulations are estimated to be positive.

Environmental Impact

The proposed regulations have been thoroughly reviewed by the Coast Guard and have been determined to be categorically excluded from further environmental documentation as provided for in 10 CFR 51.22(c)(3). Therefore, neither an Environmental Assessment or Environmental Impact Statement has been prepared for this Interim Rule. A Categorical Exclusion Determination has been made for these regulations and may be inspected or copied at the address indicated in the first paragraph of ADDRESSES above. The regulations are expected to have a positive but not significant environmental impact, as defined in the National Environmental Policy Act of 1969 (42 U.S.C. 4321, *et seq.*). The regulations are expected to contribute to the reduction of the occurrence of plastic as well as other ship-generated garbage in the marine environment. Since the placarding requirement will remind persons of their responsibilities under the law, and the amounts and locations of discharge of significant quantities of garbage will be recorded, the Coast Guard feels that there can be no negative environmental impact and there will be a beneficial effect, even if not quantifiable.

Regulatory Flexibility Act

A regulatory flexibility analysis was conducted in accordance with the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*) to evaluate the impact of the rule on small entities and it has been made part of the Draft Regulatory Evaluation. The Coast Guard is proposing to adopt the definition of "small business" used when the Small Business Administration is considering loans to concerns engaging in marine transportation (13 CFR 121.2 Table 2) as a definition for small entities. A concern is considered small, under this definition, if its annual receipts do not exceed $3.5 million.

The Coast Guard does not have accurate information on how many vessels would qualify as small entities. However, the Coast Guard estimates that this will affect 2,200 miscellaneous U.S. flag vessels of less than 1,000 gross tons, 14,800 fishing vessels, and 600 vessels engaged in offshore oil and gas operations that would be considered as small entities.

These regulations contain reporting or recordkeeping requirements for small entities. Most vessels which are small entities would have to comply with the requirements for placards and waste management plans but would be exempt from the requirement for Record Books. Based on a calculation that the annualized compliance costs would be less than 1.5 percent of net income or operational costs for representative entities, the Coast Guard certifies that this rule will not have a significant impact on a substantial number of small entities.

Paperwork Reduction Act

These regulations will establish information collection requirements at 33 CFR 151.55 and 33 CFR 151.57. Revisions to existing OMB paperwork approvals, which have been assigned RCS/OMB Control Numbers 2115–0025 and 2115–0120 respectively, have been submitted to the Office of Management and Budget (OMB) for this Notice of Proposed Rulemaking. Persons desiring to comment on this information collection requirement should submit their comments to the Office of Management and Budget at the address listed in the second paragraph of ADDRESSES above. It is requested that a copy of these comments also be submitted to the Coast Guard at the address shown in the first paragraph of ADDRESSES above.

Federalism Statement

This rulemaking has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the proposed rules do not have sufficient federalism implications to warrant the preparation of a federalism assessment.

Regulatory Information Number (RIN)

A regulatory information number has been assigned to this regulatory action and it is listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center (RISC) publishes the Unified Agenda in April and October of each year. The RIN number listed at the heading of this document can be used to cross reference this action with the Unified Agenda.

List of Subjects

33 CFR Part 151

Oil pollution, Reporting and recordkeeping requirements, Water pollution control.

In consideration of the preceding, it is proposed to amend part 151 of title 33, Code of Federal Regulations, as follows:

PART 151—[AMENDED]

1. The authority citation for subpart A of part 151 continues to read as follows;

Authority: 33 U.S.C. 1321(j)(1)(C) and 1903(b); E.O. 11735, 3 CFR, 1971–1975 Comp., p. 793; 49 CFR 1.46.

2. By amending § 151.05 by adding the definition for the term "Act" in the proper alphabetical sequence to read as follows:

§ 151.05 Definitions.

* * * * *

"Act" means the Act to Prevent Pollution from Ships, as amended (33 U.S.C. 1901, *et seq.*).

* * * * *

3. By adding § 151.55 to read as follows:

§ 151.55 Recordkeeping requirements.

(a) This section applies to each manned oceangoing ship 79 feet or more in length engaged in commerce that is documented under the laws of the United States or numbered by a state, and to each manned fixed or floating platform subject to the jurisdiction of the United States

(b) Each person who is in charge of a vessel described in paragraph (a) shall ensure that a Coast Guard Refuse Record Book, available for purchase from the Government Printing Office is—

(1) Maintained on board the ship;

(2) Completed in accordance with the instructions in the Refuse Record Book each time garbage is—

(i) Discharged overboard in accordance of this part;

(ii) Discharged overboard in accordance with the emergency provisions of this part;

(iii) Discharged overboard for some other reason;

(iv) Discharged to another vessel;

(v) Discharged to a reception facility in a port or terminal; or

(vi) Incinerated on board the vessel; and

(3) Returned to the Commandant (G–MPS), U.S. Coast Guard, 2100 2nd Street SW., Washington, DC 20593–0001 within 30 days of—

(i) The first anniversary date of the initial entry;

(ii) The date all space for entries has been used;

(iii) The date the ship on which the Record Book is being used changes owners; or

(iv) The date the ship is no longer required to keep a Record Book.

4. By adding § 151.57 to read as follows:

§ 151.57 Waste management plans.

(a) This section applies to each manned oceangoing ship 40 feet or more in length that is documented under the laws of the United States or numbered by a state, engaged in commerce or equipped with a galley and berthing, and to each manned fixed or floating platform subject to the jurisdiction of the United States.

(b) Each person in charge of a ship described in paragraph (a) shall ensure that it does not operate unless a written waste management plan meeting paragraph (c) of this section is on board the ship and that each person handling garbage follows the plan.

(c) Each waste management plan required under paragraph (a) of this section must—

(1) Provide for the discharge of garbage by means that meet Annex V of MARPOL 73/78, the Act, and this subpart;

(2) Describe procedures for collecting processing, storing, and discharging the vessel's garbage; and

(3) Designate the person who is in charge of the ship.

5. By adding § 151.59 to read as follows:

§ 151.59 Placards.

(a) Each person who is in charge of a U.S. ship under this part, that is 26 feet in length or more, shall display in a prominent location so that passengers and crew can read its message, a placard that—

(1) Is at least 9 inches wide by 4 inches high with lettering no smaller than ⅛ of an inch in height;

(2) Is made of a durable material; and

(3) Notifies passengers and crew that the—

(i) Discharge of any plastic into any waters is prohibited;

(ii) Discharge of all garbage is prohibited within 3 miles from the seacoast and in the navigable waters of the U.S.;

(iii) Discharge of dunnage, lining, and packing materials that float is prohibited within 25 miles of the seacoast;

(iv) Other garbage may be discharged beyond 12 nautical miles from the seacoast;

(v) Other garbage ground to less than 1 inch may be discharged beyond 3 nautical miles from the seacoast;

(vi) Violation of these requirements may result in civil penalty of up to $25,000, fine and imprisonment.

List of Subjects in 46 CFR Part 25

Fire prevention, Marine safety.

It is proposed to amend chapter I of title 46, Code of Federal Regulations as follows:

PART 25—[AMENDED]

6. The authority citation to part 25 continues to read as follows:

Authority: 33 U.S.C. 1903(b), 46 U.S.C. 3306, 4104, and 4302; 49 CFR 1.46.

7. By revising § 25.20–1 to read as follows:

§ 25.20–1 Criteria.

Each uninspected vessel must meet the garbage discharge, record keeping, waste management plan, and placard requirements of 33 CFR part 151.

Note: The Act to Prevent Pollution from Ships, as amended (33 U.S.C. 1901–1911) (the Act), prohibits the discharge of all plastics from vessels, limits discharges of other types of garbage in U.S. waters, and requires certain U.S. vessels to maintain a garbage record book, to operate under a waste management plan, and to have placards outlining provisions of the Act. See 33 CFR 151.05 for definition of "plastic" and "garbage" and 33 CFR 151.55, 151.57, and 151.59 for the record keeping, waste management plan, and placard requirements.

Dated: August 11, 1989.

J.D. Sipes,

Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Safety, Security and Environmental Protection.

LIST OF PUBLIC LAWS

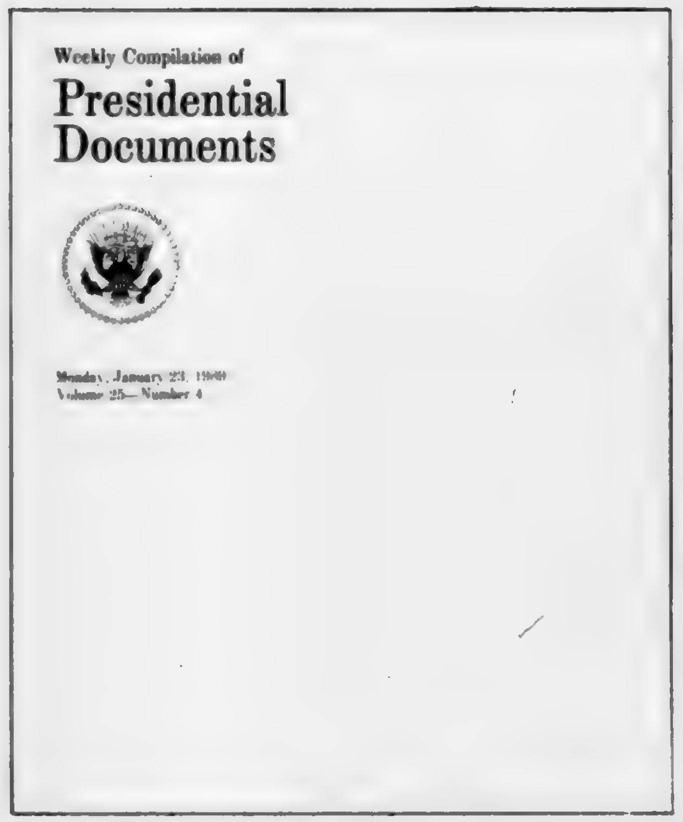
Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last List August 22, 1989

The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

Administration of George Bush



Weekly Compilation of
Presidential
Documents

Monday, January 23, 1989
Volume 25—Number 4

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published periodically. Other features include lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by the Office of the Federal Register, National Archives and Records Administration.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC, and Atlanta, GA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 54 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Title 3—

The President

Presidential Determination No. 89-25 of August 28, 1989

Extension of the Exercise of Certain Authorities Under the Trading With the Enemy Act

Memorandum for the Secretary of State, the Secretary of the Treasury

Under Section 101(b) of Public Law 95–223 (91 Stat. 1625; 50 U.S.C. App. 5(b) note), and a determination made by former President Reagan on September 8, 1988 (53 FR 35289), the exercise of certain authorities under the Trading With the Enemy Act is scheduled to terminate on September 14, 1989.

I hereby determine that the extension for one year of the exercise of those authorities with respect to the applicable countries is in the national interest of the United States.

Therefore, pursuant to the authority vested in me by Section 101(b) of Public Law 95–223, I extend for one year, until September 14, 1990, the exercise of those authorities with respect to countries affected by:

(1) the Foreign Assets Control Regulations, 31 CFR Part 500;

(2) the Transaction Control Regulations, 31 CFR Part 505;

(3) the Cuban Assets Control Regulations, 31 CFR Part 515; and

(4) the Foreign Funds Control Regulations, 31 CFR Part 520.

The Secretary of the Treasury is directed to publish this Determination in the **Federal Register.**

George Bush

Rules and Regulations

Federal Register
Vol. 54, No. 172
Thursday, September 7, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 302

Procedures for Selecting Candidates for Appointment in the Excepted Service

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management (OPM) is adopting as final its interim regulations governing procedures used to select candidates for appointments in the excepted service to clarify the rights of applicants entitled to 10-point veterans preference when numerical scores are not assigned. The regulations require that applicants entitled to 10 point preference on a basis other than compensable disability will be referred after compensably disabled 10-point preference eligibles but before applicants entitled to 5-point veterans preference.

EFFECTIVE DATE: October 10, 1989.

FOR FURTHER INFORMATION CONTACT: Tracy Spencer, (202) 632-6817.

SUPPLEMENTARY INFORMATION: On May 9, 1989 (54 FR 19869), OPM issued interim regulations revising final regulations issued September 13, 1988 (53 FR 35291), which permitted agencies to refer candidates for excepted appointments in order of veterans preference without other ranking. Under the unranked referral procedures, applicants eligible for 10-point veterans preference based on a compensable service-connected disability of 10 percent or more were to be referred first (unless the position is a scientific or professional one at grade GS-9 or above), followed by other veteran preference eligibles and, last, by applicants not eligible for veterans preference.

The interim regulations revised this order by providing for applicants entitled to 10-point veterans preference under 5 U.S.C. 2108(3)(D) through (G) to be referred in a separate category following compensably disabled veterans entitled to 10-point preference under 5 U.S.C. 2108(3)(C), but ahead of eligibles entitled to 5-point preference under 5 U.S.C. 2108(3) (A) and (B). Selections must be made from the highest available preference category as long as at least three candidates remain in that category. This revision ensures that eligibles in each preference category receive the full preference provided by law.

We received no comments on the interim regulations.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because the regulation affects only the procedures used to appoint certain Federal employees.

List of Subjects in 5 CFR Part 302

Administrative practice and procedures, Government employees.

Office of Personnel Management.
Constance Berry Newman,
Director.

PART 302—[AMENDED]

Accordingly, OPM is adopting its interim rule amending 5 CFR part 302 published in the **Federal Register** (54 FR 19869, May 9, 1989) as a final rule without change.

(Authority: 5 U.S.C. 1302, 3301, 3302, 8151; E.O. 10577 (3 CFR 1954–1958, Comp., p. 218); § 302.105 also issued under 5 U.S.C. 1104; Pub. L. 95-454, sec. 3(5); § 302.501 also issued under 5 U.S.C. 7701 et seq.)

[FR Doc. 89-21036 Filed 9-6-89; 8:45 am]

BILLING CODE 6325-01-M

---

5 CFR Part 315

Noncompetitive Appointments of Former Incumbents of Positions Brought into the Competitive Service; Technical Amendment

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management (OPM) is amending its regulations permitting noncompetitive appointment based on former incumbency of a position brought into the competitive service to cover former employees entitled to restoration following a compensable injury. Currently, the regulations refer only to former employees entitled to restoration following active military service.

EFFECTIVE DATE: September 7, 1989.

FOR FURTHER INFORMATION CONTACT: Tracy E. Spencer, (202) 632-6817.

SUPPLEMENTARY INFORMATION: By law (5 U.S.C. 8151(b)(1)), an employee who is found by the Department of Labor to be fully recovered from a compensable on-the-job injury or disability within 1 year after the date compensation begins, or from the time compensable disability recurs if the recurrence begins after the injured employee resumes regular full-time employment with the United States, is entitled to be restored to his or her former position, or an equivalent position, and to receive all attendant rights which he or she would have acquired in the former position but for the injury. OPM has issued regulations implementing this statutory entitlement for employees in both the competitive and the excepted service. It has come to our attention, however, that the langauge of the part 315 regulations would not clearly cover an eligible employee whose position was brought into the competitive service while the employee was off the rolls as a result of a compensable injury.

When positions are brought from the excepted into the competitive service, employees occupying those positions under nontemporary appointment may be retained and converted to career or career-conditional appointments. Since an employee restored under 5 U.S.C. 8151 is entitled to acquire the tenure he or she would have gained by remaining on the job, such an employee whose position has been brought into the competitive service is entitled to be restored in a competitive appointment. However, the applicable regulations in 5 CFR part 353 provide for restoration in a position of like status to that previously held. While this language, together with the language of the law, could be read as permitting restoration in a competitive appointment when the status of the position itself has changed, the existing part 315 regulation does not provide explicit authority for the noncompetitive appointment of an employee whose previous service was under excepted appointments. To provide such explicit authority, OPM is amending the regulation which permits noncompetitive appointment based on former incumbency of a position brought into the competitive service to afford the same benefit to persons entitled to restoration following compensable injury as is already afforded to those entitled to restoration following military duty.

OPM is also amending § 315.607, which authorizes noncompetitive appointment of present and former Peace Corps personnel, to remove a duplicate paragraph.

Waiver of Notice of Proposed Rulemaking and 30-day Delay of Effective Date

Under 5 U.S.C. 553(b)(3)(B) and (d)(3), I find that good cause exists for waiving the general notice of proposed rulemaking and for making the amendment effective in less than 30 days. The regulations reflect a statutory entitlement that is already in effect.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because the regulation affects only the procedures used to appoint certain Federal employees.

List of Subjects in 5 CFR Part 315

Administrative practice and procedures, Government employees.

Office of Personnel Management.

Constance Berry Newman,

Director.

Accordingly, OPM is amending 5 CFR Part 315 as follows:

PART 315—[AMENDED]

1. The authority citation for Part 315 is revised to read as follows:

Authority: 5 U.S.C. 1302, 3301, and 3302; E.O. 10577, 3 CFR 1954–1958 Comp., p. 218; §§ 315.601 and 315.609 also issued under 22 U.S.C. 3651 and 3652; §§ 315.602 and 315.604 also issued under 5 U.S.C. 1104, Pub. L. 95–454, sec. 3(5); § 315.603 also issued under 5 U.S.C. 8151, Pub. L. 93–416; § 315.605 also issued under E.O. 12034, 43 FR 1917, Jan. 13, 1978; § 315.606 also issued under E.O. 11219, 3 CFR 1964–1965 Comp., p. 303; § 315.607 also issued under 22 U.S.C. 2506, 93 Stat. 371, E.O. 12137, 22 U.S.C. 2506, 94 Stat. 2158; § 315.608 also issued under E.O. 12362, 47 FR 21231; § 315.610 also issued under 5 U.S.C. 3304(d), Pub. L. 99–586; § 315.710 also issued under E.O. 12596, 52 FR 17537; Subpart I also issued under 5 U.S.C. 3321, E.O. 12107.

2. Section 315.603 is amended by adding a new paragraph (a)(3) to read as follows:

§ 315.603 Appointment based on former incumbency of a position brought into the competitive service.

(a) * * *

(3) *Employee recovered from compensable injury.* An agency may appoint a former incumbent of a permanent excepted position who was serving under an appointment not limited to 1 year or less, when the position has been brought into the competitive service *and* when:

(i) The employee is entitled to restoration based on recovery from compensable injury in accordance with 5 U.S.C. 8151 and part 353;

(ii) The employee's position was brought into the competitive service either before the employee's separation for compensable injury or during his or her period of statutory restoration rights following such injury, and the employee's separation for compensable injury occurred before the end of the time limits set forth in § 315.701(c);

(iii) the agency initiates the appointment within 6 months after cessation of compensation; and

(iv) The employee performed 6 months of statisfactory service immediately before the date his or her position was brought into the competitive service in the civilian executive branch of the Government, unless OPM has excepted his or her particular type of case from this requirement by a provision of the Federal Personnel Manual.

§ 315.603 [Amended]

3. Section 315.603 is amended by revising paragraph (d)(2) to read as follows:

(d) * * *

(2) A person appointed under paragraph (a)(2) or (a)(3) of this section acquires a competitive status automatically on completion of probation.

§ 315.607 [Amended]

4. Section 315.607 is amended by removing paragraph (b)(3).

[FR Doc. 89–21037 filed 9–6–89; 8:45 am]

BILLING CODE 6325-01-M

---

5 CFR Parts 872 and 873

RIN 3206–AD75

Additional Optional Life Insurance and Family Optional Life Insurance under FEGLI

AGENCY: U.S. Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management (OPM) is adopting as final its interim regulations issued on April 5, 1989, concerning the Federal Employees' Group Life Insurance (FEGLI) Program. The interim regulations: (1) Eliminated a requirement to be under age 36 to cancel a declination of additional optional life insurance; (2) clarified to whom benefits shall be paid on family optional insurance when an employee predeceases a covered family member and the family member dies within 31 days after the death of the insured; and (3) eliminated a requirement to be in a pay and duty status for the cancellation of a declination of family optional insurance to become effective.

EFFECTIVE DATE: October 10, 1989.

FOR FURTHER INFORMATION CONTACT: Bill Smith, (202) 632–4634.

SUPPLEMENTARY INFORMATION: On April 5, 1989, OPM published interim regulations in the **Federal Register** (54 FR 13665) implementing the three changes noted above. OPM received two comments from interested parties, one from an employee organization and one from an individual. The employee organization supported the changes. The individual respondent recommended that employees who missed out on the opportunity to obtain additional coverage due to the age restriction be afforded a one time opportunity to enroll for a 60 day period after the final regulations are published. The 60 day period would allow employees who have acquired a spouse or children since the last FEGLI open season an opportunity to enroll. This recommendation can not be adopted. Unless there are legislatively-imposed effective dates, regulatory provisions are effective prospectively. In making this change, OPM recognized the need to put it into effect at the earliest possible date, and accomplished that end by publishing these changes as interim

rules effective immediately upon publication (i.e., April 5, 1989).

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they primarily affect Federal employees and their family members.

List of Subjects in 5 CFR Parts 872 and 873

Administrative practice and procedure, Government employees, Life insurance.

Office of Personnel Management.

Constance B. Newman,

Director.

PARTS 872 and 873—[AMENDED]

1. The authority citation for Parts 872 and 873 continues to read as follows:

Authority: 5 U.S.C. 8716.

2. The interim regulations amending 5 CFR 872.205, 873.102 and 873.205, that were published at 54 FR 13665 on April 5, 1989, are adopted as final rules without change.

BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Part 1980

Guaranteed Farmer Program Loan

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule, correction.

SUMMARY: The Farmers Home Administration (FmHA) corrects a final rule published January 13, 1989 (54 FR 1534) involving subpart B of part 1980 of its regulations. The title of Attachment 2 of Exhibit A to subpart B of part 1980 was included in the final rule but not the designation as Attachment 2. Attachment 3 of Exhibit A to subpart B of part 1980 was inadvertently omitted in the final rule. The intended effect of this action is to correct this error.

EFFECTIVE DATE: September 7, 1989.

FOR FURTHER INFORMATION CONTACT: Ann B. Dill, Guaranteed Loan Making Branch, Farmers Home Administration, USDA, Room 5440, Washington, DC 20250. Telephone: (202) 382–1186.

SUPPLEMENTARY INFORMATION: On January 13, 1989, FmHA published a final rule to implement changes to its guaranteed farmer program loan regulations necessary to implement the Agricultural Credit Act of 1987. Subpart B of part 1980 was republished in its entirety. Exhibit A to 7 CFR part 1980, subpart B contains the Approved Lender Program for guaranteed operating, farm ownership and soil and water loans. When the final rule was published, an error was made in the heading of Attachment 2. The title of the Attachment was included but not the designation as Attachment 2. An error was also made omitting the existing Attachment 3 of Exhibit A to subpart B of part 1980. This attachment is the Approved Lender Program Application for Guarantee, and is necessary to an orderly operation of that program.

The following correction is made to 54 FR on pages 1589 and 1592, respectively, dated January 13, 1989:

PART 1980—GENERAL

1. The authority citation for part 1980 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23 and 2.70.

Subpart B—Farmer Program Loans

Exhibit A—[Amended]

2. Exhibit A, the title of Attachment 2—Farmers Home Administration Approved Lender Program (ALP) is changed as follows:

Attachment 2—Farmers Home Administration Approved Lender Program (ALP)

Lender's Agreement for Operating Line of Credit Guarantee (Contract of Guarantee Cases)

3. Exhibit A, Attachment 3—Farmers Home Administration Approved Lender Program (ALP) is added to read as follows:

Attachment 3

TO: County Supervisor, FmHA

SUBJECT: Request for Loan Note Guarantee under Approved Lender Agreement Applicable to Loan Note Guarantee Cases (Attachment 1). Principal Amount of Loan $________

AND/OR

Request for Line of Credit Guarantee under Approved Lender Agreement Applicable to Contract of Guarantee Cases (Attachment 2).

Line of Credit Ceiling $________.

Principal Amount of Initial Advance $________

Lender Agreement Dated ________.

Lender IRS I.D. No. ________

Request is made for issuance of a guarantee(s) in the following case.

Applicant's Name ________________

Address________________________

Social Security or IRS Tax No.________ County________ State________

Percent Guarantee Requested________%

Interest rate to borrower________% If variable, state method determined and frequency of adjustment

Specific amounts and purposes of loan/line of credit are as follows:

Proposed repayment terms: ________________

Proposed closing date if request is approved:

Special or unique conditions or problems:

Applicant's Financial Condition:

New Worth $________ ________________

Current [1]			
Intermediate [2]			
Long Term [3]			
Totals			

[1] Current: Cash savings, marketable bonds, receivables, 60 day sales of goods available within 60 days.

[2] Intermediate: Machinery, livestock, retirement accounts, cash value life insurance, securities household goods, receivable 60 days to 1 year.

[3] Long term: Real estate, contracts and notes receivable amount beyond current year.

Ratio Calculation from Financial Information and Operating Plans:

Total Assets of $________ divided by Total Liabilities ________ = Net Capital Ratio ________

Annual Cash Operating Expenses $________ divided by Gross Income $________ = Operating Ratio ________

Net Income $________ divided by Total Assets $________ = Profit to Assets ________

Debt Repayment $________ divided by Gross Income $________ = Debt Repayment ________

Security Proposed:

Item	Value	Prior liens (if any)	Equity value
Totals			

Briefly list any special conditions and narrate security accounting, reporting limitations and supervision etc., contained in proposed loan/line of credit agreement. See 7 CFR part 1980, subpart B, § 1980.113(d)(7)

The applicant's total farming operation is as follows: (Include total acres owned and/or leased broken down to use and indicate irrigated, double crop, etc., if any. Includes totals of all livestock owned and/or tended and describe operation purchasing, marketing, breeding details. Use attachments if necessary.)

The undersigned certifies that:

1. The information contained in this request is correct and that a complete application containing all required items described in § 1980.113(d) of part 1980, subpart B are on file and may be examined by FmHA at any time during regular business hours prior to or after FmHA responds to this request for a loan note guarantee or contract of guarantee.
2. Before a Loan Note Guarantee or Contract of Guarantee is issued by FmHA, the lender will certify to conditions in § 1980.60 of 7 CFR part 1980, Subpart A.
3. The lender will provide a Guarantee Loan Closing Report on Form FmHA 1980–19 and a check for the amount of the guarantee fee at the time the Loan Note Guarantee or Contract of Guarantee is issued.
4. This proposed loan/line of credit is considered sound, will be fully secured and is within the borrower's repayment ability.
5. All applicable requirements have been or will be met.
6. The loan or advance under the line of credit cannot be made without an FmHA guarantee.

BILLING CODE 3410-07-M

Packers and Stockyards Administration

9 CFR Part 201

Technical Amendment

AGENCY: Packers and Stockyards Administration, USDA.

ACTION: Final rule—technical amendment.

SUMMARY: The Packers and Stockyards Administration is making two corrections to the control numbers assigned by the Director of the Office of Management and Budget upon approval of the reporting and recordkeeping requirements, and deleting a reference to a regulation no longer in effect.

EFFECTIVE DATE: September 7, 1989.

FOR FURTHER INFORMATION CONTACT: Calvin W. Watkins, Deputy Administrator, Packers and Stockyards Administration, U.S. Department of Agriculture, Room 3039 South Building, Washington, DC 20250–2800, (202) 447–7063.

SUPPLEMENTARY INFORMATION: This merely corrects some errors and does not impose any requirements on the affected public, therefore:

(a) It is not a "major rule" as in E.O. 12291 section 1(b);

(b) It will not have a significant economic impact on a substantial number of small entities as in 5 U.S.C. 605;

(c) Notice and public procedure on it are unnecessary as in 5 U.S.C. 553(b)(B) so notice of proposed rulemaking is not required by 5 U.S.C. 553(b); and

(d) Good cause is hereby found for making it effective in less than 30 days as in 5 U.S.C. 553(d)(3).

List of Subjects in 9 CFR Part 201

Reporting and recordkeeping requirements, Packers, Stockyards, Dealers and market agencies.

Accordingly, part 201, Chapter II of title 9 of the Code of Federal Regulations is amended as set forth below:

PART 201—REGULATIONS UNDER THE PACKERS AND STOCKYARDS ACT

1. The authority citation for part 201 continues to read as follows:

Authority: 7 U.S.C. 222, 228(a), 7 CFR 2.17(e), 2.56.

2. Section 201.10 is amended by changing the Office of Management and Budget control number to "0590–0001".

§ 201.10 Requirements and procedures.

* * * * *

(Approved by the Office of Management and Budget under control number 0590–0001)

3. Section 201.99 is amended by changing the Office of Management and Budget control number to "0590–0001".

§ 201.99 Purchase of livestock by packers on a carcass grade, carcass weight, or carcass grade and weight basis.

* * * * *

(Approved by the Office of Management and Budget under control number 0590–0001)

4. Section 201.200(c) is amended by removing ", or by § 201.68 relating to financing packers by dealers or vice versa." As revised, paragraph (c) reads as follows:

§ 201.200 Sale of livestock to a packer on credit.

* * * * *

(c) The provisions of this section shall not be construed to permit any transaction prohibited by § 201.61(a) relating to financing by market agencies selling on a commission basis.

Done at Washington, DC, this 1st day of September, 1989.

B.H. (Bill) Jones,
Administrator, Packers and Stockyards Administration.

FARM CREDIT ADMINISTRATION

12 CFR Part 611

RIN 3052–AA00

Organization; Correction

AGENCY: Farm Credit Administration.

ACTION: Final rule; correction.

SUMMARY: On December 15, 1988, the Farm Credit Administration (FCA) published a final rule which amended the regulation relating to organizational authorities of Farm Credit institutions (53 FR 50381). On January 23, 1989, a correction to that final rule was published in the **Federal Register** (54 FR 2994). The FCA is revising the correction document to remove a word that was incorrectly added.

EFFECTIVE DATE: February 22, 1989.

FOR FURTHER INFORMATION CONTACT: Gary L. Norton, Senior Attorney, Office of General Counsel, Farm Credit Administration, McLean, Virginia 22102–5090, (703) 883–4020, TDD (703) 883–4444.

SUPPLEMENTARY INFORMATION: In the January 23, 1989 correction to the final rule, an error was inadvertently made in 12 CFR 611.310.

PART 611—ORGANIZATION

1. On page 2994, third column, the word "director," was incorrectly added in § 611.310(c). Paragraph (c) is corrected to read as follows:

Subpart C—Election of Directors

§ 611.310 Eligibility for membership on bank and association boards and subsequent employment.

* * * * *

(c) No bank director shall, within 1 year after the date when he or she ceases to be a member of the board, serve as a salaried officer or employee of such bank, or any association with which the bank has a discount or agent relationship.

* * * * *

Dated: August 31, 1989.

David A. Hill,
Secretary, Farm Credit Administration Board.

BILLING CODE 6705-01-M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 120

RIN 3245–AB86

Business Loan Policy

AGENCY: Small Business Administration, (SBA).

ACTION: Final rule.

SUMMARY: This rule implements section 102 of Public Law 100–590 (102 Stat. 2989), enacted November 3, 1988 (1988 legislation), which authorizes SBA certified and preferred participating lenders to retain one-half of the guaranty fee payable to the SBA on loans of $50,000 or less.

EFFECTIVE DATE: September 7, 1989.

ADDRESSES: For further information, contact Charles R. Hertzberg, Deputy Associate Administrator for Financial Assistance, Small Business Administration, 1441 L Street NW., Washington, DC 20416. Telephone (202) 653–6574.

SUPPLEMENTARY INFORMATION: On March 6, 1989, SBA published in the **Federal Register** (54 FR 9233), a notice of proposed rulemaking to implement section 102 of the 1988 legislation. The Agency received eight written comments all of which supported the rule as proposed.

The SBA charges a guaranty fee for a participating lender to obtain the SBA guaranty. On loans with maturities in excess of twelve months, the guaranty fee is two percent of the amount that SBA guarantees. Such fee is paid by the lender to SBA, but the lender may pass that charge on to the small business concern borrower. This is true whether the loan being guaranteed by SBA is a regular loan, a loan made under the Certified Lenders Program (CLP) (under which a lender is promised a three-day turnaround review by SBA), or a loan made under the Preferred Lenders Program (PLP) (under which the loan may be approved by a lender without prior processing review by SBA). Under this final rule, any certified or preferred lender which makes a loan of $50,000 or less, with a maturity in excess of twelve months, could retain one-half of the guaranty fee payable to the SBA.

One commenter suggested that the lender be given an option not to charge the borrower the one-half of the guaranty fee which the lender is permitted to keep under the 1988 legislation. The commenter stated that this could be a useful marketing tool for the lender in competitive markets and would be of assistance to the borrower. SBA has no objection to this proposal, and neither the statute nor the regulation prohibits this procedure. The purpose of the 1988 legislation is to encourage a lender to make small SBA guaranteed loans, and this may be effected by allowing the lender not to pay to SBA the full amount of the guaranty fee. Section 7(a)(18) of the Small Business Act (15 U.S.C. 636(a)(18)) places the obligation on the lender to pay the guaranty fee to SBA. That section then authorizes the lender, if it chooses, to be reimbursed by the borrower. If the lender elects not to charge the borrower for all or any part of the guaranty fee, that is permissible. The borrower which is not charged for the guaranty fee is released from an expense which inures to its benefit. The 1988 legislation apparently presumes that a lender ordinarily chooses to charge the borrower for the full amount of the guaranty fee payable to SBA, but that need not be the situation in every case. The thrust of the 1988 legislation is to authorize SBA to collect from the lender only one-half of the guaranty fee attributable to a loan of $50,000 or less. If a lender chooses to absorb the other half of the guaranty fee, to the borrower's benefit, SBA has no objection since the Agency is still receiving the mandated one-half of the guaranty fee.

A commenter recommended that the size of loan eligible for this program be increased from $50,000 to $100,000. Such an increase would require additional legislation. Accordingly, SBA is precluded from adopting this suggestion.

Another suggestion was to allow financial institutions to use their own standard closing documents. SBA has not adopted this recommendation. SBA's forms have been interpreted in many court decisions over the years, which permits a degree of certainty as to their meaning. This enables SBA to provide financial assistance to small business concerns on a nationwide basis without fear of adverse legal implications.

The Agency has reconsidered its earlier decision on application forms for these small loans. Accordingly, at an early date, SBA will issue new and simplified application forms for loans of $50,000 or less. Until such new forms are approved, printed, and circulated, SBA personnel are authorized to continue to use existing forms.

For purposes of the Regulatory Flexibility Act (5 U.S.C. 605(b)), SBA certifies that this final rule will not have a significant impact on a substantial number of small entities because recent history indicates to SBA that a large number of loans $50,000 or less will not be made.

SBA certifies that this final rule does not constitute a major rule for the purposes of Executive Order 12291, since the change is not likely to result in an annual effect on the economy of $100 million or more because it is not anticipated that such a large number of $50,000 loans will be made. In 1986, the average SBA loan was $150,000, for 1987 it was $160,000, and for 1988 it was $161,000.

The final rule would not impose additional reporting or recordkeeping requirements which would be subject to the Paperwork Reduction Act, 44 U.S.C. chapter 35.

The final rule will not have federalism implications warranting the preparation of a Federal Assessment in accordance with Executive Order 12612.

The revision and amendment sequences were misstated for the final regulation published on May 30, 1989 (54 FR 22977), amending part 120 of SBA regulations (13 CFR part 120). The correct sequence is revision 7, amendment 5.

List of Subjects in 13 CFR Part 120

Loan programs/business.

Pursuant to the authority contained in section 5(b)(6) of the Small Business Act (15 U.S.C. 634(b)(6)) and section 136 of Public Law 100–590 (102 Stat. 2989), SBA hereby amends part 120, chapter I, title 13, Code of Federal Regulations, as follows:

Part 120—Business Loan Policy

1. The authority citation for part 120 continues to read as follows:

Authority: 15 U.S.C. 634(b)(6) and 636 (a) and (h).

2. Section 120.104–1 is amended by adding a new Paragraph (f) to read as follows:

§ 120.104–1 Guaranty fees.

* * * * *

(f) *Retention of Guaranty Fee for Small Loans.* When a Certified Lender or Preferred Lender makes a loan of $50,000 or less, with a maturity in excess of twelve months, it shall pay SBA an amount equal to one percent of the amount of the deferred participation share of such loan.

Dated: August 16, 1989.

Susan Engeleiter,

Administrator.

BILLING CODE 8025-01-M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 175

[T.D. 89–85]

Tariff Classification of Scroll Cut Tin Free Steel Sheet

AGENCY: Customs Service, Department of the Treasury.

ACTION: Final interpretative rule.

SUMMARY: This document gives notice of a change in the tariff classification of scroll-cut tin free steel sheet, cut to length, and scroll-cut tin free steel sheet which has been laquered, painted or varnished (but not decorated, designed or otherwise finished). Customs previously published notice of the proposed change in classification and invited comments.

This merchandise has heretofore been classified under the provision for other articles of iron or steel, not coated or plated with precious metal, in item 657.25, Tariff Schedules of the United States (TSUS). The column 1 rate of duty under item 657.25, TSUS, is 5.7 percent ad valorem. Merchandise so classified is not subject to import restrictions imposed by Voluntary Restraint Agreements or VRAs.

The merchanise in question will now be classified under the provision for plates, sheets, and strip, of iron or steel, whether or not cut, pressed, or stamped to nonrectangular shape, if electrolytically coated or plated with base metal other than tin, lead, or zinc, in item 609.17, TSUS. The column 1 rate of duty under item 609.17, TSUS, is 5.7 percent ad valorem. Merchandise so classified is subject to VRAs.

EFFECTIVE DATE: This decision will be effective as to merchandise entered, or withdrawn from warehouse for consumption, on or after October 20, 1989.

FOR FURTHER INFORMATION CONTACT: James A. Seal, Commercial Rulings Division, Office of Regulations and Rulings (202) 566–8181.

SUPPLEMENTARY INFORMATION:

Background

In response to a petition received on behalf of Bethlehem Steel Corporation under the authority of section 516, Tariff Act of 1930, as amended (19 U.S.C. 1516), Customs agreed to review the classification of scroll-cut, tin free steel sheet, and tin free steel sheet which has been scroll-cut and also lacquered, painted or varnished (but not decorated, designed or finished). Customs published notice in the Federal Register on April 18, 1989 (54 FR 15440), that the classification in question was under review and invited public comments on the proposed change. Five (5) comments were received in response to the notice.

The merchandise affected by this decision is tin free steel sheet, which is black plate (*i.e.*, cold-rolled steel sheets, not coated, in thicknesses ranging from 0.0055 inches to 0.0149), electrolytically coated with metallic chromium oxide, and cut to a nonrectangular shape by scroll cutting. Scroll cutting involves the shearing of each end of a sheet to form a pattern of interlocking notches which fit into one another. The sheet may then be lacquered, painted, or varnished. These sheets are suitable for use in making cans and can ends for beverages and other food products.

Effective January 1, 1989, the Harmonized Tariff Schedule of the United States Annotated (HTSUSA), replaced the Tariff Schedules of the United States (TSUS) as the tariff code of this country. However, because the VRAs will continue in effect through September of 1989, and a product's coverage under a particular Arrangement will depend on how it is classified under the TSUS, it is necessary, for purposes of the VRAs, to resolve this issue under the TSUS.

In a letter dated March 13, 1978 (056338), Customs ruled that scroll-cut electrolytic tin plate or sheet was classifiable under the provision for articles of iron or steel, not coated or plated with precious metal, of tin plate, under item 657.15, TSUS, if of tin plate. If of iron or steel without actual tin plating, classification was held to be under the provision for other articles of iron or steel, in item 657.20, TSUS. The scroll-cut sheets in this case were found to be articles or products, rather than sheets. By letter dated September 11, 1978 (057211), Customs ruled that scroll-cut tinplate sheets were classifiable in item 657.15, TSUS. The ruling noted that the scroll pattern was designed to serve a specific purpose which takes the tinplate beyond the description of a basic material. Finally, a letter dated April 23, 1986 (077760), cited rulings 056338 and 057211, and confirmed that scroll-cut tin free steel sheets sprayed with an epoxy phenolic lacquer, then heated and dried, were classifiable in item 657.25, TSUS.

Summary of Comments

Of the five (5) comments received, three (3) favored the proposed change and two (2) opposed the change. Those favoring the change made the following arguments:

(1) The merchandise is encompassed by item 609.17, TSUS, because it is a steel sheet for purposes of the TSUS, is electrolytically coated other than with tin, lead, or zinc, and is cut to a nonrectangular shape by scroll cutting;

(2) Scroll cutting is not an additional process that advances the merchandise beyond the status of a basic shape or form because the steel sheet is still within the product description contained in item 609.17;

(3) The provision in item 609.17, TSUS, is relatively more specific than the provision in item 657.25, TSUS, for articles of iron or steel; and

(4) Conclusions reached in some of the existing rulings on this merchandise are based on incorrect statements of fact.

Those opposing the proposed change in classification made the following arguments:

(1) The classification of scroll-cut tin free steel sheet is well known in the importing community, as evidenced by the cited Customs rulings;

(2) There has been no change in the way the merchandise is manufactured that might serve as a basis for changing its classification; and

(3) Because scroll-cut tin free steel sheet has previously been excluded from coverage under the VRAs, any proposal to change the tariff status of this merchandise should be addressed at negotiating sessions with an individual country or countries.

Analysis of Comments

Customs agrees with the comments submitted in favor of the proposed change in classification. The merchandise in question satisfies each of the particular requirements necessary for classification in item 609.17, TSUS. With respect to scroll cutting, Customs believes that no step in the creation of merchandise otherwise classifiable as a basic shape or form of iron or steel can, at the same time, be an advancement of that merchandise beyond the status of a basic shape or form. Scroll cutting merely results in steel sheet which is nonrectangular in shape, as provided for in item 609.17. The additional steps of lacquering, painting or varnishing scroll-cut, tin free steel sheet are permissible treatments allowed by Schedule 6, Part 2, Headnote 1, TSUS. Customs believes that the requirements for classification in item 609.17, TSUS, are more difficult to satisfy than are those of item 657.25. Consequently, item 609.17 is the relatively more specific provision. Finally, Customs believes that conclusions contained in some of the cited rulings on this merchandise may have been based not on incorrect statements, but on a misapplication of the stated facts.

With respect to the comments opposing the change in classification, Customs believes the fact that classification of this merchandise in item 657.25, TSUS, may be well documented by the existing rulings, and the fact that there has been no change in the way this merchandise is made, does not override its obligation to classify and assess duty on merchandise in its condition as imported. Moreover, concerning the comment that the proposed change in classification would bring within the coverage of the VRAs merchandise not previously intended by the negotiaters to be included, Customs notes that this result was anticipated because the VRAs were negotiated with the understanding that changes in classification might occur. Relevant provisions in Part 177, Customs Regulations (19 CFR Part 177), giving Customs the authority to modify or revoke rulings, were well known to the negotiators of the VRAs.

Decision

After careful analysis of the submitted comments, and further review of the matter, the proposed change in classification of scroll-cut tin free steel sheet and scroll-cut tin free steel sheet which has been lacquered, painted or varnished (but not decorated, designed or finished), is adopted. The merchandise in question will be classified under the provision for plates, sheets, and strip, of iron or steel, whether or not cut, pressed, or stamped to nonrectangular shape, plated or covered with chromium oxide or with chromium and chromium oxide, in item 609.1710, Tariff Schedules of the United States Annotated (TSUSA).

This change in classification is effective as to merchandise entered, or withdrawn from warehouse, for consumption, on or after 30 days from the date of publication of this decision in the Customs Bulletin.

Customs rulings of March 13, 1978 (056338), September 11, 1978 (057221), and April 23, 1986 (077760) are hereby revoked.

Drafting Information

The principal author of this document was James A. Seal, Commercial Rulings Division, U.S. Customs Service. However, personnel from other offices participated in its development.

Michael H. Lane,

Acting Commissioner of Customs.

BILLING CODE 4820-02-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 524

Ophthalmic and Topical Dosage Form New Animal Drugs Not Subject to Certification; Nitrofurazone Ointment; Technical Amendment

AGENCY: Food and Drug Administration.

ACTION: Final rule; technical amendment.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect a sponsor change from Wendt Laboratories to Quality Plus Essar Corp. for a new animal drug application (NADA) for nitrofurazone ointment. The agency is issuing this technical amendment to amend § 524.1580b(b) (21 CFR 524.1580b(b)).

EFFECTIVE DATE: September 7, 1989.

FOR FURTHER INFORMATION CONTACT: J. Taylor Madill, Center for Veterinary Medicine (HFV–231), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3336.

SUPPLEMENTARY INFORMATION: In the Federal Register of September 25, 1987 (52 FR 36022), FDA published a document reflecting the change of sponsor of several NADA's from Wendt Laboratories to Quality Plus Essar Corp. That document provided for a sponsor change for NADA 118–586 Nitrofurazone ointment, but it failed to amend the corresponding regulation in § 524.1580b(b) to reflect the sponsor change.

List of Subjects in 21 CFR Part 524

Animal drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR Part 524 is amended as follows:

PART 524—OPHTHALMIC AND TOPICAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

1. The authority citation for 21 CFR Part 524 continues to read as follows:

Authority: Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)); 21 CFR 5.10 and 5.83.

§ 524.1580b [Amended]

2. Section 524.1580b *Nitrofurazone ointment* is amended in paragraph (b) by removing the number "015579," from the first sentence.

Dated: August 31, 1989.

Robert C. Livingston,

Deputy Director, Office of New Animal Drug Evaluation Center for Veterinary Medicine.

BILLING CODE 4160-01-M

---

21 CFR Part 558

New Animal Drugs for Use in Animal Feeds; Change of Sponsors

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect a change of sponsor for new animal drug applications (NADA's) from Hess & Clark, Inc., to Feed Specialties Co., Inc., and from SDS Biotech Corp. to Fermenta Animal Health Co.

EFFECTIVE DATE: September 7, 1989.

FOR FURTHER INFORMATION CONTACT: Benjamin A. Puyot, Center for Veterinary Medicine (HFV-130), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1414.

SUPPLEMENTARY INFORMATION: Feed Specialties Co., Inc., 1877 NE. 58th Avenue, Des Moines, IA 50313, has informed FDA that it has acquired NADA 48-480 which provides for use of a Type A medicated article containing 50 grams of chlortetracycline per pound in making Type C medicated feeds. The feeds are indicated for use as growth promotants in chickens and turkeys. Hess & Clark, Inc., the former sponsor, has confirmed the change of sponsor. Accordingly, the agency is amending 21 CFR 558.15 to reflect the change of sponsor.

Additionally, an error in § 558.15(g)(1) has been noted. In § 558.15(g)(1), in the table, under "Drug sponsor," the two entries for "SDS Biotech Corp." (i.e. at "Bacitracin methylene disalicylate" and at "Chlortetracycline") are incorrect in that they refer to NADA's that have been transferred from SDS Biotech Corp. to Fermenta Animal Health Co., a subsidiary of SDS Biotech Corp., by a publication in the **Federal Register** of August 8, 1986 (51 FR 28546). Therefore, § 558.15 is further amended to reflect the correct sponsor.

List of Subjects in 21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR part 558 is amended as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

1. The authority citation for 21 CFR part 558 continues to read as follows:

Authority: Sec. 512, 82 Stat. 343-351 (21 U.S.C. 360b); 21 CFR 5.10 and 5.83.

§ 558.15 [Amended]

2. Section 558.15 *Antibiotic, nitrofuran, and sulfonamide drugs in the feed of animals* is amended in paragraph (g)(1) in the table, under the "Drug Sponsor" heading, by revising the entry for "A. L. Laboratories, Inc., SDS Biotech Corp." to read "A. L. Laboratories, Inc., Fermenta Animal Health Co." and by revising the entry for "American Cyanamid Co., SDS Biotech Corp., Hess & Clark, Pfizer, Inc., and VPO, Inc." to read "American Cyanamid Co., Fermenta Animal Health Co., Feed Specialties Co., Inc., Pfizer, Inc., and VPO, Inc."

Dated: August 31, 1989.

Robert C. Livingston,

Deputy Director, Office of New Animal Drug Evaluation, Center for Veterinary Medicine.

[T.D. 8259]

RIN 1545-AM99

Real Estate Mortgage Investment Conduits; Reporting Requirements and Other Administrative Matters

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary income tax regulations relating to real estate mortgage investment conduits. The relevant provisions in the Internal Revenue Code were added or amended by the Tax Reform Act of 1986 and by the Technical and Miscellaneous Revenue Act of 1988. These regulations prescribe the manner in which an entity elects status as a real estate mortgage investment conduit (REMIC) for Federal income tax purposes and the procedures to be followed when filing a Federal income tax return as a REMIC. The regulations also require REMICs and certain other issuers to file information returns with the Internal Revenue Service and to provide notice to holders of REMIC interests or other debt instruments to which section 1272(a)(6) applies of income and certain allocable expenses attributable to their interests.

In addition, the temporary regulations set forth in this document generally serve as the text of the proposed regulations cross-referenced in the notice of proposed rulemaking in the Proposed Rules section of this issue of the **Federal Register**.

DATES: These regulations are effective after December 31, 1986, except as follows:

With respect to certain reporting requirements, §§ 1.67-3T(f), and 1.6049-7T(b)(1) and the amendements to § 1.1275-3T(b) are effective September 7, 1989.

Sections 1.6049-7T(e)(2)(x) and 1.6049-7T (f)(2)(i)(G) and (f)(2)(ii)(K) are effective for calendar years beginning after December 31, 1989.

Sections 1.860F-4T(e)(1)(ii) (A) and (B), 1.6049-7T(c) (6) through (14), 1.6049-7T(e) (1), (2) (i) through (ix), (3), (4), and (5), 1.6049-7T(f)(3) (i) and (ii), and 1.6049-7T (f)(5)(i) and (f)(7) are effective for calendar quarters and calendar years beginning after December 31, 1988.

Section 1.6049-7T(f)(2)(ii) (E), (F), and (I) are effective for calendar quarters and calendar years beginning after December 31, 1987.

Sections 1.860F-4T(e)(1)(ii)(D) and 1.6049-7T(f)(3)(iii) are effective for calendar quarters and calendar years beginning after December 31, 1987 and ending before January 1, 1990.

Section 1.860F-4T(e)(1)(ii)(C) is effective for calendar quarters and calendar years beginning after December 31, 1986 and ending before January 1, 1988.

With respect to who may sign a REMIC return, § 1.860F-4T(c)(1) is effective for REMICs with a startup day on or after November 10, 1988.

Finally, the § 1.6049-7T(g) requirement to set forth information on the face of the debt instrument is effective for debt instruments issued after April 8, 1988.

FOR FURTHER INFORMATION CONTACT: Laura Ann M. Lauritzen, 202-566-6624 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

This regulation is being issued without prior notice and public procedure pursuant to the Administrative Procedure Act (5 U.S.C. 553). For this reason, the collections of information contained in this regulation have been reviewed and, pending receipt and evaluation of pubic comments, approved by the Office of Management and Budget (OMB) under control number 1545-1018.

The estimated total annual reporting and/or recordkeeping burden for the requirements contained in §§ 1.860D-1T(d), 1.860F-4T, 1.1275-3T(b), 1.6049-7T(b), 1.6049-7T(e), 1.6049-7T (f)(1) through (f)(6) of this regulation is reflected on Forms 1066, 1099-INT, 1099-OID, 8281, and 8811. The estimated annual burden per respondent/recordkeeper varies from *0.1* hours to *20.0* hours, depending on individual

circumstances, with an estimated average of *1.5* hours.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents/recordkeepers may require more or less time, depending on their particular circumstances.

For further information concerning this collection of information, and where to submit comments on this collection of information, the accuracy of the estimated burden, and suggestions for reducing this burden, please refer to the preamble to the cross-reference notice of proposed rulemaking published in the Proposed Rules section of this issue of the **Federal Register**.

Issuance of Proposed Regulation

The rules contained in this document are also being issued as proposed regulations by the notice of proposed rulemaking on this subject in the Proposed Rules section of this issue of the **Federal Register**. Pursuant to section 7805(f) of the Internal Revenue Code, a copy of the rules will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Background

This document sets forth temporary income tax regulations (26 CFR part 1) under sections 860D, 860F, and 6049 (d)(7) of the Internal Revenue Code of 1986 (Code), relating to real estate mortgage investment conduits or REMICs. Section 671 of the Tax Reform Act of 1986 (the 1986 Act) added to the Code new sections 860A through 860G to provide rules relating to real estate mortgage investment conduits. Section 674 of the 1986 Act amended section 6049 to impose certain information reporting requirements with respect to REMIC interests and certain other debt instruments. Section 1006(t) of the Technical and Miscellaneous Revenue Act of 1988 (TAMRA) amended certain provisions in sections 860A through 860G and section 6049.

In general, a REMIC is a fixed pool of mortgages in which multiple classes of interests are held by investors and which elects to be taxed as a REMIC. The regulations under section 860D prescribe the manner in which an entity elects status as a REMIC. The regulations under section 860F govern the filing of the REMIC's income tax return and, together with the regulations under section 6049, require notice of income and other information to be provided to REMIC investors and the Internal Revenue Service.

Explanation of Provisions

Treatment of a REMIC as a Partnership

Except in determining who may sign a REMIC return, section 860F(e) provides that, for purposes of subtitle F of the Code (Procedure and Administration), a REMIC is treated as a partnership and any holder of a residual interest is treated as a partner. Thus, the rules relating to the tax treatment of partnership items (subchapter C of chapter 63 of the Code) generally apply to a REMIC. For example, under § 1.860F-4T(d), a REMIC may designate a tax matters person in the same manner in which a partnership may designate a tax matters partner under § 301.6231(a)(7)-1T. If there is only one holder of the REMIC residual interest, however, § 1.860F-4T(a) provides an exception to the application of those rules.

REMIC Income Tax Return and Election

Section 1.860F-4T(b) generally requires a REMIC to file an income tax return annually with the Internal Revenue Service. The Service has developed Form 1066, U.S. Real Estate Mortgage Investment Conduit Income Tax Return, for this purpose. As required by section 860F(e), the return must include the amount of the daily accruals determined under section 860E(c). The due date and any extensions for filing the REMIC's annual return are determined as if the REMIC were a partnership that uses the calendar year. Section 1.860F-4T(c)(1) provides that the REMIC return must be signed by a person who is authorized to sign the return of the entity absent the REMIC election.

As provided in § 1.860D-1T(d)(1), a qualified entity, as defined in § 1.860D-1T(c)(4), elects to be treated as a REMIC by timely filing, for its first taxable year, a Form 1066, U.S. Real Estate Mortgage Investment Conduit Income Tax Return, signed by a person authorized to sign that return under § 1.860F-4T(c). The Commissioner may, however, upon a showing of good cause, grant a reasonable extension of time under § 1.9100 for electing REMIC status. Once made, the election is irrevocable for that taxable year and all succeeding taxable years.

Section 1.860D-1T(d)(2) requires that the REMIC provide certain information with its income tax return for the first taxable year of the REMIC's existence. That information includes the REMIC's employer identification number (a REMIC may apply for an EIN on Form SS-4, Application for Employer Identification Number), information concerning the terms of each class of regular interest and the designated residual interest, and any other information that is required by the form. Each REMIC's EIN must differ from that of any other REMIC or other entity.

The REMIC must also provide on its first return a description of the prepayment and reinvestment assumptions that are made pursuant to section 1272(a)(6). Finally, pursuant to § 1.860D-1T(d)(3), sufficient records must be kept concerning investments to show the REMIC's compliance with the provisions of sections 860A through 860G during each taxable year.

Notice to Residual Interest Holders

At the close of each calendar quarter, a REMIC is required under § 1.860F-4T(e)(1) to provide to each person who held a residual interest in the REMIC during the quarter notice on Schedule Q (Form 1066) of certain information. That information includes (a) the residual holder's share of REMIC taxable income or net loss for the calendar quarter, (b) the amount of the excess inclusion with respect to the holder's residual interest, (c) in the case of certain holders, the allocable investment expenses for the quarter, and (d) for calender years after 1987, the percentage of the REMIC's assets that are qualifying real property loans under section 593, assets described in section 7701(a)(19), and real estate assets defined in section 856(c)(6)(B). A residual interest holder may rely upon the information provided on Schedule Q concerning the percentage of assets tests in determining the tax treatment of its residual interest under sections 593, 7701(a)(19)(C), and 856. This right of reliance will be explicitly stated in future regulations under those code sections.

For calendar quarters after 1988, in determining the information to be reported to REMIC interest holders concerning the percentage of assets tests, § 1.860F-4T(e)(1)(ii) (concerning residual interests) and § 1.6049-7T(f)(3)(i) (concerning regular interests) direct a REMIC to compute the applicable percentages by reference to the average adjusted basis of the REMIC's assets during the calendar quarter. This differs from the rule now contained in temporary regulation § 1.860F-4T(e)(1)(i)(D) and § 1.6049-7T(f)(3)(i), which direct a REMIC to compute the applicable percentages by reference to the average fair market value of the REMIC's assets during the calender quarter. The Service intends that, for calendar quarters in 1989, a

REMIC may use either method and that no REMIC will be penalized for having used one method rather than the other.

Section § 1.860F–4T(e)(2) requires that Schedule Q be mailed (or otherwise delivered) to each holder of a residual interest during a calendar quarter not later than the last day of the month following the close of the calendar quarter. Further, § 1.860F–4T(e)(4) provides that a copy of Schedule Q for each person who was a residual interest holder at any time during a REMIC's taxable year and for each quarter in which that person was a residual interest holder must be attached to the REMIC's income tax return for that taxable year. Quarterly notice to the Internal Revenue Service is not required.

Reporting to the Internal Revenue Service

Section 1.6049–7T(b)(1) requires every REMIC and issuer of a collateralized debt obligation (as defined in § 1.6049–7T(d)(2)) to file Form 8811, Information Return for Real Estate Mortgage Investment Conduits (REMICs) and Issuers of Collateralized Debt Obligations, with the Internal Revenue Service by the later of July 31, 1989, or 30 days after the startup day (as defined in section 860G(a)(9)) of the REMIC or the issue date (as defined in section 1275(a)(2)) of a collateralized debt obligation. Further, a new Form 8811 must be filed within 30 days of any change in the information previously provided on Form 8811.

The information required on Form 8811 includes the name, title, address, and telephone number of a person to be contacted by the Internal Revenue Service for information concerning the form. The form also requires designation of a person to be contacted by certain brokers, middlemen, corporations, non-calendar year taxpayers, and other persons specified in § 1.6049–7T(e)(4) for financial information necessary to complete Form 1099.

Reporting to certain brokers, middlemen, corporations, non-calendar year taxpayers, and other persons specified in § 1.6049–7T(e)(4)

The Internal Revenue Service will print in Publication 938 the information on Form 8811 concerning the representative to be contacted by persons specified in § 1.6049–7T(e)(4). For calendar quarters after 1988 a person specified in § 1.6049–7T(e)(4) may request in writing or by telephone the tax information specified in § 1.6049–7T(e)(2) from a REMIC or an issuer of a collateralized debt obligation. Pursuant to § 1.6049–7T(e)(3), the REMIC or issuer must then supply the tax information by telephone, by written statement, by causing it to be published in a publication generally read by persons permitted to make the request, or by any other method agreed to by the parties, by the later of 30 days after the close of the calendar quarter for which the information was requested, or two weeks after the receipt of the request.

The information the REMIC or the issuer of a collateralized debt obligation is required to provide includes: (a) Name, address, and Employer Identification Number of the REMIC or issuer of the collateralized debt obligation; (b) the Committee on Uniform Security Identification Procedure (CUSIP) number, account number, serial number, or other identifying number or information for each class of interest; (c) interest and original issue discount includible in the holder's gross income for each accrual period during the specified calendar quarter; (d) the length of the accrual period; (e) the adjusted issue price at the beginning of each accrual period in the specified calendar quarter; and (f) information necessary to compute the accrual of market discount.

A REMIC must also provide certain information with respect to the percentage of the REMIC's assets that are qualifying real property loans under section 593, assets described in section 7701(a)(19), and real estate assets under section 856(c)(6)(B). A regular interest holder may rely on the information provided by the REMIC concerning the percentage of assets tests in determining the tax treatment of its regular interest under sections 593, 7701(a)(19)(C), and 856. This right of reliance will be explicitly stated in future regulations under those code sections.

Reporting to regular interest holders

Section 6049 of the Code requires that certain returns of information be made regarding payments of interest. Under section 6049(d)(7) and § 1.6049–7T(a), the term "interest" includes amounts includible in the gross income of any holder of a REMIC regular interest or a collateralized debt obligation.

As required by § 1.6049–7T(b)(2), an information return must be made with respect to any payment of interest (as defined in § 1.6049–7T(a)) aggregating $10 or more. For calendar quarters and calendar years after 1988, this return must be made by a REMIC or an issuer of a collateralized debt obligation and by any broker or middleman who holds as a nominee any REMIC regular interest or any collateralized debt obligation for the actual owner. Information returns are not required, however, with respect to amounts includible as interest by certain holders specified in § 1.6049–7T(c).

Section 1.6049–7T(b)(2)(iii)(A) requires that for amounts includible as interest, other than original issue discount, the information return be made on Form 1099 for each calendar year showing the aggregate amount includible, the name, address, and taxpayer identification number of the record holder, and such other information as is required by the form. Section 1.6049–7T(b)(2)(iii)(B) requires similar information with respect to amounts of original issue discount includible by any record holder of a REMIC regular interest or a collateralized debt obligation.

The information returns required under § 1.6049–7T(b)(2) are to be filed annually in the manner prescribed in paragraph (b)(2)(iv) of that section. Generally, § 1.6049–7T(f) requires that the information provided to the Service and, if applicable, an additional statement containing information regarding market discount and original issue discount be furnished to each person in whose income amounts are includible as interest in the time and manner specified in paragraphs (f) (5) and (6) of that section respectively. Under § 1.6049–7T(f)(3), certain information regarding REMIC assets must also be provided to investors.

Nominee requirement to furnish information to corporations, non-calendar year taxpayers, and other persons specified in § 1.6049–7T(c) (9) through (14)

Section 1.6049–7T(f)(7)(i) requires brokers and middlemen holding as nominees REMIC regular interests or collateralized debt obligations to provide in writing or by telephone the information specified in § 1.6049–7T(e)(2). The information must be provided to corporations, non-calendar year taxpayers, and other persons specified in § 1.6049–7T(c) (9) through (14) in the time prescribed in § 1.6049–7T(f)(7)(ii).

Information required on debt instrument

Under § 1.6049–7T(g), the issuer of any REMIC regular interest or any collateralized debt obligation is required to set forth certain information on the face of the regular interest or collateralized debt obligation. This requirement is effective, however, only with respect to any regular interest or collateralized debt obligation that is issued after April 8, 1988.

Reporting original issue discount on debt instruments not subject to section 1272(a)(6)

Section 1.1275–3T(b) is revised to require issuers to provide additional information with the Form 8281. The issuer must provide a schedule showing the amount of original issue discount per unit of original principal amount that accrues for each accrual period and specify the unit of original principal amount if other than $1,000, specify the yield to maturity, and state whether the debt instrument is a variable rate debt instrument.

Notice to pass-through interest holders who hold regular interests in single-class REMICs

Section 1.67–3T(f) currently provides that a single-class REMIC (generally, one that would be classified as a trust had it not elected REMIC status) must furnish quarterly statements to certain of its regular interest holders showing each such interest holder's allocable share of the REMIC's investment expense. Quarterly reporting is no longer required. Section 1.67–3T(f) now provides that a REMIC is reqwuired to report annually to its regular interest holders.

Special Analyses

It has been determined that these regulations are not major regulations as defined in Executive Order 12291. Therefore, a regulatory impact analysis is not required.

A general notice of proposed rulemaking is not required by 5 U.S.C. 553 for temporary regulations. Therefore, these regulations do not constitute regulations that are subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Drafting Information

The principal author of these temporary regulations is Laura Ann M. Lauritzen, Office of the Assistant Chief Counsel (Financial Institutions and Products), Internal Revenue Service. However, personnel from other offices of the IRS and the Treasury Department participated in their development.

List of Subjects

26 CFR 1.61–1 Through 1.281–4

Deductions, Exemptions, Income tax, Taxable income.

26 CFR 1.851–1 Through 1.860F–4

Income taxes, Investment companies, Real estate investment trusts, Real estate mortgage investment conduits.

26 CFR 1.1271–1 Through 1.1297–3

Income taxes, Capital gains and losses, Original issue discount, Applicable Federal rate, Market discount, Short-term obligations, Stripped bonds and stripped coupons, Tax-exempt obligations.

26 CFR 1.6001–1 Through 1.6109–2

Income taxes, Administration and procedure, Filing requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Amendments to the Regulations

Accordingly, Title 26, Parts 1 and 602 of the Code of Federal Regulations are amended as follows:

PART 1—[AMENDED]

Paragraph 1. The authority for Part 1 is amended by adding the following citations:

Authority: 26 U.S.C. 7805; * * * § 1.860F–4T also issued under 26 U.S.C. 860G(e); * * * § 1.1275–3T also issued under 26 U.S.C. 1275(c); * * * § 1.6049–7T also issued under 26 U.S.C. 860G(e), 26 U.S.C. 1275(c), and 26 U.S.C. 6049(d)(7)(D). * * *

Par. 2. Paragraphs (f)(1) and (f)(2)(ii) of § 1.67–3T are revised to read as follows:

§ 1.67–3T Allocation of expenses by real estate mortgage investment conduits (temporary).

* * * * *

(f) *Notice to pass-through interest holders*—(1) *Information required.* A REMIC must provide to each pass-through interest holder to which an allocation of allocable investment expense is required to be made under paragraph (a)(1) of this section notice of—

(i) The aggregate amount of expenses paid or accrued during the calendar quarter (calendar year in the case of a regular interest holder) for which a REMIC is allowed a deduction under section 212, and

(ii) The proportionate share of these expenses allocated to that pass-through interest holder, as determined under paragraph (c) of this section.

(2) *Statement to be furnished.*

* * * * *

(ii) *To regular interest holder.* For each calendar year, a single-class REMIC (as described in paragraph (a)(2)(ii)(B) of this section) must provide to each pass-through interest holder who held a regular interest during the calendar year the notice required under paragraph (f)(1) of this section. Quarterly reporting is not required. The information required to be included in the notice may be separately stated on the statement described in § 1.6049–7T(f) instead of on a separate statement provided in a separate mailing. See § 1.6049–7T(f) (4) and (6)(i)(A).

* * * * *

Par. 3. Sections 1.860D–1T and 1.860F–4T are revised to read as follows:

§ 1.860D–1T Definition of a REMIC (temporary).

(a) *In general.* [Reserved]

(b) *Specific requirements.* [Reserved]

(c) *Segregated pool of assets*—(1) *Formation of REMIC.* A REMIC may be formed as a segregated pool of assets rather than as a separate entity. To constitute a REMIC, the assets identified as part of the segregated pool must be treated for all Federal income tax purposes as assets of the REMIC and interests in the REMIC must be based solely on assets of the REMIC.

(2) *Identification of assets.* [Reserved]

(3) *Transfer of property for interests.* [Reserved]

(4) *Qualified entity defined.* For purposes of this section, the term "qualified entity" includes an entity or a segregated pool of assets within an entity.

(d) *Election to be treated as a real estate mortgage investment conduit*—(1) *In general.* A qualified entity, as defined in paragraph (c)(4) of this section, elects to be treated as a REMIC by timely filing, for the first taxable year of its existence, a Form 1066, U.S. Real Estate Mortgage Investment Conduit Income Tax Return, signed by a person authorized to sign that return under § 1.860F–4T(c). See § 1.9100 for rules regarding extensions of time for making elections. Once made, this election is irrevocable for that taxable year and all succeeding taxable years.

(2) *Information required to be reported in the REMIC's first taxable year.* For the first taxable year of the REMIC's existence, the qualified entity, as defined in paragraph (c)(4) of this section, must provide either on its return or in a separate statement attached to its return—

(i) The REMIC's employer identification number, which must not be the same as the identification number of any other entity,

(ii) Information concerning the terms and conditions of the regular interests and the residual interest of the REMIC, or a copy of the offering circular or prospectus containing such information,

(iii) A description of the prepayment and reinvestment assumptions that are made pursuant to section 1272(a)(6) and the regulations thereunder, including a

BEST COPY AVAILABLE

statement supporting the selection of the prepayment assumption,

(iv) The form of the electing qualified entity under State law or, if an election is being made with respect to a segregated pool of assets within an entity, the form of the entity that holds the segregated pool of assets, and

(v) Such other information as is required by the form.

(3) *Requirement to keep sufficient records.* A qualified entity, as defined in paragraph (c)(4) of this section, that elects to be a REMIC must keep sufficient records concerning its investments to show that it has complied with the provisions of sections 860A through 860G and the regulations thereunder during each taxable year.

§ 1.860F–4T REMIC reporting requirements and other administrative rules (temporary).

(a) *In general.* Except as provided in paragraph (c) of this section, for purposes of subtitle F of the Internal Revenue Code, a REMIC is treated as a partnership and any holder of a residual interest in the REMIC is treated as a partner. A REMIC is not subject, however, to the rules of subchapter C of chapter 63 of the Code, relating to the treatment of partnership items, for a taxable year if there is at no time during the taxable year more than one holder of a residual interest in the REMIC.

(b) *REMIC tax return*—(1) *In general.* To satisfy the requirement under section 6031 to make a return of income for each taxable year, a REMIC must file the return required by paragraph (b)(2) of this section. The due date and any extensions for filing the REMIC's annual return are determined as if the REMIC were a partnership.

(2) *Income tax return.* The REMIC must make a return, as required by section 601(a), for each taxable year on Form 1066, U.S. Real Estate Mortgage Investment Conduit Income Tax Return. The return must include—

(i) The amount of principal outstanding on each class of regular interests as of the close of the taxable year,

(ii) The amount of the daily accruals determined under section 860E(c), and

(iii) the information specified in § 1.860D–1T(d)(2) (i), (iv), and (v).

(c) *Signing of REMIC return*—(1) *In general.* Although a REMIC is generally treated as a partnership for purposes of subtitle F, for purposes of determining who is authorized to sign a REMIC's income tax return for any taxable year, the REMIC is not treated as a partnership and the holders of residual interests in the REMIC are not treated as partners. Rather, the REMIC return must be signed by a person who could sign the return of the entity absent the REMIC election. Thus, the return of a REMIC that is a corporation or trust under applicable State law must be signed by a corporate officer or a trustee, respectively. The return of a REMIC that consists of a segregated pool of assets must be signed by a person who could sign the return of the entity that owns the assets of the REMIC under applicable State law.

(2) *REMIC whose startup day is before November 10, 1988*—(i) *In general.* The income tax return of a REMIC whose startup day is before November 10, 1988, may be signed by any person who held a residual interest during the taxable year to which the return relates, or, as provided in section 6903, by a fiduciary, as defined in section 7701(a)(6), who is acting for the REMIC and who has furnished adequate notice in the manner prescribed in § 301.6903–1(b).

(ii) *Startup day.* For purposes of paragraph (c)(2) of this section, startup day means any day selected by a REMIC that is on or before the first day on which interests in such REMIC are issued.

(iii) *Exception.* A REMIC whose startup day is before November 10, 1988, may elect to have paragraph (c)(1) of this section apply, instead of paragraph (c)(2) of this section, in determining who is authorized to sign the REMIC return. See section 1006(t)(18)(A) of the Technical and Miscellaneous Revenue Act of 1988 (102 Stat. 3426) and regulations thereunder for the time and manner for making this election.

(d) *Designation of tax matters person.* A REMIC may designate a tax matters person in the same manner in which a partnership may designate a tax matters partner under § 301.6231(a)(7)–1T. For purposes of applying that section, all holders of residual interests in the REMIC are treated as general partners.

(e) *Notice to holders of residual interests*—(1) *Information required.* As of the close of each calendar quarter, a REMIC must provide to each person who held a residual interest in the REMIC during that quarter notice on Schedule Q (Form 1066) of information specified in paragraphs (e)(1) (i) and (ii) of this section.

(i) *In general.* Each REMIC must provide to each of its residual interest holders the following information:

(A) That person's share of the taxable income or net loss of the REMIC for the calendar quarter;

(B) The amount of the excess inclusion (as defined in section 860E and the regulations thereunder), if any, with respect to that person's residual interest for the calendar quarter;

(C) If the holder of a residual interest is also a pass-through interest holder (as defined in § 1.67–3T(a)(2)), the allocable investment expenses (as defined in § 1.67–3T(a)(3)) for the calendar quarter, and

(D) Such other information as is required by Schedule Q (Form 1066).

(ii) *Information with respect to REMIC assets*—(A) *95 percent asset test.* For calendar quarters after 1988, each REMIC must provide to each of its residual interest holders the following information:

(*1*) The percentage of REMIC assets that are qualifying real property loans under section 593,

(*2*) The percentage of REMIC assets that are assets described in section 7701(a)(19), and

(*3*) The percentage of REMIC assets that are real estate assets defined in section 856(c)(6)(B), computed by reference to the average adjusted basis (as defined in section 1011) of the REMIC assets during the calendar quarter (as described in paragraph (e)(1)(iii) of this section). If the percentage of REMIC assets represented by a category is at least 95 percent, then the REMIC need only specify that the percentage for that category was at least 95 percent.

(B) *Additional information required if the 95 percent test not met.* If, for any calendar quarter after 1988, less than 95 percent of the assets of the REMIC are real estate assets defined in section 856(c)(6)(B), then, for that calendar quarter, the REMIC must also provide to any real estate investment trust (REIT) that holds a residual interest the following information:

(*1*) The percentage of REMIC assets described in section 856(c)(5)(A), computed by reference to the average adjusted basis of the REMIC assets during the calendar quarter (as described in paragraph (e)(1)(iii) of this section),

(*2*) The percentage of REMIC gross income (other than gross income from prohibited transactions defined in section 860F(a)(2)) described in section 856(c)(3) (A) through (E), computed as of the close of the calendar quarter, and

(*3*) The percentage of REMIC gross income (other than gross income from prohibited transactions defined in section 860F(a)(2)) described in section 856(c)(3)(F), computed as of the close of the calendar quarter. For purposes of this paragraph (e)(1)(ii)(B)(*3*), the term "foreclosure property" contained in section 856(c)(3)(F) has the meaning specified in section 860G(a)(8).

In determining whether a REIT satisfies the limitations of section 856(c)(2), all REMIC gross income is deemed to be derived from a source specified in section 856(c)(2).

(C) *For calendar quarters in 1987.* For calendar quarters in 1987, the percentages of assets required in paragraphs (e)(1)(ii) (A) and (B) of this section may be computed by reference to the fair market value of the assets of the REMIC as of the close of the calendar quarter (as described in paragraph (e)(1)(iii) of this section), instead of by reference to the average adjusted basis during the calendar quarter.

(D) *For calendar quarters in 1988 and 1989.* For calendar quarters in 1988 and 1989, the percentages of assets required in paragraphs (e)(1)(ii) (A) and (B) of this section may be computed by reference to the average fair market value of the assets of the REMIC during the calendar quarter (as described in paragraph (e)(1)(iii) of this section), instead of by reference to the average adjusted basis of the assets of the REMIC during the calendar quarter.

(iii) *Special provisions.* For purposes of paragraph (e)(1)(ii) of this section, the percentage of REMIC assets represented by a specified category computed by reference to average adjusted basis (or fair market value) of the assets during a calendar quarter is determined by dividing the average adjusted basis (or for calendar quarters before 1990, fair market value) of the assets in the specified category by the average adjusted basis (or, for calendar quarters before 1990, fair market value) of all the assets of the REMIC as of the close of each month, week, or day during that calendar quarter. The monthly, weekly, or daily computation period must be applied uniformly during the calendar quarter to all categories of assets and may not be changed in succeeding calendar quarters without the consent of the Commissioner.

(2) *Quarterly notice required*—(i) *In general.* Schedule Q must be mailed (or otherwise delivered) to each holder of a residual interest during a calendar quarter no later than the last day of the month following the close of the calendar quarter.

(ii) *Special rule for 1987.* Notice to any holder of a REMIC residual interest of the information required in paragraph (e)(1) of this section for any of the four calendar quarters of 1987 must be mailed (or otherwise delivered) to each holder no later than March 28, 1988.

(3) *Nominee reporting*—(i) *In general.* If a REMIC is required under paragraph (e) (1) and (2) of this section to provide notice to an interest holder who is a nominee of another person with respect to an interest in the REMIC, the nominee must furnish such notice to the person for whom it is a nominee.

(ii) *Time for furnishing statement.* The nominee must furnish the notice required under paragraph (e)(3)(i) of this section to the person for whom it is a nominee no later than 30 days after receiving this information.

(4) *Reports to the Internal Revenue Service.* A copy of Schedule Q for each person who was a residual interest holder at any time during a REMIC's taxable year and for each quarter in which that person was a residual interest holder must be attached to the REMIC's income tax return for that taxable year. Quarterly notice to the Internal Revenue Service is not required.

Par. 4. Paragraph (b) of § 1.1275–3T is amended as follows:

1. In paragraph (b)(1), after the last sentence, by adding the sentence, "Any person making an offering of interests in a REMIC or other debt instrument subject to section 1272(a)(6), however, is not treated as an issuer of publicly offered debt instruments having original issue discount and, consequently, is not required to make an information return on Form 8281."

2. In paragraph (b)(2)(i) by removing the language "address, and" and adding in its place the language "address, telephone number, and".

3. By redesignating paragraphs (b)(2) (iv), (v), (vi), (vii), (viii), and (ix) as paragraphs (b)(2) (v), (vi), (vii), (ix), (x), and (xi) respectively.

4. Redesignated paragraphs (b)(2)(ix) (D), (E) and (F) and further redesignated as paragraphs (b)(2)(ix) (E), (F) and (G) respectively.

5. By adding a new paragraph (b)(2)(iv) immediately after paragraph (b)(2)(iii), a new paragraph (b)(2)(viii) immediately after paragraph (b)(2)(vii), and a new paragraph (b)(2)(ix)(D) immediately after paragraph (b)(2)(ix)(C), to read as follows:

§ 1.1275–3T Original issue discount information reporting requirements.

* * * * *

(b) *Information required to be reported to Secretary*—

* * * * *

(2) *Information required to be reported.*

* * * * *

(iv) A schedule showing the amount of original issue discount per unit of original principal amount that accrues for each accrual period and specify the unit of original principal amount if other than $1,000;

* * * * *

(viii) The yield to maturity;

(ix) * * *

(D) Whether the debt instrument is a variable rate debt instrument described in § 1.1275–5(a);

* * * * *

Par. 5. Section 1.6049–7T is revised to read as set forth below.

§ 1.6049–7T Returns of information with respect to REMIC regular interests and collateralized debt obligations (temporary).

(a) *Definition of interest*—(1) *In general.* For purposes of section 6049(a), for taxable years beginning after December 31, 1986, the term "interest" includes:

(i) Interest actually paid with respect to a collateralized debt obligation (as defined in paragraph (d)(2) of this section),

(ii) Interest accrued with respect to a REMIC regular interest (as defined in section 860G(a)(1)), or

(iii) Original issue discount accrued with respect to a REMIC regular interest or a collateralized debt obligation.

(2) *Interest deemed paid.* For purposes of this section and in determining who must make an information return under section 6049(a), interest as defined in paragraph (a)(1) (ii) and (iii) of this section is deemed paid when includible in gross income under section 860B(b) or section 1272.

(b) *Information required to be reported to the Commissioner*—(1) *Requirement of filing Form 8811 by REMICs and other issuers*—(i) *In general.* Except in the case of a REMIC all of whose regular interests are owned by another REMIC, every REMIC and every issuer of a collateralized debt obligation (as defined in paragraph (d)(2) of this section) must make an information return on Form 8811, Information Return for Real Estate Mortgage Investment Conduits (REMICs) and Issuers of Collateralized Debt Obligations. Form 8811 must be filed in the time and manner prescribed in paragraph (b)(1)(iii) of this section. The submission of Form 8811 to the Internal Revenue Service does not satisfy the election requirement specified in § 1.860D–1T(d) and does not require election of REMIC status.

(ii) *Information required to be reported.* The following information must be reported to the Commissioner on Form 8811—

(A) The name, address, and employer identification number of the REMIC or the issuer of a collateralized debt obligation (as defined in paragraph (d)(2) of this section);

(B) The name, title, address, and telephone number of the official or representative of the REMIC or the issuer of a collateralized debt obligation who will provide to any person specified in paragraph (e)(4) of this section the interest and original issue discount information specified in paragraph (e)(2) of this section;

(C) The startup day (as defined in section 860G(a)(9)) of the REMIC or the issue date (as defined in section 1275(a)(2)) of the collateralized debt obligation;

(D) The Committee on Uniform Security Identification Procedure (CUSIP) number, account number, serial number, or other identifying number or information, of each class of REMIC regular interest or collateralized debt obligation;

(E) The name, title, address, and telephone number of the official or representative of the REMIC or the issuer of a collateralized debt obligation whom the Internal Revenue Service may contact, and

(F) Such other information as is required by Form 8811.

(iii) *Time and manner of filing of information return*—(A) *Manner of filing.* Form 8811 must be filed with the Internal Revenue Service at the address specified on the form. The information specified in paragraph (b)(1)(ii) of this section must be provided on Form 8811 regardless of whether other information returns are filed by use of electronic media.

(B) *Time for filing.* Form 8811 must be filed by each REMIC or issuer of a collateralized debt obligation by the later of July 31, 1989, or 30 days after the startup day (as defined in section 860G(a)(9)) in the case of a REMIC or the issue date (as defined in section 1275(a)(2)) in the case of a collateralized debt obligation. Further, each REMIC or issuer of a collateralized debt obligation must file a new Form 8811 within 30 days after the change of any information previously provided on Form 8811.

(2) *Requirement of reporting by REMICs, issuers, and nominees*—(i) *In general.* Every person described in paragraph (b)(2)(ii) of this section who pays to another person $10 or more of interest (as defined in paragraph (a) of this section) during any calendar year must file an information return on Form 1099, unless the interest is paid to a person specified in paragraph (c) of this section.

(ii) *Person required to make reports.* The persons required to make an information return under section 6049(a) and this section are—

(A) REMICs or issuers of collateralized debt obligations (as defined in paragraph (d)(2) of this section), and

(B) Any broker or middleman who holds as a nominee any REMIC regular interest or any collateralized debt obligation.

(iii) *Information to be reported*—(A) *REMIC regular interests and collateralized debt obligations not issued with original issue discount.* An information return on Form 1099 must be made for each holder of a REMIC regular interest or collateralized debt obligation not issued with original issue discount, but only if the holder has been paid interest (as defined in paragraph (a) of this section) of $10 or more for the calendar year. The information return must show—

(*1*) The name, address, and taxpayer identification number of the record holder.

(*2*) The CUSIP number, account number, serial number, or other identifying number or information, of each REMIC regular interest or collateralized debt obligation, with respect to which a return is being made,

(*3*) The aggregate amount of interest paid or deemed paid to the record holder for the period during the calendar year for which the return is made,

(*4*) The name, address, and taxpayer identification number of the person required to file this return, and

(*5*) Such other information as is required by the form.

(B) *REMIC regular interests and collateralized debt obligations issued with original issue discount.* An information return on Form 1099 must be made for each holder of a REMIC regular interest or a collateralized debt obligation issued with original issue discount, but only if the holder has been paid interest (as defined in paragraph (a) of this section and as determined under section 1272(a)(6) and the regulations thereunder) of $10 or more for the calendar year. The information return must show—

(*1*) The name, address, and taxpayer identification number of the record holder,

(*2*) The CUSIP number, account number, serial number, or other identifying number or information, of each REMIC regular interest or collateralized debt obligation, with respect to which a return is being made,

(*3*) The aggregate amount of original issue discount deemed paid to the record holder for the period during the calendar year for which the return is made,

(*4*) The aggregate amount of interest, other than original issue discount, paid or deemed paid to the record holder for the period during the calendar year for which the return is made,

(*5*) The name, address, and taxpayer identification number of the person required to file this return, and

(*6*) Such other information as is required by the form.

(C) *Cross-reference.* See § 1.67-3T(f)(3)(ii) for additional information required to be included on an information return on Form 1099 with respect to certain holders of regular interests in REMICs described in § 1.67-3T(a)(2)(ii).

(iv) *Time and place for filing a return with respect to amounts includible as interest.* The returns required under paragraph (b)(2) of this section for any calendar year must be filed after September 30 of that year, but not before the payor's final payment to the payee for the year, and on or before February 28 of the following year. These returns must be filed with the appropriate Internal Revenue Service Center, the address of which is listed in the instructions for Form 1099. For extensions of time for filing returns under this section, see § 1.6081-1. For magnetic media filing requirements, see § 301.6011-2.

(c) *Information returns not required.* An information return is not required under section 6049(a) and this section with respect to payments of interest, if the holder of a REMIC regular interest or a collateralized debt obligation is—

(1) An organization exempt from taxation under section 501(a) or an individual retirement plan;

(2) The United States or a State, the District of Columbia, a possession of the United States, or a political subdivision or a wholly-owned agency or instrumentality of any one or more of the foregoing;

(3) A foreign government, a political subdivision thereof, or an international organization;

(4) A foreign central bank of issue (as defined in § 1.895-1(b)(1) to be a bank which is by law or government sanction the principal authority, other than the government itself, issuing instruments intended to circulate as currency);

(5) Any trust which is described in section 4947(a)(1) (relating to certain charitable trusts);

(6) For calendar quarters and calendar years after 1988, a broker (as defined in section 6045(c) and § 1.6045-1(a)(1)) who holds any REMIC regular interest or collateralized debt obligation;

(7) For calendar quarters and calendar years after 1988, a middleman (as defined in § 1.6049-4(f)(4)) who holds as a nominee any REMIC regular interest or collateralized debt obligation;

(8) For calendar quarters and calendar years after 1988, a corporation (as

defined in section 7701(a)(3)), whether domestic or foreign;

(9) For calendar quarters and calendar years after 1988, a dealer in securities or commodities required to register as such under the laws of the United States or a State;

(10) For calendar quarters and calendar years after 1988, a real estate investment trust (as defined in section 856);

(11) For calendar quarters and calendar years after 1988, an entity registered at all times during the taxable year under the Investment Company Act of 1940;

(12) For calendar quarters and calendar years after 1988, a common trust fund (as defined in section 584(a));

(13) For calendar quarters and calendar years after 1988, a financial institution such as a mutual savings bank, savings and loan association, building and loan association, cooperative bank, homestead association, credit union, industrial loan association or bank, or other similar organization; and

(14) For calendar quarters and calendar years after 1988, any trust which is exempt from tax under section 664(c) (*i.e.*, a charitable remainder annuity trust or a charitable remainder unitrust).

(d) *Special provisions and definitions*—(1) *Incorporation of referenced rules.* The special rules of § 1.6049-4(d) are incorporated in this section, as applicable. Sections 1.6049-4(d)(2) and 1.6049-5(c) do not, however, apply to any REMIC regular interest or any other debt instrument to which section 1272(a)(6) applies.

(2) *Collateralized debt obligation.* For purposes of this section, the term "collateralized debt obligation" means any debt instrument (except a tax-exempt obligation) described in section 1272(a)(6)(C)(ii) that is issued after December 31, 1986.

(e) *Requirement of furnishing information to certain nominees, corporations, and other specified persons*—(1) *In general.* For calendar quarters and calendar years after 1988, each REMIC or issuer of a collateralized debt obligation (as defined in paragraph (d)(2) of this section) must provide the information specified in paragraph (e)(2) of this section in the time and manner prescribed in paragraph (e)(3) of this section to any persons specified in paragraph (e)(4) of this section who request the information.

(2) *Information required to be reported.* For each class of REMIC regular interest or collateralized debt obligation and for each calendar quarter specified by the person requesting the information, the REMIC or issuer of a collateralized debt obligation must provide the following information—

(i) The name, address and Employer Identification Number of the REMIC or issuer of a collateralized debt obligation;

(ii) The CUSIP number, account number, serial number, or other identifying number or information, of each specified class of REMIC regular interest or collateralized debt obligation;

(iii) Interest paid on a collateralized debt obligation for each calendar quarter, and the aggregate amount for the calendar year if the request is made for the last quarter of the calendar year;

(iv) Interest accrued on a class of REMIC regular interest for each accrual period during such calendar quarter, and the aggregate amount for the calendar year if the request is made for the last quarter of the calendar year;

(v) Original issue discount accrued for each accrual period during such calendar quarter, and the aggregate amount for the calendar year if the request is made for the last quarter of the calendar year;

(vi) The daily portion of original issue discount per unit of original principal amount as determined under section 1272(a)(6) and the regulations thereunder for each accrual period and specify the unit or original principal amount if other than $1,000;

(vii) The length of the accrual period;

(viii) The adjusted issue price (as defined in section 1275(a)(4)(B)(ii)) of the REMIC regular interest or the collateralized debt obligation at the beginning of each accrual period for the requested quarters,

(ix) The information required by paragraph (f)(3) of this section, and

(x) For calendar years after 1989, the information required by paragraphs (f)(2)(i)(G) or (f)(2)(ii)(K) of this section.

(3) *Time and manner for providing information*—(i) *Manner of providing information.* The information specified in paragraph (e)(2) of this section may be provided as follows—

(A) By telephone;

(B) By written statement sent by first class mail to the address provided by the requesting party;

(C) By causing it to be printed in a publication generally read by and available to persons specified in paragraph (e)(4) and by notifying the requesting persons in writing or by telephone of the publication in which it will appear, the date of its appearance, and, if possible, the page upon which it appears; or

(D) By any other method agreed to by the parties. If the information is published, then the publication should also specify the date and, if possible, the page on which corrections, if any, will be printed.

(ii) *Time for furnishing the information.* Each REMIC or issuer of a collateralized debt obligation must furnish the information specified in paragraph (e)(2) of this section by the later of—

(A) 30 days after the close of the calendar quarter for which the information was requested, or

(B) Two weeks after the receipt of the request.

(4) *Persons entitled to request information.* The following persons may request the information specified in paragraph (e)(2) of this section from a REMIC or issuer of a collateralized debt obligation in the manner prescribed in paragraph (e)(5) of this section:

(i) Any broker who holds on its own behalf or as a nominee any REMIC regular interest or collateralized debt obligation,

(ii) Any middleman who is required to make an information return under section 6049(a) and paragraph (b)(2) of this section and who holds as a nominee any REMIC regular interest or collateralized debt obligation,

(iii) Any corporation or non-calendar year taxpayer who holds a REMIC regular interest or collateralized debt obligation directly, rather than through a nominee,

(iv) Any other person specified in paragraphs (c) (9) through (14) of this section who holds a REMIC regular interest or collateralized debt obligation directly, rather than through a nominee, or

(v) A representative or agent for a person specified in paragraphs (e)(4) (i), (ii), (iii), or (iv) of this section.

(5) *Manner of requesting information from the REMIC.* A requesting person specified in paragraph (e)(4) of this section should obtain Internal Revenue Service Publication 938, Real Estate Mortgage Investment Conduit (REMIC) and Collateralized Debt Obligation Reporting Information. This publication contains a directory of REMICs and issuers of collateralized debt obligations. The requesting person can locate the REMIC or issuer from whom information is needed and request the information from the official or representative of the REMIC or issuer at the address or telephone number specified in Publication 938. The information may be requested in writing or by telephone. The request should specify the calendar quarters (*e.g.*, all calendar quarters in 1989) and the classes of REMIC regular interests or collateralized debt obligations for which information is needed.

(f) *Requirement of furnishing statement to recipient*—(1) *In general.* Every person filing a Form 1099 under section 6049(a) and this section must furnish to the holder (the person whose identifying number is required to be shown on the form) a written statement showing the information required by paragraph (f)(2) of this section. The written statement provided by a REMIC must also contain the information specified in paragraph (f)(3) of this section.

(2) *Form of statement*—(i) *REMIC regular interests and collateralized debt obligations not issued with original issue discount.* For REMIC regular interests or collateralized debt obligations issued without original issue discount, the written statement must specify for the calendar year the following information:

(A) The aggregate amounts shown on Form 1099 to be included in income by that person;

(B) The name, address, and taxpayer identification number of the person required to file this form;

(C) The name, address, and taxpayer identification number of the person who must include the amount of interest in gross income;

(D) A legend, including a statement that the amount is being reported to the Internal Revenue Service, that conforms to the legend on Form 1099, Copy B, For Recipient;

(E) The CUSIP number, account number, serial number, or other identifying number or information, of each REMIC regular interest or collateralized debt obligation, with respect to which a return is being made;

(F) All other items shown on Form 1099 for the calendar year; and

(G) For calendar years after 1989, information necessary to compute accrual of market discount including:

(*1*) For each accrual period in the calendar year, a fraction, the numerator of which equals the interest allocable to that accrual period, and the denominator of which equals the remaining interest as of the beginning of the accrual period, and

(*2*) [Reserved].

The interest allocable to each accrual period and the remaining interest are calculated by taking into account events which have occurred before the close of the accrual period and the prepayment assumption, if any, determined as of the startup day (as defined in section 860G(a)(9)) of the REMIC or the issue date (as defined in section 1275(a)(2)) of the collateralized debt obligation that would be made in computing original issue discount if the debt instrument had been issued with original issue discount.

(ii) *REMIC regular interests and collateralized debt obligations issued with original issue discount.* For REMIC regular interests or collateralized debt obligations issued with original issue discount, the written statement must specify for the calendar year the following information:

(A) The aggregate amount of original issue discount includible in gross income of the holder for the calendar year with respect to the REMIC regular interest or the collateralized debt obligation;

(B) The aggregate amount of interest, other than original issue discount, includible in the gross income of the holder for the calendar year with respect to the REMIC regular interest or the collateralized debt obligation;

(C) The name, address, and taxpayer identification number of the person required to file this form;

(D) The name, address, and taxpayer identification number of the person who must include the amount of interest specified in paragraph (f)(2)(ii) (A) and (B) of this section in gross income;

(E) For calendar years after 1987, the daily portion of original issue discount per unit of original principal amount as determined under section 1272(a)(6) and the regulations thereunder for each accrual period and specify the unit of original principal amount if other than $1,000;

(F) For calendar years after 1987, the length of the accrual period;

(G) All other items shown on Form 1099 for the calendar year;

(H) A legend, including a statement that the information required under paragraph (f)(2)(ii) (A), (B), (C), (D) and (G) of this section is being reported to the Internal Revenue Service, that conforms to the legend on Form 1099, Copy B, For Recipient;

(I) For calendar years after 1987, the adjusted issued price (as defined in section 1275(a)(4)(B)(ii)) of the REMIC regular interest or the collateralized debt obligation at the beginning of each accrual period with respect to which interest income is required to be reported on Form 1099;

(J) The CUSIP number, account number, serial number, or other identifying number or information, of each class of REMIC regular interest or collateralized debt obligation, with respect to which a return is being made; and

(K) For calendar years after 1989, information necessary to compute accrual of market discount including:

(*1*) For each accrual period in the calendar year, a fraction, the numerator of which equals the original issue discount allocable to that accrual period, and the denominator of which equals the remaining original issue discount as of the beginning of that accrual period, and

(*2*) [Reserved].

The original issue discount allocable to each accrual period and the remaining original issue discount are calculated by taking into account events which have occurred before the close of the accrual period and the prepayment assumption determined as of the startup day (as defined in section 860G(a)(9) of the REMIC or the issue date (as defined in section 1275(a)(2)) of the collateralized debt obligation.

(3) *Information with respect to REMIC assets*—(i) *95 percent asset test.* For calendar years after 1988, the written statement provided by a REMIC must also contain the following information for each calendar quarter:

(A) The percentage of REMIC assets that are qualifying real property loans under section 593,

(B) The percentage of REMIC assets that are assets described in section 7701(a)(19), and

(C) The percentage of REMIC assets that are real estate assets defined in section 856(c)(6)(B), computed by reference to the average adjusted basis (as defined in section 1011) of the REMIC assets during the calendar quarter (as described in section 1.860F–4T(e)(1)(iii)). If for any calendar quarter the percentage of REMIC assets represented by a category is at least 95 percent, then the statement need only specify that the percentage for that category, for that calendar quarter, was at least 95 percent.

(ii) *Additional information required if the 95 percent test not met.* If, for any calendar quarter after 1988, less than 95 percent of the assets of the REMIC are real estate assets defined in section 856(c)(6)(B), then for that calendar quarter, the REMIC's written statement must also provide to any real estate investment trust (REIT) that holds a regular interest the following information:

(A) The percentage of REMIC assets described in section 856(c)(5)(A), computed by reference to the average adjusted basis of the REMIC assets during the calendar quarter (as described in § 1.860F–4T(e)(1)(iii)),

(B) The percentage of REMIC gross income (other than gross income from prohibited transactions defined in section 860F(a)(2)) described in section 865(c)(3) (A) through (E), computed as of the close of the calendar quarter, and

(C) The percentage of REMIC gross income (other than gross income from prohibited transactions defined in section 860F(a)(2)) described in section 865(c)(3)(F), computed as of the close of the calendar quarter. For purposes of this paragraph (f)(3)(ii)(C), the term "foreclosure property" contained in section 865(c)(3)(F) shall have the meaning specified in section 860G(a)(8). In determining whether a REIT satisfies the limitations of section 856(c)(2), all gross income is deemed to be derived from a source specified in section 856(c)(2).

(iii) For calendar years 1988 and 1989, the percentage of assets required in paragraph (f)(3) (i) and (ii) of this section may be computed by reference to the average fair market value of the assets of the REMIC during the calendar quarter (as described in § 1.860F–4T(e)(1)(iii)), instead of by reference to the average adjusted basis of the assets of the REMIC during the calendar quarter.

(4) *Cross-reference.* See § 1.67–3T(f)(2)(ii) for additional information that may be separately stated on the statement required by paragraph (f) of this section with respect to certain holders of regular interests in REMICs described in § 1.67–3T(a)(2)(ii).

(5) *Time for furnishing statements*—(i) *For calendar quarters and calendar years after 1988.* For calendar quarters and calendar years after 1988, each statement required under paragraph (f) of this section to be furnished to any person of a calendar year with respect to amounts includible as interest must be furnished to that person after April 30 of that year and on or before March 15 of the following year, but not before the final interest payment (if any) for the calendar year.

(ii) *For calendar quarters and calendar years prior to 1989*—(A) *In general.* For calendar quarters and calendar years prior to 1989, each statement required under paragraph (f) of this section to be furnished to any person for a calendar year with respect to amounts includible as interest must be furnished to that person after April 30 of that year and on or before January 31 of the following year, but not before the final interest payment (if any) for the calendar year.

(B) *Nominee reporting.* For calendar quarters and calendar years prior to 1989, each statement required under paragraph (f) of this section to be furnished by a nominee must be furnished to the actual owner of a REMIC regular interest or a collateralized debt obligation to which section 1272(a)(6) applies by the later of—

(*1*) 30 days after the nominee receives such information, or

(*2*) January 31 of the year following the calendar year to which the statement relates.

(6) *Special rules*—(i) *Copy of Form 1099 permissible.* The requirements of paragraph (f) of this section for the furnishing of a statement to any person, including the legend requirement or paragraphs (f)(2)(i)(D) and (f)(2)(ii)(H) of this section, may be met by furnishing to that person—

(A) A copy of the Form 1099 filed pursuant to paragraph (b)(2) of this section is respect of that person, plus a separate statement (mailed with the Form 1099) that contains the information described in paragraphs (f)(2)(i)(G), (f)(2)(ii) (E), (F), (I), and (K), (f)(3) and (f)(4), if applicable, of this section, or

(B) A substitute form that contains all the information required under paragraph (f) of this section and that complies with any current revenue procedure concerning the reproduction of paper substitutes of Forms 1099 and the furnishing of substitute statements to forms recipients.

(ii) *Statement furnished by mail.* A statement mailed to the last known address of any person shall be considered to be furnished to that person within the meaning of this section.

(7) *Requirement that nominees furnish information to corporations and certain other specified persons*—(i) *In general.* For calendar quarters and calendar year after 1988, every broker or middleman must provide in writing or by telephone the information specified in paragraph (e)(2) of this section to—

(A) A corporation,

(B) A non-calendar year taxpayer, or

(C) Any other person specified in paragraphs (c)(9) through (14) of this section who requests the information and for whom the broker or middleman holds as a nominee a REMIC regular interest or a collateralized debt obligation. A corporation, non-calendar year taxpayer, or any other person specified in paragraphs (c)(9) through (14) of this section may request the information in writing or by telephone for any calendar quarter and for any class of REMIC regular interest or collateralized debt obligation.

(ii) *Timer of furnishing information.* The statement required in paragraph (f)(7)(i) of this section must be furnished to the corporate or non-calendar year taxpayer within 45 days after receipt of the request. If the request is made, however, for the last calendar quarter in a year, then the information must be furnished by the later of—

(A) 45 days after receipt of request, or

(B) March 15 of the year following the calendar quarter for which the information was requested.

(g) *Information required to be set forth on face of debt instrument.* In the case of any REMIC regular interest or collateralized debt obligation that is issued after April 8, 1988 and that has original issue discount, the issuer must set forth on the fact of the REMIC regular interest or collateralized debt obligation—

(1) The amount of the original issue discount,

(2) The issue date,

(3) The rate at which interest is payable (if any) as of the issue date,

(4) The yield to maturity, including a statement as to the assumption made under section 1272 (a)(6)(B)(iii),

(5) The method used to determine yield where there is a short accrual period, and

(6) The amount of the original issue discount allocable to the short accrual period based on the prepayment assumption determined on the startup day (as defined in section 860G (a)(9)) or the issue date (as defined in section 1275 (a)(2)).

In cases where it is not possible to set forth the information required by this paragraph (g) of the fact of the REMIC regular interest or collateralized debt obligation by the issue date, the issuer must deliver to the holder a sticker containing this information within 10 days after the issue date. For rules relating to the penalty imposed for failure to show the information required by this paragraph (g) on the regular interest or collateralized debt obligation, see section 6706 (a) and the regulations thereunder.

PART 602—[AMENDED]

Par. 6. The authority citation for Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 602.101 [Amended]

Par. 7. Section 602.101 (c) is amended by adding to the table in the appropriate place—

"§ 1.67–3T......1545–1018",
"§ 1.860D–1T......1545–1018",
"§ 1.860F–4T......1545–1018", and
"§ 1.6049–7T......1545–1018".

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

Approved: August 5, 1989.

Kenneth W. Gideon,
Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

COTP Western Alaska Regulation 89-04, Safety Zone Regulations: Viekoda Bay, Kodiak Island, Alaska

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard is establishing a one hundred (100) yard safety zone around the incinerator barge MLC–333, tug MARINE CHALLENGER, and berthing vessel JEANE CANDIES. The zone is needed to protect these vessels from a safety hazard associated with small vessels obstructing movement of vessels transporting oil spill debris to the MLC–333. Entry into this zone is prohibited unless authorized by the Captain of the Port.

EFFECTIVE DATE: This regulation becomes effective at 5:30 p.m., August 18, 1989. It terminates at 12:00 a.m., September 15, 1989, unless sooner terminated by the Captain of the Port.

FOR FURTHER INFORMATION CONTACT: LCDR W.J. Hutmacher, (907) 271–5137.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, a notice of proposed rulemaking was not published for this regulation and good cause exists for making it effective in less than 30 days after **Federal Register** publication. Publishing an NPRM and delaying its effective date would be contrary to the public interest since immediate action is needed to prevent damage to the vessels involved, possible loss of oily debris, and injury to vessel crews.

Drafting Information

The drafters of this regulation are LCDR W. J. Hutmacher, project officer for COTP Western Alaska, and CDR R. L. Nelson, project attorney, Commander, Seventeenth Coast Guard District (dl).

Discussion of Regulation

The circumstances requiring this regulation resulted from the citizens of Port Lions stating they planned to demonstrate against the burning of oil spill debris aboard the barge MLC–333 and possibly block the approach of debris-carrying vessels to the incinerator barge. Small boats obstructing the path of debris-carrying vessels can create potential problems for the safe navigation of the debris-carrying vessels that could result in damage to those vessels and the protest vessels, possible loss of oily debris resulting in further oil pollution, and possible injuries to the crews involved. The regulation is necessary to prevent damage and possible injuries from occurring.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Regulation

In consideration of the foregoing, subpart C of part 165 of title 33, Code of Federal Regulations, is amended as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5, 49 CFR 1.46.

2. A new § 165.T1704 is added to read as follows:

§ 165.T1704 Safety zone.

One hundred (100) yards around the incinerator barge MLC–333, tug MARIEN CHALLENGER, and the berthing vessel JEANE CANDIES.

(a) *Location:* The following area is a safety zone: One hundred (100) yards around the incinerator barge MLC–333, tug MARIEN CHALLENGER, and the berthing vessel JEANE CANDIES while anchored in Viekoda Bay, Kodiak Island, Alaska, position 57–51N, 153–05W.

(b) *Effective Date.* This regulation becomes effective at 5:30 p.m., August 18, 1989. It terminates at 12:00 a.m., September 15, 1989, unless sooner terminated by the Captain of the Port.

(c) *Regulations:* In accordance with the general regulations in § 165.23 of this part, entry into this zone is prohibited unless authorized by the Captain of the Port.

Dated: August 18, 1989.

W.J. Morani, Jr.,

Commander, U.S. Coast Guard, Alternate Captain of the Port, Western Alaska.

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 21

RIN 2900–AD76

Veterans Education; Implementation of the Veterans' Benefits Improvement and Health-Care Authorization Act of 1986

AGENCY: Department of Veterans Affairs.

ACTION: Correction; Final regulations.

SUMMARY: On August 17, 1989, commencing on page 33885 (54 FR 33885–33894), the Department of Veterans Affairs (VA) published a final rule to better acquaint the public with the way in which VA intends to administer the provisions of law contained in the Veterans' Benefits Improvement and Health-Care Authorization Act of 1986 which affect the administration of dependents' educational assistance and benefits provided under the Vietnam-era GI bill. VA inadvertently neglected to show that the introductory text of § 21.4204 contained in the current edition of title 38 Code of Federal Regulations is not removed. The introductory text is published below to avoid any confusion. VA regrets the error and hereby corrects it.

FOR FURTHER INFORMATION CONTACT: Mr. William G. Susling, Jr., Acting Assistant Director for Education Policy and Program Administration (225), Vocational Rehabilitation and Education Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420 (202) 233–2092.

List of Subjects in 38 CFR Part 21

Civil rights, Claims, Education, Grant programs-education, Loan programs-education, Reporting and recordkeeping requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Dated: August 30, 1989.

Charles A. Fountaine III,

Chief, Directives Management Division.

In 38 CFR part 21, Vocational Rehabilitation and Education, the introductory text of § 21.4204 is republished to read as follows:

§ 21.4204 Periodic certification.

Educational assistance allowance is payable on the basis of a required certification concerning the pursuit of a course during the reporting period.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 88–588; RM–6481]

Radio Broadcasting Services; The Dalles, OR

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Nugent Broadcasting Corporation, substitutes Channel 249C2 for Channel 249A at The Dalles, Oregon, and modifies its license for Station KACI(FM) to specify operation on the higher powered channel. Channel 249C2 can be allotted to The Dalles in compliance with the Commission's minimum distance separation requirements with a site restriction of 9.7 kilometer (6.0 miles) northwest to accommodate petitioner's desired transmitter site. The coordinates for this allotment are North Latitude 45–38–54 and West Longitude 121–16–18. With this action, this proceeding is terminated.

EFFECTIVE DATE: October 16, 1989.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 88–588, adopted August 18, 1989, and released September 1, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington DC 20037.

BILLING CODE 6712-01-M

---

47 CFR Part 73

[MM Docket No. 88–590; RM–6484; RM–6690]

Radio Broadcasting Services; Ravenel, Barnwell and Blackville, SC

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Coastal Broadcasting, Inc., substitutes Channel 269C2 for Channel 269A at Ravenel, South Carolina, modifies its license for Station WMGL(FM) to specify operation on Channel 269C2, substitutes Channel 256A for Channel 269A at Barnwell, South Carolina, and modifies Station WBAW(FM)'s license to specify the alternate Class A channel. At the request of Aiken Broadcast Group, the Commission allots Channel 250A to Blackville, South Carolina, as its first local FM service. Channel 250A can be allotted to Blackville in compliance with the Commission's minimum distance separation requirements without the imposition of a site restriction. The coordinates for the Blackville allotment are North Latitude 33–21–48 and West Longitude 81–16–06. Channel 269C2 can be allotted to Ravenel with a site restriction of 17.2 kilometers (10.7 miles) southwest to accommodate Coastal's desired transmitter site. The coordinates for the Ravenel allotment are North Latitude 32–40–40 and West Longitude 80–23–40. Channel 256A can be allotted to Barnwell in compliance with the Commission's minimum distance separation requirements and can be used at Station WBAW(FM)'s present transmitter site. The coordinates for the Barnwell allotment are North Latitude 33–13–25 and West Longitude 81–21–35. With this action, this proceeding is terminated.

DATES: Effective October 16, 1989. The window period for filing applications for Channel 250A at Blackville, South Carolina, will open on October 17, 1989, and close on November 16, 1989.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 88–590, adopted August 18, 1989, and released September 1, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

BILLING CODE 6712-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611 and 672

[Docket No. 81132-9033]

Foreign Fishing; Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of revision of effective date.

SUMMARY: This document revises the "**DATES**" portion of the preamble of a notice of adjustment to the 1989 specification of total allowable catch for pollock for the groundfish fishery of the Gulf of Alaska published August 10, 1989 (54 FR 32819). This action is intended to carry out management objectives contained in the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP).

DATES: This notice of revision is effective September 5, 1989. This notice changes the effective date of the notice published at 54 FR 32819 (August 10, 1989) from September 5, 1989 to September 15, 1989.

FOR FURTHER INFORMATION CONTACT: Ronald J. Berg, Fishery Management Biologist, 907–586–7230.

SUPPLEMENTARY INFORMATION: NMFS has been requested by fishermen and processors to delay the opening of directed fishing for pollock in the Gulf of Alaska to September 15. Processors argue that the September 7–8 halibut opening will produce such a quantity of fish that not less than a week will be required to properly handle the product. Processing of halibut is very different from pollock and requires adjustment in plant operations. Many fishermen have their vessels on contract to Exxon/Veco on oil spill clean-up activities through September 15. Other fishermen, believing the opening would occur in mid-September, have vessels undergoing repair and will not be ready until September 15. An earlier opening would eliminate much of their fishing opportunity and would result in wastage.

In rule document 89–18881, in the issue of August 10, 1989, page 32819, the phrase, "Effective September 5, 1989", should read, "Effective September 15, 1989." In column three, the sentence, "This inseason adjustment takes effect 30 days after the Secretary has filed the proposed adjustment with the Office of the Federal Register," before the Classification Section, should be deleted.

Classification

This action is taken under § 672.22 and Amendment 15 to the FMP. This action is in compliance with Executive Order 12291.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 1, 1989.

Herbert L. Blatt,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

[FR Doc. 89–21033 Filed 9–1–89; 3:04 pm]

BILLING CODE 3510-22-M

---

50 CFR Parts 611 and 672

[Docket No. 81132-9033]

Foreign fishing; Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure.

SUMMARY: The Secretary of Commerce (Secretary) prohibits trawling for groundfish in the Gulf of Alaska with a fishing vessel that has trawl gear other than pelagic trawl gear attached or on board that vessel, effective September 2, 1989, through the remainder of 1989. This action is necessary to limit the prohibited species catch (PSC) for Pacific halibut to the amount provided for by regulations implementing the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP). It is intended to carry out the management objectives of the North Pacific Fishery Management Council.

DATES: This notice is effective at 12:00 noon, Alaska Daylight Time (ADT) on September 2, 1989, until midnight, Alaska Standard Time, December 31, 1989.

FOR FURTHER INFORMATION CONTACT: Ronald J. Berg, Fishery Management Biologist, NMFS, 907–586–7230.

SUPPLEMENTARY INFORMATION: The FMP, which governs groundfish fishing in the U.S. exclusive economic zone in the Gulf of Alaska under the Magnuson Fishery Conservation and Management Act, is implemented by rules appearing at 50 CFR 611.92 and part 672. Special consideration is given to the conservation of Pacific halibut (halibut), a valuable species sought in another U.S. fishery, but which are caught as bycatch in the groundfish fishery. Pacific halibut are managed under authority of the International Pacific Halibut Commission; however, bycatches by U.S. fishermen are controlled through prohibited species catch (PSC) limits (50 CFR 672.20(f)).

The current halibut PSC limit for the Gulf of Alaska is an amount that would result in the mortality of no more than 2,000 metric tons (mt). A PSC share allocated to domestic annual processing (DAP) fisheries was not specified numerically, but was defined as the amount that would result in a total mortality inflicted on halibut of 1,485 mt. No JVP operations are planned during the remainder of 1989, and, therefore, the DAP fishery was allowed to continue until the halibut mortality was 2,000 mt. The Regional Director has determined that halibut mortality will equal this number on September 2, 1989. Under § 672.20(f)(1), the Regional Director is prohibiting fishing with trawl gear other than pelagic trawl gear for the remainder of the 1989 fishing year. Fishing with trawl gear is interpreted to include operations at sea in support of, or in preparation for, the use of trawl gear, such as having trawl gear on board.

Classification

Unless this notice takes effect promptly, the halibut PSC for the Gulf of Alaska will be exceeded. Therefore, NOAA finds for good cause that prior opportunity for public comment on this notice is contrary to the public interest and its effective date should not be delayed. This action is taken under 50 CFR 672.20 and is in compliance with Executive Order 12291.

BILLING CODE 3510-22-M

---

50 CFR Part 661

[Docket No. 90515-9115]

Ocean Salmon Fisheries Off the Coasts of Washington, Oregon, and California

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of inseason adjustment and closure.

SUMMARY: NOAA announces adjustment to the commercial ocean salmon management measures in the exclusive economic zone (EEZ) as follows: (1) For the subarea from Cape Falcon to Orford Reef Red Buoy, a ration restriction of one chinook for every two coho salmon landed is established and the first two coho salmon may be landed without a chinook salmon, beginning August 14, 1989; (2) the quota for chinook salmon in the commercial fishery from Humbug Mountain, Oregon to Punta Gorda, California, beginning August 18, 1989 is increased from 7,500 to 9,200 fish; and (3) when the commercial fishery from Humbug Mountain to Punta Gorda is open fish taken in this fishery, and only this fishery, may be landed at Port Orford, Oregon, beginning August 18, 1989.

NOAA also announces the closure of four ocean salmon fisheries in the EEZ as follows: (1) The commercial fishery for coho salmon from Cape Falcon, Oregon to Horse Mountain, California, at midnight, August 17, 1989; (2) the recreational fishery from Leadbetter Point, Washington, to Cape Falcon, Oregon, at midnight August 17, 1989; (3) the commercial fishery from Humbug Mountain, Oregon, to Punta Gorda, California, at midnight, August 20, 1989; and (4) the recreational fishery from Cape Falcon to Orford Reef Red Buoy, Oregon, at midnight, August 20, 1989. The Director, Northwest Region, NMFS (Regional Director), has determined that this action is necessary to conform to the preseason notice of 1989 management measures. This action is intended to allow maximum harvest of ocean salmon quotas established for the 1989 season, to accommodate fishermen's needs without substantially or adversely affecting the implementation of the 1989 management measures, and to ensure conservation of chinook and coho salmon.

DATES: The adjustments were effective as follows: (1) 0001 hours local time, August 14, 1989 for the adjustment to the commercial fishery from Cape Falcon to Orford Reef Red Buoy, Oregon; (2) 2400 hours local time, August 17, 1989 for the closure of the commercial fishery for coho salmon from Cape Falcon, Oregon, to Horse Mountain, California, and closure of the recreational fishery from Leadbetter Point, Washington, to Cape Falcon, Oregon; (3) 0001 hours local time, August 18, 1989 for the revised quota and adjustment to the commercial fishery from Humbug Mountain, Oregon, to Punta Gorda, California; and (4) 2400 hours local time, August 20, 1989 for the closure of the commercial fishery from Humbug Mountain Oregon, to Punta Gorda, California, and closure of the recreational fishery from Cape Falcon to Orford Reef Buoy, Oregon. Actual notice to affected fishermen was given prior to those times through a special telephone hotline and U.S. Coast Guard notice-to-mariners broadcasts as provided by 50 CFR 661.20, 661.21, and 661.23 (as amended May 1, 1989). Public comment on this notice will be accepted through September 22, 1989.

ADDRESSES: Comments may be mailed to Rolland A. Schmitten, Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way NE., BIN C15700, Seattle, WA 98115–0070; or E. Charles Fullerton, Director, Southwest Region, National Marine Fisheries Service, 300 S. Ferry Street, Terminal Island, CA 90731–7415. Information relevant to this notice has been compiled in aggregate form and is available for public review during business hours at the office of the NMFS Northwest Regional Director.

FOR FURTHER INFORMATION CONTACT: William L. Robinson at 206–526–6140, or Rodney R. McInnis at 213–514–6199.

SUPPLEMENTARY INFORMATION: Regulations governing the ocean salmon fisheries are published at 50 CFR part 661. Management measures for 1989 were effective on May 1, 1989 (54 FR 19798, May 8, 1989). The following adjustments to the commercial management measures are authorized by the ocean salmon regulations at 50 CFR 661.21(b)(1)(i)–(v).

Adjustment to Commercial Fishery From Cape Falcon to Orford Reef Red Buoy, Oregon

In its preseason notice of 1989 management measures, NOAA specified landing limits, landing boundaries, and ratio fisheries (restriction on the ratio of coho to chinook salmon which can be landed) for the 1989 commercial seasons in the subareas from Cape Falcon to Cascade Head, Oregon, and from Cascade Head to Orford Reef Red Buoy, Oregon. These restrictions were modified effective 0001 hours local time, July 18, 1989 (54 FR 31196, July 27, 1989) as follows. For the subarea from Cape Falcon to Cascade Head, a single daily landing limit per vessel or 50 coho salmon was established; for the surbarea from Cascade Head to Orford Reef Red Buoy, a ratio restriction of one chinook salmon for every two coho salmon landed was established and the first two coho salmon could be landed without a chinook salmon.

Based on the most recent catch information, the Regional Director determined that the catch rate should be slowed in the subarea from Cape Falcon to Cascade Head, Oregon, in order to allow maximum harvest of the overall coho quota and subarea coho ceilings established for the area south of Cape Falcon and to provide for equitable distribution of harvest among Oregon ports. Therefore, a landing ratio restriction of one chinook salmon for every two coho salmon landed with the provision that the first two coho salmon may be landed without a chinook salmon was established for the combined subarea from Cape Falcon to Orford Reef Red Buoy, Oregon, effective 0001 hours local time, August 14, 1989.

Adjustment to Commercial Fishery From Humbug Mountain, Oregon, to Punta Gorda, California

The 1989 commercial troll salmon fisheries from Humbug Mountain, Oregon, to Punta Gorda, California, are managed not to exceed an overall quota of 30,000 chinook salmon through August 31. This overall quota is partitioned into three subquotas and seasons. Any overages or underages in meeting a subquota for one time period are subtracted from or added to the next time period prior to August 31.

The commercial fisheries for the first two time periods have been completed. Actual landings indicate that about 20,800 chinook salmon have been caught, and 9,200 fish remain in the overall chinook quota. The third and last season governed by this chinook quota began on August 18, 1989, from Humbug Mountain, Oregon, to Punta Gorda, California. Therefore, the subquota for this fishery should be increased by the number of chinook salmon not harvested in the two earlier fisheries. Accordingly, the subquota for the commercial fishery from Humbug Mountain, Oregon, to Punta Gorda, California, beginning August 18, 1989, was increased from 7,500 to 9,200 chinook salmon.

The preseason notice of 1989 management measures requires that salmon caught in the commercial fisheries from Humbug Mountain, Oregon, to Punta Gorda, California, must be delivered within the area. Commercial fishermen requested to land their catch in Port Orford, Oregon, which is in the closed area between Orford Reef Red Buoy and Humbug Mountain, Oregon. By earlier inseason adjustment (54 FR 24906, June 1989), Port Orford is allowed to receive salmon caught only in the commercial fishery to the north between Cascade Head and Orford Reef Red Buoy, Oregon. In order to allow fishermen to land salmon in Port Orford and to provide proper accounting of catches for each management area, effective 0001 hours local time, August 18, 1989, whenever the commercial salmon fishery between Humbug Mountain, Oregon, and Punta Gorda, California is open, salmon caught in this fishery, and only this fishery, may be landed at Port Orford, Oregon. These landing boundaries, as well as the landing limits, will remain in effect only until this area is closed to commercial fishing.

Closures

Regulations governing the ocean salmon fisheries to 50 CFR 661.21(a)(1) state that "When a quota for the commercial or the recreational fishery, or both, for any salmon species in any portion of the fishery management area is projected by the Regional Director to be reached on or by a certain date, the Secretary will, by notice issued under § 661.23, close the commercial or recreational fishery, or both, for all salmon species in the portion of the fishery management area to which the quota applies as of the date the quota is projected to be reached."

Closure of Commercial Fishery From Cape Falcon, Oregon, to Horse Mountain, California, to Coho Salmon

The 1989 commercial fishery in the area from Cape Falcon, Oregon, to the U.S.-Mexico border is limited to an overall quota of 474,000 coho salmon, of which 5,000 coho salmon were reserved preseason for the commercial fishery south of Horse Mountain, California.

Based on the best available information, the commercial fishery catch south of Cape Falcon was projected to reach the 460,000 coho salmon quota (deducting the 5,000 coho salmon reserved preseason as stated above) by midnight, August 17, 1989. Therefore, the commercial fishery in the subarea from Cape Falcon, Oregon, to Horse Mountain, California, was closed to further fishing for coho salmon effective 2400 hours local time, August 17, 1989. In accordance with the preseason notice of 1989 management measures, the commercial salmon fishery in the subarea from Cape Falcon to Horse Mountain will continue for all salmon species except coho salmon, and the commercial salmon fishery in the subarea from Horse Mountain to the U.S.-Mexico border will continue for all salmon species through the earlier of September 30 or the attainment of a subarea quota of 5,000 coho salmon, effective 0001 hours local time, August 18, 1989.

Closure of Recreational Fishery From Leadbetter Point, Washington, to Cape Falcon, Oregon

The 1989 recreational fishery for all salmon species in the subarea from Leadbetter Point, Washington, to Cape Falcon, Oregon, commenced on June 26, 1989, and was scheduled to continue through the earliest of September 28, 1989, or the attainment of either a subarea quota of 111,400 coho salmon or an overall quota of 47,500 chinook salmon north of Cape Falcon. Based on the best available information, the recreational fishery catch in the subarea was projected to reach the 111,400 coho salmon quota by midnight, August 17, 1989. Therefore, the recreational fishery in this subarea was closed to further fishing effective 2400 hours local time, August 17, 1989.

Closure of Commercial Fishery From Humbug Mountain, Oregon, to Punta Gorda, California

According to the preseason notice, the commercial fishery in the subarea from Humbug Mountain, Oregon, to Punta Gorda, California, opened on August 18, 1989 for all salmon species except coho salmon and was scheduled to continue through the earlier of August 31, 1989 or the attainment of a subarea quota of 9,200 chinook salmon (as described above). Based on the best information available before the fishery opened, the commercial fishery catch in the subarea was projected to reach the subarea quota of 9,200 chinook salmon by midnight, August 20, 1989. Therefore, the commercial fishery in this subarea was closed to further fishing effective 2400 hours local time, August 20, 1989.

Closure of Recreational Fishery From Cape Falcon to Orford Reef Red Buoy, Oregon

The 1989 recreational fishery in the area from Cape Falcon, Oregon, to the U.S.-Mexico border is limited to an overall quota of 285,000 coho salmon. If the recreational coho quota is reached, the recreational fishery from Cape Falcon to Orford Reef Red Buoy, Oregon, is to be closed while the fishery from Orford Reef Red Buoy, Oregon, to the U.S.-Mexico border remains open as regularly scheduled.

The recreational fishery for all salmon species in the subarea from Cape Falcon to Orford Reef Red Buoy, Oregon, commenced on May 1, 1989, and was scheduled to continue through the earlier of September 15 or the attainment of an overall quota of 285,000 coho salmon south of Cape Falcon. The fishing week in this subarea was shortened to Sunday through Thursday only effective 2400 hours local time, July 27, 1989 (54 FR 31841, August 2, 1989) in order to provide a longer recreational fishing season. Based on the best available information, the recreational fishery catch south of Cape Falcon is projected to reach the 285,000 coho salmon quota by midnight, August 20, 1989. Therefore, the recreational fishery in the subarea from Cape Falcon to Orford Reef Red Buoy, Oregon, is closed to further fishing effective 2400 hours local time, August 20, 1989.

The Regional Director consulted with representatives of the Pacific Fishery Management Council, the Washington Department of Fisheries, the Oregon Department of Fish and Wildlife, and the California Department of Fish and Game regarding these closures and inseason adjustments. The States of Washington, Oregon, and California will manage the commercial and recreational fisheries in state waters adjacent to the affected areas of the EEZ in accordance with this federal action. This notice does not apply to other fisheries which may be operating in other areas.

In accordance with the revised inseason notice procedures of 50 CFR 661.20, 661.21, and 661.23, actual notice to fishermen was given prior to the times listed above by telephone hotline number (206) 526-6667 and by U.S. Coast Guard Notice to Mariners broadcasts on Channel 16 VHF-FM and 2182 KHz.

Because of the need for immediate action, the Secretary of Commerce has determined that good cause exists for this notice to be issued without affording a prior opportunity for public comment. Therefore, public comments on this notice will be accepted through September 21, 1989.

Other Matters

This action is authorized by 50 CFR 661.23 and is in compliance with Executive Order 12291.

BILLING CODE 3510-22-M

---

50 CFR Part 675

[Docket No. 81131-9019]

Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of inseason adjustment; notice rescinding and partially rescinding prohibitions on receipt of certain groundfish.

SUMMARY: NOAA announces the apportionment of amounts of Alaska groundfish to the joint venture processing (JVP) portion of the domestic annual harvest (DAH). This action, taken under provisions of the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP), is necessary to assure optimum use of groundfish in that area. It is a conservation and management measure intended to promote fishery objectives of the North Pacific Fishery Management Council.

DATES: Effective noon, September 3, 1989, Alaska daylight time (A.D.T). Comments will be accepted through September 18, 1989.

ADDRESS: Comments should be mailed to Steven Pennoyer, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 21668, Juneau, AK 99802, or be delivered to Room 453, Federal Building, 709 West Ninth Street, Juneau, Alaska.

FOR FURTHER INFORMATION CONTACT: Janet E. Smoker (Fishery Management Biologist, NMFS), 907-586-7230.

SUPPLEMENTARY INFORMATION: The FMP is implemented by rules appearing at 50 CFR 611.93 and part 675.

Initial specifications of groundfish for 1989 were published at 54 FR 3605

(January 25, 1989). Initially, 15 percent of the 1989 total allowable catch (TAC) for each species or species group was placed in reserve. Domestic annual processing (DAP) amounts were determined based on NMFS' preseason comprehensive survey of domestic processors. Remaining amounts were provided to domestic fishermen delivering fish to be processed by foreign processors (JVP). No initial specifications were provided for foreign fishing because DAH requirements exceeded the optimum yield. The same notice apportioned amounts from reserve to JVP for arrowtooth flounder, squid, and "other species" in order to provide bycatch amounts for JVP fisheries.

In June, the Regional Director sent another written survey to DAP processors to determine whether information gathered in the initial survey was still valid. The midseason survey was completed on July 28. Respondents indicated actual production for the first and second quarters of 1989 and changes, if any, to amounts requested for the third and fourth quarters. A thorough evaluation of survey returns by NMFS Regional Office staff indicated amounts excess to DAP needs exist within DAH in 1989, as well as DAP amounts that could require supplementation. Amounts that may be needed to supplement DAP are retained in the non-specific reserve, to be apportioned to DAP if the need arises later in the year. Amounts in DAP and reserve which are in excess of DAP requirements are apportioned to JVP.

Earlier this year, NOAA announced prohibitions of receipt by foreign processors of fish taken in several directed fisheries. These included directed fisheries for Bering Sea subarea pollock, effective January 21, 1989 (54 FR 3609, January 25, 1989), Pacific cod, effective February 11, 1989 (54 FR 6934, February 15, 1989), rock sole, effective February 21, 1989 (54 FR 7933, February 24, 1989) and yellowfin sole, effective March 1, 1989 (54 FR 9216, March 6, 1989). This notice reapportions sufficient amounts of pollock and yellowfin sole to permit resumption of JVP directed fisheries for those two species. The prohibitions of receipt by foreign processors of pollock and yellowfin sole taken in directed fisheries are rescinded. However, the amounts of Pacific cod and rock sole reapportioned by this notice are sufficient only to provide bycatch amounts for the directed fishing of other species. The prohibitions of receipt by foreign processors of Pacific cod and rock sole taken by the directed fishing for these species remain in effect.

Reapportionment

The following actions are taken by this notice to reapportion groundfish from DAP and from the non-specific reserve.

The Regional Director has found that the current DAP for Bering Sea subarea pollock may require supplementation by part of the reserve (up to 27,000 mt) later in the year. However, 174,000 mt of the reserve is available and is reapportioned to JVP for Bering Sea subarea pollock. Similarly, 30,000 mt of the nonspecific reserve is available and is reapportioned to JVP for Pacific cod.

The currently specified DAP amounts for yellowfin sole, Greenland turbot, other flatfish, and rock sole are in excess of DAP requirements for 1989. Therefore, excess DAP amounts of these species, along with reserve amounts, are reapportioned to JVP.

These reapportionments will not result in overfishing of any species, since, in each case, the resulting species TAC is less than its acceptable biological catch.

TABLE 1.—BERING SEA/ALEUTIANS REAPPORTIONMENTS OF TAC

[Values are in metric tons]

		Current	This action	Revised
Pollock (Bering Sea subarea)	DAP	1,045,565		1,045,565

Classification

This action is taken under the authority of 50 CFR 675.20(b) and complies with Executive Order 12291.

The Assistant Administrator for Fisheries, NOAA finds for good cause that it is impractical and contrary to the public interest to provide prior notice and comment. Immediate effectiveness of this notice is necessary to benefit domestic fishermen who otherwise would be unable to obtain markets for their catch. Interested persons are invited to submit comments in writing to the address above for 15 days after the effective date of this notice.

50 CFR Part 675

[Docket No. 90407-9170]

Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of reapportionment and closure.

SUMMARY: The Director, Alaska Region, NMFS (Regional Director), has determined that, (1) previously specified

prohibited species catch (PSC) allowances for Pacific halibut and red king crab are incorrect, and (2) the PSC allowances of red king crab for domestic fisheries in bycatch limitation zone 1 (Zone 1) in the Bering Sea and Aleutian Islands (BSAI) area have been attained. Therefore, the Secretary of Commerce (Secretary) is reapportioning PSC allowances for Pacific halibut and red king crab. In addition, the Secretary is prohibiting any further directed fishing for yellowfin sole, rock sole, and "other flatfish," and directed fishing for pollock and Pacific cod with bottom trawl gear in Zone 1. This action is necessary to prevent excessive bycatch of red king crabs in the trawl fishery for groundfish in an area of particular importance to the red king crab stock. This action is intended to carry out the objectives of recently implemented measures to control the bycatch of prohibited species in the trawl fishery for groundfish.

EFFECTIVE DATES: September 3, 1989 through December 31, 1989.

FOR FURTHER INFORMATION CONTACT: Jay J.C. Ginter (Fishery Management Biologist), NMFS Alaska Region, P.O. Box 21668, Juneau, Alaska 99802–1668, telephone 907–586–7229.

SUPPLEMENTARY INFORMATION: The Secretary approved Amendment 12A to the Fishery Management Plan for the Groundfish Fishery in the Bering Sea and Aleutian Islands Area (FMP) under authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act). Amendment 12A was implemented by the Secretary with a final rule promulgaed August 9, 1989 (54 FR 32642) and effective September 3, 1989 through December 31, 1990.

The purpose of Amendment 12A is to limit incidental catches of the prohibited species Tanner crab, red king crab, and Pacific halibut by the groundfish fisheries in the BSAI area. Such incidental catches are referred to as bycatches in fisheries targeting other species.

The amendment establishes five prohibited species catch (PSC) limits, each of which are apportioned among four fisheries: The domestic annual processing (DAP) fisheries for (1) flatfish and (2) other species, and the joint venture processing (JVP) fisheries for (3) flatfish and (4) other species. Each of the 20 PSC allowances prescribed for the 1989 groundfish fisheries were specified in the final rule implementing Amendment 12A (50 CFR § 675.21, Table 2, 54 FR 32651, August 9, 1989). Specification of the PSC allowances was based on the anticipated bycatch of prohibited species through the use of a mathematical prediction procedure using statistical information derived from fishery performance in previous years and projected performance for the 1989 fishing year.

Reapportionment

The Regional Director has determined that the prediction procedure has led to incorrect specification of the PSC allowances for Pacific halibut and red king crab. These adjustments of the PSC allowances are based on the best available scientific information concerning the actual groundfish harvest to date and new projections of harvest for the remaining fishing year. The Regional Director has determined that there was insufficient halibut PSC allowance apportioned to the DAP and "JVP flatfish fisheries" and excessive halibut PSC allowance apportioned to the DAP and "JVP other fisheries," and that there was insufficient red king crab PSC allowance apportioned to the "JVP flatfish fishery" and excessive red king crab PSC allowance apportioned to the "JVP other fishery." This adjustment will allow redistribution of uncaught PSC allowances among fisheries. Therefore, the Secretary is adjusting the incorrectly specified halibut and red king crab PSC allowances specified in Table 2, 50 CFR 675.21 as follows:

REAPPORTIONMENT OF 1989 PROHIBITED SPECIES CATCH (PSC) ALLOWANCES OF PACIFIC HALIBUT (IN METRIC TONS) AND RED KING CRAB (IN NUMBERS OF ANIMALS)

Fishery	Original primary PSC allowance for halibut	Change	New primary PSC allowance for halibut
DAP flatfish	181	+50	231
DAP other	3,408	−50	3,358
JVP flatfish	146	+250	396
JVP other	665	−250	415
Primary PSC limit	4,400		4,400
Fishery	Original secondary PSC allowance for halibut (BSAI-wide)	Change	New secondary PSC allowance for halibut (BSAI-wide)
DAP flatfish	220	+50	270
DAP other	4,131	−50	4,081
JVP flatfish	177	+250	427
JVP other	805	−250	555
Secondary PSC limit	5,333		5,333
Fishery	Original PSC allowance for red king crab (zone 1)	Change	New PSC allowance for red king crab (zone 1)
JVP flatfish	111,858	+16,552	128,410
JVP other	16,684	−16,552	132

Closure

The Regional Director has determined that the "DAP flatfish fishery," the "DAP other fishery," the "JVP flatfish fishery" and the "JVP other fishery" have attained their PSC allowances for red king crab in Zone 1 for the 1989 fishing year.

Therefore, the Secretary, by this notice and under authority of § 675.21(c), prohibits for the remainder of the fishing year:

(1) Directed fishing for yellowfin sole, rock sole, and "other flatfish" in the aggregate in Zone 1 by U.S. fishing vessels that process their catch on board or deliver it to U.S. processors;

(2) Directed fishing for pollock and Pacific cod in the aggregate with bottom trawl gear in Zone 1 by U.S. fishing vessels that process their catch on board or deliver it to U.S. processors;

(3) The receipt by foreign vessels of groundfish caught from Zone 1 that is composed of 20 percent or more yellowfin sole, rock sole, and "other flatfish" in the aggregate; and

(4) The receipt by foreign vessels of groundfish caught from Zone 1 with bottom trawl gear that is composed of 20 percent or more pollock and Pacific cod in the aggregate.

Classification

These actions are taken under §§ 675.20 and 675.21 and they comply with Executive Order 12291.

Proposed Rules

Federal Register
Vol. 54, No. 172
Thursday, September 7, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Part 425

[Amendment No. 2; Doc. No. 7089S]

Peanut Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) proposes to amend the Peanut Crop Insurance Regulations (7 CFR Part 425), effective for the 1990 and succeeding crop years. The intended effect is to standardize the unit structure and to establish units by share where there is a landlord/tenant relationship.

COMMENT DATE: Written comments, data, and opinions on this proposed rule should be received not later than October 10, 1989.

ADDRESS: Written comments on this proposed rule should be sent to Peter F. Cole, Office of the Manager, Federal Crop Insurance Corporation, Room 4090, South Building, U.S. Department of Agriculture, Washington, DC, 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC, 20250, telephone (202) 447–3325.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established by Departmental Regulation 1512–1. This action constitutes a review as to the need, currency, clarity, and effectiveness of these regulations under those procedures. The sunset review date established for these regulations is April 1, 1994.

John Marshall, Manager, FCIC, (1) has determined that this action is not a major rule as defined by Executive Order 12291 because it will not result in: (a) An annual effect on the economy of $100 million or more; (b) major increases in costs or prices for consumers, individual industries, federal, State, or local governments, or a geographical region; or (c) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets; and (2) certifies that this action will not increase the federal paperwork burden for individuals, small businesses, and other persons and will not have a significant economic impact on a substantial number of small entities.

This action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Flexibility Analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

FCIC proposes to amend the Peanut Crop Insurance Regulations (7 CFR Part 425) to standardize the unit structure and to establish units by share where there is a landlord/tenant relationship.

Changes being proposed herein serve to allow standard policy units currently in existence for all peanut program counties.

FCIC is soliciting public comment on this proposed rule for 30 days following publication in the **Federal Register**. Written comment should be sent to Peter F. Cole, Office of the Manager, Federal Crop Insurance Corporation, Room 4090, South Building, U.S. Department of Agriculture, Washington, DC 20250.

All written comments received pursuant to this proposed rule will be available for public inspection and copying in the Office of the Manager, Federal Crop Insurance Corporation, Room 4090, South Building, U.S. Department of Agriculture, Washington, DC 20250, during regular business hours, Monday through Friday.

List of Subjects in 7 CFR Part 425

Crop insurance; Peanuts

Proposed Rule

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation proposes to amend the Peanut Crop Insurance Regulations (7 CFR Part 425), proposed to be effective for the 1990 and succeeding crop years, as follows:

PART 425—[AMENDED]

1. The authority citation for 7 CFR Part 425 is revised to read as follows:

Authority: 7 U.S.C. 1508, 1516.

2. The Peanut Crop Insurance Regulations (7 CFR part 425) § 425.7 is amended in Section 7(d) by revising subsections 17.c. and 17.n., to read as follows:

§ 425.7 The application and policy.

* * * * *

(d) * * *

17. Meaning of terms. * * *

c. *"County"* means the county shown on the actuarial table and any additional land located in a local producing area bordering on the county, and shown by the actuarial table; and * * *

n. *"Unit"* means all insurable acreage of peanuts in the county on the date insurance attaches for the crop year:

(1) in which you have a 100 percent share; or

(2) which is owned by one entity and operated by another entity on a share basis.

Land rented for cash, a fixed commodity payment, or any consideration other than a share in the insured crop on such land will be considered owned by the lessee. Units will be determined when the acreage is reported and may be adjusted to reflect the actual unit structure when adjusting a loss; however, no further unit division may be made at loss adjustment time.

We may consider any acreage and share thereof reported by or for your spouse or child

or any member of your household to be your bona fide share or the bona fide share of any person having an interest therein.

Peanut acreage that would otherwise be one unit, may be divided into more than one unit, if for each proposed unit you maintain written verifiable records of planted acreage and harvested production for at least the previous crop year. Production reports by unit based on those records must be filed no later than the earlier of the acreage reporting date or 45 days after the sales closing date for the upcoming crop year. The acreage planted to the insured peanut crop, to be divided into units, must be located in separate, legally identifiable sections (except in Florida) or, in the absence of section descriptions (and in Florida) the land is identified by separate ASCS Farm Serial Numbers, provided:

(1) The boundaries of the section or ASCS Farm Serial Number are clearly identified and the insured acreage is easily determined; and

(2) The peanuts are planted in such a manner that the planting pattern does not continue into an adjacent section or ASCS Farm Serial Number,

If you have a loss on any unit, production records for all harvested units must be provided. Production that is commingled between optional units will cause those units to be combined.

* * * * *

Done in Washington, DC on August 16, 1989.

John Marshall,
Manager, Federal Crop Insurance Corporation.

BILLING CODE 3410-08-M

FEDERAL TRADE COMMISSION

16 CFR Part 307

Smokeless Tobacco

AGENCY: Federal Trade Commission.

ACTION: Extension of time to file comments.

SUMMARY: The Federal Trade Commission has granted several requests to extend the public comment period for all interested parties for 45 days, until October 16, 1989, on the Notice of Proposed Rulemaking for possible amendments to its regulations under the Comprehensive Smokeless Tobacco Act of 1986. The original comment period on the Notice, published on July 31, 1989 (54 FR 31541), ended on August 30, 1989.

DATE: Comments regarding the proposed amendments to the regulations must be filed no later than October 16, 1989.

ADDRESS: Comments should be addressed to Secretary, Federal Trade Commission, 6th & Pennsylvania Ave. NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Anne V. Maher (202) 326–2987. Division of Advertising Practices, Federal Trade Commission, 6th & Pennsylvania Ave. NW., Washington, DC 20580.

SUPPLEMENTARY INFORMATION: In a Notice of Proposed Rulemaking published on July 31, 1989 (54 FR 31541), the Federal Trade Commission requested public comment on proposed amendments to 16 CFR part 307, the Commission's regulations under the Comprehensive Smokeless Tobacco Act of 1986 ("Act"). Those regulations, which took effect on February 27, 1987, implement the Act's requirements for the display of health warnings in the labeling and advertising of smokeless tobacco products and for the submission of plans for compliance with the Act. The regulations exempt "utilitarian objects for personal use, such as pens, pencils, clothing and sporting goods" from the Act's requirement that all advertising display the warnings. The Commission's decision to exempt utilitarian items was challenged in court, and the court subsequently ordered the Commission to delete the exemption.[1] Consequently, the Notice proposed the deletion of the exemption of utilitarian objects from the regulations, and proposed a method for displaying the required health warnings on utilitarian objects.

The date on which comments would have been due was August 30, 1989. Two organizations, however, have requested a 30-day extension to the time period, while the Smokeless Tobacco Council has requested a 60-day extension. Having considered the requests, the Commission has determined that a 45-day extension period will provide all parties with a sufficient amount of time to prepare comments to the proposed amendments. Accordingly, the comment period will be extended for 45 days, and the Commission will accept written public comments on the Notice until October 16, 1989.

List of Subjects in 16 CFR Part 307

Health warnings, Smokeless tobacco, Trade practices.

By direction of the Commission.

Donald S. Clark,
Secretary.

[1] *Public Citizen, et al. v. Federal Trade Commission*, No. 88–5209, (D.C. Cir. March 14, 1989), *aff'g.* 688 F. Supp. 667 (D.D.C. 1988).

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 1

Rule Amendments Concerning Trading Cards and Submission of Trade Records

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed Rule Amendments.

SUMMARY: The Commodity Futures Trading Commission proposes several amendments to Regulation 1.35, 17 CFR 1.35. These amendments would (1) require that trading cards prepared by a member of a contract markets showing purchases and sales executed on that contract market, pursuant to paragraph 1.35(d)—(a) contain pre-printed, unique identifying information which would permit the sequencing of such records intra-day, (b) distinguish each member's records from those of other members, and (c) distinguish each such record from all other such records prepared by the member over a period of one week; (2) require that trading cards be timestamped promptly upon completion; (3) require that all contract markets adopt and make effective within 60 days rules which require that trading cards prepared pursuant to Regulation 1.35(d) and customer order tickets prepared pursuant to Regulation 1.35(a–l) be submitted by the executing member to the clearing member or the exchange immediately at the end of intervals not to exceed 30 minutes, commencing with the beginning of the trading session; provided that the time period for submission of trading records after the close not exceed five minutes; (4) require that all contract markets adopt rules providing that the 30-minute period for submission subsequently be shortened to 15 minutes; (5) require that members of contract markets submit the records required by Regulations 1.35(a–1) and 1.35(d) in accordance with exchange rules adopted to implement the 30-minute and 15-minute trade submission requirements; (6) that members be held accountable for all of the trading cards prepared pursuant to paragraph 1.35(d) in exact numerical sequence, regardless of whether that trading cards was voided or otherwise not used for submission of trades to clearing; (7) that members record trades on trading cards in exact chronological order on sequential lines of a trading card with no lines skipped between trades; provided, however, that if lines remain after the last execution recorded on a trading card, the remaining lines

The Commission believes that

collection and timestamping

that trading cards be timestamped by

shall be marked through; (8) that all contract markets adopt rules which designate the opening and closing periods upon which the opening and closing trading ranges are based in each of their designated futures or option contracts; (9) that all contract markets adopt rules requiring that members identify on their trading cards prepared pursuant to 1.35(d) the trades executed during designated opening and closing periods, either by drawing a line on the card to separate those trades from others recorded thereon or by other method approved by the Commission.

DATES: Comments on the proposed amendments to Regulation 1.35 must be received on or before October 10, 1989.

ADDRESSES: Comments should be sent to Jean A. Webb, Secretary of the Commission, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581.

FOR FURTHER INFORMATION CONTACT: Patricia C. Apfelbaum, Assistant Director, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Telephone: (202) 254–8955.

SUPPLEMENTARY INFORMATION:

I. Paperwork Reduction Act Notice

Public report burden for this collection of information is estimated to average 80.83 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Joseph G. Salazar, CFTC Clearance Officer, 2033 K Street NW, Washington, DC 20581; and to, Office of Management and Budget, Paperwork Reduction Project (3038–xxx), Washington, DC 20503.

II. Background

Existing Regulation 1.35 governs the records of cash commodity, futures, and option transactions which must be prepared and maintained for all purchases and sales of commodities for future delivery or commodity options on designated contract markets. Regulation 1.35(d) requires that each member of a contract market executing purchases and sales prepare regularly and promptly a trading card or other record showing such purchases and sales. These records are made by exchange members with respect to their personal (customer type indicator "CTI" 1) trades, although in some markets those records also are used to reflect trades executed for the benefit of other account types.[1] The contract markets likewise impose on their members a variety of requirements for the preparation of such records and the submission of trade records for clearing, consistent with each exchange's system for assigning a one-minute time of execution to each trade, as required by Commission Regulation 1.35(g). Commission Regulation 1.35(a–1) requires that a written record be prepared of all customer orders both by the futures commission merchant ("FCM") and the member receiving the order on the trading floor, and that the orders be timestamped upon receipt and at the time a report of execution is made from the trading floor.

Commission Regulation 1.35 imposes a variety of obligations on the members of contract markets to keep accurate and complete records of their trading activity. Further, the one-minute trade timing standard of Commission Regulation 1.35(g) is a performance standard which requires an accurate and verifiable time of execution for each trade.[2] The Commission has found that, in many instances, members are not preparing accurate trade records in accordance with their own recordkeeping obligations and, therefore, also are not providing accurate data which will permit an exchange to meet the performance standard as to their trades. Moreover, the exchanges have had sufficient opportunity to address these issues and, although some steps have been taken, have failed to implement adequate measures to address this situation.

For these reasons, the Commission has determined that it is necessary that Commission Regulation 1.35 be amended to provide a variety of means to prevent the above-described source records from being fabricated or altered, to verify the sequence of a member's trading activity, and to enhance surveillance of trades executed during opening and closing periods. These records are source documents from which trade data, particularly for those trades executed for a member's personal account, are taken for entry into clearing and used in the creation of an exchange's trade register. The trade register then is used to conduct trade practice surveillance and to reconstruct trading for various purposes.

Collecting these records more frequently after completion than required now at most exchanges should reduce the potential for a member to alter such records to commit or conceal illegal trading activity. Requiring that trading records be submitted within five minutes after the close also will reduce the potential for members improperly to execute trades after the close of trading. A separate requirement that members comply with those submission requirements would provide the Commission with the authority to enforce these requirements as well.

Timestamping trading cards and including pre-printed sequence information thereon would provide a mechanism by which to verify the sequential order of the trading cards, deter alteration of such trading cards in connection with illegal trading, and help enforce the trade record collection requirements being proposed. Requiring members to be fully accountable for all trading cards will provide more complete written records for surveillance purposes. Requiring that members record trades on trading cards in exact chronological sequence without skipping lines will further reduce the ability of a member to fabricate trades after the fact.[3] Finally, the designation of separate opening and closing periods and identification by members on their trading cards of trades executed during those periods would facilitate the identification of those trades for the purposes of monitoring potential abuses involving customer orders during those periods, which generally have greater volume, and often more price volatility, than other designated time periods during a trading day.[4] A separate requirement that members comply with exchange rules in this regard provide the Commission with the authority to enforce that requirement.

---

[1] In some instances, customer orders also may be used to record information specifically required by Regulation 1.35(d) such as opposite clearing member. Such orders are not addressed by the proposed amendments herein that relate to trading cards.

[2] *See*, 49 FR 50190 (December 27, 1984).

[3] The proposed requirement that members record trades on trading cards in exact chronological order on sequential lines of a trading card without skipping lines will not prevent members from recording buys and sells separately on different sides of the trading card or on different cards as long as buys and sells so recorded are in sequential order.

[4] The opening and closing periods referred to herein are the periods which are the basis for establishing the opening and closing ranges and not opening and closing bracket periods. Data collected in connection with the adoption of the amendments to Regulation 1.35 for the timing of trades to the nearest minute indicated that, in some markets the volume of transactions executed during the open ranged from 13–25% and that as much as 12% of the volume of transactions may occur in the closing period.

The Commission believes that timestamping and regular collection of trade records are readily achievable at reasonable expense to the exchanges and their members. With respect to timestamping, order tickets already are required to be timestamped upon report, pursuant to Commission Regulation 1.35(a–1), and trading cards easily could be timestamped upon completion in the same manner. Further, many exchanges already have recognized the benefit of frequent collection of trading records and have imposed such requirements on their members. Likewise, recording trades on trading cards without skipping lines between trades and designating opening and closing periods can be implemented at no cost to exchanges and their members and without a material increase in the time required for the preparation of the required record.

The Commission believes that the proposed requirements would provide several additional benefits. By reducing the opportunity to alter or fabricate source records, the proposed requirements would increase the reliability of audit trail data based on such records and the confidence of public customers in the accuracy of such data. The time stamp and designation of the open and close on trading cards could be used to refine existing exchange audit trail systems. Specifically, the additional timing data would aid verification of the one-minute trade times required under Commission Regulation 1.35(g). Such time stamp data also would provide additional information which could be used in the derivation of one-minute times, for systems which impute trade times, and as such should aid such audit trail systems in imputing reliable one-minute trade times to trades involving a member's personal account (CTI 1 trades), with an increased level of confidence than is the case today. The Commission has identified weaknesses in the exchanges' existing audit trail systems with respect to those trades.[5]

In its review of the implementation of exchange audit trail systems and in its analysis of audit trail proposals preparatory to the adoption of the one-minute timing standard, the Commission previously has identified many of these steps as a means of improving audit trails and made recommendations to the exchanges toward that end.[6] The collection and timestamping requirements combined with additional trading card identification and sequencing information and recording requirements also would address the types and manner of certain abuses allleged in criminal indictments and Commission compliants against a number of traders at the CME and CBT, announced on August 2, 1989. The indictments allege, among other things, that certain traders altered, rewrote, or destroyed trading cards and made false reports of trades to clearing in order to conceal and falsely reflect trading activity which deprived their customers of profits and enabled the traders to avoid liability for trading errors.

In sum, such amendments should result in immediate improvements in the deterrence and detection of illegal trading abuses facilitated by improper fabrication and alteration of trading records and in audit trail data. In particular, such actions would reduce the opportunity for members trading for their personal accounts to participate in illegal trading to defraud customers.

III. Existing Exchange Practices

As noted above, the exchanges already have in place some requirements that address these issues and have indicated that these systems are a valuable tool in their surveillance efforts.[7] Specifically, at the CBT pre-numbered sequential trading cards must be used to record all of a member's personal trades (Regulation 332.04). Trading cards must be used in ascending order each day but need not be used in exact numerical sequence as long as they are used in ascending order on a day-to-day basis. However, CBT has adopted a rule, which will become effective on September 1, 1989, to make members accountable for all trading cards in numerical order, regardless of whether the trading card is used for trade submission (Regulation 332.04).[8] CBT Regulation 332.05 requires that clearing members collect trading cards at designated times throughout the trading day, presently intra-day and once after the close of the market for the day trading session and every half-hour during the evening trading session. The CBT has amended this rule to require that trading cards be timestamped by the clearing member upon collection.[9] CBT has represented the Commission staff that it intends to require the hourly submission of trading cards to clearing members effective September 1, 1989. With respect to designation of opening and closing periods, the CBT currently has no rules establishing such periods.

At the Coffee, Sugar & Cocoa Exchange ("CSC") members are required to record all trades in exact chronological order of execution on pre-printed sequentially numbered trading cards, provided by the CSC. The trading cards are collected by the CSC promptly following the end of each half-hour bracket period, beginning at 10:00 a.m. (Rule 3.18). The traders use three-ply carbon trading cards and submit the top copy of the card to the Exchange. CSC presently employs an opening call procedure for opening its coffee, sugar, and cocoa markets (Rule 3.04), whereby each contract month is "called" for the execution of opening orders for that contract month alone. Typically, the opening call for any particular month lasts one minute or less. There is a similar closing call in the coffee and sugar contracts. The closing period for trading in the cocoa contract is five minutes in length (Rule 3.04(e)). Members are required to place a line on their trading cards to designate trades executed during the opening call (Rule 3.18(d)).

At the New York Futures Exchange ("NYFE") all trades must be recorded on trading cards in the order of execution with each trade on a separate line and no lines skipped. Trading cards are numbered sequentially by the executing member and must be submitted to NYFE no later than 15 minutes after the end of the half-hour bracket period during which those trades were executed (Rule 409 and Regulatory Memorandum 84–11). With respect to the open and close, NYFE has an opening call subject to procedures established by the Floor Committee (Rules 411 and 412). The closing period is set as the last minute of trading (Rule 435(a)). Members are required to draw a line on their trading cards to indicate when the opening call was completed (Rule 409(b)).

At the CME, trades for a member's personal account (CTI 1) and house account (CTI 2) trades originated by the member must be recorded on trading cards in the order in which they are executed. All of the member's cards must be numbered sequentially in the order in which they are used, and once a trade has been recorded on a new card, the member may not return to a previous card (Rule 536 B and C). Trading cards are submitted to clearing members twice intra-day and once after the close of the market (Rule 536 A, Memorandum from CME Clearinghouse to All Members re "Intra-day Trade Submission Compliance," August 7, 1989).[10] With respect to opening and closing periods, CME has specified closing periods of 30 seconds for its agricultural, interest rate and S & P futures and 60 seconds for currencies and S & P options.

---

[5] *E.g.*, Rule Enforcement Review of the Chicago Board of Trade ("CBT"), February 17, 1989; Audit Trail Rule Enforcement Review of the Chicago Mercantile Exchange ("CME"), September 19, 1988.

[6] *E.g.*, Letters from the Division of Trading and Markets ("Division") to the exchanges dated February 7 and March 8, 1989; and the Rule Enforcement Review of the CBT.

[7] In its response to the Division's March 8, 1989 letter, the Commodity Exchange, Inc. ("Comex") characterized these procedures as minimizing the opportunity to fabricate or alter source documents and increasing the opportunity for detection of such activities.

[8] The rule was submitted to the Commission pursuant to Commission Regulation 1.41(c). In a letter dated May 24, 1989, the Division notified the Exchange that the rule could be so implemented.

[9] The rule was submitted to the Commission pursuant to Commission Regulation 1.41(c). In a letter dated July 25, 1989, the Division notified the Exchange that the rule could be so implemented. On the same date, the Division informed the Exchange that amendments to CBT Regulation 465.01, which require that all time stamps be affixed by synchronized time clocks, could also be implemented under 1.41(c).

Comex requires that CTI 1 and 2 trades be recorded on trading cards in the exact order of execution (Rule 4.60(a)(1)). Members also may record CTI 3 and CTI 4 trades on their trading cards. Further, all members submit trading cards and order tickets to their clearing members every half hour beginning at 9:15 a.m. for trades executed during designated half-hour periods (Rule 4.63(a)). Clearing members are required to have full-time representatives on the floor to collect such trading documents (Rule 4.85). Openings at Comex are conducted pursuant to a call procedure (Rule 4.04). The closing period is the last minute of trading (Rule 4.80).

At the Kansas City Board of Trade ("KCBT") all trades must be recorded on trading cards (Rule 1115.00). Further, trades must be submitted to clearing within 90 minutes after the trade was executed (Clearing Corporation Bulletin 88–11, July 27, 1988). In order to comply with these requirements, clearing members must collect trading cards regularly from the executing member. With respect to the open and close, KCBT rules provide that the opening range is set by the Pit Reporter based on all prices at which orders on the open are executed (Rules 1111.00 and 1111.01). The closing period is the last 30 seconds of trading (Rule 1111.02).

At the New York Cotton Exchange ("NYCE") all trades are recorded on numbered carbonized trading cards in the order of execution. Buys and sells are recorded on the left and right sides of the card, respectively, and, except for cross trades and straddles, each buy or sell must be recorded on the line immediately following the prior transaction. A member may, however, skip lines between trades if that is his practice, that practice has been submitted in writing to the Compliance Department, and the practice does not result in trades being recorded out of sequence (Rule 5.10(d)). Trades must be submitted by the clearing member to the clearing house within one-half hour after the bracket in which the trade occurred.[11] The opening period is set at one minute (Rule 5.10(c)).

The existence of these exchange requirements, although less extensive than the proposed regulations, indicate that the exchanges believe that requirements of the type being proposed are important to their audit trail and surveillance capabilities, as well as to the intra-day clearing and reconciliation of trades. These procedures provide an existing structure for the contract markets and their members readily to adopt the necessary changes without disrupting the markets. The proposed regulatory amendments provide a uniform minimum standard for the preparation and submission of trade data and provide additional information to verify the accuracy of that data and enforce existing requirements.

IV. Proposed Rules

In light of the foregoing, the Commission proposes to amend Regulation 1.35 by amending paragraph 1.35(a–1), which pertains to written records of customer orders and paragraph 1.35(d), which pertains to trading cards, and adding a new paragraph (j), which relates to the submission of trading documents to a clearing member or contract market, and designation of opening and closing periods.

1. Proposed Paragraph (a–1) Futures commission merchants, introducting brokers, and members of contract markets: Recording of customers' and option customers' orders.

The Commission proposes to add to subparagraph (a–1)(4) of Regulation 1.35 a new sentence which would require that the members of contract markets comply with exchange rules adopted pursuant to proposed Commission Regulations 1.35(j) (1) and (2), which would require that written records of customer orders be submitted to exchange personnel or the clearing member within certain timeframes.[12] This proposal would give the Commission the authority to enforce such trade date submission requirements independent of any exchange action and thereby would provide the Commission with an additional tool for enforcing the other requirements of Commission Regulation 1.35.

2. Proposed Paragraph (d)—Members of contract markets.

The Commission proposes to add to paragraph (d) of Regulation 1.35 a new sentence which would require that trading cards contain a pre-printed sequence number which would permit the sequencing of such records at least intra-day. The proposed amendments would require further that the trading card contain information to identify the member and to distinguish each of that member's trading cards from other trading cards the member prepares during a period of one week. The Commission further proposes to require that trading cards be timestamped promptly after completion in the same manner as written records of customer orders presently are timestamped upon report. The Commission believes that such identifying and timing information would permit it more effectively to determine whether a member has entered his trades in chronological order and to monitor whether a trader may have altered, fabricated, or destroyed trade records to carry out or conceal illegally trading activity. Likewise, the proposed requirement that members record trades on trading cards in exact chronological order without skipping lines and mark through any lines remaining after the last execution is recorded on a trading card should inhibit the ability of a member to fabricate trades after the fact.

---

[10] In a report dated April 19, 1989, the CME's Special Committee to Review Trading Practices recommended that trading cards be collected on an hourly basis and that trading cards have pre-printed numbers. Subsequently, a special Computerized Trade Reconstruction ("CTR") Enhancements Committee ("Committee"), in a report to the Board of Governors dated July 27, 1989, recommended that the Exchange implement the hourly collection of trading cards. The proposal would require that trades executed and recorded prior to 8:00 a.m. would be submitted to the clearing members no later than 8:30 a.m., and that subsequent submissions would take place every hour on the half-hour. Thus, all trades executed and recorded between 8:00 a.m. and 9:00 a.m. would be submitted by 9:30 a.m., and so on throughout the remainder of the trading day. On August 2, 1989, the Board of Governors adopted this requirement, to take effect upon approval by the Commission.

The Committee further recommended that the Exchange require that clearing members timestamp all "locals'" trading cards upon receipt at the firm's floor trading desk. The Committee recommended that the Exchange *not* adopt a requirement that trading cards have pre-printed numbers.

[11] At NYCE trades are submitted to clearing on brokerage submission sheets. Rule 9.10(a) requires trading members to submit brokerage sheets to their clearing members promptly.

[12] The order tickets which must be submitted in accordance with this requirement are any written records of customer orders used on the floor of an exchange, whether prepared on the floor, transmitted via wire, or originating from the FCM or introducing broker.

Further, the timestamping requirement would enable the exchanges to enforce the proposed requirement, discussed below, that trading cards and order tickets be submitted at regular intervals throughout the trading day. The proposed amendments would require members to comply with exchange rules implementing the latter requirement and with rules requiring that they identify trades executed during opening and closing periods on their trading cards, thereby providing the Commission with an additional tool to ensure compliance with other requirements of Regulation 1.35.

The Commission believes that the requirement that trading cards be timestamped upon completion generally could be accomplished in the same manner that order tickets presently are timestamped. At exchanges where trading cards are collected by clearing members, this mechanism for compliance would extend equally to all members. At those exchanges the clearing member already would have the trading cards and simply would have to provide for those trading cards to be timestamped at the floor desk along with order tickets.

As noted above, several exchanges already require that members record trades on pre-printed sequentially numbered trading cards or that sequence numbers be recorded manually. This information is required to be included when trades are submitted for clearing at the CBT, CME, and CSC as part of their computerized systems for deriving one-minute times of execution for each trade. Further, this record enables the exchanges to investigate the sequence of a member's trading activity during a particular trading session and compare the contemporaneous record of the trade to the data submitted for clearing. These exchanges do not, however, require that the trading card numbers be unique except within one trading session. This increases the potential for a member to use a trading card with a duplicate pre-printed number, which ordinarily would be used on a different trade day, to rewrite or fabricate trading records.

For that reason, the Commission is proposing steps to limit the potential for a trader to circumvent the sequence requirement through the use of duplicate printed records. The proposed regulation would require that each trading card contain unique identifying information which would permit the records of each member to be distinguished from those of other members. The trading cards also would have to contain identifiers which would permit the trading cards of a member prepared during one trading session to be distinguished from trading cards the member prepares for other trading sessions during a period of one week.

Compliance with this requirement may be achieved through a variety of means at the election of the member and in accordance with any relevant exchange rules, but any such information must be pre-printed on the trading card. Among the possible methods to achieve this result would be pre-printed dates to distinguish trading days, plus, where applicable, an alpha or other designation to identify the particular trading session during a day. Separate series numbers or letter designations for each group of sequence numbers would be another method by which the trading cards for each trading session could be distinguished from those for other trading sessions during a one-week period. Pre-printed clearing member or floor member identification, which frequently already appear on trading cards, would facilitate further the unique identification of a trading card.

The Commission believes that the flexibility permitted in implementing the proposed amendment recognizes that these types of data presently are used in computerized audit trail systems, and that practical limitations exist on the number of fields and spaces available for data entry. Thus, although the exchanges likely would find it necessary to publish rules or guidelines for their members on the parameters that the unique identifiers must meet, the Commission has determined not to establish more specific criteria for such identifiers or to require that all trading cards be unique indefinitely.

Finally, the amendments to this paragraph would require members of contract markets to comply with exchange rules adopted pursuant to paragraph (j) that require the periodic submission of trading cards, that members be accountable for all trading cards in numerical sequence, and that members identify trades which are executed during designated opening and closing periods. In this manner, the Commission will be able independently to enforce such requirements.

3. Proposed Paragraph (j)—Submission of trading records.

The Commission proposes to add to Regulation 1.35 a new paragraph (j) which would require that contract markets adopt and have in place within 60 days rules requiring that order tickets prepared under paragraph 1.35(a–1) and the trading cards prepared under paragraph 1.35(d) be submitted to the clearing member, or to the exchange, at intervals not to exceed 30 minutes; provided, however, that the time period for submission of such trading records after the close shall not exceed five minutes. The new paragraph further would provide that, effective 90 days after implementation of the 30-minute requirement, the time for submission be reduced to 15 minutes.

Currently, Regulation 1.35(a–1) requires that order tickets be timestamped upon report, which should be as soon as possible after an order has been filled. Nonetheless, order tickets have been included in the proposed amendment to assure that under no circumstances would they be held by a broker longer than the time periods provided for the collection of trading cards.

The purpose of the proposed requirement that trading records be submitted within a particular timeframe to the exchange or clearing member is to remove the record from the trader's control to that of exchange or clearing firm employees and thereby reduce the potential for the member to alter the record or fabricate records in the time which might otherwise intervene between trade execution and the submission of the trades for clearing. In this regard, the Commission intends that the documents remain beyond the member's control at least until after the trades have been entered into clearing.[13]

The timely collection of trade records, together with the requirement that those records be sequentially numbered and otherwise identified, should materially reduce the potential for such abuses. On the other hand, the Commission believes that the proposed collection schedules should be sufficient for traders to fully record and confirm their trades and submit them to the appropriate entity without impeding trade executions.

The proposed regulation also would require that exchanges establish rules subject to Commission approval which designate opening and closing trading periods for each market and require members to identify on their trading cards the trades executed during such periods. This requirement would enhance the ability of exchange and

---

[13] This requirement is intended to accommodate existing practices whereby the individual member presently is responsible for the direct submission of trades for clearing and retains his own trade records. For example, it could be fulfilled through the use of multi-part trading cards such as those used at the CSC. Both the top copy of such multi-part cards and the carbon copies constitute records which must be retained pursuant to Commission Regulation 1.31.

BEST COPY AVAILABLE

Commission staff to identify trades executed during those periods and monitor those trades for potential abuse of customer orders at no increased costs to exchanges or their members and with no material increase in the time needed to prepare those records.

Finally, the proposed new paragraph would require that members account for all trading cards required by paragraph (d) in sequence, without gaps, regardless of whether that record is voided or otherwise is not used by the clearing member or member to enter trades for clearing. If, for instance, a member has a clerk rewrite his trades on a new card because of an error discovered upon confirmation to the opposite side, he nevertheless would have to retain the original trading card and submit it to the contract market upon request. If a member's trading cards ordinarily are retained by his clearing member, the clearing member likewise would be responsible for those trading cards not used for trade submission.

V. Proposed Effective Dates

The Commission proposes that proposed Commission Regulation 1.35(j)(1), which would require that trading cards and order tickets be submitted at intervals not to exceed 30 minutes, and that those trading records be submitted within five minutes of the close, be effective 60 days after publication of final rules. After an additional 90 days, the requirement of subparagraph 1.35(j)(2) that such records be submitted at intervals not to exceed 15 minutes would become effective. Further, the requirements in proposed Regulation 1.35(d), that all trading cards be timestamped upon completion, and of Regulation 1.35(j), that exchanges designate open and closing periods and require members to identify trades executed during those periods, also would become effective 60 days after publication of final rules.

The Commission proposes that the additional requirements of proposed Regulation 1.35(d), that trading cards contain certain pre-printed sequence and identifying information, and of proposed Regulation 1.35(j)(3), that members be accountable for all such trading cards, become effective 90 days after the publication of final rules.

VI. Related Matters

A. Regulatory Flexibility Act

The Regulatory Flexibility Act ("RFA"), 5 U.S.C. 601 et seq., requires that agencies, in proposing rules, consider the impact of the rules on small businesses. The Regulation 1.35 amendments proposed here would affect contract markets, clearing members, and contract market members. The Commission previously has determined that contract markets are not "small entities" for the purposes of the RFA, and that the Commission need not, therefore, consider the effect of the proposed amendments on contract markets in relation to the RFA. 47 FR 18618, 18619, April 30, 1982.

The Commission also previously has determined that FCMs should be excluded from the definition of "small entity" based upon the fiduciary nature of the FCM/customer relationships as well as the fact that FCMs must meet minimum financial requirements. 47 FR 18618, 18619, April 30, 1982. The Commission has determined that clearing members are, by exchange or clearing house rule, subject to a minimum capital requirement which is at least as great, and in most cases substantially greater, as that imposed on FCMs, and are not, therefore, small entities for the purposes of the RFA. Further, many clearing members are also FCMs. The Commission need not, therefore, consider the effect of proposed amendments on clearing members in relation to the RFA.

With respect to members of contract markets, the Commission has stated that it is appropriate to evaluate within the context of a particular rule proposal whether some or all floor brokers should be considered small entities and, if so, to analyze the economic impact on such entities at that time. 47 FR 18618, April 30, 1982. The members of contract markets affected by the proposed regulation, other than clearing members, would be floor brokers and floor traders.

Commission Regulation 1.35 imposes requirements on members of contract markets to prepare complete and accurate records of their trades. Commission Regulation 1.35 also establishes a performance standard for accurate and verifiable one-minute times of execution. This standard requires that the trading data recorded by members to be accurate. Moreover, Commission Regulation 1.31 authorizes the Commission to request records for inspection at anytime. The proposed amendments are intended to ensure that the existing requirements of Regulation 1.35 are satisfied.

The Commission believes that the proposed amendments can be implemented without imposing a significant economic burden on a substantial number of small entities. With respect to the requirements that members identify trades executed during the open and close on their trading cards, that they be fully accountable for all trading cards prepared pursuant to Regulation 1.35(d), whether or not those trading cards are used for submitting trades for clearing, and that they record trades in chronological sequence without skipping lines between trades, the Commission believes these requirements would not impose a significant economic burden on members. Notably, there should be very few occasions when a member will have a trading card which is not going to be used for trade submission to clearing, since this only involves trading cards which are rewritten completely due to errors. All other such trading cards already are used directly or indirectly for submitting trade data for clearing.

With respect to the collection of trading records at 30-minute, and ultimately 15-minute, intervals, the Commission again notes that many exchanges already require the frequent collection of those records. For these exchanges, therefore, a mechanism exists to enable members to comply with exchange rules adopted to implement this requirement. At other exchanges compliance with these requirements can reasonably be integrated into existing procedures for the collection of trading information. Although the proposed requirement would require more frequent collection, the Commission believes that existing resources will be sufficient in most cases to meet the requirement. Moreover, the personnel to perform these functions often are employees of clearing members, which are not small entities. Similarly, existing Regulation 1.35(a–1) requires customer order tickets to be timestamped upon report. This means that a procedure for timestamping documents already exists, and trading cards could be timestamped in the same manner. At exchanges where clearing members already are required to collect trading cards, this mechanism for compliance extends equally to all members.

Finally, with respect to the requirement that certain information be pre-printed on trading cards, the Commission believes that the economic impact will not be significant. As noted above, the CBT and the CSC already require that trading cards contain pre-printed sequential numbers. Further, many members at all exchanges already are having their trading cards pre-printed with their member identification. At other exchanges, the Commission believes that these items can be accomplished at reasonable expense. Finally, the timeframe for the implementation of this requirement is expected to reduce further any economic burden which may incur to the members.

Accordingly, pursuant to section 3(a) of the Regulatory Flexibility Act, Public Law 96–354, 94 Stat. 1168 (5 U.S.C. 605(b)), based on its initial review of the available data, the Commission certifies the belief that this rule, promulgated, will not have a significant economic impact on a substantial number of small entities. If additional data are provided to the record to suggest that these proposed requirements will have a significant impact on small entities, the CFTC will complete a regulatory flexibility analysis with the final rulemaking. The Commission invites specific comment regarding the potential costs of these requirements for small entities and alternative less burdensome means to achieve the Commission's objectives.

B. Paperwork Reduction Act

The Paperwork Reduction Act of 1980, (Act) 44 U.S.C. 3501, *et seq.*, imposes certain requirements on federal agencies, (including the Commission) in connection with their conducting or sponsoring any collection of information as defined by the Paperwork Reduction Act. In compliance with the Act the Commission has submitted this proposed rule and its associated information collection requirements to the Office of Management and Budget. The burden associated with this entire collection, including this proposed rule, is as follows:

Average Burden Hours Per Response: 60.83.

Number of Respondents: 339.

Frequency of Response: on occasion.

Persons wishing to comment on the information which would be required by this proposed rule should contact Gary Waxman, Office of Management and budget, Room 3228, NEOB, Washington, DC 20502, (202) 395–7340. Copies of the information collection submission to OMB are available from Joseph Salazar, CFTC Clearance Officer, 2033 K Street NW., Washington, DC 20581, (202) 254–9735.

List of Subjects

17 CFR Part 1

Commodity futures, Commodity options, Contract markets, Customers, Exchanges of futures for physicals, Futures commission merchants, Introducing brokers, Members of contract markets, Noncompetitive trading, Reporting and recordkeeping requirements.

In consideration of the foregoing, and pursuant to the authority contained in the Commodity Exchange Act and, in particular, Sections 4, 4g, 5, 5a and 8a thereof, 7 U.S.C. 6, 6g, 7, 7a, and 12a, the Commission hereby proposes to amend 17 CFR part 1 of chapter I of the Code of Federal Regulations as follows:

PART 1—GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

1. The authority citation for part 1 continues to read as follows:

Authority: 7 U.S.C. 2, 2a, 4, 4a, 6, 6a, 6b, 6c, 6d, 6e, 6f, 6g, 6h, 6i, 6j, 6k, 6l, 6m, 6n, 6o, 7, 7a, 8, 9, 12, 12a, 12c, 13a, 13a–1, 16, 19, 21, 23, and 24, unless otherwise stated.

2. Regulation 1.35 is proposed to be amended by revising paragraph (a–1)(4) to read as follows:

§ 1.35 Record of Cash Commodity, Futures, and Option Transactions,

* * * * *

(a–1) * * *

(4) Each member of a contract market reporting the execution of a customer's or option customer's order from the floor of a contract market shall record on a written record of such order, including the account identification and order number, by time-stamp or other timing device, the date and time, to the nearest minute, such report of execution is made. Each member of a contract market shall submit the written records of customer orders prepared pursuant to this paragraph in accordance with the requirements of exchange rules adopted in accordance with paragraphs (j)(1) and (j)(2) of this section.

3. Regulation 1.35 is proposed to be amended by revising paragraph (d) to read as follows:

* * * * *

(d) *Members of contract markets.* (1) Each member of a contact market who, in the place provided by the contract market for the meeting of persons similarly engaged, executes purchases or sales of any commodity for future delivery or commodity option on or subject to the rules of such contract market, shall prepare regularly and promptly a trading card or other record showing such purchases and sales. Such trading card or record shall show the member's name, the name of the clearing member, transaction date, time (as specified in rules of the contract market which comply with the requirements of this section), quantity, and, as applicable, underlying commodity, contract for future delivery or physical, price or premium, delivery month or expiration date, whether the transaction involved a put or a call and strike price. Such trading card or other record shall also clearly identify the opposite floor broker or floor trader with whom the transaction was executed, and the opposite clearing member (if, in accordance with the rules or practice of the contract market, such opposite clearing member is made known to the member).

(2) Each member of a contract market recording trades on trading cards pursuant to this paragraph shall record such trades in exact chronological order of execution on sequential lines of the trading card without skipping lines between trades; provided, however, that if lines remain after the last execution recorded on a trading card, the remaining lines shall be marked through.

(3) Each trading card prepared pursuant to paragraph (d)(1) of this section also must contain pre-printed sequence numbers, which would permit such records to be sequenced intra-day. The trading cards prepared pursuant to this paragraph also must contain trader identification and other unique identifying information which would permit trading cards of one member to be distinguished from those of other members and would permit each of the tradng cards prepared by the member to be distinguished from other such trading cards prepared by the member for no less than a one week period.

(4) Each member of a contract market reporting the execution of trades on a trading card pursuant to this paragraph shall record, by time-stamp or other timing device, the date and the earlier of the time, to the nearest minute, such trading card is completed or submitted as required by paragraphs (j)(1) and (j)(2) of this secton.

(5) Each member of a contract market shall be accountable for all trading cards prepared pursuant to this paragraph in exact numerical sequence, whether or not such trading cards are used in the submission of trades for clearing.

(6) Each member of a contract market shall prepare in accordance with exchange rules adopted pursuant to paragraph (j)(4) of this section and submit in accordance with exchange rules adopted pursuant to paragraphs (j)(1) and (j)(2) of this section the trading cards prepared pursuant to this paragraph.

§ 1.35 [Amended]

* * * * *

3. Regulation 1.35 is proposed to be amended by adding paragraph (j) to read as follows:

* * * * *

(j) *Submission of trading records.* Each contract market shall:

(1) Have rules in effect requiring that trading records prepared by members of the contract market pursuant to paragraphs (a–1) and (d) of this section be submitted to contract market personnel or the clearing member at intervals not to exceed 30 minutes, commencing with the beginning of each

trading session; provided, however, that the time period permitted for the submission of trading records after the close of trading in each market shall not exceed five minutes.

(2) Have rules in effect which will require that upon 90 days after the requirements of paragraphs (j)(1) of this section become effective, that the records required to be submitted pursuant to this paragraph be submitted to contract market personnel or the clearing member at intervals not to exceed 15 minutes.

(3) Have rules in effect which provide that members of the contract market shall be accountable for all trading cards prepared pursuant to paragraph (d) of this section in exact numerical sequence, whether or not such records are used in the submission of trades for clearing.

(4) Have rules in effect which designate the opening and closing periods upon which the opening and closing trading ranges are based for each of its markets. The rules also shall provide that members of the contract market identify on the trading cards prepared pursuant to paragraph (d) of this section the trades executed during such opening and closing periods either by drawing a line on the trading card to separate those trades from others recorded thereon or other method approved by the Commission.

Issued in Washington, DC, on this 29th day of August, 1989.

Lynn K. Gilbert,

Deputy Secretary to the Commission.

BILLING CODE 6351-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 888

[Docket No. N–89–1963; FR–2656]

Section 8 Housing Assistance Payments Program; Fair Market Rents for New Construction and Substantial Rehabilitation—Chicago, Il

Special Revisions for Fiscal Year 1986 and Fiscal Year 1987

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Proposed notice.

SUMMARY: Section 8(c)(1) of the United States Housing Act of 1937 requires the Secretary to establish Fair Market Rents (FMRs) periodically, but not less frequently than annually. This document proposes to amend the Fiscal Year 1986 and the Fiscal Year 1987 Fair Market Rent Schedules to establish new FMRs for the Chicago, Illinois market area for those fiscal years. These rents are necessary to provide FMRs more comparable to market rents for new construction in this market area.

DATES: Comments due October 10, 1989.

ADDRESSES: Interested persons are invited to submit comments to the Rules Docket Clerk, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410. Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection during regular business hours at the above address. (7:30 a.m. to 5:30 p.m. weekdays).

FOR FURTHER INFORMATION CONTACT: Edward M. Winiarski, Chief Appraiser, Valuation Branch, Technical Support Division, Office of Insured Multifamily Housing Development, 451 Seventh Street SW., Washington, DC 20410–0500, telephone (202) 426–7624. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Background

Section 8 of the United States Housing Act of 1937 (42 U.S.C. 1437f) (the Act) authorizes a system of housing assistance payments to aid lower income families in renting decent, safe, and sanitary housing. These programs, known collectively as the Section 8 Housing Assistance Payments Program, provide assistance payments for lower income families for a variety of housing options, including new construction and substantial rehabilitation.

Under these programs, HUD or public housing agencies (PHAs) make rental assistance payments on behalf of eligible families to owners. When families lease an eligible unit, the housing assistance payment is made and is based upon the differences between the total housing expense and the total family contribution. Initial contract rents, plus an allowance for utilities generally may not exceed area-wide Fair Market Rents (FMRs) established by the Department. FMRs are based primarily on the level of rentals paid for recently completed or newly constructed dwelling units of modest design within each market area as determined by HUD Field Office staff. For the FY 1987 FMRs previously promulgated by the Department (see the April 26, 1988 **Federal Register**, 53 FR 14954), these rents reflected the Department's cost containment efforts in relation to housing assistance provided in the Section 8 New Construction and Substantial Rehabilitation Programs.

This Document

This document proposes special revisions to the Fiscal Year 1986 and the Fiscal Year 1987 Fair Market Rent schedules applicable to the Chicago, Illinois market area. These FMRs reflected data submitted by the Chicago Office. Where sufficient market rental comparables do not exist, HUD procedures permit the use of an interpolation technique to arrive at indicated FMRs. Although the use of interpolation and adjustments to establish rents are sound principles and techniques, the best data for "market rents" would be that from recently constructed projects, as it would necessarily reflect current conditions in the marketplace with respect to financing, vacancy rates, etc., and would provide a degree of assurance that rents so derived should be adequate to support new projects, all factors being equal.

The Chicago Office requested that the Department establish new rents for the Chicago, Illinois market area. Careful analysis of this request and reanalysis of the FY 1986 and FY 1987 FMRs for this market area indicate that the rents resulting from the application of the aforementioned techniques, when modified to reflect the Department's cost containment policies, are not adequate, even when it is clear that there has been compliance with the Department's cost containment guidelines with respect to project design. Therefore, upward adjustments of the FY 1986 and FY 1987 FMRs for this market area are needed. Accordingly, the Department is proposing revisions of the FY 1986 and FY 1987 schedules applicable to the Chicago, Illinois market area. It is intended that when these schedules are

published for effect, their applicability will be the same as set forth in the preamble to the original FY 1986 and FY 1987 schedules, published on August 7, 1986, at 51 FR 28486, and April 26, 1988, at 53 FR 14954, respectively.

Other Information

HUD regulations in 24 CFR Part 50, implementing section 102(2)(c) of the National Environmental Policy Act of 1969, contain categorical exclusions from their requirements for the actions, activities and programs specified in § 50.20. Since the FMRs established in this Notice are within the exclusion set forth in § 50.20(1), no environmental assessment is required, and no environmental finding has been prepared.

The Catalog of Federal Domestic Assistance Program number and title for the activities covered by this Notice are 14.156, Lower Income Housing Assistance Program (Section 8).

Accordingly, the following amendments to the FY 1986 and FY 1987 Fair Market Rent schedules are proposed for the Chicago, Illinois Market Area:

SCHEDULE A—FAIR MARKET RENTS FOR NEW CONSTRUCTION AND SUBSTANTIAL REHABILITATION

REGION 5—CHICAGO REGIONAL OFFICE MARKET; CHICAGO, ILLINOIS

[Including Housing Finance and Development Agencies' Programs]

Structural	Number of Bedrooms				
	0	1	2	3	4+

BILLING CODE 4210-29-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[FI–27–89]

RIN 1545–AN52

Real Estate Mortgage Investment Conduits; Reporting Requirements and Other Administrative Matters

AGENCY: Internal Revenue Service, Treasury.

ACTION: Amendment of notice of proposed rulemaking and notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: This document contains proposed income tax regulations relating to real estate mortgage investment conduits. The relevant provisions in the Internal Revenue Code were added or amended by the Tax Reform Act of 1986 and by the Technical and Miscellaneous Revenue Act of 1988. These regulations prescribe the manner in which an entity elects status as a real estate mortgage investment conduit (REMIC) for Federal income tax purposes and the procedures to be followed when filing a Federal income tax return as a REMIC. The regulations also require REMICs and certain other issuers to file information returns with the Internal Revenue Service and to provide notice to holders of REMIC interests or other debt instruments to which section 1721 (a)(6) applies of income and certain allocable expenses attributable to their interests.

In addition, in the Rules and Regulations portion of this **Federal Register**, the Internal Revenue Service is issuing temporary regulations that relate to the reporting requirements and other administrative matters with respect to interests in REMICs and other debt instruments to which section 1272(a)(6) applies. Except for the amendments to § 1.67–3T and § 1.1275–3T, the text of those temporary regulations and the amendments to § 1.6049–4(b)(2) and to proposed regulation § 1.1275–3 that are proposed in this notice serve as the comment document for this proposed rulemaking.

DATES: These regulations are proposed to be effective after December 31, 1986, except as follows:

With respect to certain reporting requirements, § 1.6049–7(b)(1) and the amendments to § 1.1275–3(b) are proposed to be effective September 7, 1989.

The amendments to § 1.6049–4(b)(2) is proposed to be effective for calendar years after 1990.

Sections 1.6049–7(e)(2)(x) and 1.6049–7(f)(2)(i)(G) and (f)(2)(ii)(K) are proposed to be effective for calendar years beginning after December 31, 1989.

Sections 1.860F–4(e)(1)(ii) (A) and (B), 1–6049–7(c)(6) through (14), 1.6049–7(e)(1), (2)(i) through (ix), (3), (4), and (5), 1.6049–7(f)(3) (i) and (ii), and 1.6049–7(f)(5)(i) and (f)(7) are proposed to be effective for calendar quarters and calendar years beginning after December 31, 1986.

Section 1.6049–7(f)(2)(ii) (E), (F), and (I) are proposed to be effective for calendar quarters and calendar years beginning after December 31, 1987.

Section 1.860F–4(e)(1)(ii)(D) and 1.649–7(f)(3)(iii) are proposed to be effective for calendar quarters and calendar years beginning after December 31, 1987 and ending before January 1, 1990.

Section 1.860F–4(e)(1)(ii)(C) is proposed to be effective for calendar quarters and calendar years beginning after December 31, 1986 and ending before January 1, 1988.

With respect to who may sign a REMIC return, § 1.860F–4(c)(1) is proposed to be effective for REMICs with a startup day on or after November 10, 1988.

Finally, the § 1.6049–7(g) requirement to set forth information on the face of the debt instrument is proposed to be effective for debt instruments issued after April 8, 1988.

Written comments and requests for a public hearing must be mailed or delivered by October 10, 1990.

ADDRESS: Send comments and requests for a public hearing to: Internal Revenue Service, Attn: CC:CORP:T:R (FI–27–89), Room 4429, Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Laura Ann M. Lauritzen, 202–566–6624 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collections of information contained in this notice of proposed rulemaking have been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments on the collections of information should be sent to the Office of Management and Budget, Paperwork Reduction Project (1545–1018), Washington, DC 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer T:FP, Washington, DC 20224.

The collections of information in this regulation are in §§ 1.860D–1(d), 1.860F–4, 1.1275–3(b), 1.6049–4(b)(2), and 1.6049–7 (b)(1), (b)(2), (e), and (f). This information is required by the Internal Revenue Service to provide the Service and investors in REMICs and other debt instruments subject to section 1272(a)(6) with the amount of interest or original issue discount allocable to them. This information will be used to examine the required income tax returns and information returns to ensure compliance with the applicable tax law. The likely respondents are business or other for-profit institutions.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service Individual respondents/recordkeepers may require more or less time, depending on their particular circumstances.

The estimated total annual reporting and/or recordkeeping burden for the requirements contained in §§ 1.60D–1 (d), 1.860F–4, 1.1275–3(b), 1.6049–4 (b)(2), 1.6049–7(b), 1.6049–7(e), 1.6049–7 (f)(1) through (f)(6) of this regulation is reflected on Forms 1066, 1099–INT, 1099–OID, 8281, and 8811.

Estimated total annual reporting and/or recordkeeping burden for the requirements contained in § 1.6049–7(e): *720* hours.

The estimated annual burden per respondent/recordkeeper varies from *0.1* hours to *12.0* hours, depending on individual circumstances, with an estimated average of *1.2* hours.

Estimated number of respondents and/or recordkeepers: *600.*

Estimated annual frequency of responses (for reporting requirements only): *12.*

Estimated total annual reporting and/or recordkeeping burden for the requirements contained in § 1.6049–7 (f)(7): *250* hours.

The estimated annual burden per respondent/recordkeeper varies from *0.1* hours to *20.0* hours, depending on individual circumstances, with an estimated average of *5.0* hours.

Estimated number of respondents and/or recordkeepers: *50.*

Estimated annual frequency of responses (for reporting requirements only): *50.*

Background

The temporary regulations published in the Rules and Regulations portion of this issue of the **Federal Register** amend regulations §§ 1.67–3T and 1.1275–3T, withdraw §§ 1.860D–1T, 1.860F–4T, and 1.6049–7T and add new temporary regulations §§ 1.860D–1T, 1.860F–4T, and 1.6049–7T to part 1 of title 26 of the Code of Federal Regulations (CFR). The final regulations that are proposed to be based on these temporary regulations would be added to part 1 of title 26 of the CFR. The new temporary regulations §§ 1.860–1T, 1.860F–4T, and 1.6049–7T are promulgated as new proposed regulations §§ 1.860D–1, 1.860F–4, and 1.6049–7. The revisions to § 1.67–3T and 1.1275–3T, however, are not being proposed by cross reference.

Those final regulations would provide rules on the reporting requirements and other administrative matters of REMICs and collateralized debt obligations and some additional reporting requirements for debt instruments with original issue discount. For the text of the Temporary Regulations, see T.D. 8259, published in the Rules and Regulations portion of this issue of the **Federal Register**. The preamble to the temporary regulations explains the regulations.

This document also contains a notice of proposed rulemaking which proposes to amend §§ 1.1275–3(b) and 1.6049–4 (b)(2).

The proposed amendments to § 1.1275–3(b) require issuers to provide additional information with the Form 8281. The issuer must provide a schedule showing the amount of original issue discount per unit of original principal amount that accrues for each accrual period and specify the unit of original principal amount if other than $1,000, specify the yield to maturity, and state whether the debt instrument is a variable rate debt instrument.

For debt instruments issued with original issue discount, § 1.6049–4(b)(2) permitted brokers to send Forms 1099–OID to only those persons who were holders of record on the semiannual record date, if any, or on June 30 and December 31. The proposed amendments to § 6049–4(b)(2) require brokers to provide a Form 1099–OID to each person who was a holder of record at any time during the calendar year, even if the person was not the holder of record on June 30 or December 31 of that year, and to report the original issue discount for the period that the person held the debt instrument.

Special Analyses

It has been determined that these proposed regulations will not be major regulations as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required.

Pursuant to section 7805(f) of the Internal Revenue Code, the proposed regulations are being sent to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Request for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety. A public hearing will be scheduled and held upon written request by any person who submits written comments on the proposed rules. Notice of the time and place for the hearing will be published in the **Federal Register.**

Drafting Information

The principal author of these proposed regulations is Laura Ann M. Lauritzen, Office of the Assistant Chief Counsel (Financial Institutions and Products), Internal Revenue Service. However, personnel from other offices of the IRS and Treasury Department participated in their development.

List of Subjects

26 CFR 1.1271–1 through 1.1297–3

Income taxes, Capital gains and losses, Original issue discount, Applicable federal rate, Market discount, Short-term obligations, Stripped bonds and stripped coupons, Tax-exempt obligations.

26 CFR 1.6001–1 through 1.6109–2

Income taxes, Administration and procedure, Filing requirements.

Proposed Amendments to the Regulations

The proposed amendments to 26 CFR Part 1 are as follows:

PART 1—[AMENDED]

Paragraph 1. The authority for part 1 is amended by adding the following citations:

Authority: 26 U.S.C. 7805; * * * § 1.1275–3(b)(2) also issued under 26 U.S.C. 1275(c). * * *

Par. 2. Section 1.1275–3(b) of the amendment to the regulations proposed April 8, 1986, (51 FR 12086) is amended as follows:

1. In paragraph (b)(1) by removing the word "and" after the language "(ii) certificates of deposit," in paragraph (b)(1) and by removing the period after the language "(within the meaning of section 1286)" and by adding in place of the period the following language ", and (iv) interests in a REMIC or other debt instrument subject to section 1271(a)(6)."
2. In paragraph (b)(2)(i) by removing the language "address, and" and adding in its place the language "address, telephone number, and".
3. By redesignating paragraphs (b)(2)(iv), (v), (vi), (vii), (viii), and (ix) as paragraphs (b)(2) (v), (vi), (vii), (ix), (x), and (xi) respectively.
4. Redesignated paragraphs (b)(2)(ix)(D) and (E) are further redesignated as paragraphs (b)(2)(ix) (E) and (F) respectively.
5. By adding a new paragraph (b)(2)(iv) immediately after paragraph (b)(2)(iii), a new paragraph (b)(2)(viii) immediately after paragraph (b)(2)(vii), and a new paragraph (b)(2)(ix)(D) immediately after paragraph (b)(2((ix)(C), to read as follows:

§ 1.1275–3 Original issue discount information reporting requirements.

* * * * *

(b) *Information required to be reported to Secretary—*

* * * * *

(2) *Information required to be reported.*

* * * * *

(iv) A schedule of the amount of original issue discount per unit of original principal amount for each accrual period and specify the unit of original principal amount if other than $1,000;

* * * * *

(viii) The yield to maturity;

(ix) * * *

(D) Whether the debt instrument is a variable rate debt instrument described in § 1.1275–5(a);

* * * * *

§ 1.6049–4 [Amended]

Par. 3. Section 1.6049–4 is amended as follows:

1. The first sentence of paragraph (b)(2) is amended by adding a period after the language "aggregating $10 or more" and by removing the parenthetical "(determined, if semiannual record date reporting is being used, under § 1.6049–1(a)(1)(ii)(*b*)(*1*), by treating each holder as holding the obligation on every day it was outstanding during the calendar year)" and adding in its place the following sentence "For calendar years ending before January 1, 1991, semiannual record date reporting under § 1.6049–1(a)(1)(ii)(*b*)(*1*) may be used, and if used, the original issue discount includible in gross income is determined by treating each holder as holding the obligation on every day it was outstanding during the calendar year."

The second sentence in paragraph (b)(2)(iii) is revised to read as follows, "For calendar years ending before January 1, 1991, semiannual record date reporting under § 1.6049–1(a)(1)(ii)(*b*)(*1*) may be used, and if used, the original issue discount includible in gross income is determined by treating each holder as holding the obligation on every day it was outstanding during the calendar year."

3. The flush language that follows paragraph (b)(2)(vi) is revised to read as follows, "Section 1.6049–1(a)(1)(ii)(*b*)(*2*) and, for calendar years ending before January 1, 1991, § 1.6049–1(a)(1)(ii) (*b*)(*1*), and (*c*), apply for purposes of this paragraph."

Fred T. Goldberg, Jr.,

Commissioner of Internal Revenue.

BILLING CODE 4830-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 931

New Mexico Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule; reopening and extension of comment period on proposed amendments.

SUMMARY: OSM is announcing receipt of a revision pertaining to a previously proposed amendment to the New Mexico permanent regulatory program (hereinafter, the "New Mexico program") under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment is intended to provide additional safeguards for protection of the hydrologic balance.

This notice sets forth the times and locations that the New Mexico program and proposed amendment to that program are available for public inspection and the reopened comment period during which interested persons may submit written comments on the proposed amendment.

DATES: Written comments must be received by 4:00 p.m., m.d.t. September 22, 1989.

ADDRESSES: Written comments should be mailed or hand delivered to Mr. Robert H. Hagen at the address listed below.

Copies of the New Mexico program, the proposed amendment, and all written comments received in response to this notice will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requester may receive one free copy of the proposed amendment by contacting OSM's Albuquerque Field Office.

Mr. Robert H. Hagen, Director, Albuquerque Field Office, Office of Surface Mining Reclamation and Enforcement, 625 Silver Avenue, SW., Suite 310, Albuquerque, New Mexico 87102, Telephone: (505) 766–1486.

New Mexico Energy and Minerals Department, Mining and Minerals Division, 525 Camino de los Marquez, Santa Fe, NM 87503, Telephone (505) 827–5970.

FOR FURTHER INFORMATION CONTACT: Mr. Robert H. Hagen, Director, Albuquerque Field Office, (505) 766–1486.

SUPPLEMENTARY INFORMATION:

I. Background on the New Mexico Program

On December 31, 1980, the Secretary of the Interior conditionally approved the New Mexico program. General background information on the New Mexico program, including the Secretary's findings, the disposition of comments, and the conditions of approval of the New Mexico program, can be found in the December 31, 1980, **Federal Register** (45 FR 86489). Subsequent actions concerning New Mexico's program and program amendments can be found at 30 CFR 931.15, 931.16, and 931.30.

II. Proposed Amendment

By letter dated February 21, 1989 (Administrative Record No. NM–474), New Mexico submitted a proposed amendment to its permanent regulatory program pursuant to SMCRA. New Mexico submitted the proposed amendment at its own initiative. The rule that New Mexico proposed to amend is Coal Surface Mining Commission (CSMC) Rule 80-1-20-41(d)(1). OSM published a notice in the March 14, 1989, **Federal Register** (54 FR 10562) announcing receipt of the amendment and inviting public comment on the adequacy of the proposed amendment (Administrative Record No. NM-482). The public comment period ended April 13, 1989.

During its review of the amendment, OSM identified concerns relating to the protection of the hydrologic balance. OSM notified New Mexico of the concerns by telephone conversation on August 14, 1989 (Administrative Record No. NM-535). New Mexico responded in a letter dated August 17, 1989, by submitting a proposed revision to CSMC Rule 80-1-42(a)(1) (Administrative Record No. NM-534), which is in addition to that revision previously proposed for CSMC 80-1-20-41(d)(1). This additional revision (Administrative Record No. NM-534) is now under consideration.

III. Public Comment Procedures

OSM is reopening the comment period on the proposed New Mexico program amendment to provide the public an opportunity to reconsider the adequacy of the additional materials submitted. In accordance with the provisions of 30 CFR 732.17(h), OSM is seeking comments on whether the proposed amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If the amendment is deemed adequate, it will become part of the New Mexico program.

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "DATES" or at locations other than the Albuquerque Field Office will not be considered in the final rulemaking or included in the administrative record.

BILLING CODE 4310-05-M

---

30 CFR Part 934

North Dakota Permanent Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule; withdrawal of proposed amendment.

SUMMARY: OSMRE is announcing withdrawal of a proposed amendment to the North Dakota permanent regulatory program (hereafter referred to as the North Dakota program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The proposed amendment pertains to the reclamation bond liability period for surface coal mining acreage disturbed for sediment ponds and associated access roads, surface water diversions and soil stockpiles.

EFFECTIVE DATE: September 7, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Jerry Ennis, Director, Casper Field Office, Office of Surface Mining Reclamation and Enforcement, 100 East B Street, Casper, Wyoming 82601-1918, Telephone: (307) 261-5776.

SUPPLEMENTARY INFORMATION:

I. Background on the North Dakota Program.

On December 15, 1980, the Secretary of Interior conditionally approved the North Dakota program. General background information on the North Dakota program, including the Secretary's findings, the disposition of comments, and the conditions of approval can be found in the December 15, 1980, **Federal Register** 45 FR 82246. Subsequent actions concerning North Dakota's program and program amendments can be found at 30 CFR 934.12, 934.13, 934.14, 934.15, and 934.16.

II. Submission of Amendment.

On November 8, 1988, North Dakota submitted a proposed amendment to its program pursuant to SMCRA (Administrative Record No. (ND-H-01). The amendment would revise regulation section at: NDAC section 69-05.2-22-07, which requires, a 10-year bond liability period for a reclamation tract, beginning after the last year of augmented seeding, planting, fertilization, irrigation or other work.

At it's own initiative, for purposes of improving operational efficiency of the State program, North Dakota proposed to amend to section 69-05-2-22-07, to allow for a case-by-case determination of reclamation bond liability periods, for sedimentation ponds and associated disturbances, that would end at the same time as the reclamation bond liability period for the disturbances within the reclamation tract.

OSMRE published a notice in the December 23, 1988, **Federal Register** 53 FR 51845 announcing receipt of the amendment and inviting public comment on the adequacy of the proposed amendment (Administrative Record No. ND-H-11). The public comment period ended on January 23, 1989.

III. Withdrawal of Amendment.

On July 31, 1989, North Dakota requested that the proposed amendment submitted on November 8, 1988, be withdrawn (Administrative Record No. ND-H-13). Therefore, the proposed amendment published in the December 23, 1988, **Federal Register** is withdrawn and 30 CFR Part 934 is not amended.

IV. List of Subjects in 30 CFR Part 934:

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: August 24, 1989.

Raymond L. Lowrie,

Assistant Director, Western Field Operations.

30 CFR Part 950

Wyoming Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule; Reopening and extension of public comment period on proposed amendment.

SUMMARY: OSM is announcing receipt of additional explanatory information and revisions pertaining to a previously proposed amendment to the Wyoming permanent regulatory program (hereinafter, the "Wyoming program") under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The additional explanatory information and revisions pertain to the entire amendment. The amendment is intended to allow the construction of bluffs as final reclamation features where such features will enhance post-mining land uses for the benefit of wildlife and livestock.

This notice sets forth the times and locations that the Wyoming program and proposed amendment to that program are available for public inspection and the reopened comment period during which interested persons may submit written comments on the proposed amendment.

DATES: Written comments must be received by 4:00 p.m., m.d.t. October 10, 1989.

ADDRESSES: Written comments should be mailed or hand delivered to Mr. Jerry R. Ennis at the address listed below.

Copies of the Wyoming program, the proposed amendment, and all written comments received in response to this notice will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requester may receive one free copy of the proposed amendment by contacting OSM's Casper Field Office.

Mr. Jerry R. Ennis, Director,
Casper Field Office,
Office of Surface Mining Reclamation
and Enforcement,
100 East B Street, Room 2128,
Casper, WY 82602-1918,
Telephone: (307) 261-5776.
Department of Environmental Quality
Land Quality Division
Herschler Building—Third Floor West
122 West 25th Street
Cheyenne, WY 82002
Telphone: (307) 777-7756.

FOR FURTHER INFORMATION CONTACT: Mr. Jerry R. Ennis, Director, Casper Field Office, (307) 261-5776.

SUPPLEMENTARY INFORMATION:

I. Background on the Wyoming Program

On November 26, 1980, the Secretary of the Interior conditionally approved the Wyoming program. General background information on the Wyoming program, including the Secretary's findings, the disposition of comments, and conditions of approval of the Wyoming program can be found in the November 26, 1980 **Federal Register** (45 FR 78637). Subsequent actions concerning Wyoming's program and program amendments can be found at 30 CFR 950.12, 950.15, and 950.16.

II. Proposed Amendment

By letter dated December 13, 1988 (administrative record No. WY-11-1), Wyoming submitted a proposed amendment to its program pursuant to SMCRA. Wyoming submitted the proposed amendment at its own initiative. The proposed amendment defines and provides for approval of bluffs as final reclamation features if it is determined that the bluff-type features will enhance the post-mining land use. Governmental agencies and the public would be provided the opportunity for review of and comment on any applicant's bluff proposal prior to Wyoming approving or disapproving it. Approved bluff-type features would have to be designed and constructed to meet safety, stability, reclamation, and land use planning criteria specified in the proposed amendment.

The proposed amendment requires that approval of bluff-type features be made in accordance with the fish and wildlife protection performance standards of the approved State program.

The regulations that Wyoming proposes to amend are: Wyoming Department of Environmental Quality, Land Quality Division, Rules and Regulations, September 1, 1986.

Chapter I. Section 2. Definitions.

Chapter II. Section 3(b)(i)(B)(VIII) Permit Applications. Special application content requirements for surface coal mining operations.

Chapter IV. Section 2(b)(ii)(A). General environmental protection performance standards. Soft rock surface mining.

Chapter IV. Section 3(a)(v). Special environmental protection performance standards applicable to surface coal mining and reclamation operations. Backfilling, grading, and contouring.

Chapter IV. Section 3(a)(x). Special environmental protection performance standards applicable to surface coal mining and reclamation operations. Backfilling, grading, contouring.

OSM published a notice in the January 13, 1989 **Federal Register** (54 FR 1399) announcing receipt of the amendment and inviting public comment on the adequacy of the proposed amendment (administrative record No. WY-11-5). The public comment period ended February 13, 1989.

During its review of the amendment, OSMRE identified some concerns relating to the definition of bluff, chapter 1, Section 2, and backfilling, grading and contouring requirements, chapter IV, Section 3. OSM notified Wyoming of the concerns by letter dated March 29, 1989 (administrative record No. WY-11-11). Wyoming responded in a letter dated August 21, 1989 by submitting additional explanatory information and a revised amendment package (administrative record No. WY-11-15).

III. Public Comment Procedures

OSM is reopening the comment period on the proposed Wyoming program amendment to provide the public an opportunity to reconsider the adequacy of the amendment in light of the additional materials submitted. In accordance with the provisions of 30 CFR 732.17(h), OSM is seeking comments on whether the proposed amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If the amendment is deemed adequate, it will become part of the Wyoming program.

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "DATES" or at locations other than the Casper Field Office will not necessarily be considered in the final rulemaking or included in the administrative record.

BILLING CODE 4310-05-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD1 89-040]

Drawbridge Operation Regulations; Bellamy River, NH

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: At the request of the New Hampshire Department of Transportation, the Coast Guard is considering a change to the regulations governing the Route 4 (Scammell) drawbridge across the Bellamy River at mile 0.1, at Dover, New Hampshire to provide that the draw need not open for passage of vessels. Should the needs of navigation warrant, however, the bridge shall be returned to operable condition within six months after notification by the District Commander to do so. This change is being made because no requests have been made to open the draw since August 1958. This action should relieve the bridge owner of the burden of restoring and maintaining the machinery and of having a bridge tender available to open the draw and should still provide for the reasonable needs of navigation.

DATE: Comments must be received on or before October 23, 1989.

ADDRESSES: Comments should be

mailed to Commander (obr), First Coast Guard District, Bldg. 135A, Governors Island, NY 10004–5073. The comments and other materials referenced in this notice will be available for inspection and copying at this address. Normal office hours are between 8 a.m. and 4:30 p.m., Monday through Friday, except federal holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: William C. Heming, Bridge Administrator, First Coast Guard District, at (212) 668–7170.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, comments, data or arguments. Persons submitting comments should include their names and addresses, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal. Persons desiring acknowledgment that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The Commander, First Coast Guard District, will evaluate all communications received and determine a course of final action on this proposal. The proposed regulations may be changed in light of comments received.

Drafting Information

The drafters of this notice are Jose M. Arca Jr., project officer, and LT. Robert E. Korroch, project attorney.

Discussion of Proposed Regulation

This drawbridge provides a vertical clearance of 9 feet at mean high water and 16 feet at mean low water. Reportedly, in February 1956, the U.S. Army Corps of Engineers authorized operation of the bridge on 4 hours advance notice during specified hours from April to October, except for emergency openings. However, Title 33 Code of the Federal Regulation Part 117 does not reflect that any special regulations were officially issued. Therefore, operation of the bridge is governed by the general regulation which requires that at all times the draw shall open on signal. The bridge was last opened in August 1958. The present structural and mechanical condition of the bridge precludes opration without the expenditure of substantial funds. However, the proposed regulation would contain provision for restoring the bridge to operation within six months after notification by the District Commander. The New Hampshire Department of Transportation is also investigating replacement of the entire structure.

Economic Assessment and Certification

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation, and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. The determination is based on the reported information that no requests for openings have been made since 1958. Since the economic impact of this proposal is expected to be minimal, the Coast Guard certifies that if adopted, it will not have a significant economic impact on a substantial number of small entities.

Federalism Implications Assessment

This action has been analyzed under the principles and criteria in Executive Order 12612, and it has been determined that this proposed regulation does not have sufficient federalism implications to warrant preparation of a federal assessment.

List of Subjects in 33 CFR Part 117

Bridges.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend part 117 of title 33, Code of Federal Regulations as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 449; 49 CFR 1.46; 33 CFR 1.05–1(g); 33 CFR 117.43.

2. A new section 117.695 is added to read as follows:

§ 117.695 Bellamy River.

The draw of the Route 4 drawbridge at mile 0.1 at Dover, New Hampshire need not open for the passage of vessels. However, the bridge shall be returned to operable condition within six months after notification by the District Commander.

Dated: August 21, 1989.

R. I. Rybacki,

Rear Admiral, U.S. Coast Guard Commander, First Coast Guard District.

[FR Doc. 89–20947 Filed 9–6–89; 8:45 am]

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL-3641-5]

Approval and Promulgation of Implementation Plans; Wisconsin

AGENCY: United States Environmental Protection Agency (USEPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: USEPA is disapproving a submission by the State of Wisconsin as a revision to the Wisconsin State Implementation Plan (SIP) for ozone. This revision consists of a site-specific reasonably available control technology (RACT) determination for high performance architectural coatings used on miscellaneous metal parts and products at the Masco Corporation (Masco) facility located in Milwaukee, Wisconsin.

USEPA today is disapproving this SIP revision because (1) the Wisconsin Department of Natural Resources (WDNR) has not demonstrated that all sources operated by Masco are in compliance with applicable rules, and (2) NWDNR has not demonstrated that this revision will not jeopardize attainment, maintenance or reasonable further progress (RFP).

DATE: Comments on this revision and on the proposed USEPA action must be received by October 10, 1989.

ADDRESSES: Copies of the SIP revision and technical support documents are available at the following addresses for review. (It is recommended that you telephone Uylaine E. McMahan, at (312) 886–6031, before visiting the Region V office.)

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch (5AR–26), 230 South Dearborn Street, Chicago, Illinois 60604
Wisconsin Department of Natural Resources, Bureau of Air Management, 101 South Webster, Madison, Wisconsin 53707.

Comments on this proposed rule should be addressed to: (Please submit an original and five copies if possible) Gary Gulezian, Chief, Regulatory Analysis Section, Air and Radiation Branch (5AR–26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Uylaine E. McMahan, Air and Radiation Branch (5AR–26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinios 60604 (312) 886–6031.

SUPPLEMENTARY INFORMATION: On November 3, 1988, the WDNR submitted a revision to its ozone SIP, for a site-specific RACT[1] determination for high performance architectural coatings used on miscellaneous metal parts and products for the Masco facility, located in Milwaukee, Wisconsin, an urban nonattainment area for ozone.

Wisconsin's SIP

Under the existing federally approved SIP for Wisconsin, the high performance architectural coatings are subject to the control requirements contained in NR 422.15, Wisconsin Administrative Code. This rule established a VOC emission limit of 4.3 pounds per gallon of coatings, excluding water, for both cured and air dried clear coatings, and 3.5 pounds per gallon of coating, excluding water, for extreme performance cured coatings and all other air-dried coatings. A limit of 3.0 pounds VOC per gallon of coatings, excluding water, is established for all other cured coatings. USEPA approved these rules as meeting the RACT requirement of the Clean Air Act on January 11, 1980 (45 FR 2319), and June 21, 1982 (47 FR 26622).

Analysis

WDNR's November 3, 1988, submittal contains a variance for Masco, whereby the source is subject to the following conditions:

1. Volatile organic compound (VOC) emissions from high performance architectural coatings shall not exceed 6.0 pounds per gallon of coatings, excluding water and exempt solvents, as applied.

2. Masco shall maintain records of the following information for each coating, as it is applied:

a. A unique coating identification name or number
b. Percent solids by volume
c. Percent VOC by volume (excluding exempt VOC)
d. Percent water and exempt VOC by volume
e. Density of the VOC identified in c. (above) in pounds per gallon
f. Pounds of VOC per gallon of coating, excluding water and exempt VOC

3. The department may modify the emission limit in condition 1 in the event coatings capable of meeting the Architectural Aluminum Manufacturer's Association specification 605.2 are developed which have a VOC content lower than that specified in condition 1.

4. High performance architectural coatings may not participate in any internal offset under NR 425.04(3), Wisconsin Administrative Code.

5. This variance shall not become effective until approved by the Administrator of the USEPA or his designee as a source-specific revision to Wisconsin's ozone SIP, pursuant to NR 436.05(5), Wisconsin Administrative Code.

In order for the 6.0 pounds of VOC per gallon of coating emission limit proposed by Masco to be considered RACT, the source must initially demonstrate that it is technically or economically infeasible to meet a lower emission limit using coatings with low VOC content or using add-on control equipment, and then demonstrate it can meet other requirements, involving the impact of the relaxation on attainment and maintenance of the NAAQS.

WDNR also issued an approval to Masco to demonstrate compliance with the applicable rules for the non-high performance architectural coatings through the use of an internal offset with transfer efficient credit. This internal offset has not been submitted to USEPA as a SIP revision.[2]

Masco has demonstrated that it is not feasible to meet the existing SIP limit through the use of currently available coatings alone. The coatings involved in the variance are specialized coatings supplied by a limited number of companies. In addition to the documentation provided by Masco, Region V independently surveyed the coating suppliers and determined that a low-VOC formulation of this type of coating is not currently available.

Masco also evaluated the technical and economic feasibility of add-on control. This evaluation considered controlling emissions to the level required by the SIP, as well as two intermediate alternatives (control of oven exhaust and control of ovens, plus one booth). Masco provided vendor quotes, as well as cost estimates calculated using the procedures outlined in the Economic Analysis Branch Control Cost Manual (EPA 450/5–87–001A). These cost estimates indicate that it is not economically feasible for Masco to meet the existing SIP limit, using add-on control equipment. Masco evaluated the economic feasibility of meeting an intermediate limit using alternative control strategies in the same manner and determined that it is economically infeasible to control bake oven exhaust or to control one spray booth and the bake ovens.

Although Masco has demonstrated that it is not technicallly and economically feasible to meet the existing SIP limit, this revision is still not approvable for two reasons. First, Masco has not met the requirement, contained in NR 436.05, Wisconsin Administrative Code, that the owner or operator of the air contaminant sources for which a revision is requested demonstrates that all direct or portable sources owned or operated in the State by such person and in compliance with all applicable requirements of chapters NR 400 to 499 or are on a schedule for compliance with such requirements.

(The only facility owned or operated by Masco is the subject of this review. Some air-dried and cured coatings (which are not high performance architectural coatings and, therefore, not part of this review) are not in compliance at this time. See footnote 2.)

Second, WDNR has not demonstrated that this revision will not jeopardize attainment and maintenance of the ozone national ambient air quality standards (NAAQS) or reasonable further progress (RFP) towards attainment. WDNR has argued that the revision will not jeopardize attainment because Wisconsin VOC emission summaries indicate the actual emissions for 1986 and 1987 are below target levels in Wisconsin's approved 1982 ozone SIP, and because the increase in emissions allowed by the revision is less than 0.02 percent of the inventory for these years. However, because USEPA recently issued an ozone SIP call to Wisconsin, a demonstration which relies on the previously approved SIP is not acceptable. In additon, USEPA does not consider any increase in VOC emissions to be insignificant.

Proposal

USEPA is disapproving this SIP revision because (1) Masco has not demonstrated that all sources operated by Masco in Milwaukee, Wisconsin, are in compliance with the applicable rules, and (2) WDNR has not demonstrated that this revision will not jeopardize attainment and maintenance of the NAAQS or RFP.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevent statutory and regulatory requirements.

---

[1] A definition of RACT is contained in a December 9, 1976, memorandum from Roger Strelow, former Assistant Administrator for Air and Waste Management. RACT is defined as the lowest emission limitation that a particular sources is capable of meeting by the application of control technology that is reasonably available, considering technological and economical feasibility.

[2] WDNR approved Masco's internal offset request on October 31, 1988. The request has not been submitted to USEPA as a SIP revision. Because USEPA believes that the internal offset and transfer efficiency provisions must be submitted as SIP revisions in order to be effective, USEPA will not consider the non-high performance architectural coatings to be in compliance through the use of an internal offset with transfer efficiency credit, unless it has been approved as a SIP revision.

USEPA is providing a 30-day comment period on this notice of proposed rulemaking. Public comments received on or before (30 days from publication) will be considered in USEPA's final rulemaking. All comments will be available for inspection during normal business hours at the Region V Office address provided at the front of this notice.

This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989, (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget waived Table 2 and 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of 2 years.

Under 5 U.S.C. section 605(b), I certify that this SIP disapproval will not have a significant economic impact on a substantial number of small entities because it deals with only one source, Masco Corporation. (See 46 FR 8709).

40 CFR Part 81

[FRL–3641–4]

Designation of Areas for Air Quality Planning Purposes; Oklahoma; Tulsa County Ozone

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This notice proposes to disapprove a request from the Oklahoma State Department of Health (OSDH) to revise the attainment status designation for Tulsa County from nonattainment to attainment for the Ozone National Ambient Air Quality Standard (NAAQS). EPA is proposing to disapprove Oklahoma's request because (1) the area does not have a fully approved State Implementation Plan (SIP) and (2) the ambient air monitoring data do not demonstrate attainment. This notice discusses EPA's review, the State's request, and EPA's proposed action.

DATES: Comments on this action must be received by October 10, 1989.

ADDRESSES: Written comments on this action should be addressed to Mr. Thomas H. Diggs at the EPA Regional Office listed below. Copies of the documents relevant to this action are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region 6, Air Programs Branch (6T–A), 1445 Ross Avenue, Dallas, Texas 75202–2733

Oklahoma State Department of Health, Air Quality Service, 1000 Northeast 10th Street, P.O. Box 53551, Oklahoma City, Oklahoma 73152

FOR FURTHER INFORMATION CONTACT: Gregg Guthrie, Air Programs Branch, U.S. EPA Region 6, telephone (214) 655–7214, or (FTS) 255–7214.

SUPPLEMENTARY INFORMATION: Under section 107(d) of the Clean Air Act (CAA), the Administrator of EPA has promulgated the NAAQS attainment status for all areas within each State. These area designations may be revised whenever sufficient data become available to justify a redesignation.

Background

On March 3, 1978, at 43 FR 8962 EPA identified Tulsa County, Oklahoma as nonattainment for the Ozone NAAQS. In accordance with the requirements of the CAA for such nonattainment areas, the OSDH submitted a SIP revision in April of 1979. The 1979 SIP indicated the Ozone standard would be achieved by December 31, 1982. The 1979 SIP revision for Tulsa County was conditionally approved on February 13, 1980, at 45 FR 9733. After additional submittals by the OSDH, EPA removed the conditions on the 1979 Ozone plan revision on November 28, 1980, at 45 FR 79051. The approved revision included the adoption of the required Set I and Set II stationary source regulations which reflected the application of reasonably available control technology (RACT). Because this revision predicted attainment by December 31, 1982, these regulations were required to represent RACT for major sources only.

Violations of the ozone NAAQS continued during 1983.

Consequently, on February 24, 1984, EPA issued a letter to the Governor of Oklahoma calling for a revision to correct the inadequacy of the existing SIP. As a Post-1982 nonattainment county, EPA required the adoption of regulations specified in the Group I, II and III Control Techniques Guideline (CTG) documents for both major and minor sources located in the County. The State was also required to implement a vehicle Inspection/Maintenance program and submit a demonstration of attainment. On February 20, 1985, the Governor of Oklahoma, submitted a SIP revision designated to achieve the Ozone standard in Tulsa County.

The February 20, 1985, revision predicted attainment by December 31, 1986. The revision has thus far failed to receive EPA approval. EPA intends to act on this revision in the near future, however, approval of that submittal rests on the State's ability to demonstrate that the State's current stationary and mobile source regulations are enforceable and represent RACT and the State's adoption of all regulations required under part D of the CAA.

Because 1984–1986 monitoring data did not demonstrate attainment of the Ozone NAAQS, the Tulsa metropolitan statistical area (MSA) was identified as a potential 1988 SIP Call area in Appendix A of the proposed Post-1987 Ozone/Carbon Monoxide strategy that was published in the **Federal Register** on November 24, 1987. Using the same monitoring data that Oklahoma has submitted to support its redesignation request, EPA issued a Phase I SIP Call for the Tulsa MSA on May 26, 1988. That 1985–1987 ambient monitoring data revealed a calculated expected exceedance rate of 1.1 per year. As a Phase I SIP Call area, the State is required to correct deficiencies and inconsistencies in their existing SIP, complete the adoption of regulations previously required under part D of the CAA, and begin updating their emission inventory to reflect current emission levels in the Tulsa MSA.

Ozone Redesignation Criteria

When considering a redesignation request for ozone, a number of criteria must be met. One of these criteria is achievement of the NAAQS for ozone. The NAAQS for ozone is defined a 0.12 parts per million (ppm) over a one-hour average not to be exceeded more than once per year. An area is determined to be in violation of the standard when the annual average expected number of daily exceedances is greater than one (1.0) at any monitoring site. A daily exceedance occurs when the maximum hourly ozone concentration is greater

than 0.124 ppm during a given day. Ozone daily exceedance is defined at 40 CFR part 50. The expected number of daily exceedances is calculated from the observed number of exceedances by making the assumption that nonmonitored days (invalid or incomplete data) have the same fraction of daily exceedances as those exceedances observed on monitored days.

Specific criteria for ozone redesignation reviews are given in the following policy memoranda; a December 7, 1979, memorandum from Richard G. Rhoads former Director of EPA's Control Programs Development Division; an April 21, 1983, memorandum from Sheldon Meyers, former Director of EPA's Office of Air Quality Planning and Standards (OAQPS); and an April 6, 1987, memorandum from Gerald A. Emison, Director of OAQPS. In summary, those memoranda indicate that the calculated average number of expected exceedances should be determined from the most recent three years of quality assured representative monitoring data and that observed improvements in air quality must be due to implementation of permanent and enforceable emission control measures. Those memoranda also specify that any redesignation request contain evidence that the SIP for the area be fully approved by EPA and finally implemented by the State.

Tulsa Redesignation Request

On August 9, 1988, the OSDH submitted a request to redesignate Tulsa County to an attainment status for the ozone NAAQS. This request was based on the most recent, complete, quality assured three years of monitoring data covering calendar years 1985–1987. These data were collected at three sites within Tulsa County; Site 127 located in 1326 East Mohawk Boulevard, Tulsa, Oklahoma; Site 137 located at 900 South Osage Drive, Skiatook, Oklahoma; and Site 174 located at 502 East 144th Place, South, Glenpool, Oklahoma. These sites are located in a north-south line across the county and all sites have experienced exceedances of the ozone standard during the 1985–1987 time frame. The ozone concentrations showing exceedances are summarized below:

TABLE 1.—OZONE CONCENTRATION EXCEEDANCES PER YEAR (PPM)

Site Number	1985	1986	1987
127	0.13	0.14; 0.13	none.
137	0.13	none	none.
174	0.15	0.13	none.

EPA examined the 1985–1987 air quality data and found that they were collected in accordance with all EPA requirements. Sites 127, 137 and 174 have a calculated annual average expected number of exceedances of 1.1, 0.33 and 0.67 respectively based on the above data. The data collected from Site 127 reveal the area has not reached attainment since EPA requires a 1.0 or lower value for an annual average expected exceedance to demonstrate attainment. In addition, EPA has reviewed the 1988 ozone data and found that more recent exceedances of the ozone standard have occurred. EPA found an expected exceedance rate of 1.1 violations per year based upon 1986–1988 data which reflects continued nonattainment of the area.

Proposed Action

Based on three or more years of monitoring data that fails to demonstrate attainment of the ozone NAAQS and the lack of an EPA-approved control strategy, EPA is proposing to disapprove the State's request to redesignate Tulsa County to attainment. All interested persons are invited to submit written comment on today's proposal. Written comments received by the date specified above will be considered in determining EPA's final action.

Under 5 U.S.C. 605(b), the Administrator has certified that redesignations do not have a significant economic impact on a substantial number of small entities (See 46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 89-379, RMs-6618; 6657; 6670 and 6793]

Radio Broadcasting Services; Atlantic, Audubon, Fairfield and Newton, IA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on four petitions for rule making. Wireless Communications Corp seeks the allotment of Channel 243C2 to Atlantic, IA, as the community's second local FM service. Christian Family Radio seeks the allotment of Channel 243C1 to Audubon, IA, as its first local FM service. KCOB/KLVN requests the substitution of Channel 241C2 for Channel 240A at Newton, IA, and the modification of its license for Station KLVN–FM accordingly. Galesburg Broadcasting Company seeks the substitution of Channel 240C2 for Channel 240A at Fairfield, IA, and the modification of its license for Station KCMD accordingly by either adjusting the site restriction on proposed Channel 241C2 at Newton or substituting Channel 241A for Channel 240A at Newton and modifying Station KLVN–FM's license accordingly.

DATES: Comments must be filed on or before October 23, 1989, and reply comments on or before November 7, 1989.

ADDRESS: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: John E. Carl, President, KCOB/KLVN, Inc., 611 First Avenue East, Newton, Iowa 50208 (Petitioner for Newton); James M. Weitzman, Esq., Kaye, Scholer, Fierman, Hayes and Handler, 901 15th Street, NW., Washington, DC 20005 (Counsel to Christian Family); John T. Pritchard, Galesburg Broadcasting Company, 57½ S. Court Street, Fairfield, IA 52556 (Petitioner for Fairfield); and Barry A. Friedman, Esq., Wilner & Scheiner, 1200 New Hampshire Avenue, NW., Suite 300, Washington, DC 20036 (Counsel to Wireless Communications).

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No.

89-379, adopted August 18, 1989, and released August 31, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW, Washington, DC The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, NW, Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

Channel 243C2 can be allotted to Atlantic in compliance with the Commission's minimum distance separation requirements without the imposition of a site restriction. The coordinates for Channel 243C2 at Atlantic are North Latitutde 41-24-00 and West Longitude 90-00-54. Channel 243C1 can be allotted to Audubon with a site restriction of 30.4 kilometers southeast. The coordinates for Channel 243C1 at Audubon are North Latitude 41-30-04 and West Longitude 94-42-09. Channel 240C2 can be allotted to Fairfield with a site restriction of 16.2 kilometers southwest. The coordinates for the Fairfield allotment are North Latitude 40-54-33 and West Longitude 92-05-45. Channel 241C2 can be allotted to Newton with a site restriction of 13.3 kilometers west and Channel 241A can be allotted to Newton for use at Station KLVN-FM's present transmitter site. The coordinates for Channel 241C2 at Newton are North Latitude 41-43-16 and West Longtitude 93-12-22. The coordinates for Channel 241A at Newton are North Latitude 41-41-42 and West Longitude 93-12-22.

47 CFR Part 73

[MM Docket No. 89-369, RM-6647]

Radio Broadcasting Services; Twin Lakes, IA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition by Twin Lakes. Broadcasting, Inc. seeking the substitution of Channel 290C3 for Channel 288A at Twin Lakes, Iowa, and the modification of its license for Station KTLB accordingly. Channel 290C3 can be allotted to Twin Lakes in compliance with the Commission's minimum distance separation requirements and can be used at Station KTLB's present transmitter site. The coordinates for this allotment are North Latitude 42-32-09 and West Longitude 94-40-48. In accordance with § 1.420(g) of the Commission's Rules Station KTLB's license may be modified without accepting competing expressions of interest in use of the higher powered channel at Twin Lakes and without requiring the petitioner to demonstrate the availability of an additional equivalent class channel for use by such interested parties.

DATES: Comments must be filed on or before October 23, 1989, and reply comments on or before November 7, 1989.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Francis N. Donnelly, President, Twin Lakes Broadcasting, Inc., North Twin Lakes, S-18, Rockwell City, Iowa 50579 (Petitioner).

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making MM Docket No. 89-369, adopted August 14, 1989, and released August 31, 1989. The full text of this Commission decision is available for inspection and copying during normal buisness hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing premissible *ex parte* contacts.

BILLING CODE 6712-02-M

---

47 CFR Part 73

[MM Docket No. 89-373, RM-6873]

Radio Broadcasting Services; Lexington, MS

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a proposal filed by J. Scott Communications, Inc. requesting the substitution of FM Channel 290C3 for Channel 292A at Lexington, Mississippi, and modification of its license for Station WLTD(FM) to specify operation on the higher class channel. The coordinates for Channel 290C3 are 33–00–00 and 89–53–30.

DATES: Comments must be filed on or before October 23, 1989, and reply comments on or before November 7, 1989.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Linda J. Eckard, Mark N. Lipp, Mullin, Rhyne, Emmons and Topel, P.C., 1000 Connecticut Avenue NW., Washington, DC 20036, (Counsel for the petitioner).

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rulemaking, MM Docket No. 89–373, adopted August 7, 1989, and released September 1, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rulemaking is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts. For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

47 CFR Part 73

[MM Docket No. 89-375, RM-6846]

Radio Broadcasting Services; Bozeman, MT

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition filed by Northern Sun Corporation, proposing the allotment of FM Channel 260C1 to Bozeman, Montana, as that community's third commercial FM broadcast service. The coordinates for Channel 260C1 are 45–40–54 and 111–02–18.

DATES: Comments must be filed on or before October 23, 1989, and reply comments on or before November 7, 1989.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Dennis F. Begley, Reddy, Begley & Martin, 2033 M Street NW., Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rulemaking, MM Docket No. 89–375, adopted August 15, 1989, and released September 1, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

47 CFR 73

[MM Docket No. 89-370, RM-6842]

Radio Broadcasting Services; Wadesboro, NC

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition by Red Penny Broadcasting seeking the substitution of Channel 228C3 for Channel 228A at Wadesboro, North Carolina, and the modification of its construction permit for a new station there for specify the higher powered channel. Channel 228C3 can be allotted to Wadesboro in compliance with the Commission's minimum distance separation requirements with a site restriction of 4.9 kilometers (3.0 miles) northeast to avoid a short-spacing to Station WZNS, Dillon, South Carolina, Station WCEZ, Columbia, South Carolina, and to an application for Channel 229A at Bishopville, South Caroline (BPH-880519ND). The coordinates for this allotment are latitude 34°59'57" N. and longitude 80°02'34" W. We will not accept competing expressions of interest in use of Channel 228C3 at Wadesboro or require the petitioner to demonstrate the availability of an additional equivalent class channel for use by such parties.

DATES: Comments must be filed on or before October 23, 1989, and reply comments on or before November 7, 1989.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Justine Hope Lambert, General Partner, Red Penny Broadcasting, 206 S. Rutherford Street, Wadesboro, North Carolina 28170 (Petitioner).

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rulemaking, MM Docket No. 89–370, adopted August 14, 1989, and released August 31, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 649

[Docket No. 90809-9209]

RIN 0648-AC28

American Lobster Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Proposed rule.

SUMMARY: NOAA issues this proposed rule for comment on Amendment 3 to the Fishery Management Plan for the American Lobster Fishery (FMP). Amendment 3 and this proposed rule would: (1) Delay implementation of the increase in the escape vent size scheduled for January 1, 1990 to January 1, 1992; and (2) require that effective January 1, 1992, lobster traps contain an escape panel or equivalent mechanism that would degrade, keeping a trap from ghost fishing after it has been abandoned or lost for 12 months or more. Proposal 2 would become effective only if the New England Fishery Management Council (Council) specifies, and the Regional Director publishes a list of acceptable escape mechanisms at least 12 months prior to January 1, 1992. The purpose of this action is to allow the maximum utilization of the resource through maximum retention of legal sized lobsters during the period of scheduled size increases and to reduce mortality caused by lost or abandoned traps.

DATE: Written comments must be received on or before October 16, 1989.

ADDRESSES: Comments on the proposed rule should be sent to Richard Roe, Rigional Director, National Marine Fisheries Service, Northeast Regional Office, One Blackburn Drive, Gloucester, Massachusetts 01930. Mark the outside of the envelope "Comments on the Lobster Regulations."

Copies of the amendment which incorporates the environmental assessment and the regulatory impact review are available from Douglas G. Marshall, Executive Director, New England Fishery Management Council, Suntaug Office Park, 5 Broadway, Saugus, Massachusetts 01906.

FOR FURTHER INFORMATION CONTACT: Patricia A. Kurkul, Resource Policy Analyst, 508-281-9331.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for the American Lobster Fishery (FMP) and implementing regulations were prepared by the Council in 1983 (48 FR 36266). The objective of the FMP is to support and promote the development and implementation, on a continuing basis, of a unified regional management program for American lobsters (*Homarus americanus*), which is designed to promote conservation, to reduce the possibility of recruitment failure and to allow full utilization of the resource by the United States fishing industry. Efforts to better achieve this objective have resulted in Amendment 1 to the FMP in 1986 (51 FR 19210), Amendment 2 to the FMP in 1987 (52 FR 46088), and this proposed rule to implement Amendment 3.

Amendment 3 contains two proposals: (1) Delay the implementation of the increase in the escape vent size scheduled for January 1, 1990 until January 1, 1992; and (2) require that lobster traps must contain an escape panel or equivalent mechanism that would degrade and allow lobsters to escape after a trap has been abandoned or lost for 12 months or more.

Proposal 1

Amendment 2 to the FMP implemented a schedule of lobster size increases an an escape vent size increase according to the following schedule:

Effective date	Minimum carapace length
January 1, 1988	Increased to $3\frac{7}{32}$ inches.
January 1, 1989	Increased to $3\frac{1}{4}$ inches.
January 1, 1990	No change in carapace length, escape vents compatible with $3\frac{5}{16}$ inches.
January 1, 1991	Increase to $3\frac{9}{32}$ inches.
January 1, 1992	Increase to $3\frac{5}{16}$ inches.

Amendment 3 proposes to delay the scheduled vent size increase until January 1, 1992, in order to ease an unforeseen regulatory burden that the original schedule is likely to impose on the industry.

According to the original schedule, on January 1, 1990, the escape vent size will be increased to one that is compatible with a $3\frac{5}{16}$ inch lobster carapace size. At the time this schedule was published the Council decided that the choice of 1990 for the implementation of the vent size increase was regarded as the most conservative and practical alternative, and that the vent size increase should be compatible with the $3\frac{5}{16}$" carapace size. Since that time, however, the National Marine Fisheries Service provided the Council with scientific guidance concerning the size and timing of the escape vent requirement. This guidance provided the Council with two options (1) a vent size specification of $1\frac{7}{8}$ inches which would maximize the retention of legal size lobsters and (2) a vent size of $1\frac{15}{16}$ which would maximize escapement of lobsters less than the legal size.

Consistent with the objective of the FMP to promote conservation, the Council opted for the vent size that enhances escapement of sublegals, i.e., $1\frac{15}{16}$ inches. However, if this vent size increase were to be implemented in 1990, according to the original schedule, it is estimated that 10-15 percent of lobsters just meeting the minimum legal size could escape until the schedule of lobster minimum size increases is fully implemented in 1992. In short, implementation of a vent size that might allow excessive escapement of legal size lobsters could cause an unintended loss in revenue to the fishery, and erode the cooperation and compliance needed to achieve the objectives of the FMP.

In order to offset the potentially negative economic impacts of the scheduled vent size increase, the Council proposes to postpone the $1\frac{15}{16}$" vent size increase until 1992. This proposal would allow for optimal retention of legal sized lobsters, while ensuring that adequate escapement is achieved consistent with the scheduled increases in minimum carapace length.

Proposal 2

The second proposal would require, effective January 1, 1992, that lobster traps contain an escape panel or equivalent mechanism to keep a trap from ghost fishing after it has been abandoned or lost for 12 months or more. The purpose of this proposal is to reduce fishing mortality caused by lost traps ("ghost fishing") on all sizes of lobster. Every year lobstermen lose about 20–25 percent of their traps due to storms or damage to trap lines caused by trawlers. An unknown number of these traps continue to catch lobsters and cause some level of lobster mortality which is thought to be significant.

Several states already require degradable material in certain types of fish and shellfish traps. For instance, since 1985, Florida has required that spiny lobster traps be made of wood. Other states have a number of fishery regulations similar in purpose which require a range of readily degradable

materials such as cotton twine, soft steel trap hooks and magnesium pins to be used in fish traps.

On January 1, 1989, the state of Connecticut implemented a measure requiring biodegradable escape panels in lobster traps in state waters. Maine is considering a similar regulation that is likely to remain in a pending status until the federal rule is implemented.

Although the potential of time release mechanisms to prevent ghost fishing has been demonstrated in a number of other fisheries, their use is not widespread. Experimentation by individual lobstermen or even academic and scientific institutions is unlikely to lead to a consistent or widely accepted standard for a time release mechanism. In this environment, it is also unlikely that gear manufacturers will develop and distribute the appropriate products to help solve this problem.

This proposal would become effective January 1, 1992, only if the Council specifies, and the Regional Director publishes at least twelve months prior to this date a list of escape mechanisms. Some members of the industry are concerned that the technology of escape mechanisms has not been sufficiently tested. Although the concept of an escape panel is generally supported, a list of acceptable escape mechanisms might not be available one year prior to January 1, 1992. Therefore, implementation will occur at least one year after a list is available and published.

Classification

Section 304(a)(1)(D)(ii) of the Magnuson Act, as amended by Public Law 99-659, 16 U.S.C. 1854 (a)(1)(D)(ii) requires the Secretary of Commerce (Secretary) to publish regulations proposed by the Council within 15 days of receipt of the amendment and proposed regulations. At this time the Secretary has not determined that the amendment these rules would implement is consistent with the national standards, other provisions of the Magnuson Act, and other applicable law. The Secretary, in making that determination, will take into account the information views and comments received during the comment period.

The Council prepared within Amendment 3 an environmental assessment (EA) that discusses the impact on the environment as a result of this rule. A copy of the EA may be obtained from the Council at the address given above and comments on it are requested.

The Under Secretary for Oceans and Atmosphere, NOAA, has determined that this proposed rule is not a "major rule" requiring a regulatory impact analysis under E.O. 12291. This proposed rule, if adopted, is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or a significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Council prepared within Amendment 3 a regulatory impact review (RIR) which concludes that this rule, if adopted, would have the following economic impacts. Proposal 1 is expected to prevent a reduction in catch of lobsters between $3\frac{1}{4}$" and $3\frac{5}{16}$" of 8 percent in 1990 and 5 percent in 1991. The net benefits associated with this are unquantifiable because of the lack of data on size distribution of lobsters landed from the exclusive economic zone (EEZ). Proposal 2 is expected to provide an annual net benefit of $1.05–1.52 million in revenues to fishermen in the EEZ. Based on 1987 ex-vessel prices, proposal 2 would provide a gross annual benefit of $1.13-1.59 million in revenues to fishermen because it is expected to increase EEZ lobster landings by 139–196,000 pounds annually. The annual cost of degradable materials, such as hemp, jute, cotton twine or steel wire, is estimated to be $5–6,000 for about 550,000 traps. The opportunity cost of labor to install degradable fasteners annually is estimated to be $55–61,000. The additional cost of slightly larger plastic escape panels needed to cover the escape path opening in the lobster trap is estimated to range from about $11–13,000. A period of one year for an escape release mechanism to work is sufficient to allow a variety of materials and thicknesses to be used without forcing lobstermen to replace escape panel fasteners too frequently. Most inshore lobstermen fish nine months or less. If the material used to secure the escape panels lasts at least this amount of time, then the lobstermen will be able to re-secure the escape panels once a year before putting the gear in the water at the beginning of a new season. Total costs are expected to range from $72–80,000 annually.

Administrative, enforcement, and paperwork and recordkeeping requirements are expected to remain unchanged, thus, there are no impacts on federal, state, or local government agencies. No data on operating costs are currently available for the harvesting sector; however, operating expenses are not expected to increase measurably. Employment impacts are expected to be neutral or very slightly positive because of the small size of the increase in revenues. Impacts on the competitive position of U.S. lobstermen are expected to be neutral or slightly positive. A copy of the RIR may be obtained at the address listed above.

The General Counsel of the Department of Commerce has certified to the Small Business Administration that this proposed rule, if adopted, will not have a significant economic impact on a substantial number of small entities for the reasons stated above in the summary of the RIR. As a result, a regulatory flexibility analysis was not prepared.

This proposed rule is exempt from the procedures of E.O. 12291 under Section 8(a)(2) of that order. Deadlines imposed under the Magnuson Act require the Secretary to publish this proposed rule within 15 days of its receipt. The proposed rule is being reported to the Director, Office of Management and Budget with an explanation of why it is not necessary to follow the procedures of the order.

This rule does not contain a collection of information requirement for the purposes of the Paperwork Reduction Act.

The Council determined that this rule will be implemented in a manner that is consistent, to the maximum extent practicable, with the approved coastal zone management programs of Connecticut, Maine, Massachusetts, New Hampshire, New York, Rhode Island, Delaware, Maryland and New Jersey. This determination has been submitted for review by the responsible state agencies under section 307 of the Coastal Zone Management Act.

This rule does not contain policies with federalism implications sufficient to warrant a federalism assessment under E.O. 12612.

List of Subjects in 50 CFR Part 649

Fisheries, Reporting and recordkeeping requirements.

Dated: August 31, 1989.

James E. Douglas, Jr.,

Deputy Assistant Administrator For Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 649 is proposed to be amended as follows:

PART 649—AMERICAN LOBSTER FISHERY

1. The authority citation for part 649 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 649.2, the definition of "escape vent" is added in alphabetical order to read as follows:

§ 649.2 Definitions

* * * * *

Escape vent means an opening in a lobster trap designed to allow lobsters smaller than the legal minimum size to escape from the trap.

* * * * *

3. Section 649.20, the table in paragraph (b) is revised to read as follows:

§ 649.20 Harvesting and landing requirements.

* * * * *

(b) *Carapace length.*

* * * * *

Effective dates	Minimum carapace length
January 1, 1985, through December 31, 1987.	3$\frac{3}{16}$ inches.
January 1, 1988, through December 31, 1988.	3$\frac{7}{32}$ inches.
January 1, 1989, through December 31, 1990.	3$\frac{1}{4}$ inches.
January 1, 1991, through December 31, 1991.	3$\frac{9}{32}$ inches.
January 1, 1992, and beyond [1].	3$\frac{5}{16}$ inches.

[1] By January 1, 1992, escape vents in traps must be compatible with a minimum carapace length of 3$\frac{5}{16}$ inches.

* * * * *

4. Section 649.21 is amended by revising paragraph (c)(2) and by adding paragraph (c)(3) to read as follows:

§ 649.21 Gear identification, marking, and escape vent requirements.

* * * * *

(c) * * *

(2) On January 1, 1992, all lobster traps must contain one of the following:

(i) A rectangular escape vent compatible with an unobstructed opening not less than 1$\frac{15}{16}$ inches high (49.2 mm) by 6 inches wide (152.2 mm), if the escape vent is made by cutting meshes on a wire mesh trap the width will be measured from center to center on the wires;

(ii) Two circular escape vents with unobstructed openings not less than 2$\frac{7}{16}$ inches (61.9 mm) in diameter; or

(iii) Any other type of escape vent which the Regional Director finds to be consistent with paragraphs (c)(2)(i) and (c)(2)(ii) of this section.

(3) On January 1, 1992, lobster traps must contain an escape panel or equivalent mechanism to keep a trap from ghost fishing after it has been abandoned or lost for 12 months or more. This requirement shall become effective on or before January 1, 1991, only if the Council specifies, and the Regional director publishes, a list of acceptable methods for complying with this requirement, including the minimum dimensions of the escape path.

* * * * *

BILLING CODE 3510–22–M

Notices

Federal Register

Vol. 54, No. 172

Thursday, September 7, 1989

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Cooperative Agreements Award; Cornell University

AGENCY: Office of International Cooperation and Development (OICD).

ACTION: Notice of intent.

Activity: OICD intends to enter into a Cooperative Agreement with Cornell University to provide partial support funding for collaborative international research on Development of DNA-Probes for Identification Pseudomonas Syringae Pathovar Glycinea.

Authority: Section 1458 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 U.S.C. 3291), and the Food Security Act of 1985 (Pub. L. 99–198).

OICD announces the availability of funds in fiscal year 1989 (FY1989) and/or FY1990 to enter into a cooperative agreement with Cornell University to collaborate on international research on Development of DNA-Probes for identification Pseudomonas Syringae Pathovar Glycinea. Cornell University's Department of Plant Pathology will conduct collaborative research with Italy's University of Bologna. Assistance will be provided only to Cornell University's which is contributing resources and experience to conduct the research. Funds provided by OICD will be used to supplement costs for supplies, a research associate, and international travel. Italy's University of Bologna will support their portion of the research.

Based on the above, this is not a formal request for application. It is estimated that $20,000 will be available in FY 1989 and/or FY 1990 to support this work. A total of $40,000 is anticipated to be provided for this cooperative research effort over a three year period, subject to the availability of federally appropriated funds in future fiscal years.

Information on proposed Agreement #58–319R–9–020 may be obtained from: USDA/OICD/Management Services Branch, Washington, DC 20250–4300.

Dated: August 30, 1989.

Nancy J. Croft,

Contracting Officer.

Cooperative Agreement Award, University of Florida

AGENCY: Office of International Cooperation and Development (OICD).

ACTION: Notice of intent.

Activity: **OICD intends to enter into a Cooperative Agreement with the University of Florida to provide partial support funding for collaborative international research on Evaluating Brassicas as a Cloning Source for Resistance Genes Against Xanthomonas.**

Authority: Section 1458 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 U.S.C. 3291), and the Food Security Act of 1985 (Pub. L. 99-198).

OICD announces the availability of funds in fiscal year 1989 (FY1989) and/or FY1990 to enter into a cooperative agreement with the University of Florida to collaborate in international research on evaluating Brassicas as a cloning source for resistance genes against Xanthomonas. The University of Florida's Plant Pathology Department will conduct collaborative research with Singapore's National University. Assistance will be provided only to the University of Florida, which is contributing resources and experience to conduct the research. Funds provided by OICD will be used to supplement costs for a research assistant and international travel. Singapore's National University will support their portion of the research.

Based on the above, this is not a formal request for application. It is estimated that $16,000 will be available in FY1989 and/or FY1990 to support this work. A total of $33,500 is anticipated to be provided for this cooperative research effort over a two year period, subject to the availability of federally appropriated funds in future fiscal years.

Information on proposed Agreement #58-319R-9-017 may be obtained from: USDA/OICD/Management Services Branch, Washington, DC 20250-4300.

Dated: August 30, 1989.

Nancy J. Croft,

Contracting Officer.

BILLING CODE 3410-DP-M

Cooperative Agreements Award; Washington State University

AGENCY: Office of International Cooperation and Development (OICD).

ACTION: Notice of intent.

Activity: OICD intends to enter into a Cooperative Agreement with Washington State University to provide partial support funding for collaborate international research on Constraints to the Expansion of Edamame and Azuki Production for the Japanese Market.

Authority: Section 1458 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 U.S.C. 3291), and the Food Security Act of 1985 (Pub. L. 99-198).

OICD announces the availability of funds in fiscal year 1989 (FY1989) and/or FY1990 to enter into a cooperative agreement with Washington State University to collaborative in international research on constraints to the expansion of Edamame and Azuki production for the Japanese market. Washington State University's Department of Agronomy and Soils will conduct collaborative research with Iwate and Kokkaido Universities. Assistance will be provided only to Washington State University, which is contributing resources and experience to conduct the research. Funds provided by OICD will be used to supplement costs for a research assistant and international travel. Iwate and Kokkaido Universities will support their portion of the research.

Based on the above, this is not a formal request for application. It is estimated that $19,500 will be available in FY1989 and/or FY1990 to support this work. A total of $59,500 is anticipated to be provided for this cooperative research effort over a three year period, subject to the availability of federally appropriated funds in future fiscal years.

Information on proposed Agreement #58-319R-9-018 may be obtained from: USDA/OICD/Management Services Branch, Washington, DC 20250-4300.

Dated: August 30, 1989.

Nancy J. Croft,

Contracting Officer.

BILLING CODE 3410-DP-M

Cooperative Agreements Awards; William Patterson College

AGENCY: Office of International Cooperation and Development (OICD).

ACTION: Notice of intent.

Activity: OICD intends to enter into a Cooperative Agreement with William Patterson College to provide partial support funding for collaborative international research on Di-Haploid Soybean Plant Induction Via Anther and Inflorescence Culture.

Authority: Section 1458 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 U.S.C. 3291), and the Food Security Act of 1985 (Pub. L. 99-198).

OICD announces the availability of funds in fiscal year 1989 (FY1989) and/or FY1990 to enter into a cooperative agreement with William Patterson College to collaborate in international research on di-haploid soybean plant induction via anther and inflorescence culture. William Patterson College will conduct collaborative research with People's Republic of China's Heilongjiang Academy of Agricultural Science, Harbin. Assistance will be provided only to William College, which is contributing resources and experience to conduct the research. Funds provided by OICD will be used to supplement costs for a research assistant and international travel. People's Republic of China's Heilongjiang Academy of Agricultural Science, Harbin, will support their portion of the research.

Based on the above, this is not a formal request for application. It is estimated that $18,800 will be available in FY1989 and/or FY1990 to support this work. A total of $55,800 is anticipated to be provided for this cooperative research effort over a three year period, subject to the availability of federally appropriated funds in future fiscal years.

Information on proposed Agreement #58-319R-9-021 may be obtained from: USDA/OICD/Management Services Branch, Washington, DC 20250-4300.

Dated: August 30, 1989.

Nancy J. Croft,

Contracting Officer.

BILLING CODE 3410-DP-M

Soil Conservation Service

South Branch Kawkawlin River Watershed Protection Plan, Michigan

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines, (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the South Branch Kawkawlin River Watershed, Bay, Midland and Saginaw Counties, Michigan.

FOR FURTHER INFORMATION CONTACT: Mr. Homer R. Hilner, State Conservationist, Soil Conservation Service, 1405 South Harrison Road, East Lansing, Michigan 48823, telephone 517-337-6702.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will benefit water quality in the South Branch Kawkawlin River Watershed by significantly reducing the amounts of sediment and phosphorus entering the stream. A contact has been made with the State Historical Preservation Officer and concludes that it will have no effect on any cultural resources either eligible for or listed on the National Register of Historic Places. The State Archaeologist will be contacted if any land disturbance associated with this project and archaeological sites, features, or materials are encountered during actual construction. As a result of these findings, Mr. Homer R. Hilner, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

This measure concerns a plan for the installation of practices for water quality improvement. The practices will include: Conservation tillage, critical area planting, grassed waterways, stripcropping, diversions, water and sediment control basins, grade stabilization structures, tree planting, vegetative barriers and field windbreaks. Total financial assistance cost is estimated to be $1,740,300; $973,200 PL-566 funds and $767,100 local funds.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various federal, state, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Homer R. Hilner.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.904-Watershed Protection and Flood Prevention—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with state and local officials.)

Dated: August 25, 1989.

Homer R. Hilner,

State Conservationist.

BILLING CODE 3410-16-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Mid-Atlantic Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Mid-Atlantic Fishery Management Council and its Committees will hold public meetings on September 12-14, 1989, at the Holiday Inn, 3845 Veterans Memorial Highway, Ronkonkoma, NY.

The Council will begin meeting on September 13 at 1 p.m., and will adjourn on September 14 at 3 p.m. The Council will elect officers, recommend 1990 quotas for surf clams and ocean quahogs, as well as discuss other fishery management and administrative matters. The public meeting may be lengthened or shortened depending upon progress on the agenda. The Council also may hold a closed session (not open to the public) to discuss personnel and/or national security matters.

The Habitat Committee will meet on September 12 at 8 a.m.; the Information and Education Committee will meet on September 12 at 10 a.m.; the Coastal Migratory Fisheries Committee will meet jointly with the Atlantic States Marine Fisheries Commission Bluefish Board on September 12 at 1 p.m., to consider the Bluefish Fishery Management Plan, and the Demersal Fisheries Committee will meet on September 13 at 8 a.m.

For further information contact John C. Bryson, Executive Director, Mid-Atlantic Fishery Management Council, Room 2115, Federal Building, 300 South New Street, Dover, DE 19901; telephone: (302) 674-2331.

Dated: August 30, 1989.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

[FR Doc. 89-20919 Filed 9-6-89; 8:45 am]

BILLING CODE 3510-22-M

North Pacific Fishery Management Council: Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The North Pacific Fishery Management Council, its Scientific and Statistical Committee (SSC), Advisory Panel (AP), and other Council advisory groups will meet on September 24-29, 1989, at the Sheraton Hotel in Anchorage, AK. Except as noted below, the meetings are open to the public.

The Council will begin meeting on September 26 at 9 a.m. (Also on September 28 the Council will meet at noon in executive session (not open to the public) to discuss employment and litigation matters.) During its open session, the Council will elect officers for the coming year; receive status of stocks reports for groundfish in the Gulf of Alaska and Bering Sea/Aleutian Islands, and set initial harvest quotas and apportionments for domestic and joint venture fisheries for 1990. The Council's administrative process for setting initial and final groundfish specifications will be reviewed and discussed. The Council also will review the performance of domestic harvesters and processors, and receive the results of the survey of crab resources in the Bering Sea and Aleutian Islands. It will receive a status report from the Office of the Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration (NOAA), on efforts to implement a federal domestic observer program. In addition, there will be reports on bycatch management planning, and regulatory and plan amendments in progress.

The Council also will review and approve a formal policy for deadlines for public comments, and will also consider future utility of the Fisheries Obligation Guarantee and the Capital Construction Fund Programs.

The Council will review limited access planning schedules for the sablefish, halibut, groundfish and crab fisheries, and also determine whether they should be modified or abandoned. It will consider approval of a draft sablefish limited access plan for public review and also consider approval of halibut limited access decision points for final staff analysis, as well as review public comments on a draft amendment to fishery management plans (FMPs) to address the issue of roe stripping in the pollock fisheries in the Gulf of Alaska and Bering Sea/Aleutian Islands. It also will consider final approval of this amendment for Secretarial review as well as review options for addressing full utilization and waste issues.

The Council will receive a preliminary analysis for NOAA General Counsel on allocation proposals for allocating resources between at-sea and non-at-sea components of the fishing industry, and review the Fishery Planning Committee recommendations. The Council will determine how to proceed with further development of any of the alternatives.

The Council will review public comments on the revised FMP for Salmon Fisheries in the Exclusive Economic Zone off Alaska, and consider approval of the plan for Secretarial review. The Council also will review allocative proposals received for the 1990 halibut season, and decide which should be further analyzed and forwarded for public review. It will also consider adjusting the halibut management cycle.

A draft regulatory amendment to prohibit using groundfish pots in the Gulf of Alaska without halibut exclusion mechanisms also will be considered for approval. The Pacific Northwest Crab Industry Advisory Committee will report to the Council on its first meeting under the new Bering Sea and Aleutian Islands King and Tanner Crab FMP. The Council also will consider action to implement a federal observer program for the crab fisheries and initiate discussion on formulating cost recovery programs for the fishing industry.

The Council will review foreign permit applications as available and set priorities for consideration of review of such applications in December. Also, as appropriate, the Council will consider and develop various international issues.

The Council's AP and SSC also will meet during the week of September 24. The AP will begin meeting at 10:30 a.m., on September 24 and the SSC will begin meeting at 10:30 a.m., on September 25. Other meetings scheduled are:

(1) Halibut Management Team, September 24 at 1:30 p.m.
(2) Halibut Regulatory Amendment Advisory Group, September 24 at 7 p.m.
(3) Halibut Bycatch Work Session, September 25 at 7 p.m.
(4) Halibut Committee, September 26 at 7 p.m.

For more information contact the North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510; telephone: (907) 271–2809.

Dated: September 1, 1989.

Herbert L. Blatt,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Pacific Fishery Management Council and its advisory entities will meet on September 18–21, 1989, at the Red Lion Inn-Downtowner, 1800 Fairview, Boise, ID. Except as noted below, the meetings are open to the public.

The Council will meet on September 20 at 8 a.m., to address groundfish management issues, including but not limited to: (1) Inseason management measure adjustments for rockfish and sablefish; (2) preliminary management specifications for 1990; (3) Canadian management proposals for 1990; (4) sablefish management in 1990; (5) a preliminary report on measures to extend the whiting venture season; (6) Council guidance on the draft plan amendment; and (7) proposed regulations governing domestic offshore processors. Also on September 20 the Council will hear a status report on the Pacific halibut fisheries in 1989, and discuss the schedule of meetings to develop the 1990 allocations. On September 20 at 4 p.m., the Council will receive public comments on any issue not on the agenda. Public comments on agenda items will be considered before Council action on each item.

The Council will convene on September 21 at 8 a.m., in closed session (not open to the public), to discuss litigation and personnel matters. The open session will start at 9 a.m., to address salmon management, habitat and administrative matters. Salmon management agenda items include, but are not limited to, (1) the sequence of events and current status of the 1989 fisheries; (2) approval of the draft plan amendment for public hearings; (3) a report from council on penalties for barbless hook violations and legality of multiple landings of the same fish, and (4) a discussion on management implications of the decision to classify Sacramento River winter chinook as a threatened species.

The Scientific and Statistical Committee will meet on September 18 at 8 a.m., to address scientific issues on the Council's agenda, and will reconvene on September 19 at 8 a.m.

The Groundfish Select Group will meet on September 19 at 8 a.m., to address groundfish issues on the Council's agenda.

The Budget Committee will meet on September 19 at 1 p.m., to review the status of the 1989/90 Council budgets.

The Habitat Committee will meet on September 19 at 3 p.m., to consider timely and relevant habitat matters impacting fisheries in the Council's jurisdiction.

Detailed agendas for the above meetings will be made available to the public after September 1, 1989. For further information contact Lawrence D. Six, Executive Director, Pacific Fishery Management Council, 2000 S.W. First Avenue, Room 420, Portland, OR 97201; telephone: (503) 326–6352.

Dated: August 30, 1989.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Pacific Fishery Management Council's Scientific and Statistical Committee salmon subcommittee will hold a public meeting on September 14–15, 1989, at the General Administration Building, Director's Conference Room, Olympia, WA. On September 14 the meeting will begin at 11 a.m., and on September 15 the meeting will adjourn by 4:30 p.m. The subcommittee will review the methods used to estimate

wild coho returns to Washington State coastal streams.

A detailed agenda is available from the Pacific Council's office. For more information contact Lawrence D. Six, Executive Director, Pacific Fishery Management Council, 2000 SW. First Avenue, Portland, OR 97201; telephone: (503) 326–6352.

Dated: August 30, 1989.

BILLING CODE 3510-22-M

Marine Mammals; Permit Program Review; Permits for Taking Marine Mammals for Public Display Purposes

AGENCY: National Marine Fisheries Service (NOAA Fisheries), NOAA Commerce.

ACTION: Notice.

SUMMARY: The National Marine Fisheries Service (NOAA Fisheries) will hold a working session to solicit input on a definition of public display consistent with the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361–1407) (MMPA). This working session is part of a comprehensive review of NOAA Fisheries' permit program to take marine mammals for purposes of public display and scientific research. Note that this working session is not a hearing. Participants should be prepared to contribute substantively to the permit program review.

DATES: Persons wishing to participate in the working session must notify the Information Contact listed below by September 22, 1989. The working session will be held on Tuesday, October 3, 1989, at 9:30 a.m.

ADDRESS: Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, 1335 East-West Highway, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: Art Jeffers, Permits Division, address above; telephone 301/427–2289.

SUPPLEMENTARY INFORMATION: NOAA Fisheries is conducting a review of its program and policies for issuing permits to take marine mammals for purposes of scientific research, public display, or enhancing the survival or recovery of a species or stock pursuant to the MMPA, and for scientific research and enhancement pursuant to the Endangered Species Act (See 54 FR 13099, March 30, 1989 and 54 FR 27663, June 30, 1989). One of the objectives of the permit program review is the development of a definition of public display consistent with the policies and the purposes of the MMPA. The need for such a definition and the issues and concerns regarding whether certain activities or types of facilities constitute public display, as that term is used in the MMPA, are presented in a Discussion Paper released as part of the permit program review.

This working session is being held to give interested members of the public an opportunity to participate in group discussions to: identify, consistent with the MMPA, the elements that should enter a definition of public display; develop and examine alternative definitions of public display; and discuss the role of education in public display. The results of the working session together with the comments received on the Discussion Paper will be considered by NOAA Fisheries in the development of revised permit regulations and an Advance Notice of Proposed Rulemaking will be issued at that time. This working session is not a hearing. Participants are encouraged to: be prepared to contribute substantively and constructively to group discussions; have a working knowledge of the relevant sections of the MMPA: and be familiar with the applicable chapters of the Discussion Paper.

Separate working sessions will be held on other topics as part of the permit program review, including but not limited to the following: care and maintenance of captive marine mammals; scientific research permits; effects on wild populations; permits and the National Environmental Policy Act. Dates and locations will be published in the **Federal Register**.

Dated: August 30, 1989.

Nancy Foster,

Director, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service.

DEPARTMENT OF EDUCATION

Office of Bilingual Education and Minority Languages Affairs

Applications Submitted Under Direct Grant Programs

AGENCY: Department of Education.

ACTION: Notice for individuals interested in reviewing applications submitted under direct grant programs administered by the Office of Bilingual Education and Minority Languages Affairs.

SUMMARY: The Director of the Office of Bilingual Education and Minority Languages Affairs (OBEMLA), Department of Education, invites interested individuals to apply to serve as field readers for programs administered by OBEMLA. OBEMLA administers programs authorized by the Bilingual Education Act, 20 U.S.C. 3281–3341 as amended by Public Law 100–297 (April 28, 1988), and 34 CFR parts 500, 501, 524, 525, 526, 561, 573, and 574.

Each year the Secretary selects field readers to evaluate grant applications based upon criteria published in program regulations and, where applicable, additional criteria published in the application notices in the **Federal Register**.

Expertise is desirable in such areas as evaluation, curriculum and materials development, personnel and parent training, education administration, research, bilingual education, English as a second language, teaching English to speakers of other languages (TESOL), second language acquisition, adult education, special education, and vocational education. This list is not intended to be all inclusive and individuals with expertise in related fields are encouraged to apply. Individuals selected as reviewers will be compensated for their services as needed. Individuals interested in serving as field readers for the fiscal year 1990 funding cycle should contact OBEMLA no later than September 29, 1989.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. GP88-26-000]

Northern Pump Co., Danner No. A–1 Well; Order Vacating Final Well Category Determination

Issued August 3, 1989

Before Commissioners: Martha O. Hesse, Chairman; Charles G. Stalon, Charles A. Trabandt, Elizabeth Anne Moler and Jerry J. Langdon.

On February 17, 1988, and May 23, 1988, the Kansas Corporation Commission (Kansas) issued orders revoking its prior determinations under section 108 of the Natural Gas Policy Act of 1978 (NGPA) [1] that the Danner No. A–1 well (the well), located in Finney County, Kansas and formerly owned and operated by Northern Pump Company (Northern Pump), was qualified as a stripper well and that production from the well was seasonally affected.[2] On July 11, 1988, Hawley Management Company (Hawley) [3] filed a protest to Kansas' orders. The Commission took no action to reverse or remand the Kansas determination revoking the seasonally affected determination and that determination became final on July 21, 1988.

On March 27, 1989, the Commission reopened the final well determination that the well qualified as stripper well under section 108.[4] In the March 27, 1989 order reopening the stripper well determination, the Commission found that it appeared that in making the subject determination untrue statements of material fact were relied upon or necessary material facts were omitted. Kansas, in its February 17, 1988 order noted that testimony had revealed that it was Northern Pump's practice to partially close the valve on the well. Further, Williams Natural Gas Company, Larson Family Farms, and Randal K. Loder (purchasers of the gas) argued that the record showed that Northern Pump read the irrigation meters only once a month and estimated the number of irrigation gas days of production each month by dividing this monthly amount by an estimated daily volume which it assumed an irrigation pump would use during one day of operation.

Section 108(b) of the NGPA provides that a well qualifies as a stripper well if:

> (A) During the preceding 90-day production period, such well produced nonassociated natural gas at a rate which did not exceed an average of 60 Mcf per production day during such period; and
>
> (B) During such period such well produced at its *maximum efficient rate of flow* (MER), determined in accordance with recognized conservation practices designed to maximize the ultimate recovery of natural gas. [Emphasis added.]

Section 271.803(d) of the Commission's regulations provides that a production day means:

> (1) Any day during which gas is produced; and
>
> (2) Any day during which gas is not produced if production during such day is prohibited by a State law or a conservation practice recognized or approved by the State agency having regulatory jurisdiction over the production of natural gas.

On April 26, 1989, the purchasers filed the only comments received in response to the March 27, 1989 order. The purchasers request that the Commission vacate the section 108 stripper well determination based upon the record in this proceeding. The purchasers argue that the production figures submitted by Northern Pump in support of its section 108 application did not reflect the true maximum efficient rate of flow of the well as required by NGPA section 108(b)(1), because the valve was restricted. The purchasers further argue that the production records submitted in Northern Pump's section 108 application were also tainted by the use of estimated irrigation gas production days which creates the possibility of the double counting of production days. Finally, purchasers contend that state

---

[1] 15 U.S.C. 3318 (1982).

[2] On May 21, 1986, the Commission issued an order reopening and remanding to Kansas a determination that the well is a seasonally affected stripper gas well. 35 FERC ¶61,207.

[3] Hawley states that it is serving as manager of liquidation and dissolution of Northern Pump Company and acting as agent for the Estate Trust of Roseta H. Wright, the owner of Northern Pump Company. Hawley further states that the current operator and partial owner of the well is Ensign Operating Company (Ensign), which purchased the well in November 1986, and that Amoco Production Company also owns an interest in the well.

[4] 46 FERC ¶61,367 (1989). The Commission found that the May 28, 1986 order had only reopened and remanded the seasonally affected determination. 46 FERC at 62,153.

[Docket No. RP89-221-000]

flow tests demonstrate that the well's MER exceeded 60 Mcf per day in 1978.

Northern Pump in the course of the stripper well determination made no statement concerning the operating practice of restricting the valve on the well and failed to explain its method of estimating production days to show its compliance with § 271.803(d) of the regulations. Section 275.205(d) of the Commission's regulations provides that the Commission shall vacate any reopened determination if it finds that the grounds for reopening the determination exist.[5] Accordingly, we find good cause under section 503(d) of the NGPA to vacate the final section 108 determination of natural gas produced from the subject well.

Ensign and all working interest owners and first resellers that have collected proceeds from first sales of gas from the subject well, if they have not already done so, must refund, with interest calculated under § 154.102(c) of the Commission's regulations, all amounts collected in excess of the otherwise applicable maximum lawful price.

The Commission orders:

(A) The stripper well determination under section 108 for the Danner No. A–1 well is hereby vacated pursuant to section 503(d) of the NGPA and § 275.205 of the Commission's regulations.

(B) Within ten days from the date of this order, Ensign shall serve a copy of this order on all working interest owners or all purchasers/resellers of gas from the well and must give the Commission a list of the owners or purchasers.

(C) Within 60 days from the date of this order, Ensign and any other working interest owners and purchasers/resellers of the gas from the well must refund with interest all amounts collected in excess of the applicable maximum lawful price.

(D) Within ninety days from the date of this order, anyone who collected proceeds from first sales of gas from the well shall file a refund report. The refund report must show (1) the amount of overcharges and interest refunded, (2) the dates the refunds were paid, and (3) a statement of concurrence by the purchasers that all refunds were made, or, alternatively, a statement that no refunds are due.

(E) This order shall not prejudice any enforcement action that may be warranted.

By the Commission.

Linwood A. Watson, Jr.,

Acting Secretary.

[FR Doc. 89–20942 Filed 9–6–89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TM89–5–1–000]

Alabama-Tennessee Natural Gas Co.; Proposed Changes in FERC Gas Tariff

August 30, 1989.

Take notice that on August 24, 1989, Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), Post office Box 918, Florence, Alabama 35631, tendered for filing Alternate Second Revised Sheet No. 4A to its FERC Gas Tariff, First Revised Volume No. 1. Such tariff sheet is proposed to become effective July 1, 1989.

Alabama-Tennessee states that the filing is to adjust the currently effective take-or-pay surcharge rates to its customers to reflect decreases in the amount being billed to it by Tennessee Gas Pipeline Company, and to adjust the computation of carrying charges for one customer, in compliance with the Commission's July 7, 1989 order in Docket No. TM89–3–1–000. Alabama-Tennessee asserts that the allocation methodology utilized is that approved by the Commission in Docket Nos. RP88–205–001 and TM89–1–1–000. Alabama-Tennessee further states that such filing is being made pursuant to § 26.1(a) of its tariff.

Alabama-Tennessee has requested any necessary waivers of the Commission's Regulations in order to permit the tariff sheets to become effective as proposed.

Alabama-Tennessee states that copies of the tariff filing have been mailed to all of its jurisdictional customers and affected State Regulatory Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 or Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before September 7, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to the proceeding must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspections.

Lois D. Cashell,

Secretary.

[FR Doc. 89–20943 Filed 9–6–89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP89–220–000]

CNG Transmission Corp.; Proposed Changes in FERC Gas Tariff

August 30, 1989.

Take notice that CNG Transmission Corporation on August 25, 1989 tendered for filing proposed changes in its FERC gas tariff Volume No. 1. The purpose of the filing is to implement new rates for Outer Continental Shelf interruptible transportation service. The proposed tariff sheets being filed are Second Revised Sheet No. 1, Superseding First Revised Sheet No. 1; Original Sheets No. 81A, 81B, 81C, 81D, 81E and 81F; Sixth Revised Sheet No. 32, and First Revised Sheets No. 226, 227, 228, 229, 230 231, and 232.

The Federal Energy Regulatory Commission, in Orders 509 and 509A, issued to CNG a blanket certificate for off-shore transportation. CNG initially filed to continue use of its current TF and TI rates for off-shore transportation under this blanket certificate, but by this filing proposes to use new rates designed specifically for interruptible off-shore transportation.

Copies of the filing were served upon the company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or protest this filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 N. Capitol Street, NE., Washington, DC 20426 in accordance with §§ 385.214 and 385.211 of the Commission's rules and regulations. All such motions or protests should be filed on or before September 7, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants party to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

[FR Doc. 89–20944 Filed 9–6–89; 8:45 am]

BILLING CODE 6717-01-M

---

[5] 18 CFR 275.205 (1988).

[Docket No. RP89–221–000]

North Penn Gas Co.; Proposed Changes in FERC Gas Tariff

August 30, 1989.

Take notice that North Penn Gas Company (North Penn) on August 25, 1989, pursuant to Ordering paragraph (G) of the Commission Order dated August 3, 1989, filed the following tariff sheets to First Revised Volume No. 1 of its FERC Gas Tariff:

Substitute Ninety-third Revised Sheet No. PGA—Effective August 1, 1989
Substitute Ninety-fourth Revised Sheet No. PGA—Effective September 1, 1989
Second Revised Sheet No. 15H(1)—Effective September 1, 1989
Original Sheet No. 15H(1)(a)—Effective September 1, 1989
Original Sheet No. 15H(6)—Effective September 1, 1989

North Penn states these sheets establish procedure by which it recovers from its customers FERC Order 473 Compression Allowance Charges and LNG Charges for which North Penn's pipeline suppliers have received Commission approval to bill and which are being billed to North Penn.

The tariff sheets in which North Penn proposes the pass-through of these charges are as follows:

(1) Second Revised Sheets No. 15H(1) and Original Sheet No. 15H(1)(a). These tariff sheets establish procedures (Section 18) by which North Penn will recover from its customers the FERC Order 473 Compression Allowance and the LNG Charges which North Penn's pipeline suppliers bill North Penn.

(2) Original Sheet No. 15H(6). This tariff sheet (as well as Appendix A) sets for each category of up-stream cost, the allocation of amounts billed to North Penn through July 1989; the amount of any such costs paid by North Penn's customers through a PGA surcharge; any related account 191 credit (off-set); and the net amount of each charge to be billed to North Penn's customers. The allocation methodology utilizes the same procedure utilized by North Penn's pipeline suppliers in their allocation of costs to North Penn.

As per Section 18, the amounts billed to North Penn after July 1989 will be billed by North Penn as incurred to its customers and Corning Natural Gas Corporation (Corning).

(3) Substitute Ninety-third, and Substitute Ninety-fourth Revised Sheet No. PGA–1. These revised tariff sheets eliminate the PGA surcharge for Order 473 and LNG Costs currently in effect, so that the net amount of these charges can be billed effective September 1, 1989 under tariff sheet No. 15H(6).

In the August 3, 1989 Commission order (page 15, footnote 48), the Commission states that "for purposes of determining the Corning-related portion of the Account No. 191 balance, the balance as of October 31, 1988 should be used. During the deferral period ended on that date, North Penn received several large refunds from Tennessee relating to the period when Corning was a customer of North Penn."

North Penn states it has difficulty implementing the above-passage as to refunds associated with Corning's past purchases, which refunds were reflected in Account 191 after October 31, 1988. To avoid prejudice to Corning or any customer, North Penn has designated and reserved such amounts pending Commission clarification.

Copies of this filing were served upon North Penn's sales customers as well as interested state commissions.

Any person desiring to be heard or to protest said filing should file a protest or motion to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.214 and 385.211. All motions or protests should be filed on or before September 7, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3641-9]

Agency Information Collection Activities Under Office of Management and Budget Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden.

DATE: Comments must be submitted on or before October 10, 1989.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 382–2740.

SUPPLEMENTARY INFORMATION:

Office of Pesticides and Toxic Substances

Title: Phase 3 of the Pesticide Reregistration Process (EPA ICR #1543.01). This ICR requests clearance for a new information collection.

Abstract: Under Phase 3 of the pesticide reregistration process, registrants responsible for submitting generic data to support reregistration of certain active ingredients must provide the following information to EPA: an update on their commitment to comply with reregistration data requirements; summaries of studies previously submitted to the Agency; reformatted versions of toxicology and residue chemistry reports submitted prior to 1982; information on unreasonable adverse effects; and any other information that might support reregistration.

Burden Statement: The public reporting burden for this collection of information is estimated to average 1360 hours per response, including 346 hours to summarize an average of 34 studies, 976 hours to reformat an average of 12 studies, 25 hours to complete the "Phase 3 Chemical Response Worksheet," 14 hours to identify unreasonable adverse effects, and 15 minutes to complete the "Phase 3 Report and Worksheet on Project Status." These estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Respondents: Pesticide manufacturers

Estimated No. of Respondents: 1220

Estimated Total Annual Burden on Respondents: 1,659,803 hours

Frequency of Collection: One time.

Send comments regarding the burden estimates, or any other aspect of this collection of information, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM–223), 401 M Street, SW., Washington, DC 20460, and

Tim Hunt, Office of Management and Budget, Office of Information and Regulatory Affairs, 726 Jackson Place, NW., Washington, DC 20503, (Telephone 395–3084).

Dated: August 30, 1989.

Paul Lapsley

Director, Information and Regulatory Systems Division.

Agency Information Collection Activities Under Office of Management and Budget Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

DATE: EPA is requesting emergency processing of this ICR by September 11, 1989.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202 382–2740).

SUPPLEMENTARY INFORMATION:

Office of Water

Title: Pesticides in Groundwater GIS Case Study (EPA ICR# 1512).

Abstract: Respondents will be asked to voluntarily answer questions concerning pesticide usage and the proximity of application points to water supplies. Data will be used to demonstrate techniques for identifying vulnerable water supplies needed in developing State Pesticide in Groundwater Management Plans. This collection is essential to the mission of the agency and statutory deadlines may be missed if normal procedures are followed.

Burden Statement: The estimated public reporting burden for this collection of information is one hour per respondent, per year. This estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Respondents: Farmers, County Agriculture Agents

Estimated No. of Respondents: 151

Estimated Total Annual Burden on Respondents: 158 hours

Frequency of Collection: One-time only.

To obtain a copy of the ICR package contact Sandy Farmer on (202) 382–2740.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to:

Workshop on Environmental and Occupational Asthma

AGENCY: U.S. Environmental Protection Agency.

ACTION: Notice of workshop.

SUMMARY: A scientific workshop, sponsored by the Federal Task Force on Environmental Cancer and Heart and Lung Disease, will be held at the Hyatt Regency Long Beach, 200 South Pine Avenue, Long Beach, California.

DATES: The workshop will begin at 5:00 p.m. on Tuesday, November 28, 1989 and conclude at 12:00 p.m. on December 1, 1989.

ADDRESSES: Preregistration is required and attendance will be limited to 150 persons (including observers from the public). To register as an observer for the workshop, contact Ms. Willie Sanderson, Technical Resources Inc., 3202 Tower Oaks Boulevard, Rockville, Maryland, 20852, Tel. (301) 231–5250. Registration will be closed on October 20, 1989.

FOR FURTHER INFORMATION CONTACT: Thomas O. Miller, U.S. Environmental Protection Agency, RD–683, 401 M Street SW., Washington DC, 20460, Tel. (202) 382–5893 (FTS: 382–5893).

SUPPLEMENTARY INFORMATION: The Federal Task Force on Environmental Cancer and Heart and Lung Disease is an interagency group established by Congress to promote cooperation and coordination among Federal agencies on environmental health issues and to recommend research needed to understand the relationship between environmental factors and human disease. The purpose of the workshop is to identify research needs on environmentally and occupationally related asthma and to promote communication linkages between pulmonary medicine specialists and primary care providers.

Dated: August 25, 1989.

John H. Skinner,

Acting Assistant Administrator for Research and Development.

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirements Submitted to Office of Management and Budget for Review

August 31, 1989.

The Federal Communications Commission has submitted the following information collection requirements to the Office of Management and Budget for review and clearance under the Paperwork Reduction Act, as amended (44 U.S.C. 3501–3520).

Copies of the submissions may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037. Persons wishing to comment on these information collections should contact Eyvette Flynn, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, (202) 395–3785. Copies of these comments should also be sent to the Commission. For further information contact Jerry Cowden, Federal Communications Commission, (202) 632–7513.

OMB Number: 3060–0228

Title: Section 80.59, Compulsory ship stations

Action: Extension

Respondents: Individuals or households, state or local governments, businesses (including small businesses), and non-profit institutions

Frequency of Response: On occasion

Estimated Annual Burden: 200 respondents; 400 hours total annual burden; 2 hours average burden per response

Needs and Uses: Rule is needed to permit vessels to operate for up to 30 days beyond expiration of safety certificate when annual inspection required by treaty or statute cannot be performed in time.

OMB Number: 3060–0265

Title: Section 80.868, Card of instructions

Action: Extension

Respondents: Individuals or households, state or local governments, businesses (including small businesses), and non-profit institutions

Frequency of Response: Recordkeeping requirement

Estimated Annual Burden: 3,000 recordkeepers; 300 hours total annual burden; 6 minutes average burden per recordkeeper

Needs and Uses: Rule needed to ensure that radiotelephone distress procedures are readily available on board certain ships required by statute or treaty to be equipped with radio.

Federal Communications Commission.

Application for Consolidated Hearing; Longhorn Broadcast Limited Partnership, et al

1. The Commission has before it the following mutually exclusive applications for 1 new FM station and 2 new AM stations:

I.

Applicant	File No.	MMDocket No.
A. Longhorn Broadcast Limited Partnership; Elgin, Texas.	BPH-871124MD	89-380
B. Johnny L. Crain and Richard J. Martinez, d/b/a Elgin Broadcasting; Elgin, Texas.	BPH-871124ML	
C. Dynamic Radio Broadcasting Corporation; Elgin, Texas.	BPH-871124MR	
D. Austin Broadcasting Company; Elgin, Texas.	BPH-871124MX	
E. William Robert Lundgren; Elgin, Texas.	BPH-871124MB (Previously Dismissed)	

Issue heading and applicants

1. & 2. Real Party-in-Interest, A
3. Qualifications, A
4. Comparative, A,B,C,D
5. Ultimate, A,B,C,D

II.

Applicant	File No.	MMDocket No.
A. William W. Muench; Willard, Missouri.	BPH-880126NO	89-371
B. MW Multicom Inc.; Willard, Missouri.	BPH-880126OI	

Issue heading and applicants

1. Air Hazard, A,B
2. Comparative, A,B
3. Ultimate, A,B

2. Pursuant to section 309(e) of the Communications Act of 1934, as amended, the above applications have been designated for hearing in a consolidated proceeding upon the issues whose headings are set forth below. The text of each of these issues has been standardized and is set forth in its entirety under the corresponding headings at 51 FR 19347, May 29, 1986. The letter shown before each applicant's name, above, is used below to signify whether the issue in question applies to that particular applicant.

3. If there is any non-standardized issue in this proceeding, the full text of the issue and the applicants to which it applies are set forth in an Appendix to this Notice. A copy of the complete HDO in this proceeding is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text may also be purchased from the Commission's duplicating contractor, International Transcription Services, Inc., 2100 M Street, NW., Washington, DC 20037. (Telephone (202) 857–3800).

W. Jan Gay,

Assistant Chief, Audio Service Division, Mass Media Bureau.

Appendix (Elgin, Texas)

1. To determine whether Sonrise Management Services, Inc. is an undisclosed party to the application of (A) Longhorn.

2. To determine whether (A) Longhorn's organizational structure is a sham.

3. To determine, from the evidence adduced pursuant to Issues 1 through 2 above, whether (A) Longhorn possesses that basic qualifications to be a licensee of the facilities sought herein.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10220. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–003155–009.

Title: Port Authority of New York and New Jersey Terminal Agreement.

Parties: Port Authority of New York and New Jersey (Port Authority), Maersk Container Service Company, Inc.

Synopsis: The Agreement provides for the removal on or after September 1, 1989, of the Port Authority's termination right associated with Building No. 186, Port Newark (Paragraph 12 of Agreement No. 224–003155–008) which is used as an equipment maintenance facility.

Agreement No.: 224–200235–001.

Title: Port of Palm Beach District Terminal Agreement.

Parties: Port of Palm Beach District, Palm Beach Steamship Agency (Agency).

Synopsis: The Agreement provides that if the Agency exercises its renewal option in the basic lease agreement, it is to be evidenced in writing and filed with the Federal Maritime Commission to become effective pursuant to the provisions of the Shipping Act of 1984. All other terms and conditions of the basic agreement remain the same.

By Order of the Federal Maritime Commission.

Dated: August 31, 1989.

Joseph C. Polking,

Secretary.

FEDERAL RESERVE SYSTEM

Federal Open Market Committee; Domestic Policy Directive of July 5–6, 1989

In accordance with § 271.5 of its Rules Regarding Availability of Information (12 CFR 271, *et seq.*), there is set forth below the domestic policy directive issued by the Federal Open Market Committee at its meeting held on July 5–6, 1989.[1] The directive was issued to the Federal Reserve Bank of New York as follows:

> The information reviewed at this meeting tends to confirm earlier indications that economic growth has slowed this year. Gains in total nonfarm payroll employment have moderated substantially in recent months, but the civilian unemployment rate, at 5.2 percent in May, remained close to its average level in earlier months of the year. Industrial production increased on balance in April and May at about the reduced rate experienced earlier in the year. Growth in consumer spending has weakened considerably this year. Housing starts declined slightly further in May. Recent indicators of business captial spending suggest a substantial additional increase in the second quarter after a rebound in the first quarter. The nominal U.S. merchandise trade deficit narrowed in April from a substantially reduced average value in the first quarter. Broad measures of prices have risen more rapidly this year than in 1988, reflecting sharp increases in energy and food prices.
>
> Interest rates have fallen since the Committee meeting on May 16, with the largest declines generally occurring on long-term markets. In foreign exchange markets, the trade-weighted value of the dollar in terms of the other G–10 currencies rose sharply earlier in the intermeeting period but subsequently more than retraced that rise in often volatile trading.
>
> M2 and M3 declined in May, primarily because of sizable reductions in transaction and other liquid balances arising from the clearing of unusually large tax payments; data through mid-June point to a rebound in these measures of money. Thus far this year, expansion of M2 has been at a rate below the Committee's annual range, while growth of M3 has been around the lower bound of the Committee's range.
>
> The Federal Open Market Committee seeks monetary and financial conditions that will foster price stability, promote growth in output on a sustainable basis, and contribute to an improved pattern of international transactions. In furtherance of these objectives, the Committee reaffirmed at this meeting the ranges it had established in February for growth of M2 and M3 of 3 to 7 percent and 3½ to 7½ percent, respectively, measured from the fourth quarter of 1988 to the fourth quarter of 1989. The monitoring range for growth of total domestic nonfinancial debt also was maintained at 6½ to 10½ percent for the year. For 1990, on a tentative basis, the Committee agreed to use the same ranges as in 1989 for growth in each of the monetary aggregates and debt, measured from the fourth quarter of 1989 to the fourth quarter of 1990. The behavior of the monetary aggregates will continue to be evaluated in the light of movements in their velocities, developments in the economy and financial markets, and progress toward price level stability.
>
> In the implementation of policy for the immediate future, the Committee seeks to decrease slightly the existing degree of pressure on reserve positions. Taking account of indications of inflationary pressures, the strength of the business expansion, the behavior of the monetary aggregates, and developments in foreign exchange and domestic financial markets, somewhat greater reserve restraint or somewhat lesser reserve restraint would be acceptable in the intermeeting period. The contemplated reserve conditions are expected to be consistent with growth of M2 and M3 over the period from June through September at annual rates of about 7 percent. The Chairman may call for Committee consultation if it appears to the Manager for Domestic Operations that reserve conditions during the period before the next meeting are likely to be associated with a federal funds rate persistently outside a range of 7 to 11 percent.

By order of the Federal Open Market Committee, August 31, 1989.

Normand Bernard,

Assistant Secretary, Federal Open Market Committee.

BILLING CODE 6210-01-M

Change in Bank Control Notice; Acquisition of Shares of Banks or Bank Holding Companies

The notificant listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than September 21, 1989.

A. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President), 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *Dan B. Kyle,* Richwood, Ohio; to retain up to 15 percent of the voting shares of The Citizens Savings Bank Company, Richwood, Ohio.

Board of Governors of the Federal Reserve System, August 31, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

Intercounty Bancshares, Inc. Employee Stock Ownership Plan; Formation of, Acquisition by, or Merger of Bank Holding Companies

The company listed in this notice has applied for the Board's approval under section 3 of the Bank Holding Company Act (14 U.S.C. 1842) and 225.14 of the Board's Regulation Y (12 CFR 225.24) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that application or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Comments regarding this application must be received not later than September 28, 1989.

---

[1] Copies of the record of policy actions of the Committee for the meeting of July 5–6, 1989, are available upon request to The Board of Governors of the Federal Reserve System, Washington, DC 20551.

A. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *InterCounty Bancshares, Inc. Employee Stock Ownership Plan,* Wilmington, Ohio; to become a bank holding company by acquiring 25 percent of the voting shares of InterCounty Banshares, Inc., Wilmington, Ohio.

B. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Bank Maryland Corp.,* Towson, Maryland; to acquire 100 percent of the voting shares of Universal Bank of Maryland, Lanham-Seabrook, Maryland.

C. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Lemens Banking Investments, Ltd.,* Austin Texas; to become a bank holding company by acquiring 61.8 percent of the voting shares of First Bank & Trust Co. Bartlett, Bartlett, Texas, and Eagle Bank, Jarrell, Texas.
2. *The Plains Corporation,* Wilmington, Delaware; to become a bank holding company by acquiring 98.02 percent of the voting shares of the Plains Corporation, Lubbock, Texas, and thereby indirectly acquire Plains National Bank of Lubbock, Lubbock, Texas.

Board of Governors of the Federal Reserve System, August 31, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

GENERAL SERVICES ADMINISTRATION

Report to Congress on the Costs of Operating Privately Owned Vehicles

The Travel Expense Amendments Act of 1975 (Pub. L. 94–22, May 19, 1975) requires the periodic investigation of the operating costs of privately owned vehicles (airplanes, automobiles, and motorcycles) to Government employees while engaged on official business. Further, the Act requires that the results of these investigations be reported to the Congress and published in the **Federal Register**.

The following report is being published to comply with the requirements of the Act.

Dated: August 23, 1989.

Richard G. Austin,

Acting Administrator of General Services.

The Travel Expense Amendments Act of 1975 (Pub. L. 94–22, May 19, 1975), 5 U.S.C. 5707(b), requires that the Administrator of General Services, in consultation with the Comptroller General of the United States, the Secretaries of Defense and Transportation, and representatives of Government employee organizations, conduct a periodic investigation of the costs of operating privately owned vehicles to Government employees while engaged on official business and report the results to the Congress at least once a year. The Act further requires that a determination of the average, actual cost per mile be made based on the results of the investigation. Such figures must be reported to the Congress within 5 working days after the determinations have been made.

The General Services Administration (GSA) conducted an automobile cost investigation based on calendar year 1988 data and consulted with representatives of employee organizations, the General Accounting Office, and the Departments of Defense and Transportation on the results. As required, GSA is reporting the results of that investigation and the cost per mile determination.

GSA's investigation of the costs of operating privately owned automobiles revealed an average cost of 24 cents per mile. GSA is currently processing an amendment to the Federal Travel Regulation increasing the automobile mileage reimbursement rate from the current level of 22.5 cents to 24 cents.

The investigation of the cost of operating privately owned motorcycles and airplanes is still in process. The results of that investigation will be reported upon completion of the investigation and the consultation process.

This report on the cost of operating privately owned automobiles will be published in the **Federal Register**.

BILLING CODE 6820-24-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

[Announcement No. 948]

Availability of Funds for Fiscal Year 1989 for a Cooperative Agreement for an Epidemiologic Study to Determine the Incidence and Extent of Human Immunodeficiency Virus (HIV) Infection in American Blood Donors

Introduction

The Centers for Disease Control (CDC) proposes to continue assistance to the American Red Cross (ARC) through a cooperative agreement for an epidemiologic surveillance study to determine the incidence and extent of infection with Human Immunodeficiency Virus (HIV) and related retroviruses in American blood donors and to monitor trends over time using computer software developed by ARC and CDC.

Authority

This program is authorized under section 317(k)(3) of the Public Health Service Act (42 U.S.C. 247(b)), as amended.

Eligible Applicant

The American Red Cross (ARC) is the major collector of blood for transfusion in the United States, with about six million units collected annually. This number comprises approximately half the nation's blood supply. The other half is collected by numerous independent local blood banks and the military. ARC is national in scope, with collection in at least parts of most States in the continental United States. Because the prevalence of HIV infection, and especially the incidence of new infection, in blood donors is low (due to the self-deferral process), very large numbers of donors need to be studied to obtain meaningful results. Additionally, HIV infection levels vary considerably by geographic area. It is essential to obtain HIV infection data from across the entire United States.

The ARC, funded through cooperative agreement U64/CCU302659, awarded by the Centers for Disease Control in Fiscal Year 1986 has 3 years in experience in epidemiologic surveillance studies of HIV infection. It has developed a system to collect, manage, and analyze at least 6 million records a year on donations that have been tested for HIV infection. There is no other organization that is known to have already collected, managed, and analyzed millions of blood donation records which would enable to monitoring of trends in HIV infection from as early as 1986. Therefore, the intent of this announcement is to provide funding to the American Red Cross for an additional five years to continue this study.

Availability of Funds

Approximately $203,000 is available in fiscal year 1989 to fund this award. The award will be funded with 12-month annual budget periods within a 5-year project period, which will begin September 29, 1989. Continuation awards within the project period will be made on the basis of satisfactory progress and the availability of funds. The funding estimate outlined above may vary and is subject to change. No other applications are being accepted for this project.

Purpose

The purpose of this cooperative agreement is to continue assistance to the American Red Cross for: (1) Determining and monitoring the extent of HIV infection in blood donors, (2) analyzing the characteristics of infected donors to strengthen the effectiveness of the donor deferral and screening process, (3) analyzing the socio-demographic characteristics of donors to assess the degree of representativeness of the general population, and (4) monitoring for emergence of additional Acquired Immunodeficiency Syndrome (AIDS) viruses as well as other viruses relevant to the epidemiology of AIDS.

Program Requirements

1. Recipient Agency Activities

a. Collect and analyze, on a national scale, serologic and demographic data on first-time and repeat blood donors to determine the prevalence of HIV infection by person, place, and time.

b. Continue to refine the data management system for the study.

c. Provide training for data management personnel at the ARC regional level.

d. Identify areas experiencing appreciable percentage of true seropositives which would permit ARC to determine reasons why the self-deferral process was not fully effective in screening these donors.

e. Analyze the socio-demographic characteristics of blood donors to assess the degree of their representativeness of the general U.S. population.

f. Using the computerized surveillance software developed by ARC and CDC, prepare summary data to be used for other epidemiologic studies of HIV infection in blood donors.

g. Develop and implement CDC/ARC collaborative studies for national surveillance of HIV–2 and other viruses relevant to the epidemiology of AIDS.

h. Collaborate with CDC in the presentation and dissemination of study results.

2. Centers for Disease Control Activities

a. Provide technical assistance in designing a data management system.

b. Monitor trends in the prevalence of HIV infection in first-time donors and the incidence of new HIV infection in repeat donors.

c. Evaluate and validate trend findings by comparison with trend data from other national and regional sentinel surveillance activities.

d. Collaborate in the analysis of the socio-demographic characteristics of blood donors to assess the degree of their representativeness of the general U.S. population.

e. Provide technical collaboration to the applicant in the data analyses, the evaluation of the self-deferral process and socio-demographic studies.

f. Collaborate in the presentation and dissemination of study results.

Evaluation Criteria

The application will be reviewed and evaluated based on the following criteria:

1. The extent to which the proposed objectives are measurable, specific, time-phased, and related to required recipient activities and program purpose.

2. The quality of the applicant's plan for conducting program activities and the potential effectiveness of the proposed methods in meeting its objectives.

In addition, consideration will also be given to the extent that the budget request and proposed use of project funds are appropriate and reasonable.

Funding Priorities

The intent of this announcement is to renew the cooperative agreement U64/CCU302659 between the American Red Cross and the Centers for Disease Control.

E.O. 12372 Review

The application is not subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs.

Catalog of Federal Domestic Assistance Number

The Catalog of Federal Domestic Assistance number is 13.118.

Application Submission and Deadline

The American Red Cross must submit an original and two copies of application form PHS–5161–1 (Rev 3/89) to Candice Nowicki, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., Room 300, Atlanta, Georgia 30305, on or before September 8, 1989.

Where to Obtain Additional Information

If you are interested in obtaining additional information regarding this project, please refer to Announcement Number 948 and contact the following: Business: Carole J. Tully, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., Room 300, Atlanta, Georgia 30305, or by calling (404) 842–6575 or FTS 236–6575. Technical: Lyle Peterson, M.D., AIDS Program, Center for Infectious Diseases, Centers for Disease Control, Atlanta, Georgia 30333, (404) 639–2082 or FTS 236–2082.

Dated: August 31, 1989.

Robert L. Foster,

Acting Director, Office of Program Support Centers For Disease Control

BILLING CODE 4160-18-M

Food and Drug Administration

[Docket No. 85F–0477]

INI Agrico, Inc.; Withdrawal of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the withdrawal, without prejudice to a future filing, of a food additive petition (FAP 5M3882) proposing that the food additive regulations be amended to provide for the safe use of a source of gamma radiation to control insect infestation and to inhibit growth and maturation in fresh papaya at doses not to exceed 1 kiloGray (kGy).

FOR FURTHER INFORMATION CONTACT: Clyde A. Takeguchi, Center for Food Safety and Applied Nutrition (HFF–330), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5740.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of November 13, 1985 (50 FR 46834), FDA published a notice that it had filed a petition (FAP 5M3882) submitted by INI Agrico, Inc., 1000 Elwell Ct., Suite 232, Palo Alto, CA 94303, that proposed to amend the food additive regulations to provide for the safe use of a source of gamma radiation to control insect infestation and to inhibit growth and maturation in fresh papaya at doses not to exceed 1 kGy (100 kilorad).

The agency concludes that the petitioned amendment is not necessary because of a broader regulation issued in 1986. In the **Federal Register** of April 18, 1986 (51 FR 13376), FDA issued a regulation based on a 1984 proposal that, among other things, permits the use of ionizing radiation to inhibit the growth and maturation of fresh foods and to disinfest food of arthropod pests at a dose not to exceed 1 kGy. Thus, the agency concludes that the use of radiation requested by the petitioner is already permitted and that the petition should be withdrawn.

On February 14, 1989, the agency requested the petitioner to concur that the petitioned amendment is no longer necessary and that the petition be withdrawn without prejudice (21 CFR 171.7) within 30 days. The agency has not received a response to this request and has been unable to contact the petitioner. Therefore, FDA is withdrawing the petition without prejudice. The agency will refile the petition if the petitioner so requests within 30 days.

Dated: August 24, 1989.

Fred R. Shank,

Acting Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4140-01-M

Public Health Service

Health Resources and Services Administration

Final Project Specifications, Review Criteria, Funding Preference and Funding Priorities for Grants for Podiatric Primary Care Residency Training Programs

The Health Resources and Services Administration announces the final Project Specifications, Review Criteria, Funding Preference and Funding Priorities for Grants for Podiatric Primary Care Residency Training Programs.

Section 788(e) authorizes the award of grants to accredited schools of podiatric medicine and public and nonprofit private hospitals to meet the costs of projects to: (1) Plan and implement projects in primary care training for podiatric physicians in approved or provisionally approved residency training programs; and (2) provide financial assistance in meeting costs of supporting trainees who participate in such programs and who plan to specialize in primary care.

Proposed Project Specifications, Review Criteria, Funding Preference and Funding Priorities were published in the **Federal Register** May 11, 1989, (54 FR 20440) for public comment. Four comments were received from three respondents during this 30-day comment period.

Proposed Project Specifications

Three of the comments were related to the Proposed Project Specification (a) which states that each project is expected to have a project director who is employed by the grantee institution and has completed at least one year of podiatric residency training and has at least one year of clinical teaching experience.

The three respondents recommended that a person who is certified by one of the recognized specialty boards within the profession, i.e., the American Board of Podiatric Surgery, the American Board of Podiatric Public Health, or the American Board of Podiatric Orthopedics, and who has a minimum of five years of clinical teaching experience in a college or approved post-graduate program, also be eligible to serve as project director for the program.

One respondent also recommended that an alternative qualification be added following ". . . clinical teaching experience" in specification "a" to read as follows: "or hold certification in a recognized specialty area in podiatric medicine and has at least five years of clinical teaching experience."

The respondents presented the following rationale for the recommendations. Many of the existing podiatric residency training programs have been established by or are under the direction of podiatrists who have not completed a residency training program themselves, since these podiatrists graduated during the 1960s and early 1970s when postdoctoral training opportunities in podiatric medicine were minimal. If the Proposed Project Specification (a) were to remain unchanged, many experienced and qualified leaders in the field of podiatric medicine would be prohibited from serving as project directors.

The Department accepts the rationale for the recommended changes to Project Specification (a) and has revised this requirement accordingly.

Specification "a" stipulates that the project director must complete at least one year of podiatric residency training. It was also suggested to insert "approved" between "podiatric" and "residency training" to ensure the educational integrity of the proposed program. The Department has accepted this suggestion and has revised the requirement accordingly.

Proposed Funding Preference

A comment was also received in support of the Proposed Funding Preference regarding the establishment of a new residency program. The respondent recommended that an alternate method for achieving preference status be added: namely, the addition of a minimum of three new positions to an already established and approved residency program. These three new positions would constitute a separate training track with its own educational program designed to meet applicable requirements.

No change will be made in the Proposed Funding Preference since the Department interprets the phrase "new podiatric primary care residency training program with a minimum of three new residency positions" to include the addition of a podiatric primary care residency training track to an existing approved podiatric residency training program, provided that the addition to an existing program results in a net increase of three podiatric residency positions.

The following final project specifications, review criteria, funding preference and funding priorities will be used in making grant awards in Fiscal Year 1989:

Final Project Specifications

Each project should have:

a. A project director who is employed by the grantee institution and: (1) Has completed at least one year of approved podiatric residency training and has at least one year of clinical teaching experience; or (2) is board certified in a recognized specialty area in podiatric medicine and has had at least five years of clinical teaching experience.

b. An appropriate administrative and organizational plan and appropriate faculty, staff and facility resources for the achievement of stated objectives.

c. A systematic evaluation of the educational program, including the performance and competence of trainees and faculty, the administration of the program, and the degree to which program and educational objectives are met.

d. Use of ambulatory care settings where podiatric primary care is practiced and where an adequate portion of the clinical training is conducted.

e. A curriculum which:

1. Is appropriate for the academic level of the trainees and the specific length and nature of the educational program;

2. Supplements any practical (including clinical) experiences with related educational activities; and

3. Includes: A minimum of 20 percent of curriculum time devoted to supervised instruction in ambulatory clinical settings; instruction in behavioral sciences and the development of psychosocial skills and topics; and a supervised clinical experience in a family medicine or general internal medicine ambulatory care setting;

f. A sufficient number of residents to provide an adequate collegial environment for the educational program and to enhance cost-efficiency.

g. An adequate number of qualified faculty with training and experience in podiatric medicine, and behavioral sciences and liaison faculty in related program areas for the number of residents in the program. The faculty in the program are expected to engage in periodic faculty development activities to improve their teaching skills.

h. Adequate facilities for the provision of the educational activities and, in particular, have ambulatory care space the *Catalog of Federal Domestic Assistance*. It is not subject to the provisions of Executive Order 12372 Intergovernmental Review of Federal Programs (as implemented through 45 CFR part 100).
the residents with a broad clinical experience.

Final Review Criteria

Approval of all applications will be based on an analysis of the following factors:

1. The degree to which the proposed project provides for the project specifications;

2. The administrative and management capability of the applicant to carry out the proposed project in a cost effective manner;

3. The degree to which the proposed training program emphasizes podiatric primary care; and

4. The potential of the project to continue on a self-sustaining basis.

Final Funding Preference

Applications that propose to start a new podiatric primary care residency program with a minimum of three new residency positions will be placed ahead of other approved applications in the funding order.

Final Funding Priorities

In determining the order of funding of approved applications, a funding priority will be given to:

1. Applications which demonstrate an affiliation with a college of podiatric medicine that will serve to enrich the educational experience of participating residents.

2. Applications which demonstrate a realistic plan for the recruitment of underrepresented minorities (i.e. Black, Hispanic and American/Alaskan Native) into the program.

3. Applications which meet at least two of the following curriculum initiatives:

a. Applications proposing to develop and implement curricula concerning ambulatory and inpatient care of those with HIV infection-related diseases.

b. Applications which are innovative in their educational approaches to quality assurance/risk management activities: monitoring and evaluation of health care services and utilization of peer-developed guidelines and standards.

c. Applications proposing to provide substantial multidisciplinary geriatric training experiences in multiple ambulatory settings and inpatient and extended care facilities.

This program will be listed at 13.181 in sufficient to provide an adequate clinical experience for the residents.

i. A sufficient number of patients with a variety of health care needs to provide

Dated: August 31, 1989.

BILLING CODE 4160-15-M

Health Resources and Services Administration

Final Funding Preference for Scholarships for the Undergraduate Education of Professional Nurses Grant Program

The Health Resources and Services Administration announces the Final Funding Preference for Scholarships for the Undergraduate Education of Professional Nurses Grant Program.

Section 843 of the Public Health Service Act, as amended authorizes scholarships to provide financial assistance to individuals who are enrolled or accepted for enrollment as undergraduate nursing students in diploma, associate, or baccalaureate degree programs or in programs of nursing education leading to first degrees in professional nursing and who are in financial need with respect to attending these schools. A scholarship recipient must agree to serve full time upon graduation as a registered nurse for a period of not less than 2 years in an Indian Health Service Center, or a Native Hawaiian Health Center, or a public hospital, or a Migrant Health Center, or a Community Health Center, or a certified nursing facility, or a rural health clinic, or in a health facility determined by the Secretary to have a critical shortage of nurses.

A Proposed Funding Preference was published in the **Federal Register** on June 16, 1989 (54 FR 25629) for public comment. Comments were received from 10 respondents during this 30-day comment period. One comment was received that supported the definition of undergraduate nursing student, which was not part of the **Federal Register** notice.

Proposed Funding Preference

One comment suggested an alternative method of achieving the outcome of the preference by requiring schools to give preference in awarding scholarships to students from disadvantaged and minority backgrounds.

The purpose of the preference is to attract those schools that, by virtue of their enrollment, already have an 11.4 percent minority representation. These schools represent students most in need of scholarship support.

Several respondents indicated their intention to withdraw from applying for the scholarships because they did not meet the minority enrollment requirement to obtain the funding preference. The requirement of minority enrollment is to receive a funding preference. The preference is a bonus which does not preclude from consideration those applicants who do not qualify for the preference. There are instances where applicants who meet the requirements of the law but do not qualify for the preference are funded. Conversely, because of a limited appropriation of funds some applicants might qualify for a funding preference and not get funded because of the large number of approved applicants.

All comments received have been carefully considered.

No change will be made in the Proposed Funding Preference. The following final funding preference will be used in making grant awards in Fiscal Year 1989.

Final Funding Preference

For Fiscal Year 1989, preference in the award of the scholarship grants will be given to applicants which show evidence that they exceed the 3-year average enrollment of underrepresented minority students (i.e., Black, Hispanic, American Indian, Alaskan Native, Native Hawaiian, Asian/Pacific Islander), in undergraduate nursing programs. For the 1985–86 school year underrepresented minorities reflected 11.4 percent of undergraduate nursing students. The Administration has determined that these population groups continue to be underrepresented in the nursing profession. Their representation should be increased to ensure equitable opportunities to a career in nursing.

This program is listed at 13.182 in the *Catalog of Federal Domestic Assistance*. It is not subject to the provision of Executive Order 12372, Intergovernment Review of Federal Programs (as implemented through 45 CFR Part 100).

Dated: August 31, 1989.

John H. Kelso,

Acting Administrator.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N–89–2045]

Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESS: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 755–6050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total numbers of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: August 25, 1989.

John T. Murphy,

Information Policy and Management Division.

Proposal: Financial Statement (Claims Collection)

Office: Administration

Description of the Need for the Information and its Proposed Use: Each office in the Department is authorized to have a claims collection officer to establish and maintain a file regarding each claim for which collection activities are made. This information will be used by the claims collection officer to make judgements concerning the likelihood of being able to collect a claim.

Form Number: HUD-27041

Director, Information Policy and Management Division.

Proposal: Housing and Urban Development (HUD) Act of 1987, Preservation of Low Income Housing, Prepayment of a HUD-Insured Mortgage By an Owner of Low Income Housing, Title II

Office: Housing

Description of the Need for the Information and its Proposed Use: This rule gives regulatory effect to legislative provisions governing prepayment of HUD insured mortgages. These provisions will assure that affordable multifamily housing units are preserved to the maximum extent practicable for lower-income families and that displacement of such families are minimized while public and private sectors find long term remedies to the potential loss of affordable housing.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AA-650-4143-02]

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for collection of information listed below has been submitted to the Office of Managment and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). Copies of the proposed collection of information and related forms and explanatory material may be obtained by contacting the Bureau's clearance officer at the phone number listed below. Comments and suggestions on the requirement should be made within 30 days directly to the Bureau clearance officer and to the Office of Management and Budget, Paperwork Reduction Project (1004-0121), Washington, DC 20503, telephone (202) 395-7340.

Title: 43 CFR parts 3500, 3510, 3520, 3530, 3540, 3550, 3560, 3570 and 3580 Leasing of Solid Minerals Others than Coal and Oil Shale.

OMB Approval Number: (1004-0121).

Abstract: Respondents supply information relevant to the identification, location and quality of the specific non-energy mineral under application for prospecting, leasing or exploration and their qualifications for holding Federal mineral permits, leases and exploration licenses. This information allows the Bureau to determine the availability of the lands under application and to assure that prospective permittees, lessees and licensees are in compliance with applicable statutory and regulatory requirements.

Bureau Form Numbers: 3104-3, 3104-5, 3504-1, 3504-3, 3504-4 and 3510-2.

Estimated completion times:

- Competitive lease bid: 1 hr.
- Preference right lease application: 10 hrs.
- Fringe acreage/lease modification: 2 hrs.
- Assignment/sublease: 2 hrs.
- Lease renewal/adjustment: 2 hrs.
- Exploration license: 3 hrs.
- Development contract: 3 hrs.
- Prospecting permit extension: 1 hr.
- Exploration plan for prospecting permit: 10 hrs.
- Prospecting permit application: 5/6 hr.
- Use permit application (Bureau Form 3510-2): 2 hrs.
- Bonding requirements (Bureau Form Nos. 3504-1, 3504-3, 3504-4, 3104-3 and 3104-5): 5/6 hr.

Description of Respondents: Prospective holders of Federal non-energy prospecting permits, leases, use permits and exploration licenses.

Annual Responses: 1,246

Annual Burden Hours: 3,722

Bureau clearance officer: Rick Iovaine (202) 653-8853

Dated: April 14, 1989.

Phoenix District Advisory Council Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Meeting of the Phoenix District Advisory Council.

DATE: October 5-6, 1989, 9:00 a.m.

ADDRESS: 2015 West Deer Valley Road, Phoenix, Arizona 85027.

SUMMARY: The Phoenix District Advisory Council of the Bureau of Land Management meets October 5-6, 1989. A tour of the Kingman Resource Area will occur on October 5. The formal meeting will be held at the Kingman Resource Area Office, 2475 Beverly Avenue Kingman, Arizona at 9:00 a.m. on October 6.

The Council has been established by and will be managed according to the Federal Advisory Committee Act of 1972, the Federal Land Policy and Management Act of 1976, and the Public Rangelands Improvement Act of 1978.

The agenda for the meeting includes:

—Kingman Resource Management Plan

—BLM Management Updates

—Business form Floor

—Public Comments and Statements

—Futures Meetings and Agenda Topics

SUPPLEMENTARY INFORMATION: This is a public meeting and the presentation of oral statements or the submission of written statements that address the issues on the meeting agenda or related matters are welcome.

Dated: August 31, 1989.

Henri R. Bisson,

District Manager.

BILLING CODE 4310-32-M

[NV-930-09-4212-13; N-51436]

Realty Action; Exchange of Public Lands, Clark County, Nevada

The following described federal lands are being considered for disposal by exchange pursuant to Section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Mount Diablo Meridian, Nevada

T. 19 S., R. 60 E.,
  Sec. 5, NW¼;
  Sec. 6, N½, NE¼SW¼, W½NE¼ NW¼SW¼, W½SE¼NW¼SW¼, W½NW¼SW¼, SW¼SW¼, E½SE¼ SW¼, SE¼;
  Sec. 7, N½, SW¼, W½SE¼;
  Sec. 17, N½, SW¼, N½SE¼, SW¼SE¼;
  Sec. 20, NE¼NE¼;
  Sec. 21, SW¼NW¼;
  Sec. 28, W½NE¼, E½NW¼, SW¼NW¼, N½SE¼.
  Total acres 2,290

Final determination on disposal will await completion of an environmental analysis.

In accordance with the regulations of 43 CFR 2201.1(b), subject to valid existing rights, publication of this Notice shall segregate the affected public lands from appropriation under the public land laws, including the mining laws, but not the mineral leasing laws, and from any subsequent land exchange proposals filed by any proponent other than Metroplex Properties or their nominee.

The segregation of the above-described lands shall terminate upon issuance of a document conveying such lands or upon publication in the **Federal Register** of a notice of termination of the segregation; or the expiration of two years from the date of publication, whichever occurs first.

For a period of forty-five days, interested parties may submit comments to the District Manager, Las Vegas District Office, 4765 Vegas Drive, Las Vegas, Nevada 89126.

Dated: August 30, 1989.

Gary Ryan,

Acting District Manager, Las Vegas, Nevada.

BILLING CODE 4310-HC-M

[UT-943-09-4212-13; U-61686]

Issuance of Land Exchange Conveyance Document; Utah

AGENCY: Bureau of Land Management, Interior.

ACTION: Exchange of public and private lands.

SUMMARY: This action informs the public of the conveyance of 1,673.72 acres of public lands out of Federal ownership and the acquisition of 12,596.52 acres into Federal ownership.

FOR FURTHER INFORMATION CONTACT: Mike Barnes, BLM Utah State Office, 324 South State Street, Salt Lake City, Utah 84111, 801-439-4119.

SUPPLEMENTARY INFORMATION: Notice is hereby given that in exchange of lands made pursuant to section 206 of the Act of October 21, 1976, 90 Stat. 2756, 43 U.S.C. 1716, a patent has been issued transferring 1,673.72 acres of land in Tooele County, Utah, from Federal to private ownership.

1. In exchange, the following described lands have been reconveyed to the United States:

Salt Lake Meridian, Utah

T. 10 N., R. 4 W.,
  Sec. 19, lots, 1,2,3,4, E½, E½W½;
  Sec. 29, all;
  Sec. 31, lots 1,2,3,4, E½, E½W½.
T. 10 N., R. 16 W.,
  Sec. 3, lots 1,2,3,4, S½N½, S½.
T. 11 N., R. 16 W.,
  Sec. 29, all;
  Sec. 33, all.

3. The mineral estate for the lands described in paragraph 1 were not acquired by the Bureau of Land Management.

4. The following described lands have been reconveyed to the United States but will remain closed to surface and mineral entry until a notice of opening is given in the Federal Register:

Salt Lake Meridian, Utah

T. 9 S., R. 18 W.,

Dewey No. 2, Dewey No. 3, and Dewey No. 4 patented mining claims, within section 8 and 17, of Mineral Survey #6311.
T. 9 S., R. 18 W.,
Roy No's, 1, 2, 3, 4, and 5 patented mining claims, within section 27, 28, 33, and 34, Mineral Survey #3697.
containing 135.46 acres.

5. The purpose of the exchange was to acquire non-federal land that will allow blocking the land into better management units. The public interest was best served through the completion of the exchange.

Dated:

Ted D. Stephenson,
Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-DO-M

Fish and Wildlife Service

Klamath River Basin Fisheries Task Force; Meeting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of meetings.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. App. I), this notice announces a meeting of the Klamath River Basin Fisheries Task Force, established under the authority of the Klamath River Basin Fishery Resources Restoration Act (16 U.S.C. 460ss et seq.). The meeting is open to the public.

DATES: The Klamath River Basin Fisheries Task Force will meet from 9:00 a.m. to 4:00 p.m., Thursday, September 7, 1989, and from 8:00 a.m. until noon on Friday, September 8th. A public scoping meeting will be held from 7:00 p.m. to 9:00 p.m., September 7, 1989.

PLACE: The meeting will be held at the Eureka Inn, 7th and C Streets, Eureka, California 95501.

FOR FURTHER INFORMATION CONTACT: Dr. Ronald A. Iverson, Project Leader, U.S. Fish and Wildlife Service, P.O. Box 1006 (1030 South Main), Yreka, California 96097-1006, telephone (916) 842-5763.

SUPPLEMENTARY INFORMATION: For background information on the Task Force, please refer to the notice of their initial meeting that appeared in the **Federal Register** on July 8, 1987 (52 FR 25639).

Reports will be provided to the Task Force on current projects of the Klamath River Basin Fishery Restoration Program. Schedules and procedures for carrying out the long-range planning of the Restoration Program will be discussed. The Task Force will make final recommendations on the Restoration Program work plan for Fiscal Year 1990. Status of appointing a sport fishery representative to the Task Force will be reported. The evening scoping meeting will permit members of the public to offer comments and suggestions for developing the long-range plan and environmental assessment for the Restoration Program.

Dated: August 21, 1989.

W.E. Martin,
Acting Regional Director, U.S. Fish and Wildlife Service.

BILLING CODE 4310-55-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-297]

Commission Decision not to Modify or Vacate Initial Determination Granting Temporary Relief, and Issuance of a Limited Temporary Exclusion Order and Temporary Cease and Desist Orders, Subject to Posting of Bond by Complainant

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Commission has determined not to modify the presiding administrative law judge's (ALJ) initial determination (ID) granting temporary relief in the above-referenced investigation, and has issued a limited temporary exclusion order and temporary cease and desist orders, subject to posting of a bond by complainant.

FOR FURTHER INFORMATION CONTACT: Judith M. Czako, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-252-1093.

SUPPLEMENTARY INFORMATION: The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337), as amended by the Omnibus Trade and Competitiveness Act of 1988, Pub. L. 100-418 (Aug. 23, 1988) and in sections 210.24 and 210.58 of the Commission's Interim Rules of Practice and Procedure (53 FR 33034, Aug. 29, 1988, and 53 FR 49118, Dec. 6, 1988).

On April 17, 1989, Motorola, Inc. filed a complaint and a motion for temporary relief with the Commission alleging violations of section 337 in the importation and sale of certain cellular radiotelephones and subassemblies and component parts thereof. Motorola's complaint alleged infringement of seven U.S. patents. The motion for temporary relief was limited to 4 claims of 3 patents: claims 62 and 77 of U.S. Letters Patent 4,523,155; claim 18 of U.S. Letters Patent 4,636,593; and the sole claim of U.S. Letters Patent Des. 269,873.

Pursuant to Commission interim rule 210.24(e)(8), the Commission provisionally accepted Motorola's motion for temporary relief at the Commission meeting on May 23, 1989. The Commission also instituted an investigation into the allegations of Motorola's complaint and published a notice of investigation in the **Federal Register**. 54 FR 23292-93 (May 31, 1989). The notice named the following respondents: (1) Nokia Corporation of Helsinki, Finland; (2) Nokia-Mobira Oy of Salo, Finland; (3) Nokia, Inc. of Basking Ridge, New Jersey; (4) Nokia-Mobira, Inc. of Largo, Florida; (5) Tandy Mobira Communications Corporation of Masan, The Republic of Korea; (6) Tandy Corporation of Fort Worth, Texas; and (7) A & A International of Fort Worth, Texas.

The presiding administrative law judge (ALJ) held an evidentiary hearing on Motorola's motion for temporary relief from July 7 to July 12, 1989. All respondents actively participated in the hearing. The Commission received submissions on the issues of remedy, the public interest, and bonding, from all parties on July 31, 1989, in accordance with Commission interim rule 210.24(e)(18)(ii).

On August 9, 1989, the ALJ issued his ID granting Motorola's motion for temporary relief. All parties filed written comments or responses to comments on the ID.

The Commission, having considered the ID, the comments and responses to comments of the parties, and the record in this investigation, determined that there are no errors of law or policy reasons to vacate or modify the ID. Consequently, pursuant to Commission interim rule 210.24(e)(17)(ii), the ID became the Commission's determination.

The Commission having determined that there is reason to believe that there is a violation of section 337 in the importation, sale for importation, or sale in the United States of the accused cellular radiotelephones, subassembles thereof, or component parts thereof, and having determined that temporary relief is warranted, considered the issues of the appropriate form of such relief, whether the public interest precludes issuance of such relief, complainant's bond, and respondents' bond during the period such relief is in effect.

The Commission has determined that a temporary limited exclusion order and temporary cease and desist orders directed to all U.S. respondents are the appropriate form of temporary relief. The Commission has further determined that the statutory public interest factors do not preclude the issuance of such relief, and that respondents' bond under the temporary limited exclusion order and the temporary cease and desist orders shall be in the amount of twenty-five (25) percent of the entered value of the imported articles.

Commission interim rule 210.58(b)(3) sets forth the requirements for posting of complainant's bond. Commission interim rule 210.58(b)(7) requires that all bonds posted by complainant must be approved by the Commission Secretary before the temporary relief which the bond will secure will be issued. Consequently, the issuance of temporary relief described in the preceding paragraph is subject to the posting and approval of complainant's bond in the amount of five (5) percent of complainant's 1988 revenues from the products in question. Complainant is to file its bond with the Commission Secretary within seven (7) business days of publication of this notice in the **Federal Register**.

Copies of all nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202-252-1000. Hearing-impaired are advised that information on the matter can be obtained by contacting the Commission's TDD terminal on 202-252-1810.

By order of the Commission.

Issued: August 29, 1989.

Kenneth R. Mason,
Secretary.

[FR Doc. 89-21012 Filed 9-6-89; 8:45 am]

BILLING CODE 7020-02-M

[TA-503(a)-18 and 332-279]

President's List of Articles Which May Be Designated or Modified as Eligible Articles for Purposes of the U.S. Generalized System of Preferences

AGENCY: United States International Trade Commission.

ACTION: Institution of investigation and scheduling of hearing.

SUMMARY: Following receipt on August 16, 1989, of a request from the U.S. Trade Representative, the Commission instituted investigation No. TA-503(a)-18 and 332-279 under sections 503(a) and 131(a) of the Trade Act of 1974 (19 U.S.C. 2463(a) and 2151(b)) and section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g))—

(1) Pursuant to sections 503(a) and 131(a) of the Trade Act, and the authority of the President delegated to the U.S. Trade Representative by sections 4(c) and 8(c) and (d) of Executive Order 11846, as amended, to advise the President, with respect to each article listed in Part A of the attached Annex, as to the probable economic effect on U.S. industries producing like or directly competitive articles and on consumers of the elimination of U.S. import duties under the U.S. Generalized System of Preferences (GSP). In providing its advice, the USTR requested the Commission to assume that benefits of the GSP would not apply to imports that would be excluded from receiving such benefits by virtue of the "competitive need" limits specified in section 504(c)(1) of the 1974 Act.

(2) Under authority delegated by the President, pursuant to section 332(g) of the Tariff Act, to advise the President—

(A) With respect to each article listed in Part B of the attached Annex, as to the probable economic effect on U.S. industries producing like or directly competitive articles and on consumers of the removal of the articles in Part B from eligibility for duty-free treatment under the GSP;

(B) With respect to the article listed in Part C of the attached Annex, as to the probable economic effect on U.S. industries producing like or directly competitive articles and on consumers of the removal of Brazil from eligibility for duty-free treatment under the GSP;

(C) In accordance with section 504(c)(3)(A)(i) of the Trade Act, as to the probable economic effect on domestic industries producing like or directly competitive articles and on consumers of waiving the competitive need limits for countries specified with respect to the articles listed in Part D of the attached Annex and for Malaysia with respect to the articles provided for in HTS 8541.40.9060;

(D) As to the probable economic effect on domestic industries producing like or directly competitive articles and on consumers of restoring the competitive need limits specified in section 504(c)(1) of the 1974 Act for Mexico with respect to the articles listed in Part F of the attached Annex, all of the foregoing articles for which Mexico currently is subject to the reduced competitive need limits specified in section 504(c)(2)(B) of the 1974 Act;

(E) In accordance with section 504(d) of the 1974 Act, which exempts from one of the competitive need limits in section 504(c) of the 1974 Act articles for which no like or directly competitive article was being produced in the United States on January 3, 1985, as to whether products like or directly competitive with the articles in Part A or Part E of the attached Annex were being produced in the United States on January 3, 1985.

EFFECTIVE DATE: August 29, 1989.

FOR FURTHER INFORMATION CONTACT:

(2) Textiles and apparel, Mr. Larry Butler (202-252-1470)
(3) Chemical products, Ms. Elizabeth Nesbitt (202-252-1355)
(4) Minerals and metals, Ms. Deborah McNay (202-252-1425)
(5) Machinery and equipment, Ms. Kathleen Lahey (202-252-1409)
(6) General manufactures, Mr. Eric Langer (202-252-1497)

All of the above are in the Commission's Office of Industries. For information on legal aspects of the investigation contact Mr. William Gearhart of the Commission's Office of the General Counsel at 202-252-1091.

BACKGROUND: The USTR announced the items which have been sent to the Commission for probable economic effect advice in the **Federal Register** of August 10, 1989.

Public Hearing: A public hearing in connection with the investigation will be held in the Commission Hearing Room, 500 E Street SW., Washington, DC 20436, beginning at 9:30 a.m. on October 3, 1989 and continuing as required on October 4 and 5. All persons shall have the right to appear by counsel or in person, to present information, and to be heard. Persons wishing to appear at the public hearing should file requests to appear and should file prehearing briefs (original and 14 copies) with the Secretary, United States International Trade Commission, 500 E St. SW., Washington, DC 20436, not later than noon, September 22, 1989. Posthearing briefs must be filed by October 11, 1989.

Written Submissions: In lieu of or in addition to appearances at the public hearing, interested persons are invited to submit written statements concerning the investigation. Written statements should be received by the close of business on October 2, 1989. Commercial or financial information which a submitter desires the

BEST COPY AVAILABLE

Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons. All submissions should be addressed to the Secretary at the Commission's office in Washington, DC.

Hearing-impaired individuals are advised that information on this matter can be obtained by contacting our TDD terminal on (202) 252–1810.

By order of the Commission.

Dated: August 31, 1989.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 731–TA–424 (Final)]

Martial Arts Uniforms From Taiwan

Determination

On the basis of the record [1] developed in the subject investigation, the Commission determines,[2] pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)) (the Act that an industry in the United States is not materially injured, or threatened with material injury, nor is the establishment of an industry in the United States materially retarded, by reason of imports from Taiwan of martial arts uniforms, provided for in subheadings 6203.22.10, 6203.23.00, 6203.29.20, 6204.22.10, 6204.23.00, and 6204.29.20 of the Harmonized Tariff Schedule of the United States, that have been found by the Department of Commerce to be sold in the United States at less their fair value (LTFV).

Background

The Commission instituted this investigation effective May 1, 1989, following a preliminary determination by the Department of Commerce that imports of martial arts uniforms from Taiwan were being sold at LTFV within the meanings of section 735 of the Act (19 U.S.C. 1673d(a)). Notice of the institution of the Commission's investigation and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of May 31, 1989 (54 FR 23205). The hearing was held in Washington, DC, on July 25, 1989, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on August 28, 1989. The views of the Commission are contained in USITC Publication 2216 (August 1989), entitled "Martial Arts Uniforms From Taiwan: Determination of the Commission in Investigation No. 731–TA–424 (Final) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigation."

Dated: August 29, 1989.

By Order of the Commission.

Kenneth R. Mason,

Secretary.

[Investigation No. 337–TA–296]

Certain Phenylene Sulfide Polymers and Polymers Compounds and Products Containing Same; Commission Decision not To Review an Initial Determination Amending the Complaint and Notice of Investigation To Add an Additional Respondent

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

---

[1] See USTR **Federal Register** notice of August 10, 1989 (54 FR 32891), for article descriptions.

[2] The country named is the beneficiary developing country specified by the petitioner. The TPSC reserves the right to address removal of GSP status for countries in addition to those specified by the petitioner.

[1] The record is defined in § 207.2(h) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(h)).

[2] Commissioner Eckes and Commissioner Newquist dissenting.

SUMMARY: Notice is hereby given that the United States International Trade Commission has determined not to review an initial determination (ID) (Order No. 16) issued by the presiding administrative law judge (ALJ) granting the motion of complainant Phillips Petroleum Company (Phillips) to add Polyplastics Co., Ltd. of Osaka, Japan (Polyplastics) as a respondent to the above-captioned investigation.

ADDRESSES: Copies of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E. Street, SW., Washington, DC 20436, Telephone 202–252–1000.

FOR FURTHER INFORMATION CONTACT: Craig L. McKee, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E. Street SW., Washington, DC 20436, telephone 202–252–1117.

Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission TDD terminal on 202–252–1810.

SUPPLEMENTARY INFORMATION: On July 13, 1989, the presiding ALJ issued an ID amending the complaint and notice of investigation to add Polyplastics as a respondent. No petitions for review of the ID or government agency comments were received. These actions are taken under authority of the Tariff Act of 1930 (19 U.S.C. 1337) and Commission interim rule § 210.53(h).

By order of the Commission.

Dated: August 30, 1989.

United States-Canada Free-Trade Agreement: Probable Economic Effects on U.S. Industries and Consumers of Accleleraled Elimination of U.S. Tariffs on Certain Articles From Canada

AGENCY: United States International Trade Commission.

ACTION: Notice of receipt from the U.S. Trade Representative (USTR) of supplemental information; notice of availability of annotated list prepared by the Commission of articles in USTR **Federal Register** notice of July 17, 1989 (54 FR 29959).

Background

In her letter to the Commission on July 17, 1989, the USTR provided a list of subheadings in the U..S Harmonized Tariff Schedule which may be considered for acceleration of tariff removal under the United States-Canada Free-Trade Agreement and requested the Commission's advice as to the probable economic effect of such accelerated elimination on domestic industries producing like or directly competitive articles and on consumers.

Ambassador Hills indicated in her letter that a number of the petitions received by the Governments of the United States and Canada requested acceleration only for selected products within a subheading, and that to the extent possible separate additional advice was desired on the effect of acceleration of tariff elimination on the narrow product coverage specified in such petitions.

On August 4, 1989, the Commission received from the USTR a list of such selected products within subheadings contained in petitions to the USTR. The Commission was advised that it will receive a simlar list of products contained in petitions submitted to the Government of Canada.

Upon request, a copy of an annotated Commission list of HTS subheadings included in Annex I of the USTR notice of July 17, 1989, showing for each subheading a brief products description, may be obtained from the Secretary, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436 (202–252–1802). Also available is a copy of the selected products within subheadings contained in petitions to the USR.

The original notice of the Commission's institution of investigation and scheduling of hearing was published in the **Federal Register** on August 9, 1989 (54 FR 32701).

FOR FURTHER INFORMATION CONTACT: Carl Seastrum, (202–252–1493), or any of the other persons named in the Commission's original notice of investigation.

Hearing-impaired persons can obtain information of this study by contacting our TDD terminal on (202–252–1810).

By order of the Commission

Dated: August 31, 1989.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31519 (Sub-No. 1)]

Norfolk and Western Railway Co.—Trackage Rights Exemption—Chicago Rail Link and Chicago Short Line Railway Co.

In Finance Docket No. 31519, Chicago Rail Link (CRL) has agreed to grant overhead trackage rights to Norfolk and Western Railway Company (NW) over 2,730 feet of its Illinois Central Railroad Company (IC) connection track and number 14 track in Chicago, IL. In Finance Docket No. 31519 (Sub-No. 1), CRL and Chicago Short Line Railway Company have agreed to grant overhead trackage rights to NW over 1,320 feet of their track number 14 in Chicago, IL.[1] The proposed transactions were to have been consummated on or about August 17, 1989.

This notice is filed under 49 CFR 1180.2(d)(7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction. Pleadings must be filed with the Commission and served on: Robert J. Cooney, Three Commercial Place, Norfolk, VA 23510–2191.

As a condition to the use of this exemption, any employees affected by the trackage rights will be protected pursuant to *Norfolk and Western Ry. Co.—Trackage Rights—BN,* 354 I.C.C. 605 (1978), as modified by *Mendocino Coast Ry., Inc.—Lease and Operate.* 360 I.C.C. 653 (1980).

Dated: August 29, 1989.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

BILLING CODE 7035-01-M

[Finance Docket No. 31521]

North Carolina Railroad Co. Merger Exemption—Atlantic and North Carolina Railroad Co.

North Carolina Railroad Company (NCR) and Atlantic and North Carolina Railroad Company (ANCR) have filed a

---

[1] In Finance Docket No. 31520, *Norfolk and Western Railway Company—Trackage Rights Exemption—Illinois Central Railroad Company*, IC agreed to grant overhead trackage rights to NW over its line between milepost 12, at 95th Street in Chicago, IL, and milepost 110, at Gibson City, IL. There is no connection between 95th Street and NW's Calumet Yard. The purpose of these trackage rights is to provide such a connection.

with the undercover detectives,

Respondent on ten years probation and

evidence contained much hearsay

notice of exemption to merge ANCR into NCR. The merger is expected to be consummated by September 30, 1989.

NCR and ANCR are Class III rail carriers, whose lines and properties are leased to affiliates of Norfolk Southern Corporation. The State of North Carolina owns 75 percent and 74 percent, respectively, of the outstanding common stock of NCR and ANCR.

This is a transaction within a corporate family of the type specifically exempted from prior approval under 49 CFR 1180.2(d)(3).[1] It will not result in adverse changes in service levels, significant operational changes, or a change in the competitive balance with carriers outside the corporate family. The proposed transaction is intended to effect operating efficiencies.

To ensure that all employees who may be affected by the transaction are given the minimum protection afforded under 49 U.S.C. 10505(g)(2) and 49 U.S.C. 11347, the labor conditions set forth in *New York Dock Ry.—Control—Brooklyn Eastern Dist.*, 360 I.C.C. 60 (1979), are imposed.

Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: E. Stephen Stroud, North Carolina Railroad Company, 300 S. Salisbury Street, P.O. Box 1550, Raleigh, NC 27602; and Frank A. Rouse, Atlantic and North Carolina Railroad Company, 131 S. Queen Street, P.O. Box 3557, Kinston, NC 28502.

Decided: August 31, 1989.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

[Docket No. AB–3 (Sub-No. 84)]

Missouri Pacific Railroad Co.; Abandonment of Railroad Between Centralia and Hoyleton in Clinton and Washington Counties, IL; Findings

The Commission has found that the public convenience and necessity permit Missouri Pacific Railroad Company to abandon its approximately 8-mile line of railroad between milepost 15.025 near Centralia and milepost 23.0 at Hoyleton, IL.

A certificate will be issued authorizing abandonment unless within 15 days after this publication the Commission also finds that: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served on the applicant no later than 10 days from publication of the Notice. The following notation must be typed in bold face on the lower left-hand corner of the envelope: **"Rail Section, AB–OFA."** Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

Decided: August 29, 1989

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Andre, Lamboley, and Phillips. Vice Chairman Simmons concurred in the result with a separate expression. Commissioner Lamboley dissented with a separate expression.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 88–90]

Nathan Beckman, D.D.S.; Denial of Application

On September 6, 1988, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to Nathan Beckman, D.D.S., (Respondent) of 2301 Collins Avenue, Mez. Suite 101, Miami Beach, Florida 33139, proposing to deny his application, executed on September 1, 1987, for registration as a practitioner under 21 U.S.C. 823(f). The Order to Show Cause alleged that Respondent's registration would be inconsistent with the public interest.

Respondent requested a hearing on the issues raised by the Order to Show Cause and the matter was docketed before Administrative Law Judge Francis L. Young. Following prehearing procedures, a hearing session was held on January 18, 1989, in Miami, Florida. Due to civil disturbances in the Miami area, the Government's witness was unable to attend the hearing. As a result, Respondent presented his case and another hearing session was scheduled for March 15, 1989, in West Palm Beach, Florida. At that session, the Government presented its case and Respondent was permitted to testify with respect to the evidence presented by the Government.

On April 12, 1989, the Administrative Law Judge issued his opinion and recommended ruling, findings of fact, conclusions of law and decision. Pursuant to 21 CFR 1316.66, on May 2, 1989, the Government filed exceptions to Judge Young's opinion and recommended decision. On May 26, 1989, the Administrative Law Judge transmitted the record of these proceedings, including the Government's exceptions, to the Administrator. The Administrator has considered the record in its entirety and pursuant to 21 CFR 1316.67, hereby issues his final order in this matter based upon findings of fact and conclusions of law as hereinafter set forth.

During 1981, the Metro-Dade Police Department initiated an undercover investigation of an individual who was interested in purchasing large quantities of cocaine. Undercover conversations with the individual in early September 1981, included negotiations for the delivery of one kilogram of cocaine for $43,000. The individual told the undercover detective that his buyer was Respondent, a Miami Beach dentist. The individual further told the detective that Respondent and his partner, a Miami Beach attorney, bought and sold 21 kilograms of cocaine per month. This individual introduced the undercover detectives to a second individual. The second individual told the detectives that he was negotiating with them on behalf of Respondent, who was interested in purchasing large amounts of cocaine. This individual subsequently requested and received from the detective a sample of cocaine (⅛ gram) to give to Respondent. The individual stated that if Respondent liked the cocaine, Respondent would purchase one to five kilograms of it for $43,000 per kilogram. The individual later contacted the undercover detectives and advised them that Respondent liked the quality of cocaine and wanted to talk to the detectives.

On September 11, 1981, the individual took the undercover detectives to Respondent's office in Miami Beach, Florida. Upon entering Respondent's office, the detectives observed Respondent freebasing cocaine with a group of people. During a conversation with the undercover detectives, Respondent acknowledged that he had received and tested the cocaine sample which was given by the undercover detectives to the individual for Respondent. Respondent also stated that he was interested in purchasing three to five kilograms of cocaine from the detectives. During further negotiations, Respondent discussed the price per kilogram of cocaine and admitted to trafficking in approximately 21 kilograms of cocaine per month. Respondent also advised the detectives that he could supply large quantities of Quaaludes. On this occasion, Respondent gave the individual one gram of cocaine to give to the undercover detectives.

On September 15, 1981, the undercover detectives met with Respondent at his office where he gave them another gram of cocaine and negotiated to purchase cocaine from the detectives. Subsequent undercover conversations with Respondent on September 15 and 17, 1981, concerned the delivery of Quaaludes by Respondent through the first individual. On September 18, 1981, undercover detectives met the individual at his residence where the detectives agreed to purchase 50,000 Quaalude tablets for $40,000. The individual delivered approximately 20,000 Quaalude tablets to the detectives stating that the Quaaludes belonged to Respondent. The individual was then arrested.

On September 22, 1981, Respondent was arrested as a result of the Metro-Dade Police Department investigation. At the time of the arrest, officers seized six pounds of Quaalude tablets, approximately one-quarter ounce of cocaine and approximately 270 amphetamines ("black beauties") which were in plain view.

On October 6, 1981, Respondent was charged in a Florida State court with one count of trafficking in methaqualone, one count of possession with intent to sell methaqualone, two counts of delivery of cocaine, one count of conspiracy to traffic in methaqualone and one count of conspiracy to traffic in cocaine. On October 14, 1981, Respondent was also charged with offenses relating to the drugs seized at his office at the time of his arrest. Respondent was specifically charged with one count of trafficking in methaqualone, one count of actual or constructive possesson of cocaine and one count of possession with the intent to sell methaqualone.

Respondent entered a guilty plea to all charges and was adjudged convicted. On January 19, 1982, the Court withheld imposition of sentence, placed Respondent on ten years probation and fined him $10,000. The period of probation was suspended after three years.

On October 12, 1982, the State of Florida, Department of Professional Regulation, Division of Professions, Board of Dentistry, suspended Respondent's license to practice dentistry for five years with the possibility of reinstatement after one year. The Board also ordered that Respondent's DEA registration be suspended for at least five years. On January 25, 1988, Respondent's dental license was reinstated without any restrictions.

Testimony at the hearing indicated that Respondent suffered from attacks of depression from 1975 through 1981. Specifically, Respondent experienced attacks of endogenous depression in 1975 and in 1979 or 1980, which were professionally treated. These attacks of depression were caused by a chemical imbalance in Respondent's brain. During the 1980 attack, Respondent began abusing cocaine; however, Respondent's treating psychiatrist was not aware of Respondent's drug abuse until after his arrest. Respondent's psychiatrist testified that he treated Respondent for his second bout of depression. The psychiatrist stated that Respondent's depression drove him to cocaine abuse. The psychiatrist further stated that he felt that Respondent had made a complete recovery from the 1980 attack of endogenous depression, but stated that there was a possibility that Respondent could experience further attacks of depression. Respondent's psychiatrist testified that Respondent may become depressed because some internal biochemical mechanism goes off. The psychiatrist further stated that this sort of chemical imbalance in the brain does not go away by itself; however, a person with such an imbalance may exist for five to ten years without another attack of depression. Respondent's psychiatrist stated that he did not believe that Respondent would resort to drug abuse as a result of future attacks of depression.

In his opinion, Judge Young states that three aspects of this case call for careful consideration: First, circumstances that led Respondent to become involved with drug abuse and cocaine dealers; second, the extent of his involvement as a dealer; and third, his present situation. The Administrative Law Judge noted that although Respondent was arrested and charged with conspiracy and drug dealing, there was no trial since he pled guilty to the charges against him. Judge Young concluded that the Government's evidence contained much hearsay testimony as to what other persons, apparent drug dealers, said about Respondent's participation with them. The Administrative Law Judge conceded that Respondent seemed to be talking as a member of a group that was dealing in large quantities of drugs; however, Judge Young did not believe that the record supported a conclusion that Respondent was, in fact, a "big-time" and long-time cocaine-world figure. The Administrative Law Judge also conceded that Respondent did indeed agree to sell officers a large quantity of Quaaludes, but, Judge Young stated, the delivery of the Quaalude tablets was actually effected by someone other than Respondent. Judge Young concluded that there is no question that Respondent was guilty of the offenses with which he was charged; however, Judge Young stated that the extent of his involvement was not shown to be as great as the Government implied. The Administrative Law Judge believed that Respondent's involvement in drugs resulted from a physical and mental impairment and that this impairment is not present in Respondent at the present time. The Administrative Law Judge concluded that based on the evidence presented, Respondent can be trusted to responsibly handle controlled substances and recommended that Respondent's application be granted.

The Administrator may deny an application for registration if he determines that such registration would be inconsistent with the public interest. The factors which are considered in determining whether the registration would be in the public interest are enumerated in 21 U.S.C. 823(f). Three of the factors to be considered include the applicant's conviction record under Federal or state laws relating to controlled substances, the applicant's compliance with Federal, state or local laws relating to controlled substances and such other conduct which may threaten the public health and safety. All factors need not be present for the Administrator to deny an application for registration. Instead, the Administrator may accord each factor the weight he deems appropriate in determining the public interest. See, *Neveille H. Williams, D.D.S.*, Docket No. 87–47, 53 FR 23465 (1988); *Paul Stepak, M.D.*, 51 FR 17556 (1986).

In this instance, there is no question that Respondent has been convicted of controlled substance-related felony offenses. Although the illegal activities which resulted in Respondent's conviction fell outside the scope of his professional practice and did not involve the use of his DEA registration, the conviction constitutes a sufficient basis for finding that his registration is not in the public interest. See, *Gordon Acker, M.D.*, Docket No. 86–41, 52 FR 9962 (1987), aff'd *sub nom Acker v. DEA*, No. 87–1160 (D.C. Cir. January 19, 1988); and *Walker L. Whaley, M.D.*, Docket No. 85–12, 51 FR 15556 (1986).

---

[1] Normally, the intercorporate family class exemption would be available only if common control had been previously approved or an exemption from the common control provisions had been previously granted. Here it appears that control over these carriers by the State of North Carolina pre-dated the Interstate Commerce Act and that, therefore, Commission approval for control is not required. Publication of the notice is not a ruling by the Commission on this issue.

Based upon Respondent's felony convictions relating to controlled substances, the facts underlying those convictions and Respondent's history of mental illness, the Administrator concludes that Respondent's registration would not be in the public interest. Respondent was involved in the trafficking of large quantities of cocaine and methaqualone. Respondent admitted to undercover detectives that he was involved in trafficking approximately 21 kilograms of cocaine per month. He negotiated the delivery of a large quantity of methaqualone and actually delivered two grams of cocaine to the undercover detectives. Respondent's methaqualone negotiations with the detectives ultimately resulted in the seizure of a significant quantity of the drug as well as the arrest of Respondent and his associates. During Respondent's arrest, detectives seized large quantities of methaqualone and amphetamines, which in no way, given the quantities, could have been intended for personal use. The Administrator concludes that the evidence supports a finding that Respondent was not only personally abusing controlled substances, but he was also trafficking in significant quantities of drugs.

The Administrator further concludes that Respondent's behavior may very well have been caused by his attack of endogenous depression in the early 1980s; however, the likelihood of a recurrence of such a bout of depression causes the Administrator to conclude that Respondent cannot be trusted with a DEA registration. Respondent's attacks of depression were caused by a chemical imbalance in his brain. Respondent's psychiatrist testified that there is a 30–40% chance that Respondent will suffer another bout of depression in the future. The psychiatrist further testified that this sort of chemical imbalance in the brain does not go away by itself; however, a person with such an imbalance may exist for five to ten years without another recurrence of the depression.

A DEA registration carries with it a serious responsibility for the proper use of controlled substances. The Administrator requires assurance that the registrant will uphold his responsibility to handle controlled substances with sufficient care to protect the public interest. Respondent has yet to provide the Administrator with that degree of assurance. As a result, the Administrator concludes that Respondent's registration is inconsistent with the public interest and his application for registration must be denied.

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823(f), hereby orders that the application for registration, executed by Nathan Beckman, D.D.S., on September 1, 1987, be, and it is, denied. This order is effective September 7, 1989.

Dated: August 30, 1989.

John C. Lawn,

Administrator.

BILLING CODE 4410-09-M

[Docket No. 88–55]

Wayne Nichols, D.V.M.; Revocation of Registration

On April 21, 1988, the Administrator of the Drug Enforcement Administration (DEA) issued an Order to Show Cause and Immediate Suspension of Registration to Wayne Nichols, D.V.M., 3505 Mt. Tabor Road, West Liberty, Ohio (Respondent), proposing to revoke his DEA Certificate of Registration, AN2871451. The statutory predicate for the Order to Show Cause was that Respondent's continued registration with DEA was inconsistent with the public interest as set forth in 21 U.S.C. 823(f) and 824(a)(4). Additionally, citing his preliminary finding that Respondent's continued registration posed an imminent danger to the public health and safety, the Administrator ordered the immediate suspension of the registration pending the outcome of these proceedings. 21 U.S.C. 824(d).

Respondent requested a hearing on the issues raised in the Order to Show Cause in a letter dated May 23, 1988. The matter was placed on the docket of Administrative Law Judge Francis L. Young. Following prehearing procedures, a hearing was held in Columbus, Ohio on February 9 and 10, 1989. On May 11, 1989, the Administrative Law Judge issued his opinion and recommended ruling, findings of fact, conclusions of law and decision. No exceptions were filed. On June 20, 1989, Judge Young transmitted the record of these proceedings to the Administrator of DEA. The Administrator has considered the record in its entirety and, pursuant to 21 CFR 1316.67, hereby enters his final order in this matter based upon findings of fact and conclusions of law as hereinafter set forth.

The Administrative Law Judge found that Respondent was a veterinarian first inspected by DEA in April 1976, because of his unusual purchases of cocaine and codeine sulfate. Investigators noted that Respondent failed to note the date of receipt and amount received on his DEA 222 order forms, which are the documents Respondent is required to keep to record his purchases of Schedule II controlled substances. Respondent also failed to keep any records of dispensing of controlled substances, and failed to note dates of receipt on invoices for Schedule III–V controlled substances. Respondent was verbally advised of these violations by Investigators, and was also sent a registered letter advising him of the violations on August 27, 1976. This letter was signed for by a member of Respondent's household. Respondent did not respond to the letter and was sent another registered letter in November 1976. While Respondent maintains that he responded to this letter, the DEA has no record of any such response.

In 1977, DEA Investigators returned to Respondent's registered location. They found that Respondent continued to fail to note the amount and date of receipt on his DEA 222 order forms; that he failed to produce for Investigators some of the order forms for which he was accountable; that he failed to maintain complete and accurate records of dispensing of controlled substances; and that he failed to take a May 1, 1977, biennial inventory. Respondent was again advised of these violations both verbally and in writing. He was sent a Notice of Hearing dated September 12, 1977, by registered mail. Respondent failed to appear at the hearing and the matter was referred to the Ohio State Board of Veterinary Examiners. The Veterinary Board later advised DEA that the Executive Secretary of the Board had spoken with Respondent, who assured him that he would keep more efficient records.

A review of summaries from DEA's ARCOS System showed that Respondent was one of the largest practitioner purchasers of Dilaudid and cocaine in the United States for the years 1985, 1986, and 1987. In fact, Respondent was the number one practitioner purchaser of cocaine in the country in 1986, purchasing 1,745 grams; and the second largest practitioner purchaser of Dilaudid in the country for 1986, purchasing 14,750 4mg. tablets. DEA Investigators again conducted an investigation of Respondent's dispensing of controlled substances in January 1987. Using a zero balance as the beginning inventory, Investigators audited four controlled substances, including Dilaudid and cocaine for an 18-month period. During the audit period, Respondent received 117.28 ounces of cocaine and 12,437 Dilaudid tablets. Investigators again noted that Respondent failed to maintain proper receiving records and failed to properly dispose of controlled substances. During the audit period Respondent reported a loss of 1,600 Dilaudid tablets which he had stored in an unlocked refrigerator in an unlocked camper parked at a racetrack in Kentucky. These highly abused Schedule II controlled substances were stored in a manner that failed to comply with DEA security regulations and at a location not registered with DEA. At the conclusion of the investigation, the DEA Investigators advised Respondent of the violations noted and provided him with a booklet outlining the DEA regulations applicable to practitioners.

In March 1988, DEA Investigators conducted yet another audit of Respondent's controlled substance records. The Investigators again noted the same recordkeeping violations and conducted an audit of selected controlled substances. Two audits were conducted of Respondent's controlled substance records. One utilized patient records, one utilized Respondent's log book. The results of the audits were widely disparate. While both audits showed significant shortages of Dilaudid 4mg. tablets, one set of records showed an overage of more than 12 ounces of cocaine, the other records showing a shortage of 34 ounces. Respondent had no explanation for these differences. In addition, Respondent noted a loss of 1,200 Dilaudid tablets which he said disintegrated when he spilled chloral hydrate on them. He did not report this loss to DEA as required.

On April 27, 1988, DEA Investigators and Agents returned to Respondent's registered address, executed a search warrant and served Respondent with an Order to Show Cause and Immediate Suspension of Registration. A short audit was conducted using two separate sets of records. There were discrepancies in the audit figures and Respondent continued to keep incomplete records.

The Administrative Law Judge also found that commonly used veterinary references do not list cocaine and Dilaudid as drugs commonly used in veterinary medicine. The American Association of Equine Practitioners and the American Veterinary Medical Association have both issued policy statements discouraging the use of controlled substances such as Dilaudid in veterinary practice. The Administrative Law Judge concluded that the evidence is undisputed that Respondent has continually failed to comply with the recordkeeping and security requirements of the Controlled Substances Act and the implementing regulations. He did so even though he had been specifically advised and notified by DEA that there were deficiencies in his recordkeeping and security practices. Although there was no direct evidence of intentional diversion of the unusually large amounts of cocaine and Dilaudid purchased by Respondent, Respondent's lax security and inadequate records provided the opportunity for diversion to occur. In fact, 1,600 Dilaudid tablets, with a street value of approximately $64,000, were stolen from Respondent's trailer due to his careless and improper storage of the drug. The Administrative Law Judge found that Respondent's continued registration was inconsistent with the public interest in that he continually failed to comply with applicable State, Federal, or local laws relating to controlled substances; and that his conduct threatened the public health and safety by allowing diversion of controlled substances into the illicit traffic. The Administrator adopts the opinion and recommended ruling of the Administrative Law Judge, and concludes that Respondent's DEA Certificate of Registration should be revoked.

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registration, AN2871451, previously issued to Wayne Nichols, D.V.M., be, and it hereby is, revoked. It is further ordered that any pending applications for renewal of that registration be, and they hereby are, denied.

At the time the Order to Show Cause and Immediate Suspension of Registration was served on Respondent, all controlled substances possessed by Respondent under the authority of his then-suspended registration were placed under seal until the time for disposition of this proceeding and taking appeals had elapsed, or until all appeals had been concluded. Accordingly, these controlled substances shall remain under seal until October 10, 1989, or until any appeal of this order has been concluded. At that time, all such controlled substances shall be forfeited to the United States and shall be disposed of pursuant to 21 U.S.C. 881(e).

This order is effective September 7, 1989.

Dated: August 29, 1989.

John C. Lawn,
Administrator.
